## Education Has Choice of Religion Or Scientific Knowledge—Evans

By DICK HOLDREN

Education has the choice of staying on the "first floor," that of scientific knowledge, or rising to the "second floor," that of religion, to live happily in today's world, Dr. Louis Hadley Evans said at the Lift week assembly this morning. Dr. Evans, minister-at-large of the Board of Missions of

the Presbyterian church in the United States, said that education must "make you spell rightly and feel rightly." He said that education today seems more concerned with making you spell rightly than in how you feel.

Only when education spends as much time on the human heart as it does on science will it be working as it should, he said.

Evans illustrated the "move to the second floor" in all phases of life in America. The military forces, law, music, art, literature, and education are becoming more conscious of the spiritual needs of life, he said.

"In the past the military has slugged it out on the first floor but they are beginning to realize the need for more heart," he said.

"America has spiritual obligations to the world even more than military," Evans said.

"All war can do is given an anesthetic to a sick world but we must use a spiritual 'therapeutic' to cure its ills," he said.

"The arts have long been on the second floor, but have all been in the past," he said. He pointed out that one has to go back to the times of Michelangelo, Shakespeare, and Milton for the best in art, literature, and poetry; Bach and Haydn for music.

The art of the past was done on the second floor, while today everything is on the first floor, he said. Only in the field of literature has a "stairway to the second floor" been found, he said.

Evans illustrated this with the fact that in the 1950s the best sellers have been of a spiritual nature, with such books as "The Robe," "The Silver Chalice," and others topping the fiction list. The Bible and Norman Vincent Peale's "Power of Positive Thinking" are tops in non-fiction.

## Council To Discuss Athletic Holiday Plan

A motion to give K-Staters an athletic holiday March 23 if K-State's basketball team advances to the NCAA finals March 23 and 24 in Evanston, Ill., will be considered by the Student Council tonight, Pat Wilkerson, BA Jr, said today.

The motion will be submitted by Wilkerson. If K-State does not play in the NCAA playoffs, the proposed holiday would be added to the Easter vacation, he said.

Also submitted by Wilkerson will be a motion that a 2-man committee be appointed to survey

the parking situation in the Student Union parking lot and submit a plan to control the problem

### Pep Rally Today

A pep rally sending the K-State basketball team off to KU will be at 2:50 this afternoon, head cheerleader Phil Stiles said.

The rally north of the Field House will last until 3 p.m.

An extended class break from 2:45 to 3:05 will enable students having 3 o'clock class to attend, A. L. Pugsley, dean of administration, said.

until the lots are blacktopped and rearranged.

The Council will make appointments to the Ethics and Honors committee, the Orientation committee, and the Alumni Student Relations committee.

## Brotherhood Award To Nigerian Student

Zachaeus Ekwebelem, a graduate student in history and government from Okwelle, Okigwi, Nigeria, West Africa, is the recipient of the second annual B'nai

presented at K-State's Lift week assembly this morning, as a highlight of religious emphasis week on the campus.

The award recognizes the K-State student who has contributed most during the school year to the promotion of brotherhood, good will, and understanding among the various religious, cultural, and ethnic groups in the campus community.

Although a member of the Anglican church, Ekwebelem has participated actively in many of the student religious groups at K-State, including Wesley foundation and Newman club. He is an active member of the YMCA, and has been a member of the Cosmopolitan club for several years. He was vice-president of the organization in 1954-55.

### Today's Lift Week Meeting Schedule

1-4 p.m.—Skeptics' Hour. Guest speakers available for discussions and personal conferences; Rec center.

4 p.m.—Seminar. "Who Is This Bernardine?" Dr. Clifford Lewis, Mr. T. Bowring Woodbury, the Rev. James Christiansen, Mr. Benjamin J. Sage; Rec center.

4 p.m.—Worship Workshop. Set up for all religious coordinators and chaplains of various living groups; J 15.

7 p.m.—YM-YW Meeting. "Facing Life Beyond the Campus," Dr. Walton Cole; Rec center.

Zachaeus Ekwebelem

B'rith Hillel Foundation brotherhood award at K-State.

Ekwebelem's citation noted that "his warm and friendly attitude towards others has given him genuine recognition as a 'reconciler,' a 'peacemaker'... and his total contribution to the field of interfaith and intercultural understanding is truly immeasurable."

The brotherhood award was

## Cats To Meet KU In 'Pressure' Game

Pressure will be on both K-State and KU when the two clubs meet Tuesday night at Lawrence.

The Cats need the victory to gain a clear-cut Big Seven championship, and the Jayhawks must win to stay in contention. It's Phog Allen's last game at home and all the stops will be pulled.

The Cats' loss to Missouri was costly in more than one way. Starter Roy DeWitz broke a bone in his left foot and will be unable to play against KU, according to trainer Porky Morgan.

DeWitz's foot is in a cast and he'll be unavailable to the Wildcats should they go on to the NCAA.

Pachin Vicens received a severe charley-horse but worked out Sunday afternoon and will be able to play against the Jayhawks, Morgan said.

Missouri won the game with 4½ minutes left in the first half when they scored 14 points while holding the Cats pointless.

K-State got off only 22 shots in the first half but hit 10 of them for a 45 per cent average before the halftime break. Missouri had only 40 per cent of their first half shots but hit 16 of 40 to build up a 46-30 margin.

Much of the story of the game can be told in rebound statistics. Missouri grabbed 54 and K-State got only 39.

DeWitz

## Cat Gymnasts Take 5th Place

K-State gymnasts took 5th place in the 10th annual College Invitational gymnastics meet in Boulder, Colo., Saturday.

There were nine teams competing in the meet with the team from the newly formed air force academy on exhibition.

Kansas State sent a four-man team to the meet with Wendell Holt, senior gymnast, scoring 18 points in the meet and winning a 3d place medal in the free-exercise event. Wendell Minckley scored 7½ points in competition on the rings and side horse. Albert Bumpus scored 4 points in the side horse, trampoline, tumbling, and free exercise events.

## Girls Intramurals To Start Today

Two girls' basketball games are scheduled to be played at 5 p.m. today in Nichols 105. Waltheim is to play Delta Delta Delta and Northwest hall is to play Alpha Xi Delta.

The schedule:

Tuesday, Southeast hall vs. Kappa Delta, Chi Omega vs. Alpha Delta Pi.

Wednesday, Van Zile vs. Alpha Xi Delta, Chi Omega vs. Delta Delta Delta.

Thursday, Northwest hall vs. Kappa Kappa Gamma, Kappa Delta vs. Pi Beta Phi.

## Cat Matmen Trim Buffs 15-11 Friday

Wildcat grapplers defeated Colorado 15-11 in their last home match of the season Friday night at Ahearn Field House to run their overall record to 5-3.

Bob Mancuso, 130-pound Wildcat senior grappler, and Roland Alexander, 147-pound senior, won their final home contests Friday. Mancuso remained undefeated by decisioning Alex Montoya, 7-3. Alexander defeated Will Derby, 6-3.

Mancuso

Kyle Mines, 137-pound Wildcat grappler who has been out with a shoulder separation since the Minnesota match January 13, decisioned Larry Fitch, 4-0.

Gary Haller, 177-pound Cat grappler, wrestled to a near-pin 9-0 victory over Mel Warner. Ray Glaze, 167-pound Wildcat matman, decisioned Len Cuttrel, 8-4.

123 pound—Bill Hayden (C) won by forfeit.

130—Bob Mancuso (KS) dec. Alex Montoya, 7-3.

137—Kyle Mines (KS) dec. Larry Fitch, 4-0.

147—Roland Alexander (KS) dec. Will Derby, 6-3.

157—Ron Teubner (C) dec. Dale Blume, 6-0.

167—Ray Glaze (KS) dec. Len Cuttrel, 8-4.

177—Gary Haller (KS) dec. Mel Warner, 9-0.

Heavyweight—Sam Salerno (C) dec. Ellis Rainsberger, 3-2.

You'll be pleased with a Collegian want ad.

## Cat Swimmers Lose to NU

The K-State swimming club was defeated by Nebraska 51½ to 32½ Saturday at Lincoln.

The summaries:

300-yard medley relay—1. Nebraska, Schorr, Thorpe, Gaines, 3:25.8

220-yard freestyle—1. Matsuo (KS) 2. Kenagy (N) 3. Bodensteiner (N) 2:31.2

50-yard freestyle—1. Onuma (KS) 2. Houchen (N) 3. Fitzgerald (KS) 25.2

200-yard individual medley—1. Holeman (N) 2. Thorpe (N) 3. Nolan (KS) 2:41.8

Diving—1. Cotter (N) 2. Gaines (N) 3. Pfuetze (KS)

100-yard freestyle—1. Onuma (KS) 2. Fitzgerald (KS) 3. Tappay (KS) 58.0

200-yard backstroke—1. Schorr (N) 2. Halmón (N) 3. Brown (KS) 2:36.0

440-yard freestyle—1. Bodensteiner (N) 2. Matsuo (KS) 3. Hull (N) 5:30.8

200-yard breaststroke—1. Nolan (KS) 2. Helnesdorfer (N) 3. Sharpe (N) 2:51.8

400-yard freestyle relay—1. Nebraska, Kenagy, Tagny, Hill, and Houchen, 3:54.0.

## KS Trackmen Sixth In Big 7 Indoor Meet

K-State, with a total of 8 points, finished 6th in the Big Seven indoor track meet at Kansas City over the weekend.

The meet was again dominated by the power-packed KU tracksters. The Jayhawks used superior strength in the mile, two mile, and 880 yard run to literally run away with honors for the fifth straight year.

Only bright spots for the Cats were Gene O'Connor and Paul Miller. O'Connor took 4th in the 60-yard low hurdles and 5th in the 60-yard high hurdles. Miller, last year's co-champion in the pole vault, figured in a three-way tie for second with a 13-6 vault.

Bill Nieder of KU was the individual star of the meet. Neider got off a toss of 59-9¼ in the shotput to break his own record of 53-10¾ set last year.

Point standings for the meet were KU with 51 points, Oklahoma 45½, Missouri 36, Colorado 21 5/16, Iowa State 13½, Kansas State 8, and Nebraska 4½.

## THE GRIM AND GRISLY ADVENTURES OF NORBERT SIGAFOOS, AMERICAN

If you squeam, read no further, for today's column is not for the squeamish.

It is a harrowing story which begins in 1946 when Norbert Sigafoos, an ichthyology major from UCLA, went on a field trip with his class to Monterey Bay to study the many fish and crustaceans who make their homes in these waters.

But truth to tell, Norbert was not very interested in ichthyology. What he was interested in was television, which in 1946 was an exciting new infant industry. While his classmates leaned over the rail of the boat, studying the tunny and amberjack which swarmed below, Norbert just leaned and thought about television. Thus preoccupied, he fell overboard and, all unnoticed, was washed far out to sea.

A strong swimmer, Norbert, after 43 days, sighted land—a tiny atoll, far away from the normal sea lanes. Tired but happy, he clambered ashore. Being a college man, he was, of course, fearless, resourceful, and clean in mind, body, and spirit. He built himself a snug shelter, fashioned traps for animals, wove fishing lines, and arranged day and night signals to attract any passing ships.

Though nine years went by, Norbert never abandoned hope of being rescued. At long last, his patience was rewarded. On October 14, 1955, he was picked up by the Portuguese tanker, *Molly O'Day*.

Ralph Gomez, the ship's captain, greeted Norbert with a torrent of Portuguese. "Do you speak English?" Norbert asked. "A little," said Ralph Gomez, which was no less than the truth. He did speak a little English: two words. They were "a" and "little."

But, withal, he was a good hearted man, and he gave Norbert fresh clothes, a razor, and a cheroot.

"No, thank you," said Norbert to the cigar. "I'm a Philip Morris man myself. Have you ever smoked Philip Morris?"

"A little," said Ralph Gomez.

"Then you know what I mean when I talk about their yummy goodness, their delicately reared tobaccos, their soothing, consoling, uplifting, unflinching gentleness—pack after pack after pack," said Norbert.

"A little," said Ralph Gomez.

"I suppose you're wondering," said Norbert, "how I kept my sanity during all those years on the island."

"A little," said Ralph Gomez.

"Well, I'll tell you," said Norbert. "I've been thinking about television because that's what I want to go into when I get back. For nine years I've been sitting on that island thinking up brand new shows for television. And I've got some marvelous new ideas! I've got one terrific idea for a show where a panel of experts tries to guess people's occupations. 'What's My Line?' I call it. They I've got one, a real doozy, where you pull somebody unexpectedly out of the studio audience and do his whole life story. 'This Is Your Life,' I call it. But that's not all! I thought up a real gut-buster of an idea for a quiz show where you give away not \$64, not \$6400, but—get this, Ralph Gomez—\$64,000! Wow, I can hardly wait to get back to the States and sell these fabulous ideas to the networks!"

There is, fortunately, a happy ending to this chilling tale. Norbert never had to suffer the bitter disappointment of learning that all his ideas had long since been thought of by other people. Why not? Because the Portuguese tanker, *Molly O'Day*, struck a reef the day after picking up Norbert and, I am gratified to report, went down with all hands.

**Racial Decisions Today**  
Washington — The Supreme

Court may hand down decisions today in racial segregation and national security cases which it has had under advisement many weeks.

Heading the segregation cases is a test of state laws that requires separation of Negroes and whites on intra-state buses.

Two other race cases are concerned with the admission of Negroes to the Florida university law school and North Carolina university's undergraduate school.

## Buses To Leave At 4:15 for KU

Buses to take pep club members to the KU game at Lawrence will leave at 4:15 p.m. Tuesday in front of Northwest hall, Marylyn McCready, Purple Pepsters president, said today.

## 5,675 K-Staters This Semester

Late enrollees have brought the K-State spring semester registration to 5,675 students, E. M. Gerritz, director of admissions and registrar, reported today.

This represents a gain of 560 students, or nearly 10 per cent, over the number of students enrolled for the 1955 spring semester.

Gerritz said that although 257 degrees were granted in January, there are only 300 fewer students now enrolled than were enrolled for the first semester.

A drop in enrollment of from 6-8 per cent has been normal from the fall to the spring semester in recent years. However, the drop this year was only about 5 per cent.

## Klub Kolumn

# Veterans To Hear About KSC Politics

Charles Goetzinger of the speech department will speak about campus politics at the K-State Veteran's organization meeting today at 7:30 p.m.

President Calvin Glenn urges all veterans to bring their blood types to the meeting. The veteran's organization is filing blood types of all members with St. Mary and Riley County hospitals. Coffee and cigarettes will be served during the meeting, Glenn said.

## Wampus Cats

Wampus Cats, men's pep organization, will have a smoker tonight at 7:30 in T 209 for anyone interested in joining the organization, according to Gene Porch, Hst Jr, president. Bob Al-

exander, Union program director, will be the guest speaker.

## Geology Seminar

Dr. Austvaldur Eydol, lecturer and geographer at the National University of Iceland, will be guest speaker at the geology and geography seminar today at 4 p.m.

## Promenaders

Promenaders will meet in Engineering Lecture hall at 7:30 p.m. today.

# Lame Cats To KU for Vital Tilt

## Fischer May Start Game

The injury-riddled K-State Wildcats will be trying to break a 7-game drought when they go after a win over the KU Jayhawks at Lawrence tonight.

K-State goes into this game minus the services of hustling Roy Dewitz, who suffered a broken toe in the wild action of the Missouri game.

Coach Tex Winter will probably call on Larry Fischer to fill the gap left by Dewitz's injury.

Pachin Vicens, 5-9 playmaker, is handicapped by a charley-horse picked up in the same game, but

Closing hours for girls going to the KU game will be 12 midnight, according to Dean of Women Helen Moore.

will probably see action against the Jayhawks.

The last 7 times out against the crimson and blue K-State has come home on the short end of the score.

K-State has not beaten the Hawks since the finals of the 1952 Big Seven tournament when the Cats registered a 93-87 verdict over KU.

Tonight's clash with their arch rivals can assure K-State of undisputed first place in the conference and an NCAA regional tournament berth or it can make (Continued on page 4)

## K-State Fans Cheer Cats

"Beat KU" was the theme as 300 K-Staters gave the Wildcat basketball team a cheering sendoff to Lawrence yesterday. The students gathered in front of Ahearn gymnasium at 2:50 p.m. before the Wildcats boarded a bus for Lawrence.

Coaches Tex Winter and Howie Shannon and Roy DeWitz, Cat guard injured in the Missouri fray Saturday spoke to the crowd.

Winter expressed appreciation from the team for the send off and said, "We're going down to Lawrence to play ball. We're sorry we couldn't have done better against Missouri but I think it will be a bigger thrill for the students and the team to bring the conference crown back from KU."

## Council Okays Holiday Tomorrow if Cats Win

The Student Council voted last night to given students an athletic holiday tomorrow if K-State wins the game with KU tonight.

Pat Wilkerson originally had moved to give Staters the holiday March 23 if K-State's basketball team advanced to the NCAA finals March 23 and 24 in Evanston, Ill. That motion may be brought before the Council again if K-State doesn't win tonight.

Warren Nichols reported that the constitutional amendment to allow primary elections has been accepted. The Vet Medicine council passed the amendment yesterday. It previously had been proposed by the Student Council, and approved by school councils from Arts and Sciences, Home Economics, and Agriculture.

The amendment provides that any student wishing to run for Student Council, student-body president, or Student Board of Publications will submit a petition at least 10 days before the primary elections, noting on his petition which party ticket he wishes to run on, or stating that

he wishes to be an independent candidate.

Primary ballots will be printed for each school, listing all of each party's candidates on separate party ballots. Independent candidates will be carried through the primary and listed on the school's ballot in the general election. Any student who loses in the primaries cannot file to run again in the general election.

Other Council actions:

1. The Council passed a motion by Gary Rogers asking that the Student Council request \$1,600 from the apportionment board for repair of the letters on K-Hill.

2. The Council defeated a motion by Pat Wilkerson that would have allowed for establishment of a two-man committee to study the parking problems in the Student Union parking lot. The committee would have submitted a plan to control the problem until the lot is blacktopped and rearranged.

3. The Council voted to accept an invitation to participate in the Berkeley (Calif.) Chamber of Commerce football queen contest.

4. The Council sent a request

to the Student Board of Publications to handle publication of the K-Book and the Student Directory.

5. The Council heard a report from Prof. Luther Leavengood concerning the Manhattan Artist series. Leavengood requested that the Council help create interest in the Series, and perhaps give some financial aid to it. He gave tickets to the Council members for the next program in the series.

6. The Council appointed Jim Windle and Judy Crawford to the Student-Alumni Relations committee.

7. Frank Bergman, head of the Manhattan Red Cross drive, requested that the Council plan a Red Cross drive for the campus. His request is to be turned over to Bob Balzerick, head of the Student Drives committee.

8. The Council sent a recommendation to the commencement committee that summer commencement be eliminated.

9. The Council voted to meet at 7 p.m. next week in order to finish in time to attend the Artist Series. The Council will meet in the new Union.

## IFC Proposal May Outlaw Hell Week

By PAT ROBERTS

A resolution proposing to outlaw "hell week" in all K-State fraternities was brought before Interfraternity Council last night.

The resolution was developed by a committee that previously met with President McCain to iron out differences of opinion between the administration and the Council.

The resolution read: "Any member fraternity of the Interfraternity Council at Kansas State College shall not indulge in 'Hell Week' or in any activities which will (1) have an adverse effect on the worth of the individual, be it mentally, physically, or morally degrading to his character; (2) hinder the individual's participation in any activities, academic or extracurricular, at Kansas State College."

Under the proposed resolution, IFC could recommend the maximum punishment of expulsion from the Council or any other prohibitory measure it thought necessary. This action would be taken if a member fraternity violated the resolution in any form.

The IFC representatives took the proposal back to the various chapters for approval. If three-fourths of the Council approves the resolution, it will become part of the IFC constitution.

The action taken by the Council resulted from concern that parents and groups have shown over "hell-week" activities. The recent death of an MIT student resulting from "hell-week" activities made some sort of action necessary, Vergil Wright, president of the Council, said.

Two weeks ago, a resolution was drawn up and presented by V. D. Foltz, faculty advisor for the Council, that outlawed "hell-week."

The Council then appointed a committee to meet with President McCain to iron out any difficulties between the Council and the administration. The committee drew up the resolution and presented it to the Council.

At the meeting last night, Dean Wunderlich pointed out that the words "hell week" were not in the original draft that the committee presented.

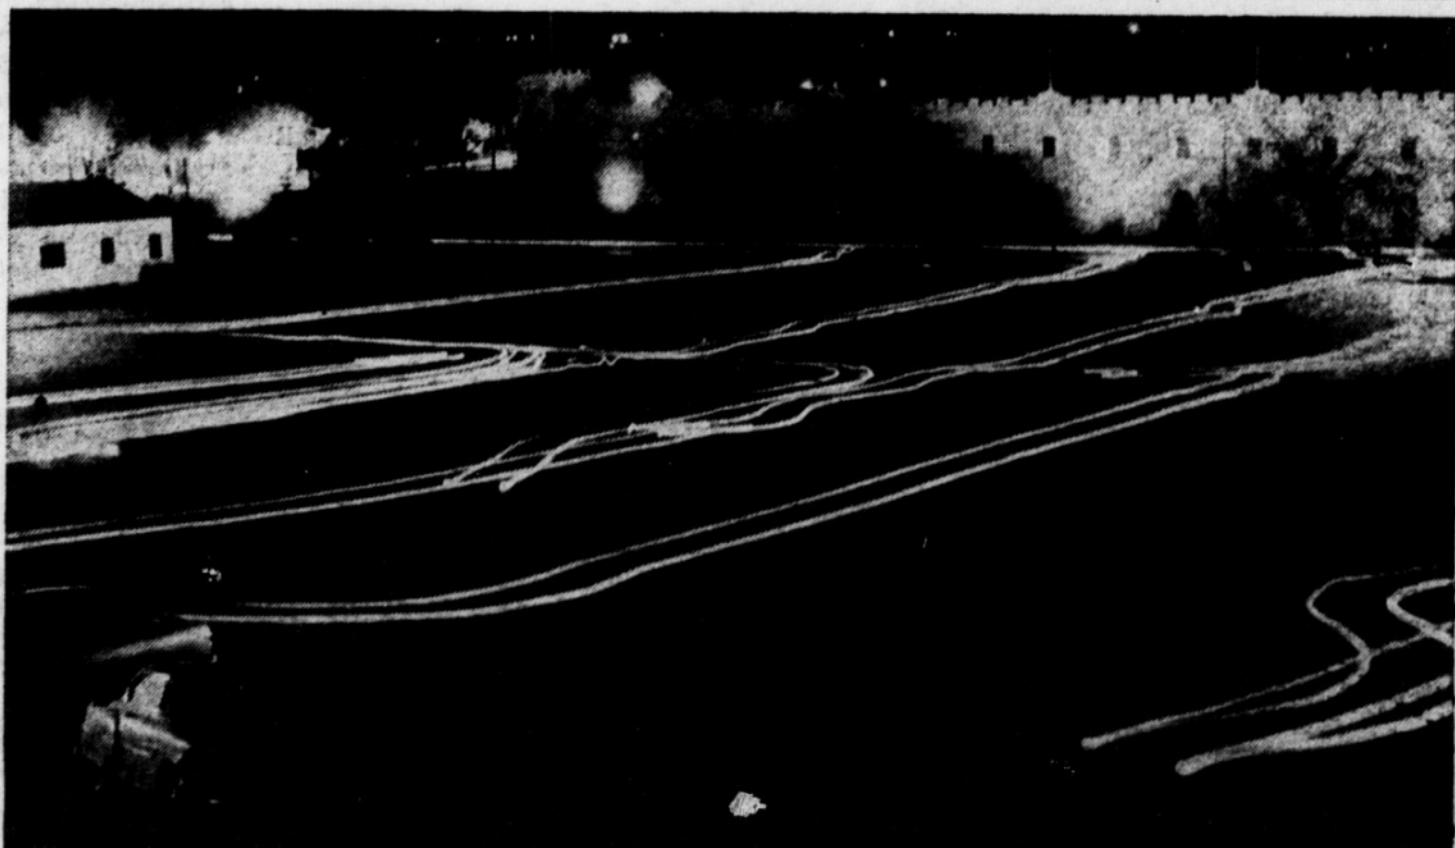

Wunderlich said the College administration recommended that "hell week" be included in the proposal. George Yapp, MT Sr, proposed an amendment that included the words "hell week." It was included.

"Since the MIT incident, we have been receiving many phone calls from concerned individuals who want to know what is being done about 'hell week'," Wunderlich said.

He stressed that the administration would like to have the Interfraternity Council stand as a spokesman for the fraternity system at K-State and say that there definitely is no "hell week" here.

"The administration believes that the Council can work out its own laws and governing system," he added.

The members of the Council will vote on the proposal at their next regularly scheduled meeting, March 19.

Collegian photo by Gary Haynes

**STANDARD PROCEDURE** for finding a parking place in the parking lot is demonstrated in this time exposure. Joe Student tries to find a place at 7:45 a.m. After going through all the available lots, encountering curbs, blocked drives, etc., he gives up and goes back to the first lot. By this time (8:20 a.m.) there is room to park on a 45-degree slope.

Court may hand down decisions today in racial segregation and national security cases which it has had under advisement many weeks.

Heading the segregation cases is a test of state laws that requires separation of Negroes and whites on intra-state buses.

Two other race cases are concerned with the admission of Negroes to the Florida university law school and North Carolina university's undergraduate school.

## Buses To Leave At 4:15 for KU

Buses to take pep club members to the KU game at Lawrence will leave at 4:15 p.m. Tuesday in front of Northwest hall, Marylyn McCready, Purple Pepsters president, said today.

## 5,675 K-Staters This Semester

Late enrollees have brought the K-State spring semester registration to 5,675 students, E. M. Gerritz, director of admissions and registrar, reported today.

This represents a gain of 560 students, or nearly 10 per cent, over the number of students enrolled for the 1955 spring semester.

Gerritz said that although 257 degrees were granted in January, there are only 300 fewer students now enrolled than were enrolled for the first semester.

A drop in enrollment of from 6-8 per cent has been normal from the fall to the spring semester in recent years. However, the drop this year was only about 5 per cent.

## Klub Kolumn

# Veterans To Hear About KSC Politics

Charles Goetzinger of the speech department will speak about campus politics at the K-State Veteran's organization meeting today at 7:30 p.m.

President Calvin Glenn urges all veterans to bring their blood types to the meeting. The veteran's organization is filing blood types of all members with St. Mary and Riley County hospitals. Coffee and cigarettes will be served during the meeting, Glenn said.

## Wampus Cats

Wampus Cats, men's pep organization, will have a smoker tonight at 7:30 in T 209 for anyone interested in joining the organization, according to Gene Porch, Hst Jr, president. Bob Al-

exander, Union program director, will be the guest speaker.

## Geology Seminar

Dr. Austvaldur Eydol, lecturer and geographer at the National University of Iceland, will be guest speaker at the geology and geography seminar today at 4 p.m.

## Promenaders

Promenaders will meet in Engineering Lecture hall at 7:30 p.m. today.

# Lame Cats To KU for Vital Tilt

## Fischer May Start Game

The injury-riddled K-State Wildcats will be trying to break a 7-game drought when they go after a win over the KU Jayhawks at Lawrence tonight.

K-State goes into this game minus the services of hustling Roy Dewitz, who suffered a broken toe in the wild action of the Missouri game.

Coach Tex Winter will probably call on Larry Fischer to fill the gap left by Dewitz's injury.

Pachin Vicens, 5-9 playmaker, is handicapped by a charley-horse picked up in the same game, but

Closing hours for girls going to the KU game will be 12 midnight, according to Dean of Women Helen Moore.

will probably see action against the Jayhawks.

The last 7 times out against the crimson and blue K-State has come home on the short end of the score.

K-State has not beaten the Hawks since the finals of the 1952 Big Seven tournament when the Cats registered a 93-87 verdict over KU.

Tonight's clash with their arch rivals can assure K-State of undisputed first place in the conference and an NCAA regional tournament berth or it can make (Continued on page 4)

## K-State Fans Cheer Cats

"Beat KU" was the theme as 300 K-Staters gave the Wildcat basketball team a cheering sendoff to Lawrence yesterday. The students gathered in front of Ahearn gymnasium at 2:50 p.m. before the Wildcats boarded a bus for Lawrence.

Coaches Tex Winter and Howie Shannon and Roy DeWitz, Cat guard injured in the Missouri fray Saturday spoke to the crowd.

Winter expressed appreciation from the team for the send off and said, "We're going down to Lawrence to play ball. We're sorry we couldn't have done better against Missouri but I think it will be a bigger thrill for the students and the team to bring the conference crown back from KU."

NUMBER 97

## Council Okays Holiday Tomorrow if Cats Win

The Student Council voted last night to given students an athletic holiday tomorrow if K-State wins the game with KU tonight.

Pat Wilkerson originally had moved to give Staters the holiday March 23 if K-State's basketball team advanced to the NCAA finals March 23 and 24 in Evanston, Ill. That motion may be brought before the Council again if K-State doesn't win tonight.

Warren Nichols reported that the constitutional amendment to allow primary elections has been accepted. The Vet Medicine council passed the amendment yesterday. It previously had been proposed by the Student Council, and approved by school councils from Arts and Sciences, Home Economics, and Agriculture.

The amendment provides that any student wishing to run for Student Council, student-body president, or Student Board of Publications will submit a petition at least 10 days before the primary elections, noting on his petition which party ticket he wishes to run on, or stating that

he wishes to be an independent candidate.

Primary ballots will be printed for each school, listing all of each party's candidates on separate party ballots. Independent candidates will be carried through the primary and listed on the school's ballot in the general election. Any student who loses in the primaries cannot file to run again in the general election.

Other Council actions:

1. The Council passed a motion by Gary Rogers asking that the Student Council request \$1,600 from the apportionment board for repair of the letters on K-Hill.

2. The Council defeated a motion by Pat Wilkerson that would have allowed for establishment of a two-man committee to study the parking problems in the Student Union parking lot. The committee would have submitted a plan to control the problem until the lot is blacktopped and rearranged.

3. The Council voted to accept an invitation to participate in the Berkeley (Calif.) Chamber of Commerce football queen contest.

4. The Council sent a request

to the Student Board of Publications to handle publication of the K-Book and the Student Directory.

5. The Council heard a report from Prof. Luther Leavengood concerning the Manhattan Artist series. Leavengood requested that the Council help create interest in the Series, and perhaps give some financial aid to it. He gave tickets to the Council members for the next program in the series.

6. The Council appointed Jim Windle and Judy Crawford to the Student-Alumni Relations committee.

7. Frank Bergman, head of the Manhattan Red Cross drive, requested that the Council plan a Red Cross drive for the campus. His request is to be turned over to Bob Balzerick, head of the Student Drives committee.

8. The Council sent a recommendation to the commencement committee that summer commencement be eliminated.

9. The Council voted to meet at 7 p.m. next week in order to finish in time to attend the Artist Series. The Council will meet in the new Union.

## IFC Proposal May Outlaw Hell Week

By PAT ROBERTS

A resolution proposing to outlaw "hell week" in all K-State fraternities was brought before Interfraternity Council last night.

The resolution was developed by a committee that previously met with President McCain to iron out differences of opinion between the administration and the Council.

The resolution read: "Any member fraternity of the Interfraternity Council at Kansas State College shall not indulge in 'Hell Week' or in any activities which will (1) have an adverse effect on the worth of the individual, be it mentally, physically, or morally degrading to his character; (2) hinder the individual's participation in any activities, academic or extracurricular, at Kansas State College."

Under the proposed resolution, IFC could recommend the maximum punishment of expulsion from the Council or any other prohibitory measure it thought necessary. This action would be taken if a member fraternity violated the resolution in any form.

The IFC representatives took the proposal back to the various chapters for approval. If three-fourths of the Council approves the resolution, it will become part of the IFC constitution.

The action taken by the Council resulted from concern that parents and groups have shown over "hell-week" activities. The recent death of an MIT student resulting from "hell-week" activities made some sort of action necessary, Vergil Wright, president of the Council, said.

Two weeks ago, a resolution was drawn up and presented by V. D. Foltz, faculty advisor for the Council, that outlawed "hell-week."

The Council then appointed a committee to meet with President McCain to iron out any difficulties between the Council and the administration. The committee drew up the resolution and presented it to the Council.

At the meeting last night, Dean Wunderlich pointed out that the words "hell week" were not in the original draft that the committee presented.

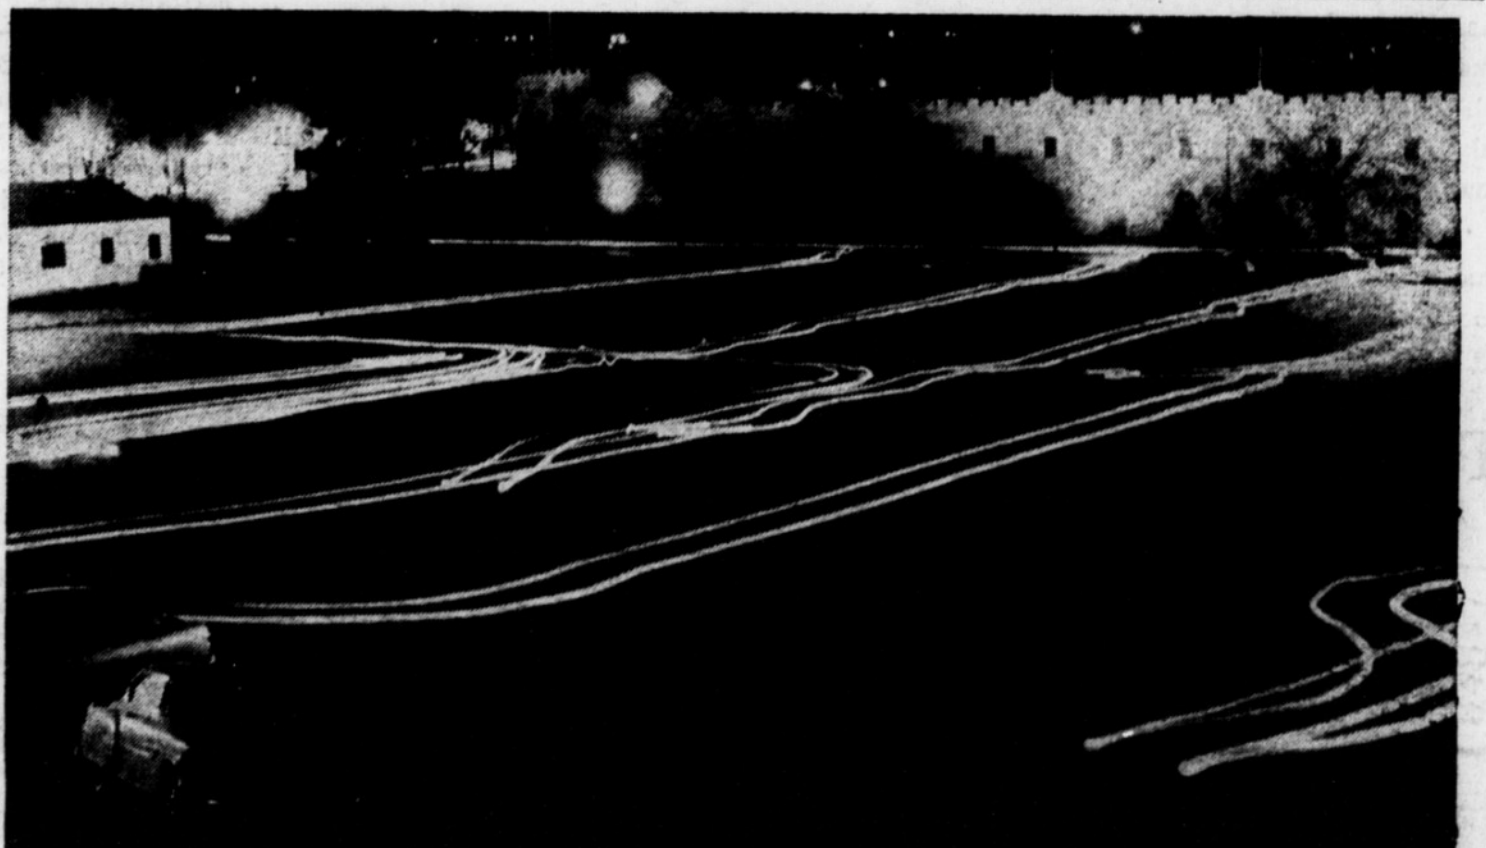

Wunderlich said the College administration recommended that "hell week" be included in the proposal. George Yapp, MT Sr, proposed an amendment that included the words "hell week." It was included.

"Since the MIT incident, we have been receiving many phone calls from concerned individuals who want to know what is being done about 'hell week'," Wunderlich said.

He stressed that the administration would like to have the Interfraternity Council stand as a spokesman for the fraternity system at K-State and say that there definitely is no "hell week" here.

"The administration believes that the Council can work out its own laws and governing system," he added.

The members of the Council will vote on the proposal at their next regularly scheduled meeting, March 19.

Collegian photo by Gary Haynes

**STANDARD PROCEDURE** for finding a parking place in the parking lot is demonstrated in this time exposure. Joe Student tries to find a place at 7:45 a.m. After going through all the available lots, encountering curbs, blocked drives, etc., he gives up and goes back to the first lot. By this time (8:20 a.m.) there is room to park on a 45-degree slope.

## Foreign Student Says

# Philippines in No Danger of 'Succumbing to Communism'

(This is the second in a series about foreign students attending K-State.)

By PAT ROBERTS

THE PHILIPPINES are in absolutely no danger of succumbing to Communism, according to Tony Ordoveza, AH Gr, a foreign student from Manila, Philippine Islands.

"Our government is known to be one of the strongest and most democratic in the East," he said. The population is 85 per cent Catholic and the church is against Communism too, he said.

ORDOVEZA CAME to K-State to study beef cattle production. His father was in the cattle business before the war and is now reentering the field. Tony plans to return to the Philippines and aid his father when he finishes his education at K-State.

"I came to K-State because of the state's (Kansas) reputation in the beef business," he explained.

The livestock industry in the Philippines is just beginning to take hold. Agriculture always has been a predominate industry. The government does all they can for the farmer and through aid such as the Foreign Operations administration in the United States, the country is increasing its agricultural production all of the time, he said.

SOCIAL CUSTOMS seem to be the main difference between the Philippines and the United States, Tony said. Spanish customs still prevail although the Islands are becoming familiar with the American ways more and more.

"In my country one has to have a chaperone on every date," he said. We go to the same places, the movies and

dancing, on dates. A girl here at the age of 15 usually has dates. Back home she is considered a child in the family, Tony said.

"YOU ARE MORE punctual here than we are in the Philippines. At home when we say 7 p.m. everyone usually shows up at 8. It sure is different here," he said.

"I am a little confused by the slang that you have over here. However, we have our own slang that would probably confuse a lot of people here," he said.

"I understand how the white people feel," said Tony when asked how he felt about the racial problem in America.

"PEOPLE NATURALLY want to be with their own kind," he said. Tony believes people are equal in every respect but that the segregation problem will take time and patience. "You can't force anything on the people," he said.

The people at K-State are nice and friendly. Instructors are perhaps a bit more practical than instructors back home where he graduated from the University of Philippines last year, he said.

"I like to hunt, ice skate, and just talk to people best," Tony said when asked what his hobbies were. He learned to ice skate at Cornell university when visiting his brother who is a student there.

"I LIKE FOOTBALL games very much. I went to one game and now I plan to see all I can," he said. Tony was on the University of Philippines soccer team. Soccer is comparable to football in the United States.

The Philippines think very highly of America. My country greatly appreciates the aid the U.S. has provided, he said.

## Good Moves

# 'Hell Week' Hits Skids; Primary Elections Set

INTERFRATERNITY Council proposes to outlaw "hell week" among K-State fraternities. Few would deny that this is a reasonable proposal, but it does entail some problems.

First of all, the resolution contains some vague statements that will have to be pinpointed before fair enforcement will be possible. The resolution says:

"Any member fraternity of the Interfraternity Council at K-State shall not indulge in 'hell week' or in any activities which will (1) have an adverse effect on the worth of the individual, be it mentally, physically, or morally degrading to his character; (2) hinder the individual's participation in any activities, academic or extracurricular, at K-State."

First of all, "hell week" needs to be defined. Also, when it is stated that one cannot indulge in activities that will have an "adverse effect" on the worth of the individual, the IFC has a lot of leeway in its decisions as to "adverse effects." Also, what is "degrading" needs to be defined.

IF THE PROPOSED resolution is okayed by three-fourths of the fraternities, and goes into effect, the IFC will have plenty of power to enforce its decisions. As it now stands, the IFC could expel a frat from IFC, or could enforce any prohibitory measure it thinks necessary.

Interfraternity Council needs as much power as it can get, and needs to know exactly where it stands on each possible issue. "Hell week" is a sad state of affairs, and strong action is needed to combat it.

Now all that remains is for the fra-

ternities to okay the IFC resolution. And, from answers most K-State frats gave to a Collegian inquiring-reporter story on "hell week," they don't like such a week and will be eager to officially do away with it.

Another group on campus seems to be moving in the direction of saner and more democratic campus life.

AN AMENDMENT to the constitution to allow primary elections has been accepted by the councils of the various schools. The amendment was proposed by Student Council and goes into effect now that councils of the schools of Arts and Sciences, Home Economics, Agriculture, and Veterinary Medicine have accepted it.

The primary election will do away with a ridiculous situation in which two candidates for each elective position were weeded out of any number of applicants by the councils of the various schools.

Of course, all is not as it might be. The Student Council last night turned down a proposed committee to plan control of traffic in the Union parking lot. The proposed committee would have worked out a method for controlling parking in the lot until it is blacktopped and rearranged next August.

Why the proposal was turned down is hard to understand.

However, it should be noted that the Council thought it wise to request \$1,600 from the apportionment board for repair of the letters on K-Hill.

—Darrel Miller

## Over the Ivy Line

# Iowa State Realizes Needs of Students, Considers Hiring a Campus Psychiatrist

By Ann Weathers

PRAISE BE TO Iowa State college! They have finally realized what it is the average college student needs more than anything else. Yea, more even than a new Student Union. More than a good five cent ladies cigar. The average college student needs a good, full-time campus psychiatrist!

Iowa State is now considering the need for such a man. As one doctor said, "No college that has a psychiatrist would want to try to get along without one."

KANSAS STATE would do well to get rid of her "classroom psychiatrists" and get one who knows what he's talking about.

Volume II—How To Get Along with Your Professor:

Today, we wish to point out a few striking types of college profs. You are sure to come in contact with some of these. Kansas State has at least one of these types in each department.

● THE EARLY BIRD—the first to arrive in the classroom. He has nothing to do for 10 minutes but carefully copy his lecture outline on the board in perfect penmanship and wait, nervously pacing the floor, for class to begin. He has an

unmistakable tendency to go to pieces under impromptu questioning.

● THE LATE BIRD—hurries into the classroom less prepared than the students, misses class completely several times, and justifies this by assigning movies and plays as outside assignments.

● THE TEXTBOOK OUTLINER—relies on a simplified outline version on the assigned text for the entirety of his lecture, and is of necessity rather boring—rarely giving or repeating an original thought.

● MR. SKIPPER—who easily becomes mixed up and confused when the student asks an intelligent question. When it gets too bad, he can always be counted on to say, "Well, it isn't too important. You can work it out yourself if you're interested."

● MR. BUT I'VE JUST BEGUN—who finally gets down to the subject when the bell rings for dismissal.

(To be continued)

I ALWAYS HAD a feeling this might happen:

The staff of the student newspaper at Bowling Green conducted a reader interest survey to discover whose features were best read. It wasn't sports, gossip, movies, or news. Max Shulman won the poll, hands down.

By Walt Kelly

"SEE YOU IN LAWRENCE." Coach Tex Winter (right) hands tickets to the KU game tonight to guard Roy DeWitz (on crutches), who will be sidelined by a fractured bone in his foot. DeWitz was at the pep rally yesterday to see the Wildcats off. A Cat win tonight would cinch the Big Seven and give K-Staters an athletic holiday tomorrow.

## 'Bernardine' Will Climax Lift Week

A vocation is more than a job, it has to do with life too, according to Warren Rempel, YMCA executive secretary.

"Your Work, Your Life and Bernardine," is the Lift week theme. Work consists of what you do to make a living and make things more comfortable for your family, life is how you do your work and what attitude you have toward it.

### Thief's Plans Gum Up

Fremont, Calif. (U.P.)—This newly-incorporated Alameda county town recorded its first "major crime" when a small boy entered a store with a gun that "looked very real" and demanded bubble gum.

When the proprietor reached for a telephone, the pint-sized bandit ripped the phone cord from the wall and fled empty-handed.

"Bernardine," a play to be presented by K-State Players, emphasizes the importance of the theme. The plot involves students who had no worries or cares about their future lives. They do not care what type of work they do, their only interest is to find a woman called Bernardine. The play will be presented Wednesday, Friday and Saturday nights in the College auditorium at 8:15 p.m.

In choosing speakers for Lift week careful thought was given to who would be qualified to speak to students about vocations. The theme is an "open ended question" that deals with finding a mate, starting a family and marriage in general according to Rempel.

"A theme was chosen for Lift week to direct speakers' efforts, and seminars in a general direction and make it more coherent," Rempel said.

### World News Briefs

# Saudi Arabia, Egypt, Syria Meet in 'War or Peace' Talk

Compiled from United Press  
By HARRY MACHIN, Jr.

Jerusalem (U.P.)—King Saud of Saudi Arabia flew today to Cairo to join the leaders of Egypt and Syria in a strategy conference that could determine whether there is to be peace or war in the Middle East.

A series of clashes between Israeli and Egyptian guns and border patrols and several incidents involving Israeli planes and Egyptian gun batteries heightened the Middle East crisis that again threatened to explode into open warfare.

King Saud joined Egyptian Premier Gamal Abdel Nasser and Syrian President Shukry El Kuwaty in conference aimed at wooing Jordan away from the last traces of British influence and to

consolidate Arab strength in event of war.

The three states have signed a pact pledging to go to war against Israel if Israel commits "aggression" against anyone.

### Indicted for Murder

Sumner, Miss.—A white man charged with murdering a "highly respected" Negro will be arraigned tomorrow in the courtroom in which the Emmett Till "wolf whistle murder case" was tried.

A Tallahatchie county grand jury yesterday indicted Elmer Kimbell, 34-year-old cotton gin operator, for the murder of Clinton Melton last December 3, at nearby Glendora, Miss.

Kimbell will be arraigned before circuit Judge Curtis Swango who conducted the trial of two white men who were acquitted of

murdering Emmett Till, 14-year-old Negro boy from Chicago.

### Tories Want Showdown

London (U.P.)—Rebels within Prime Minister Anthony Eden's own conservative party demanded today that he stop "pussyfooting" and force a showdown now with the Middle East Arabs.

A member of the group of some 40 Tory rebels in the House of Commons said they wanted action by this week end and suggested a British deal with Israel as a bargaining point—arms and troops to Israel if the Arabs refuse to play ball.

### Ocean-going Cinerama?

Washington—The U.S. Information agency has asked Congress for money to convert an obsolete navy carrier into a globe-girdling cinerama theater.

The ship also would carry special exhibits to portray how American capitalism has benefited U.S. citizens through the years.

The idea was recently submitted to the House Appropriations committee with a request for \$3,790,500 to get the project underway.

### Quite a Charge Account

Clint, Mich. (U.P.)—An enraged motorist subdued a local man and held him for police when the man hit the motorist's car after already damaging three others.

Police charged the man with being drunk in a public place, driving without a license, suspicion of felonious assault, suspicion of carrying a concealed weapon, suspicion of being a fugitive, leaving the scene of a property-damage accident, and driving under the influence of liquor.

## Fischer To Fill DeWitz's Spot For KU Game

(Continued from page 1)  
possible a 3 or 4-way tie for first place.

Iowa State, Missouri, and Kansas all have a mathematical chance of tying the Cats for the title.

If the Cats lose, the number of teams that will tie for the championship may not be determined until Saturday night when Kansas plays Colorado.

If a 3 or 4-way tie should result, a drawing will be held to determine the club to represent the Big Seven in the regional tournament at Lawrence, March 16-17.

In the event of a 2-way tie, a drawing will still be held unless one team has defeated the other twice in league play this year.

Perhaps the biggest hurdle the Cats have to face is how to stop the Jayhawks new-found scoring ace Maurice King.

The 6-2 junior recently ripped the nets for 21 points in the Jayhawks 54-44 win over Colorado at Lawrence. This lifted him over the 300 point mark for the season and into 11th place on the KU all-time scoring list.

King seems to be taking the place of Dallas Dobbs, who recently came out second best in a struggle with eligibility.

Eddie Dater, Garden City Junior college transfer, has been hitting his stride through the last 5 games and is expected to give able assistance to King.

Lew Johnson, Gene Elstun, and John Parker round out the Jayhawks' starting five.

In the previous clash between these clubs KU trounced the Cats 91-86. The 91 points Kansas racked up was the highest score a Jayhawk team has ever made against K-State. The 52 points scored by each team in the second half were the most scored in a single half on the Ahearn Field House planks.

Indications are that the Cats, whom Pachin Vicens recently termed to "give 101 per cent" their last 2 games, will be forced to put forth maximum effort if they are to beat their arch rivals and win their first championship since 1951.

The starting lineups:

Kansas State	F (6-3) Elstun	KU
Abbott (6-3½)	F (6-3) Elstun	
Fischer (6-4)	F (6-2) King	
Parr (6-9)	C (6-6½) Johnson	
Vicens (5-9)	G (6-2) Dater	
Schneider (6-3)	G (5-11) Parker	

Big Seven standings:

Team	W	L	Pct.
Kansas State	8	3	.727
Missouri	8	4	.667
Iowa State	7	4	.636
Kansas	6	4	.600
Colorado	5	5	.500
Nebraska	3	8	.272
Oklahoma	1	10	.091

## Girls Intramurals Get Underway

Waltheim hall defeated Delta Delta Delta 50 to 4 yesterday in the first round of women's intramural basketball. The only other game saw Northwest hall win 41 to 24 over Alpha Xi Delta.

No games are scheduled for today because of the KU game. Wednesday Van Zile hall will play Alpha Xi Delta and Delta Delta Delta will meet Chi Omega.

The competing teams are divided into three leagues. Each team plays every team in its league. Those winning the most games in their division then play a round robin with the other league winners.

# K-State Swimming Club May Get Varsity Status

Collegian photo by Gary Haynes

K-STATE'S SWIMMING club may soon assume varsity status. Moon Mullins will recommend swimming as a varsity sport at an athletic council meeting tomorrow. Swimming club efforts to be recognized as varsity are due to swimming coach Bill Thrall. The club was started last year by a group of men who wanted to swim competitively. Sophomore members (left to right): Don Matsuoka, Jerry Fitzgerald, Tom Onuma, Tony Mosa, Jim Nolen, Wally Brown, and Dave Dicken.

The K-State swimming club's hopes of becoming a varsity team received a shot in the arm when it was learned that Moon Mullins will recommend swimming as a varsity sport when the athletic council meets tomorrow.

"I think that if the council can see their way through on the financial problem, that swimming stands a good chance of becoming a varsity sport," said Mullins yesterday. "If the athletic council can provide adequate funds from the budget, the problem will be solved," he added.

"If K-State does get a varsity swimming team it will be entirely due to the efforts of swimming club coach Bill Thrall," Mullins said. Thrall has had inadequate finances and facilities and still has done a wonderful job, he added.

The swimming club was

formed last year when a group of good swimmers asked Thrall if they could start a swimming club. Thrall went to Mullins and the club was set up on a trial basis. Last year the swimmers paid their own way to all the out of town meets and were completely on their own as a club.

This year Thrall submitted a request for funds and for swimming to become a varsity sport.

"We didn't get a varsity standing but we got the go ahead signal and a promise that we would be watched," Thrall said. "We have gone ahead with the idea of becoming a varsity sport this spring," he added.

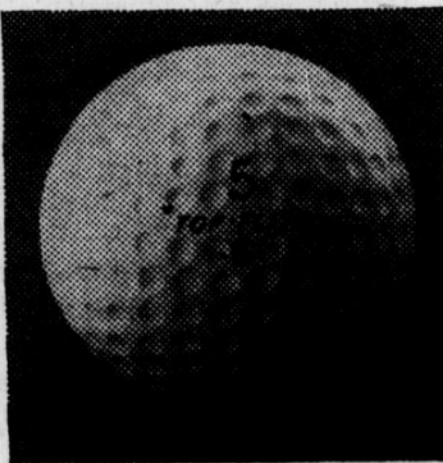

Despite the club's record of 1 win, 4 losses and 1 tie, Thrall considers the season a tremendous success. Most of the team is composed of sophomores and most of them never swam competitively before this year. The team has featured several outstanding swimmers that show promise.

"Most of our meets were close this year," Thrall said. "However we are pointing toward next year and the Big Seven," he concluded.

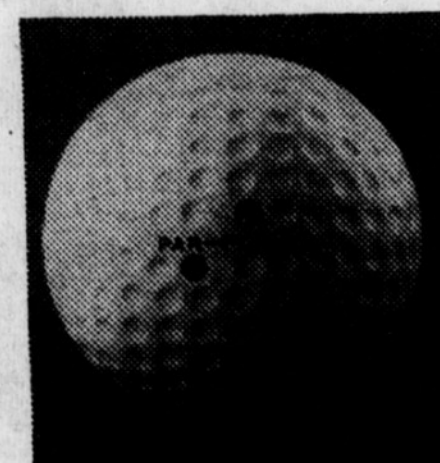

## PLAY THE RIGHT SPALDING BALL!

The new DOT® is made to give maximum distance for the long-hitting golfer. And its DURATHIN® cover keeps the DOT uncut, unscuffed and perfectly round far longer. Priced at \$14.75 a dozen, 3 for \$3.75.

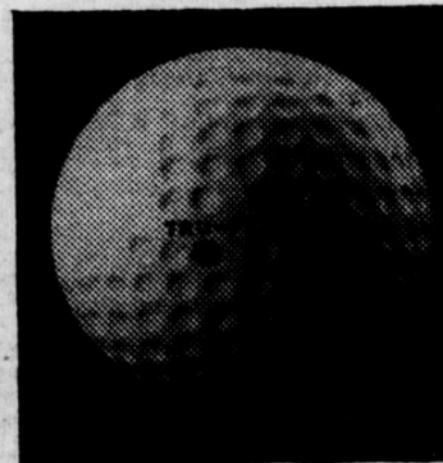

New tough Spalding TOP-FLITE® has an extra-strong cover that takes far more punishment than any ordinary ball . . . yet gives the maximum in long-distance performance. Priced at \$14.75 a dozen, 3 for \$3.75.

The popular-priced PAR-FLITE® gives an unbeatable combination of playability and durability. Its tough, resilient cover makes it an outstanding long-service ball. Priced at \$11.40 a dozen, 3 for \$2.85.

\*Trade-mark

Spalding's economy-priced TRU-FLITE®, like all other popular Spalding golf balls, is made with True-Tension winding for a longer, more active game. TRU-FLITES are priced at \$9.00 a dozen or 3 for \$2.25.

Sold only through golf professionals.

Tuesday, March 6, 1956-4

## Netmen To Meet Wichita in Opener

A 12-match schedule has been announced for Kansas State's tennis team for 1956, opening with a March 31 meet at Wichita.

Karl Finney, tennis coach, said that practice officially started yesterday and with plenty of nice weather the team should be well prepared for Wichita.

Returning for another season are four lettermen from last year's squad that finished fourth in the Big Seven tournament. The group won 6 and lost 6 of the scheduled meets. The four men are Bob Hansen, Dick Circle, John Deam, and Don Wainscott.

Additional help will come from two Topeka sophomores, Keith Andler and Bill Pulford; and two transfers from Hutchinson Junior College, Bob Alley and Larry Nafzinger. Jerry Fitzgerald, Manhattan sophomore, also may be a candidate for one of the top five positions.

# Mertes Is Facing Problem Of First Team Vacancies

Kansas State spring football drills, which reached the halfway point this week, have somewhat answered the question of replacements for seven graduating seniors from the Wildcat first team.

By shuffling his supply of 15 lettermen, Coach Bus Mertes can build a first team containing 10 of the "K" men plus Chuck Sprinkle, 200-pound sophomore center from Hutchinson.

Composing the rest of that first eleven would be ends Don Zadnik, 5-11, 190, and George Laddish, 6-3, 190; tackles Wally Carlson, 6-0, 218, and John Keelan, 6-3, 230; guards Ellis Rainsberger, 6-0, 200, and Rudy Bletscher, 5-11, 196; quarterback Dick Corbin, 6-0, 175; halfbacks, Kenny Nesmith, 5-11, 180, and Tony Addeo, 5-10, 170; and fullback Ralph Pfeifer, 6-0, 190.

Pfeifer was leading Wildcat scorer last season running from left halfback. His move to fullback is an attempt to add speed and power there since Doug

Roether, three-year letterman and all-conference fullback, will be graduated this spring. Two other lettermen fullbacks, Ray Glaze and Bill Carrington, are not out for spring drills. Glaze is a member of the varsity wrestling team and Carrington is awaiting an ankle operation to remove a calcium deposit.

Only Wildcat positions at which there are more than one letterman candidate are at quarterback, both halfback posts, and at left tackle.

Biggest "wealth" of experience falls at quarterback although Corbin is only 1955 letterman there. Jim Logsdon, 1954 regular who was sidelined with a shoulder injury last season, returns for his final season; and Keith "Alabam" Wilson, 5-8, 157-pound letterman halfback, has been shifted to quarter.

Additional help at center may come next fall when Kerry Clifford, Wichita junior who lettered last season, will be back in action. Clifford, currently

out for spring baseball, will hold down first base for the Wildcats.

After watching the K-State squad through its first week of drills, Mertes appraised them as "a real hustling pack of Wildcats."

"We are showing a tremendous amount of 'go,'" he explained after watching the Wildcats in a game-scrimmage. "And that is after some of the stiffest practice sessions anyone ever went through. That part is encouraging. But we sure quit smiling when we get down to the details of finding men to fill those seven first-team vacancies. Most of those seven men had played side-by-side for three seasons."

## A Cat's-Eye View

With Dick Holdren

ALTHOUGH THE CATS failed in their quest for the Big Seven crown Saturday night, the fans have a reason to be proud of them.

It would have been very easy for the Cats to have combatted the Tigers' rough tactics by doing the same things. But they decided to play the game as it was meant to be played and gained a measure of respect in doing so.

The Tigers play it rough—rougher than anything most of the spectators at Saturday's game have seen.

Why is this type of play allowed? Certainly flying elbows, hips, and knees have no place in the Big Seven. Neither is the hands-off, don't-touch attitude. But a happy medium between the two is needed.

The entire cause does not lie with the coaches, the players, the fans, or the officials, but with a combination of all.

THE COACHES could discourage this type of play but it never looks as bad when it's your team and you're winning.

The players certainly could sto pit of their own accord, but the same arguments used by the coaches apply here.

The fans' actions have a lot to do with it, too. When a team is away from home and trying to win an important game, it plays harder and probably can't understand why fans boo the things that they get cheered for at home.

FINALLY, THE REFEREES, who have or should have as much control over the game as anyone, sometimes fall down in their job.

If they called every foul that was committed in a particularly rough game, it would be nothing but a procession to the free-throw line and probably would take four hours to play.

And when they don't call the fouls, the game soon gets so far out of hand that it would be senseless to start calling the fouls close after the damage had been done.

The conference seems satisfied with its present corps of officials. The Big Seven secretary, Reaves Peters, seems to have good reason to think so.

He makes it a point to see every official and every team in action at least once other than at the pre-season tournament. Looking at it from an impartial viewpoint, he gets a better idea of the officiating than the fans.

SO WHAT CAN be done? Better sportsmanship would help, but it's hard to be good sports when everything seems to be going against yuro team.

The coaches could be given the power to blackball officials. But this would lead to personalities in picking officials, and would bring on a breed of "favorites" among officials.

The best way to cut down on the rough play is for all concerned to make a concerted effort to improve the situation.

## Look Names Vicens To Fifth District Team

Pachin Vicens, K-State guard, has been named to Look Magazine's fifth district All-American squad. Vicens was also on last year's fifth district all-America team.

Two other Big Seven basketballers on the fifth district squad are Gary Thompson of Iowa State and Norm Stewart of Missouri. Jim McLaughlin of St. Louis U and Lyndon Lee of Oklahoma City rounded out the area team.

Look chose separate teams for each of the eight NCAA districts in the nation in addition to the 10-man all-American squad.

The 10-man squad, which was selected from the ballots of 700 sportswriters and broadcasters, has an average height of 6-5 and features five men over 6-7 tall.

The Look All-American squad: Bill Russell, San Francisco; Bob Burrow, Kentucky; Robin Freeman, Ohio State; Si Green, Duquesne; Tom Heinsohn, Holy Cross; Joe Holup, George Wash-

ington; K. C. Jones, San Francisco; Willie Naulls, UCLA; Ron Shavlik, N.C. State, and Bill Uhl, Dayton.

# 21 Kansans Awarded \$100 U.P. Scholarships

Twenty-one winners of \$100 scholarships to K-State were announced today by the state 4-H club department of K-State.

The scholarships are awarded annually by the Union Pacific railroad to top 4-H club members in the 21 Kansas counties through which the railroad passes. The winners, all of whom are either juniors or seniors in high school this year, were selected by county trips and awards committees and approved by the state club department on the basis of all-ords.

The scholarships may be used by the 4-H youths to major either in home economics or agriculture at Kansas State college.

Scholarship winners are Carol McCosh, Abilene; Deanna Rae White, Ada; James H. Booth, Baldwin; Arnold Good, Barnard; Dean Armbrust, Ellsworth; Fred W. Loseke, Gem; Jay Lee Krauss, Gypsum; Donald Moiser, Hoxie; Cynthia Ziegler, Junction City.

Jim Vilander, Manhattan; Patty Tuma, Narka; Ruena Jo Quinn, Oakley; Naomi Wenger,

Powhattan; Connie Clary, St. George; Norman Roelf, Stockton; Larry Bacon, Tecumseh; Helen Hobbie, Tipton; Carol Hamon, Valley Falls; Charles Blaser, Waverly; Alfred Agnew, Weskan; and Edwina Huerter, Wetmore.

## Klub Kolumn

### FTA Planning Spring Banquet

Future Teachers of America will hold a spring banquet in the new Student Union on March 15. Tickets will be on sale from 9 a.m. to 3 p.m. in Anderson and during class hours in the Education building this week, announced Helen Peter, banquet chairman. The annual FTA award will be presented at the banquet.

## Law Students

Pre-law students are required to take a law aptitude test before entering Washburn Law school beginning the fall semester of 1956.

The test is administered by the Educational Testing service. Applicants should write directly to the Educational Testing service, 20 Nassau street, Princeton, N.J., for information. A fee of \$10 is charged for the exam.

## Chaparajos Club

The possibility of having a small college rodeo was discussed at the Chaps meetings last week, according to Dale Hodgson, president of the group.

New faculty sponsors of Chaps will be announced soon.

## Poultry Club

The operation and management of a Hi-line poultry farm was the topic discussed by Robert Combs last week. Combs, a producer of Hi-line poultry at Sedgwick, told the club about his business of collecting eggs from his own and other farms to sell in Wichita.

# Traffic Board Grants Appeals To K-Staters

Two K-State students won appeals of their third traffic tickets yesterday. The appeals were granted by the traffic appeals board.

Bob McDowell, PsP Soph, appealed a ticket for reckless driving. He received the ticket Friday.

McDowell's ticket was issued by Jim McClellen for reckless driving while passing Hilltop court. McClellen is a Riley county deputy sheriff.

According to McClellen, he saw McDowell coming and attempted to hail him by calling to him. "McDowell evidently didn't hear me and when he passed I took down the license number," he said.

In McDowell's behalf, McClellen said that the car was not being driven recklessly but was exceeding the speed limit. Since he was unable to clock the car he charged reckless driving.

"Driving at an excessive speed near the housing areas is reckless. There are so many children around that it makes it dangerous," McClellen said.

The traffic appeals board felt that a charge of reckless driving as a serious charge and after listening to the testimony of both McDowell and McClellen they granted the appeal.

Gary Haynes, TJ Jr, appealed a parking ticket. The ticket was received while he was working for student publications. Haynes said that it was necessary for him to park in the nonparking area so that he could get his camera equipment in position for the desired picture.

# 'Zak' Declares American People Are 'Pretty Good'

Zacchaeus Ekwebelem, recent winner of the second annual B'nai B'rith Hillel Foundation brotherhood award, said "if you look at things objectively you don't have troubles," concerning racial differences in America.

He says that Americans and the English people are very much alike but certain mannerisms, such as the way Americans tell jokes, distinguish them. American people are "pretty good," he added.

"Zak," as he is called by friends, is very active in campus religious and other extracurricular groups. He is a member of the YMCA, Cosmopolitan club, and has participated in Wesley Foundation and Newman club activities. He was vice-president of Cosmopolitan club in 1954-'55.

Although there are 20 religious denominations in West Africa, there are only two, Anglican and Catholic, in his home town of Okwelle, Okigwi, Nigeria. "Zak" explains that he was born into the Anglican church but attends Newman club functions to see what they are doing because the Cath-

olic church plans to build a university in his home town.

A graduate student in history and government, "Zak" wants to work in the administration or foreign service department of the Nigerian civil service when he goes home.

His home town is a farming and trade center and is bigger than Manhattan, he said. Although polygamy is still practiced it is dying out, "Zak" said, and he, being Christian, plans to marry only once when he does. His father was chief of his town until his death in 1940. "Zak's" family sends him to college.

## All This and Love Too

Des Moines (U.P.)—Mrs. Martha Hoffman said she would call off her divorce proceedings if her husband agreed to:

- 1) Enter into conservation with her;
- 2) Spend the "main portion" of his time with his family, instead of with his newspaper and radio;
- 3) Take her out once a week, even if it means he has to give up bowling.

## KSDB-FM

# AFROTC Cadets Feted In Reception Sunday

Senior AFROTC cadets were honored at a reception given by the AFROTC staff in Rec Center yesterday afternoon.

Angel Flight members who acted as hostesses at the reception were Joan Berrigan, Hst Jr; Connie Benjamin, HEN Fr; Janet Eason, HT Fr; Carolyn McGowan, HE Soph.

Connie King, HT Soph; Carol King, EEd Soph; Joyce Graham, BA Soph; Janice Graham, EEd Soph.

Carol Holmquist, EEd Soph; Rosemary Derks, ML Soph; and Marilyn Doran, EEd Jr.

New members at the House of Breck include Pete Pollock, FT Fr, Iowa City, Iowa; Ray Drumwright, PrV Fr, Harper; Tom

Heinz, ME Fr, Claflin; Lee Meyer, BAA Soph, Riley; and Seng-Hsun Chen, ME Grad, Formosa, China.

New social chairman for the Sigma Nu's is Ron Coryell, Geo. Soph.

Dr. William Rutz, associate professor of dairy husbandry, is the new chapter advisor for Alpha Gamma Rho.

The local chapter of Pi Kappa Alpha sent 38 members to their district conference held Saturday at the Town House in Kansas City.

Phi Delta Theta entertained rushees last weekend. The rush-

ees attended the Missouri basketball game and a party at the chapter house after the game.

## Engagement Stadt-Melcher

Chocolates at Clovia announced the engagement of Imogene Stadt, HDA Sr to Elvin Melcher, AA '54. Imogene is from Pamona and Elvin from Ottawa.

## Wedding

Stockham-Myerley  
Jereldene Stockham, EEd Soph, and Laurence Myerley, BA Sr, were married February 26 in Lyons. Jereldene is a member of Kappa Kappa Gamma; Laurence is a member of Beta Theta Pi. Both are from Lyons.

**JAMES STAMM**, FT Sr from Washington, is being greeted by Capt. James Griffith, assistant professor of air science, and Col. Charles Wilkins, professor of air science, at the AFROTC reception Sunday.

## K-State Daisy Maes, Abners Whoop It Up

"DAISY MAE" Glenice Franklin, Art Fr, and "Lil Abner" Len Legault, PEM Jr, were rompin' and stompin' at the Dogpatch Drag at Southeast hall Friday night.

Burlap-clad coeds and their "coveralled" dates spent an evening in Dogpatch at Southeast hall's Sadie Hawkins dance last Friday night.

Theme of the dance was "Dogpatch Drag." Bales of hay were scattered here and there to add to the atmosphere. Bigger-than-life paintings of everyone from Daisy Mae to the youngest schmoo adorned the recreation room walls.

Punch was served at the "Kickapoo Joy Juice" stand.

Pat Palmer, ChW Fr from Kansas City, and Carol Bliss, MAV Fr from Denver, sang hillbilly duets and accompanied themselves on their guitars.

Dixie Williams, FdN Fr from Bloomington, played two popular selections on the piano. Gordon Bute's band played for the dance.

Though burlap dresses were most popular, many girls wore faded jeans or bermudas covered with patches.

Jeans and coveralls with straw hats were the most popular costumes of the male "Dogpatchers." Everyone came up with the oldest costume he or she could find.

# A CHALLENGING CAREER in FOOD DISTRIBUTION

## ATTRACTIVE SALARY— RAPID ADVANCEMENT

THE GRAND UNION CO. offers the college graduate outstanding opportunities for personal development in an industry that has remarkable growth potential.

For 83 years the GRAND UNION CO. has been pioneering new and better ways of merchandising and distributing food to the consumer. Today GRAND UNION operates hundreds of large modern super-markets from Virginia to Canada and is opening new stores at a rate that will double our present sales volume in the next five years.

A GRAND UNION Personnel Representative will be on your campus soon to interview interested Seniors. Those who qualify will be invited to visit our headquarters in East Paterson, New Jersey. The men that are employed will participate in a formal 18 months Management Training Program that is rigorous but rewarding.

All personnel benefits including a retirement plan, medical-hospital-surgical insurance, group life insurance, profit sharing plan, stock option plan.

Contact your college placement office for interview appointment.

## Debating Team Places Second

K-State debaters Larry McDonald, ME Soph, and Nancy Porter, Sp Soph, placed second in the finals at the Southeastern Oklahoma State college in Durant last weekend. They were beaten by Cameron Junior college.

Ed McCoy, PrL Soph, and Jim Shane, Hst Soph, were

beaten in the quarterfinals by the University of Alabama.

Anita Grimm, TJ Soph, took third place in the senior women's extemporaneous speaking contest. Ed McCoy competed in the finals of the after-dinner speaking contest.

Read Collegian Want Ads.

## Dev Nelson To WIBW

Radio broadcasts of the Topeka Hawks' Western League games will be handled this season by DeVere (Dev) Nelson, football and basketball play-by-play announcer the past 2 years for the K-State Sports Network.

KANSAS STATE COLLEGIAN  
Tuesday, March 6, 1956-8

## Spanish Film Today, Tomorrow

"Dios Se Lo Pague," a Spanish-language film, will be shown today and tomorrow at 4 p.m. in J 15. The movie has English sub-titles.

The story deals with a beggar-philosopher who plays the dual role of a beggar by night

and a wealthy gentleman by day. It concerns his love for a beautiful woman, Nancy, who befriends him, and the revenge he wants against a former employer who stole his plans for a more efficient loom.

# THE WINNERS! IN VICEROY'S \$50,000 COLLEGE CONTEST!

The judges' decisions are in! Here are the 50 students who wrote the best names for Viceroy's filter... a filter made from pure cellulose—soft, snow-white, natural!... and the college organizations named by the 10 Thunderbird winners to receive RCA VICTOR Big Color TV Sets.

Dorothy Wingate Newell, Univ. of California, Berkeley, Calif.  
Jim Melton, Stanford University, Los Altos, Calif.  
Garry C. Noah, Emory Univ., Emory University, Ga.  
P. Robert Knaff, Univ. of Maryland, College Park, Md.  
Dan Hubert Hinz, Harvard Univ., Cambridge 38, Mass.

## 'Rock 'Em and Sock 'Em, We Beat the Jayhawks'

"We rocked 'em, we socked 'em, we beat KU!"

Cheers rocked Manhattan last night as the Big Seven champs rolled into town from Lawrence and were met by hundreds of yelling, horn-blowing students.

The bus was met east of town by a Manhattan police car, and with a caravan of cars following, was escorted to the Field House where "the best pep rally in the history of K-State" was organized.

Hundreds of boys were on hand

to meet the champs and were reinforced by many more girls as the dorms were excused to attend. One busload of girls missed the rally as they were too late, but got out and joined the cheers anyway.

Coaches Tex Winter and Howie Shannon, the team, and President McCain spoke, with cheers led by a couple of impromptu cheerleaders and cheerleader Larry Youngdoff who led the crowd in everything from the "Wildcat Scream" to "Fifteen Raahs for

Dean Helen Moore" and "NCAA all the Way."

Tex introduced the team and said "this is one of the greatest moments of my life. These are a swell bunch of boys and they all deserve your cheers. Everyone of them have had a lot to do with winning this championship."

Fritz Schneider was not in attendance. "We told him that if he had a good game, we'd give him the night off. He's in Kansas City seeing his girl," Tex said.

First to speak was Pachin Vicens. "We hope to go all the way in the NCAA and beat San Francisco," he said.

Tex introduced Jack Parr as "the tallest and one of the best tall men in the Big Seven."

The all-Big Seven center said, "There couldn't be a better school to win for or there couldn't be a better coach to win for."

Tex brought on a round of boos by mentioning Wilt the Stilt. "We have a weapon for Wilt the Stilt now; we've got DeWitz the Crutch," he said in introducing Roy DeWitz, who sat out the game with a broken foot bone.

"I feel more like a student at Kansas State than a member of the team tonight," Roy said.

"We'll beat San Francisco and win the NCAA," Dick Stone said. Stone started in place of DeWitz and added 10 points to the victory.

Hayden Abbott praised coach Winter. "Tex deserves a lot of credit," he said. "He suffers a lot. Just look at the Missouri game."

Tex introduced his reserves and said, "It's a difficult part to play, sitting on the bench, but these boys deserve a lot of credit for our success."

Joe Powell, senior forward, summed up the feeling of everybody as he said, "We've got this far and I'd like to play San Francisco."

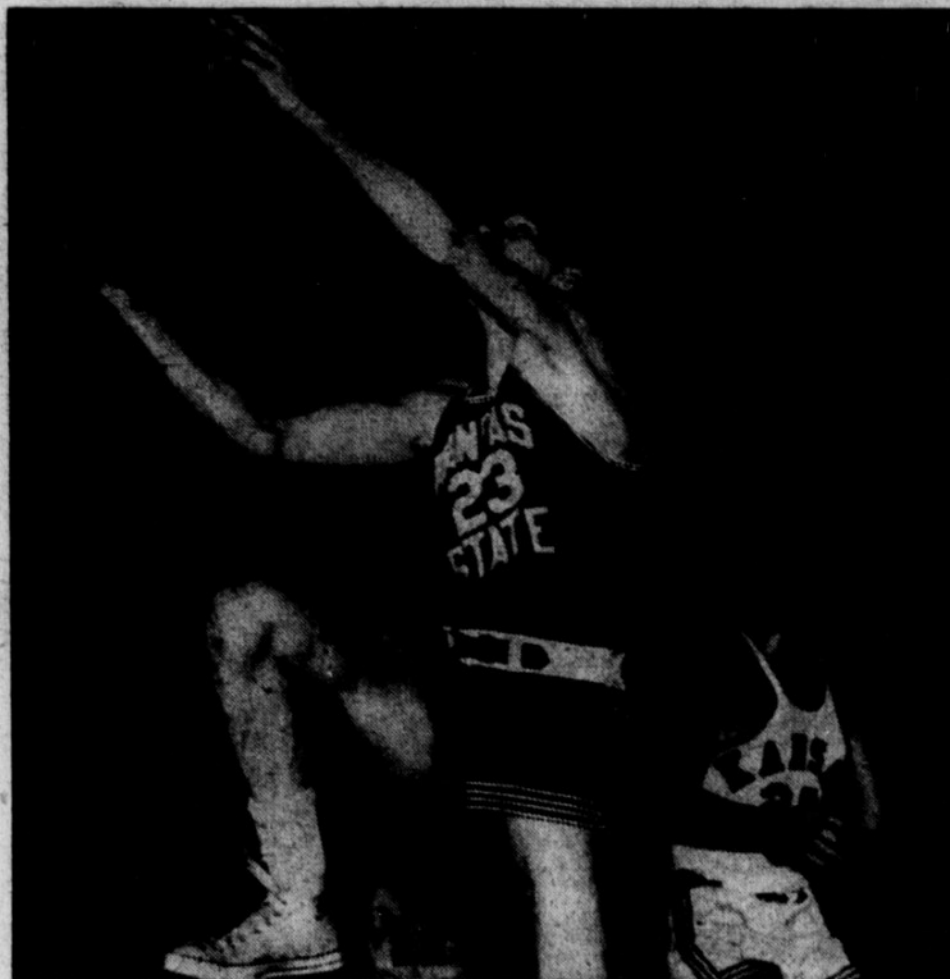

The rally ended with cheers and the "Wildcat Victory" song after President McCain said: "This is the greatest basketball victory in history, this is the greatest pep rally in the history of Kansas State. We've got the greatest coach in the United States."

### Bronk to Speak At O.H. Assembly

Dr. Detlev W. Bronk, president of the Rockefeller Institute for Medical Research, will be featured speaker at the annual Engineers' Open House assembly at Kansas State college Wednesday morning, March 14.

The 32nd annual Engineers' Open House, run by engineering students to inform the public on the work of engineers, will be March 16 and 17 on the K-State campus. Theme of the 1956 event is "Your Automatic Tomorrow."

The Open House speaker was honored by the Atomic Energy Commission for exceptional civilian service in 1946, and he has received numerous other awards and honors, including 20 honorary doctorates.

**IT'S IN!**—Fritz Schneider shows his form as he lays in another. Schneider's 36 points led the Wildcats to a victory over KU last night. Coach Tex Winter had plenty of praise for the Crystal Lake, Ill., junior, "Fritz was at his best, percentage wise and on the boards."

By ROGER MYERS

Fritz Schneider scorched the nets for 36 points to lead the Wildcats to a 79-68 win over KU last night and give K-State its first Big Seven championship since 1951.

The victory entitles K-State to go to the NCAA regional tourney to be held at Lawrence March 16-17. The Cats will be idle until March 16, when they play the winner of the Oklahoma City-Memphis State game to be played March 13 at Wichita.

It was a record-breaking night at Allen Field House. Fritz Schneider set a new field house individual scoring record besting Dallas Dobbs' old mark of 30 in one game.

"I wasn't too nervous," Fritz said. "I knew tonight would be my good one because of that," he added.

It was the first time since 1952 that the Cats have beaten the Jayhawks. That year K-State won 93-87 in the Big Seven pre-season tournament at Kansas City.

Almost forgotten in K-State's breath-taking comeback  
(Continued on page 3)

**"WE'RE THE BIG SEVEN CHAMPS,"** Joe Powell and Poncho Vicens exclaim as they celebrate in the shower after the Wildcats 79-68 victory over the Kansas Jayhawks last night. The victory cinched the title for the Cats for the first time since 1951 and assured them of an NCAA spot. Powell and Vicens played their last league game.

The winner!

The also ran!

## Council Votes to Send Girl to Queen Contest

Poise, height, maturity, and ability to walk well are marks of a queen.

These are the qualities that should be used in selecting a candidate for Berkley's Eleventh Annual Football Festival, Sondra Tate, queen representative for last year's contest, said in a meeting of student council Monday night.

Miss Tate also suggested that each house and dorm should be allowed to select a candidate.

A committee was appointed to make arrangements for the selection of K-State's queen representative for the event. Those on the committee are Chuck Broman, BPM Sr; Clarence J. Terhaar, Par Gr, Sondra Tate, Art Soph, and Dr. Germaine Marion, professor in dairy husbandry.

Queen candidates will be represented from 10 leading football colleges—Oklahoma U., Pittsburg U., Mississippi U., Denver U., Maryland U., Minnesota U., Rice Institute, Arkansas U., the University of British Columbia, and one from the University of California, host of the event.

This event is planned for early next September and is sponsored by Berkley's Junior Chamber of Commerce. It acts as a kick-off to the national collegiate football season.

The queen will get an opportunity to meet dignitaries, appear on TV shows, and attend the Coronation ball.

The free plan of registration to operate a car on campus was

discussed, but was returned to the traffic board.

Marilyn McCready, Eng Soph, reported that a K-State flag is being planned.

## Wreck Victims Moved From Post Hospital

William J. Phillips and James B. Van Loenen, K-State students who were injured in a car accident Feb. 26 at Fort Riley, are being transferred from the post hospital according to Dr. B. W. Lafene, director of Student Health.

Phillips, CE Fr, Newton, was transferred to the Newton hospital Monday and Van Loenen, CE Sr, Prairie View, is to be transferred to the Hertzler Clinic at Halstead Thursday.

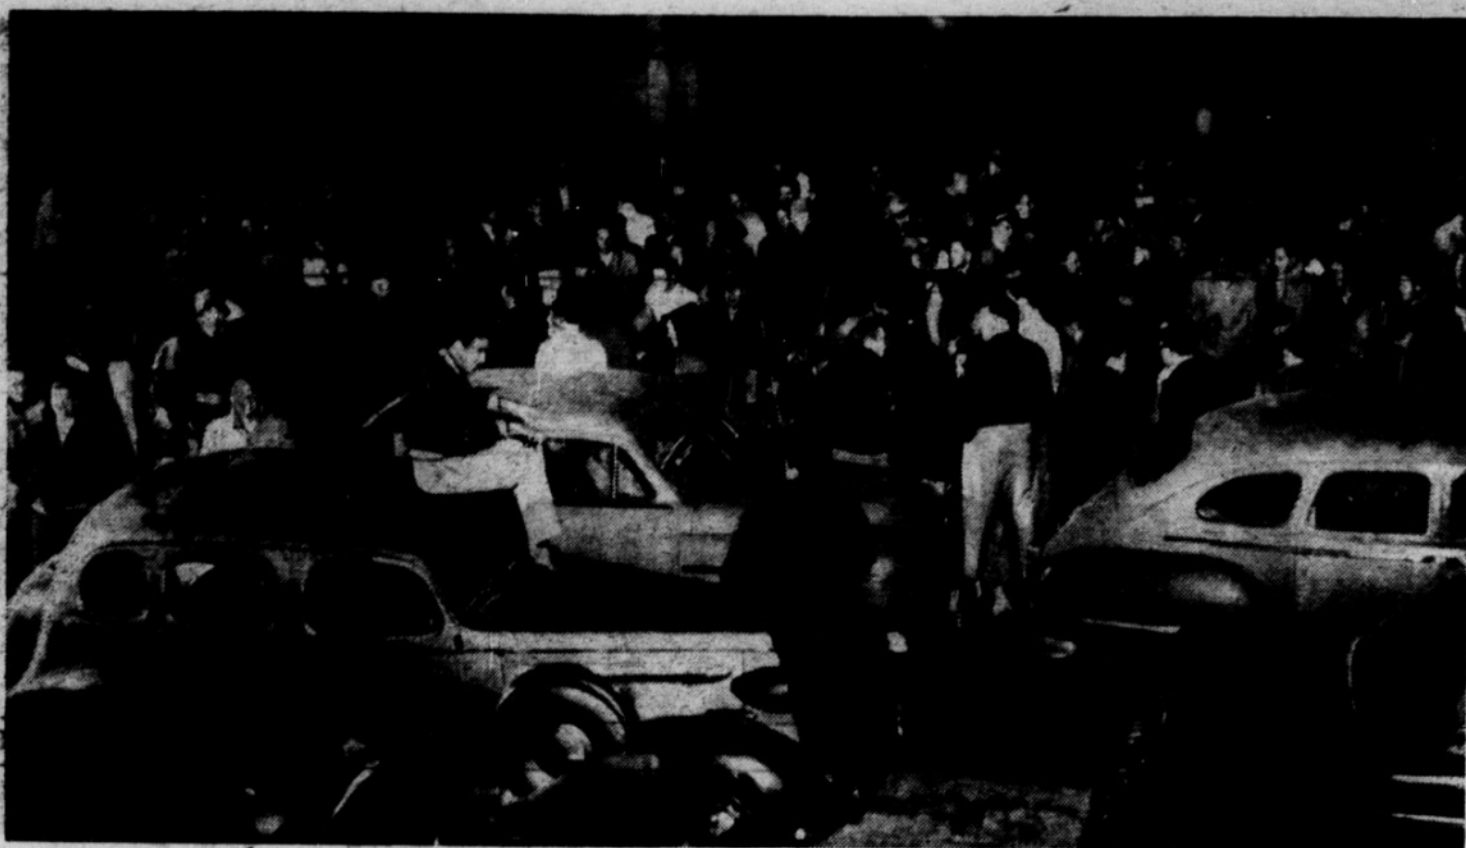

Phillips suffered a broken arm and possible internal injuries. Van Loenen suffered fractures of both legs, a fractured jaw, and concussion.

The two students were injured February 27 at the Wounded Knee monument when the car missed the turn and crashed through a stone wall surrounding the monument.

# Cagers Rap Hawks; Regionals Next

(Continued from page 1)  
was the fact that Phog Allen was coaching his last home game for the Jayhawks. Phog's 34th year as Hawk mentor was also marred by a one-point loss to Oklahoma in his 1,000th game as KU head basketball coach.

"It was Parr who killed us because it took two men to guard him," Phog said. In spite of the heavy guard, Parr snagged 16 rebounds.

Then Stone and Schneider started hitting and things really got tough, he said. "Schneider played a terrific game," Allen commented.

Winter said it felt great to be a champion, "and it's even a greater thrill to win at Lawrence."

He emphasized it wasn't the Cats' best game of the season. "We looked better against Iowa State and Colorado at Manhattan than we did at any time tonight," he said.

Tex called KU's loss of Maurice King with 12:30 left in the game one of the big turning points.

Commenting on Schneider's performance, Winter said; "Fritz was never greater and when we moved him to forward he seemed

to pick up even more steam."

K-State took the opening tip-off and gained a two point lead on Schneider's two free throws. Maurice King hit a jump shot and Schneider added three more charity tosses before the Jayhawks took a 6-5 lead by virtue of jump shots by John Parker and Gene Elstun.

The KU defense tightened and the Wildcats were forced to shoot from the outside. Schneider hit two field goals from 30 feet out and Dick Stone sunk one from 40 feet to pull the Cats within three points of KU at 11-14 with six minutes gone.

Stone, who took the injured Roy DeWitz's place in the lineup, proved a good replacement, canning 10 points. Parr and Vicens had 13 apiece and Hayden Abbott six.

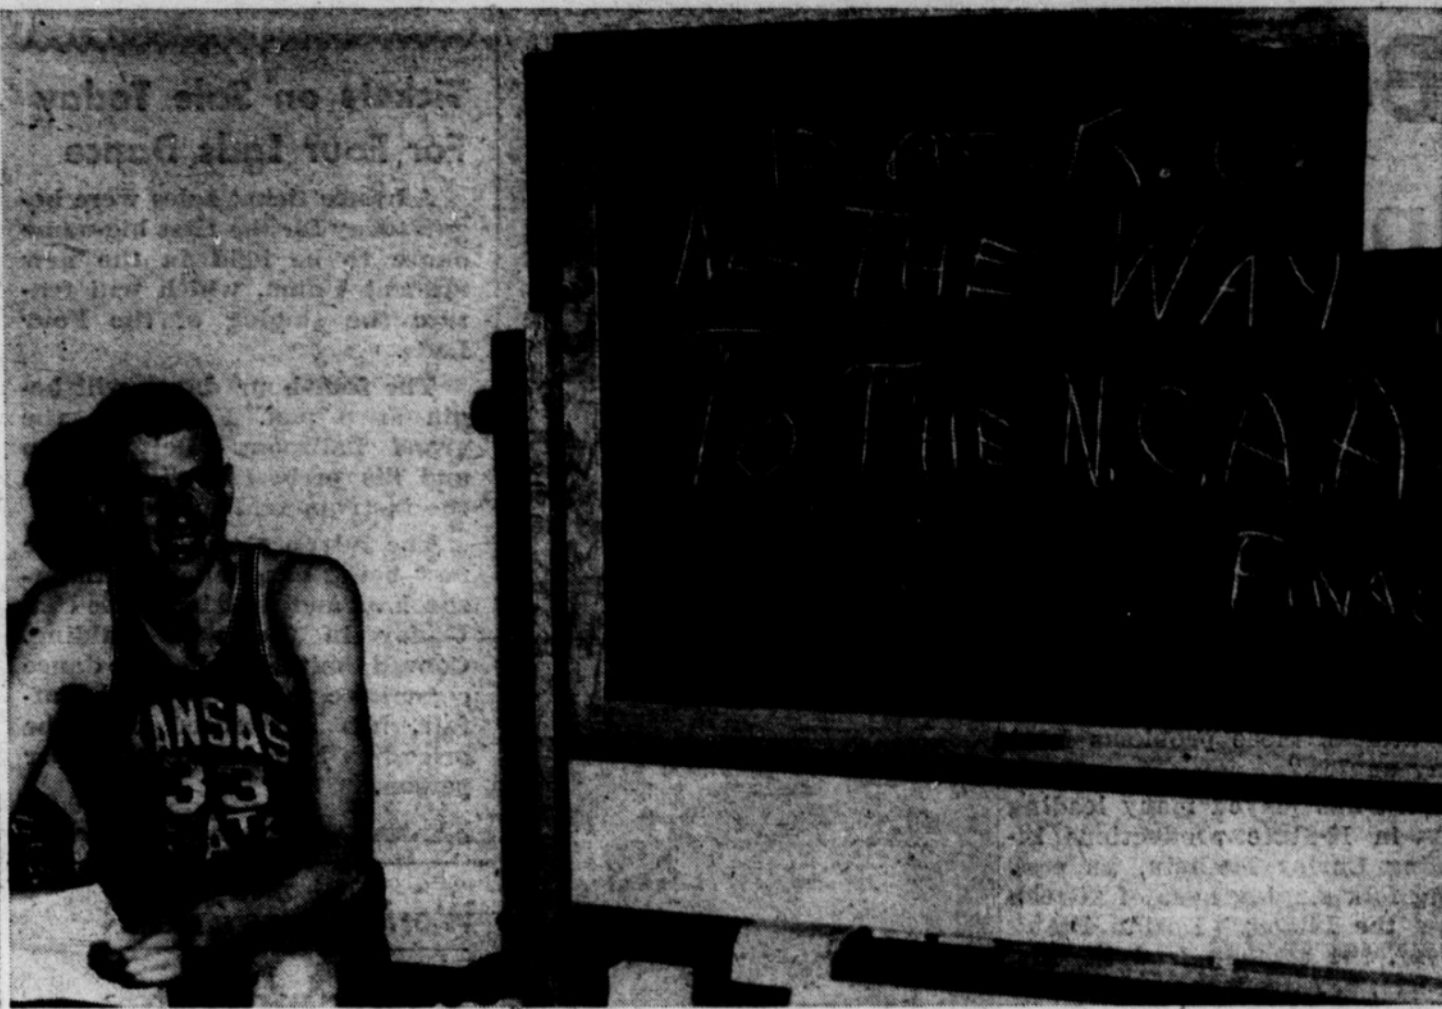

It was Schneider who kept the Wildcats in contention throughout the game. He hit 11 of K-State's first 15 points, and 17 in the first half. He added 19 in the second half rally which won the game.

The score was tied three times and the lead exchanged hands six times in the first half before John Parker dropped in a free throw to put KU ahead 33-32 with three minutes left.

The Jayhawks stunned K-State with a closing first half barrage, outscoring the Wildcats 12-5 in the last 3 minutes.

However, the Cats started closing the gap as soon as the second half began. Hayden Abbott hit a shot from the corner, Vicens went under the boards to put through an under hand layup, and Parr tipped in one of Abbotts long shots to narrow the score to 48-43.

With five minutes gone in the

Collegian photo by Gary Haynes

**WILDCAT STARTING** center Jack Parr sits in the K-State dressing room in Allen Field House before the KU game and smiles as though anticipating the Cats' 79-68 win over the Jayhawks. "There couldn't be a greater school to win for," Jack said last night at an impromptu pep rally in front of Ahearn gym. Tex Winter termed Parr as "the best and tallest center in the Big Seven." Jack was recently named starting center on the all-Big Seven squad.

final period, the Jayhawk defense started to sag. Ballhawk Pachin Vicens fed Schneider for a layup and then passed through the KU defense to Jack Parr, all alone under the basket, who laid it in and brought the score to 52-53.

With 12:03 gone in the second half, Schneider, who hit 12 of 14 charity tosses for the night, tied the score at 53-all and put K-State ahead to stay with his second free throw.

Schneider's two free throws broke the Jayhawks back and with the score 75-59 the Wildcats began a stall. With the ball in an Eddie Wallis-Pachin Vicens deep freeze for the last three and a half minutes of the game, KU was forced to foul to get the ball and the Cats coasted to their ninth conference win of the season.

The box score:

## Action Postponed In IM Volleyball

Intramural volleyball games will be postponed until Monday because of the school holiday, opening of new Union Thursday night, and the dance Friday night, Frank Myers, intramural director, announced.

# Baseball Outlook Better; Sophs Bolster Hopes

"Prospects look better than they have for some years with respect to hustle and ball-handling," baseball coach Ray Wauthier, said.

"I hope to have intra-squad games Friday and Saturday to cut

the squad down to workable size," Wauthier added.

About 70 men reported for varsity practice, and 45 are out for the freshman team, which started practice Monday.

Sax Stone, BPM Sr, is coaching the freshman squad this year.

Eight pitchers are trying out now, but Wauthier expects to cut this number down to five. The squad will number 25 after the intra-squad games.

Sophomores will add a lot to the team this year, Wauthier said.

Wally Carlson, sophomore catcher, looks good and should see a lot of action this year, according to Wauthier.

Other likely prospects are Laverne Dillinger, catcher, a transfer from Garden City Juco; Hubert Nethercot, 2d base; Richard Hackler, shortstop; and Paul Clark, 3d base.

Don Spohn, top pitcher from last year's freshman squad, is ineligible this semester because of a shortage of hours, Wauthier said.

The season's schedule has not been released yet, but the varsity will play about 22 games, the maximum allowed by Big Seven rules.

## Ward Haylett Wins Honors

Ward Haylett, K-State track mentor, recently received the track coach of the year award at the Rockne club 25th anniversary celebration in Kansas City, Mo.

Laurence "Moon" Mullins, director of athletics, received the Christy Walsh sportsman award for "long and outstanding contribution to youth and athletics." Mullins did not receive the award in person, however, as he remained in Manhattan to attend the K-State-Missouri basketball game.

H. B. "Bebe" Lee, head basketball coach at Colorado and future K-State athletic director, received the basketball-coach-of-the-year award.

The club was organized to perpetuate the memory of Knute Rockne, Notre Dame football coach.

# 'Bernardine' Star In New Type Role

Baird Miller, Sp Sr, as Arthur Beaumont in the K-State Player's production of "Bernardine," deviates from his usual portrayal as the romantic lead. In this play Baird is the leader of a gang of high school boys, as well as Lt. Beaumont of the Air Force who narrates the story by recalling his high school experiences.

"Bernardine is a very appropriate show for Lift week," he said. "It shows the problems of youth and attacks these problems from many angles."

Baird has played many leading roles in K-State productions including Curley McClain, an easy going folk singing hero of "Green Grow the Lilacs;" Ensign Frank Pulver, the comedy lead in "Mr. Roberts;" Alfred, one of three escaped convicts in "My Three Angels;" and the title role of "Quantrill in Kansas."

Besides his collegiate work, Baird acted at the Black Hills Summer Playhouse during the summer of '55. In "The Moon Is Blue," he played the part of Don Gresham, the romantic lead. "The Legend of Devil's Gulch" saw him cast as Cy Henry, who falls in love with the fantasy of the Black Hills. The part of Tom in "You Can't Take It With You" completed the season.

I like romantic parts, but I would like to try something else, he said.

Baird started to college in 1949 but left after his sophomore year to join the army. He is now a senior majoring in radio-speech and will graduate in June. After graduation he plans to continue his education and ultimately teach in college or give the professional

theatre a try. The stage, radio or television are all possibilities, he said.

Although Baird acted in plays in high school, he became interested in the theater as a career when he returned from army service.

He is now president of Kansas State Players and will soon be initiated into the National Collegiate Players.

Baird Miller

## Tickets on Sale Today For Four Lads Dance

Advance ticket sales were begun today for the first big-name dance to be held in the new Student Union, which will feature the singing of the Four Lads.

The four-hour dance will begin at 8 p.m. Friday, in the grand ballroom. Del Clayton and his orchestra will furnish the instrumental music.

The advance ticket sales are now being conducted in Anderson hall and will be carried on Friday in the new building. Conrad Smith, head of the dance committee in charge of the affair, has announced that the price has been set at \$2.25 per person.

### Alabama Cites Segregation Policy

By UNITED PRESS

Alabama legislators today drafted a "go slow" plea, warning to the U.S. Supreme Court of the danger of civil strife if the South is forced to desegregate too hastily.

The proposed resolution, intended as an official appeal to the Supreme Court, cites the Autherine Lucy riots at the University of Alabama as evidence of potential danger.

The resolution departed from past southern state legislation purporting to "nullify" court decisions or sidestep them, but echoed consternation the University of Alabama case raised in deep south states.

President Eisenhower said today it is up to Vice President Richard M. Nixon to chart his own political future.

Mr. Eisenhower told his news conference that he has no criticism of Nixon as a man, an associate or a running mate on the Republican ticket.

VOLUME LXII

NUMBER 99

Kansas State College, Manhattan, Kansas, Thursday, March 8, 1956

### Damage by Staters Estimated at \$700

Exaggerated reports of property damage by enthusiastic Wildcat pepsters in Aggieville Tuesday night were under investigation by College officials, it was reported today by President McCain.

Jubilant K-Staters poured through the streets, some 500 strong, celebrating their undisputed Big Seven title win over the Kansas university Jayhawkers, 79-68. A huge victory beacon was set ablaze at the intersection of Twelfth street and Moro.

Spot news flashes reported damages amounting to \$3,000 as a result of carefree K-Staters. After extensive investigations the amount of damage is still uncertain, but it is not expected to be more than \$700.

Fire Chief Clyde Morris submitted a tentative list of damages for consideration.

It included: (1) One nozzle; (2) one 5-gallon extinguisher, pump type; (3) one hydrant wrench; (4) one 12-foot aluminum ladder; (5) one 30-foot aluminum extension ladder; (6) five helmets, three of which have been returned; (7) one window vent on a truck pumper; (8) a 25-foot iron chain.

"The College will make proper restitution when the figures are verified," said President McCain.

He added emphatically, "The College will not tolerate overt acts of such wanton nature by any member of the student body. Neither do we wish the student body to be criticized unjustly."

City firemen answering the call met stiff opposition in their attempt to extinguish the blaze. During the fracas two firemen were injured. Paul Bostick, assistant fire chief, was treated at Riley County hospital for a broken finger. Jerald Kleiner, a fireman,

suffered a severe cut of the right hand from a flying bottle.

Police Chief Leo H. Osbourn explained that the crowd was quite unruly, but that he felt that when they later moved into the park the situation was well under control.

Survey disclosed that the principal damage effected by the crowd was upon the city's two pumper trucks.

Fire Chief Morris pointed out that the most serious problem encountered was the fact that with two trucks in Aggieville, it left only one truck to answer calls.

This truck was further hampered by the fact that it recently had to be pulled and the starter spring was broken. As a result no other call could have been effectively answered.

Kansas State college fire fighting equipment was immediately made available to the city for emergency use during this crisis.

Chief Morris also stated that the fire last night was extremely dangerous because of high wind. The department felt that the business area of Aggieville was definitely threatened, and responded to the situation accordingly.

City Manager W. B. Avery said, "It's a shame K-State's wonderful basketball performance last night was marred by a minority of the student body."

"No one sweats these games out any more than I do, and no one could wish for victory any more than I do," urged Avery.

"I only wish that in the future we can plan to rally in the city park with a fire truck standing by in case of an emergency," he added.

Interviewed Aggieville businessmen reported no extensive private property damage as a result of the students' exuberance.

Students will be kings in their own palace tonight when they formally open their new \$1,650,000 Union building.

There will be a pre-dedication dinner, and a short ribbon-cutting ceremony at 7:45 p.m. The real highlight of the evening will be at 8 p.m. when lights flash on throughout the building and

the doors swing open for the 5,700 students now enrolled.

All areas of the building will be put into immediate use.

There will be games of all kinds on the basement level, including billiards, bowling, table tennis, and table games.

There will be a ballroom dance to the music of Matt Betton and his orchestra on the second floor, a juke box playing in the Dive on the basement level, and a "Renoir to Picasso" art display in the art lounge.

A circus theme will prevail for the opening, and students on the Union staff, clad in clown suits, will be stationed throughout the building to direct visitors and answer questions.

Because the crush of students expected for the opening, a special "Open House" for faculty, Manhattan residents, and others is being planned later this spring, according to Loren Kottner, Union director.

The ribbon-cutting ceremony preceding the formal opening will be between 7:45 and 8 p.m. Gerry Day, student body president, and Rick Harman, Alumni association president, will preside at the ribbon cutting.

Also speaking briefly will be Ed Gillette, head of the Union program council; Leon Armantrout, Union Governing Board chairman; President McCain, and a member of the Board of Regents.

A talent show at the intermission of the dance will feature a skit by Pi Beta Phi sorority, music by the Tau Kappa Epsilon fraternity quartet, piano music by Jerry Weaver of Manhattan, a reading by Gayle Griffith of Norton, and the K-State Singers.

The cafeteria will not start up full scale operations until Monday. When the Union cafeteria opens the Thompson hall cafeteria will shut down.

The Union will be open seven days a week, for an average of better than 18 hours a day. The building opens each morning at 7, and closes at 10:30 except on Friday and Saturday nights when the closing hour is 12:30.

### Manhattan Barbershops Discriminate, RCC Says

By ESTALEE VAN SICKLE and FAITH MCCONNELL

K-State's male Negro students cannot get their hair cut in any barber shop in Manhattan, but rather must go to towns such as Junction City and Topeka for haircuts, according to Gordon Grosh,

Mid Gr. of the Religious Coordinating Council.

The Council has become concerned and has appointed a committee to investigate the situation, Grosh said. RCC has voted unanimously to take whatever steps the committee thinks necessary, he said.

Committee members are Keith Landis, EE Soph; Walter Martin, AH Jr; David Mugler, AEd Soph; Bill Rogers, BA Sr; and Grosh. Faculty advisers are Prof. Abby Marlatt, Prof. Helen Hostetter, and Asst. Prof. Walter H. Crockett.

The Manhattan Ministerial Alliance has given the project its approval and active support, Grosh said. The Alliance commended RCC for undertaking the project, and approved its methods and cautiousness in carrying them out, Grosh added.

RCC has conducted a survey of all Manhattan barbers to learn if they allow all patrons to be served, without discrimination against races, he said.

Students representing RCC and religious groups on campus questioned the 14 barbers in Manhattan and found that none serve Negroes, Grosh said. Asked why they didn't serve Negroes, the barbers said they were afraid they would lose business.

A Negro barber from Topeka gives haircuts here from 10 a.m. to 4 p.m. on Sundays, the committee found. A local Negro man cuts hair by appointment. These are the only two persons who will cut Negroes' hair in Manhattan, Grosh said.

The RCC has made two proposals to improve this situation, he said.

1. Gain support of the Manhattan Alliance to organize a downtown survey to work in cooperation with a campus survey and discover if the barbers' present patrons would leave if Negro patronage were allowed.

2. Prove to the barbers by this student-city poll that they won't lose patronage.

### 'Bernardine' Shows Troubles of Lad Interested in Girls

Last night's K-State Players' production of "Bernardine" provided the audience with a full hour-and-a-half of entertainment based upon the problems of a group of teenage boys when they begin taking an interest in girls.

Wormy, portrayed by Bruce Bellamy, Sp Gr, decides to take his problems to his gang of friends at the Shamrock, the local hang-out, when he received almost no satisfaction from his mother, played by Judith Hall, Sp Soph.

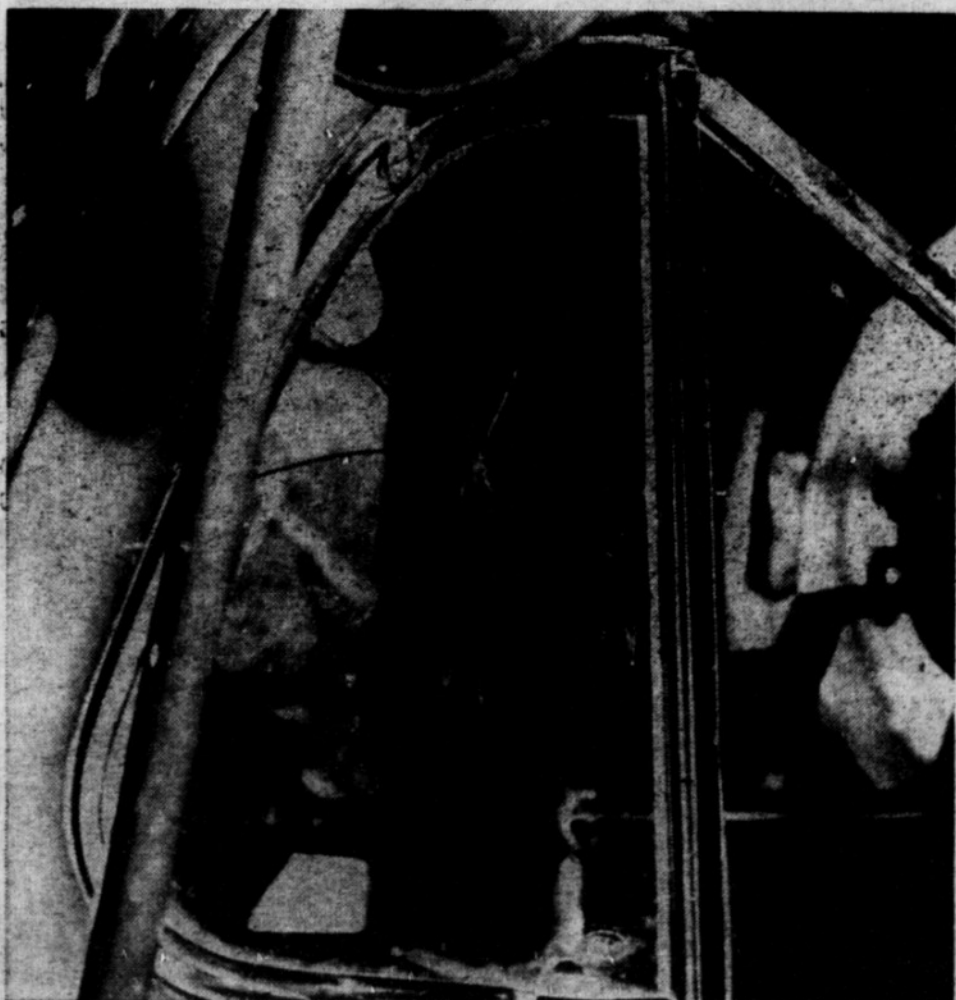

She was afraid to let him grow up, so gave him a kittle car (bicycle) when he wanted a car, and a puppy when he wanted a girl.

After some trouble with teenagers he decided he'd rather have an older sophisticated woman. He found satisfaction in Enid, an old girl-friend of his mother's, portrayed by Ann Soelter, Sp Gr. He called her Bernardine, who was the imaginary ideal girl of his gang.

Later finding out Wormy was the son of one of her old girl-friends, Enid directed him to a more mature outlook on life. He decided to go back to his real high school sweetheart, Jean, played by Dorothy Ennis, who before had seemed childish.

Beau, played by Baird Miller, was leader of Wormy's gang who held out at the Shamrock and got along very well with most women.

The two-act comedy will be given in the Auditorium again tomorrow and Saturday evenings.

Collegian photo by Gary Haynes

**VISIBLE DAMAGE** on Manhattan's firetruck includes this broken window, which allegedly was "hit with a flying beer can—a full one."

### Four Lads Tickets Not Quite So High

Prices for the "Four Lads" dance in the new Student Union tomorrow evening aren't quite as high as many students have come to believe, Conrad Smith, Union dance committee head, said yesterday.

Price of tickets is \$2.25 a couple, not \$3 as was originally decided upon. A story in yesterday's Collegian erroneously stated it as \$2.25 a person.

## Students Say

### Negroes Welcome In Barbershops

"Would you patronize a barbershop that served Negroes as well as white people?"

A number of students were asked this question during the week. The students questioned were 100 per cent in favor of nonsegregated barbershops.

● **KENNETH PAYNE, ME Fr.** "Yes. It wouldn't make any difference to me as long as they cut my hair."

● **JERRY POAGE, PEM Fr.** "Sure. I don't see why Negroes are different from anyone else."

● **LARRY MILLER, "Certainly.** I've gone in barber shops where they served both. Being in the service where there is almost no discrimination has made me used to the idea."

● **PAUL WALLACE, "Yes.** I think they're people too."

● **HARRISON KASH, Chm Grad.** "Sure. A setup such as they have now is an extreme inconvenience."

● **AUGUST DORNBUSCH, AgE Soph.** "Sure. I'd just as soon go to a nonsegregated barber shop. As long as they do a good job of cutting my hair."

● **RAY STRATTON, AgE Fr.** "Yes. The only discrimination I would make would be on the price of the haircut."

● **BILL THORP, BA Soph.** "Certainly, the barber shops in my home town aren't segregated and I've gotten used to it."

● **BOB RAFFERTY, ME Jr.** "Yes. I would go to a nonsegregated barber shop."

● **PEDRO PAU, "I would prefer not** to go back to a barber shop that refused to cut Negroes hair, but I have to or else go down to Yuma street. I have a friend from Puerto Rico who quit school here because of such things as not being able to get a haircut in Aggieville. He would have been quite a basketball player, too."

● **JOE BONAR, Ag Fr.** "Yes. They're not any different from white people."

● **KEITH JACKSON, BA Soph.** "Sure. I certainly wouldn't go out of my way to avoid a nonsegregated barber shop."

● **RALPH MATTINGLY, EE Jr.** "I believe I would. I lived in Wichita all of my life and I've gone to school with Negroes since I was in grade school."

● **WALTER DOUTHIT, MT Fr.** "It's just a barber shop. It wouldn't make any difference to me."

● **LOREN TREGELLAS, EE Jr.** "I don't see what it would hurt. Most of it is just in a persons mind anyway."

● **JOHN SLADE, EE Soph.** "I suppose. I don't see any difference."

● **C. E. LEWIS, AA Jr.** "Certainly. I don't know why I shouldn't. I would like to see the barber shops in Manhattan take up the affair and be nonsegregated."

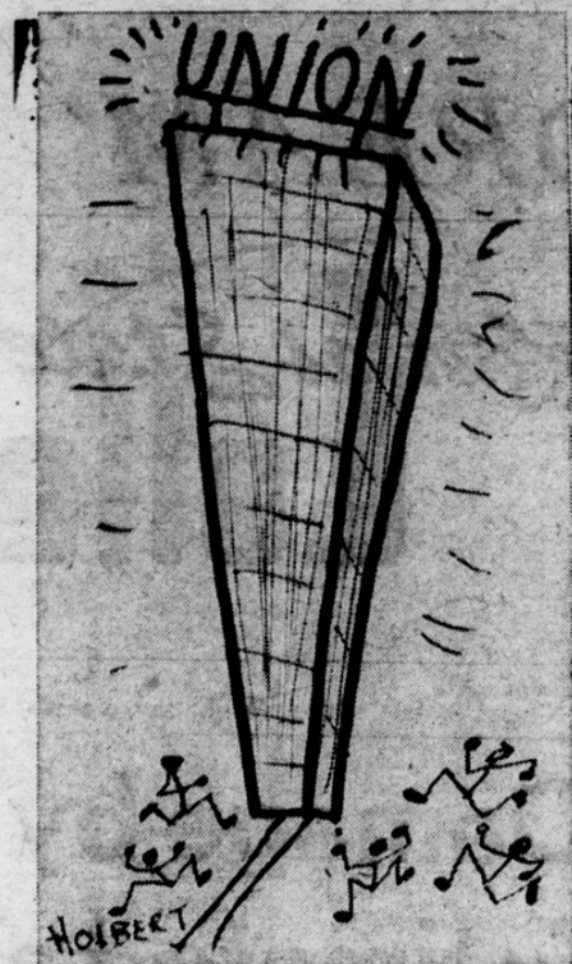

# Opening of Student Union Could Add Unifying Spirit

**OPENING OF** the new Student Union could add a unifying spirit to college life at K-State. For the first time in K-State history, the College has a meeting place large enough, and with enough attractions, to make it the center of K-State social life.

Especially for the non-Greeks on campus, the Union should create a feeling of being "in" on what is happening. Those students who live in rooms off campus, and who don't participate in organized social activities, will have a recreation place where they can mingle with all K-Staters.

**K-STATE HAS** been described as a coldly scientific place where many students study and go their own way without having much feeling for the traditions of the school. Students from universities say they miss a certain "university" spirit.

K-Staters probably wouldn't recognize a "university" spirit if they met one, and probably don't care. But the new Union should add a "K-State" spirit.—Darrel Miller.

## Readers Say

### Price 'Too High' For SU Dance

To the Editor:

**ONE QUESTION** in mind: Are the Union officials trying to pay off the Union construction debt in a few years time? I can remember in the past few years that I have been here at K-State that prices to a name band dance have been \$1.50 a couple. Witness, to such a dance as the Sauter Finegan group last year.

The first dance in the new Student Union this coming Friday night, March 9, has a band that, I would wager to say, has never been heard of by K-State students. Granted, the Four Lads are an A-1 drawing card, but \$3 a couple seems beyond the range of most K-State students. If a poll were to be taken of the K-State students opinions on the price of the tickets to this dance, at least 95% would say, "TOO HIGH!"

**I MAY BE** misinformed as to where the component parts of the \$3 for each couple are being spent, however, who's got \$3 to find out?

How about a reply from the proper Union official?

Sincerely yours,

Jerry Holliday, ARE Jr.

**Editor's note:** The price being charged for tickets to the Union dance tomorrow night has been changed from the original \$3 to \$2.25 a couple by the Union dance committee. This admission charge is necessary to pay a \$1,500 and expenses bill for the band and Four Lads, according to the committee.

# Clean Up Our Back Yard

If a man wants to do something for the good of mankind, he usually doesn't need to leave his own back yard.

A couple of weeks ago, it was proposed at a Student Council meeting that the Council write a letter to Alabama university. The letter inquired about the position Alabama U had taken concerning racial segregation on that campus. The proposal was defeated.

It is doubtful if such a letter would have had much effect. However, if any members of the Student Council are concerned about segregation, they can look into the segregation problems in Manhattan.

**SOME FOLKS** would tell you that there is no segregation problem in Manhattan. However, it shouldn't be hard to disprove that view—which is mostly wishful thinking. The Religious Coordinating Council recently made a start by a poll of Manhattan barbers. The poll showed that Negroes cannot get a haircut in any of the 14 Manhattan barber shops.

In the past, there has been controversy as to whether Negroes could use cafes

here. As a result, some of the cafes were opened to Negroes. The Collegian last fall received a letter to the editor from a colored foreign student that denounced the housing discrimination against colored students. It is indeed sad, with the United States trying to impress foreign nations with our way of life, that foreign students should go home to tell of discrimination in Manhattan.

**SEGREGATION** is a touchy thing. Right now the South is in trouble on this issue. The situation is not nearly so bad in Manhattan as it is in the South. But let's not fool ourselves—there IS segregation in Manhattan, and something should be done about it. In a quiet, sensible way, of course.

The Collegian hopes to throw some light upon the subject. In the next few weeks we'll try to dig out what the local situation is. We'll be interviewing people for their opinions, and will try to present a complete picture.

"Give the people light and they will find their own way," the saying goes. We hope that will work out here.

—Darrel Miller.

# As One Aggieville Merchant Said, 'We Don't Win a Championship Every Day'

**IN THE WEE** hours Wednesday morning, several hundred delirious K-Staters gathered in Ahearn Field House for what President McCain termed "the greatest spontaneous pep rally in K-State history."

Earlier in the night, there was joy in Aggieville as K-Staters whooped it up around a bonfire. When the fire department arrived to put out the fire, Staters took a dim view to such proceedings and put up resistance that resulted in a few hundred dollars' damage.

**THOSE MUTTERINGS** that you hear against K-State students may have some truth in them. It probably would have been better if K-Staters hadn't laid the College open to the bad publicity resulting from the Aggieville debacle.

But these persons who are talking

about "irresponsible college students" are way off base. And those news agencies that splashed distorted stories of what happened in Aggieville were way off base. Perhaps they should have attended the pep rally in the Field House and seen how K-Staters reacted at the game in Lawrence.

**ACTUALLY,** we thought K-Staters acted more sanely than could be expected under the circumstances. And a lot of people didn't mind. As one Aggieville merchant put it, "Hell, we don't win a championship every day."

You may think Tuesday night was bad. What if K-State wins the NCAA regionals in Lawrence March 16-17?

—Darrel Miller

# Matmen To Ames For Big 7 Meet

"DOESN'T HURT—MUCH," says Kyle Mines, K-State grappler, as Bob Mancuso puts the pressure on. Both will see action in the Big Seven Wrestling meet at Ames, Iowa, tomorrow and Saturday. So far this season Mancuso is undefeated. Oklahoma is favored to take the championship.

K-State wrestlers will be in Ames, Iowa, tomorrow and Saturday for the Big Seven wrestling tourney.

Coach Fritz Knorr has guided the Wildcats to a 5-3 record in dual meets. Last K-State victim was Colorado university, rated ninth in the nation in pre-season coaches' polls. That victory gave the Wildcat grapplers a 2-2 record against Big Seven foes for a third-place ranking among conference teams in dual competition. (Missouri and Kansas universities do not compete.)

Best Wildcat hopes for individual crowns in the tourney at Ames are held by Bob Mancuso, 130-pound undefeated co-captain; Gary Haller, 177-pound sophomore who has a 6-2 record; Roland Alexander, 147-pound senior co-captain with a 5-3 mark; and Ray Glaze, 167-pound sophomore who has a 4-3 record.

K-State has finished fourth in the Big Seven tourney the past two seasons.

One sure-fire Olympic team member as well as several possible members will be in action as Oklahoma seeks its seventh straight Big Seven mat title. Danny Hodge, a member of the 1952 team, and currently winner of 23 straight intercollegiate matches without a loss, will be favored at 177 pounds. Hodge is rated as one of the best wrestlers ever developed in this country.

The heavyweight class will be the biggest question mark of the meet. If there is a favorite it probably is Gordon Roesler, Oklahoma. Ellis Rainsberger of Kansas State and Sam Aslerno of Iowa State are capable of winning, however.

At last report, Coach Knorr said that Glaze and Rainsberger will make the trip but will not be in top shape. Glaze has intestinal flu and may not be able to compete. Rainsberger received a sprained wrist in football practice Wednesday.

## NIT Setup Released, To Start March 17

By UNITED PRESS

The 12-team National Invitation Tournament today announced pairings for its competition opening at Madison Square Garden, New York, March 17, and disclosed 1-2-3-4 seedings as follows: Dayton, Louisville, St. Joseph's (Pa.), and Niagara.

First round, March 17—St. Francis (N.Y.)-Lafayette and Duquesne-Oklahoma A&M (day); Seton Hall-Marquette and St. Louis-Xavier (Ohio) (night).

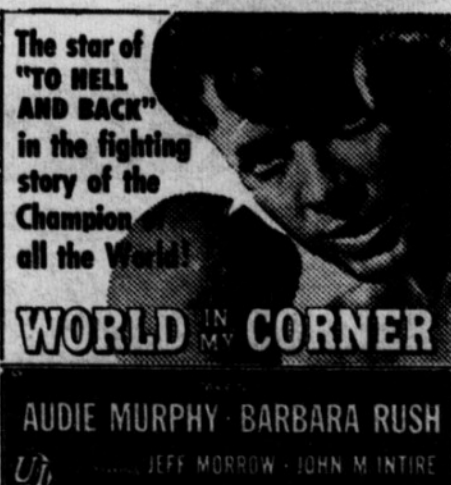

Quarter-finals—March 19: Niagara vs. St. Francis-Lafayette winner and Louisville vs. Duquesne-Oklahoma A&M winner; March 20: Dayton vs. St. Louis-Xavier winner and St. Joseph's vs. Seton Hall-Marquette winner.

Semi-finals, March 22—Winner of Niagara game vs. winner of Dayton game and winner of Louisville game vs. winner of St. Joseph's game.

Finals, March 24, with consolation for third place. Games to be nationally-televized, both on Saturday afternoons, are Duquesne-Oklahoma Aggies first rounder and the finale.

Big Seven Champs Say . . .

## Hustle, Team Spirit, Sophs Were Factors in Hoop Title

By DON MILLER

Since becoming Big Seven champions Tuesday night, a few members of the basketball team have paused to review this season and to visualize chances in the future. Some of these players and their opinions are:

ROY DeWITZ: "I personally think that we've had a very successful season. I can think of no better way to win the championship than by beating KU. I would have liked to play but the fellows did a great job without me."

LARRY FISCHER: "The team has had good teamwork all season and most of us always had planned to win anyway. Roy helped the team a lot during the season because of his hustle. I think he is one of the best defensive men I've seen."

JACK PARR: "Tuesday night was one of the most inspirational moments of the season because of all that depended on the game's outcome. DeWitz's constant hustle, particularly in the Nebraska game in Kansas City, sparked the team all season."

DICK STONE: "We kept hustling Tuesday night even though we were still eight points behind at halftime. Tex said before the game that hustle was one of our good points and if we kept it up it would pay off. This time it did and I feel that this spark will help us at the national tournament."

PACHIN VICENS: "The biggest factor of our success was the

team's feeling of 'one for all and all for one.' In my opinion Fritz's playing was a great help to the team. Our sophomores also came through very well. All this, of course, was possible through Tex's

fine coaching. I would like to play again next year but I am sure the boys will do all right without me. As far as the tournament is concerned, I think we have a very good chance."

# Tex, with 'Faith in Athletics,' Planning for NCAA Playoffs

## Tex Called 'Best Coach'

By DICK HOLDREN

Tex Winter told the Manhattan Tipoff club that this year's K-State basketball team has restored his faith in American athletics.

"In the past three years, since I came to Kansas State, I have been disillusioned by some of the things that I have heard other coaches say were necessary to win, but this year's team has taught me that these things are untrue," Tex said after he had been crowned "King of the Big Seven" by Sandy Sanborn, master of ceremonies.

"I can thank Moon Mullins for thinking right and keeping me right on the scheme of athletics," he continued. "Bebe Lee has indirectly contributed to my understanding. Although he had difficulty in his first years at Colorado, Bebe never faltered in his athletic philosophy."

"The world loves a winner but the loser stands alone," he told the crowded Wareham hotel Terrace room.

President McCain repeated the remarks he made at the pep rally Tuesday night.

"This was the greatest victory in the history of K-State," he said. "This is a wonderful team. They are really champions in the best sense of the word. We have the best coach in the nation in Tex Winter. K-State is very fortunate to have a fine young coach like Tex."

Moon Mullins, director of athletics, said that it was "wonderful to be associated with such men as Tex, Howie Shannon, Roger Craft (assistant freshman coach), train-

Tex Winter

er Porky Morgan, and manager Bob Boyd, all who have contributed greatly in making this team a group of high class boys."

Tex introduced the team to the group and had the seniors make a few remarks. Fritz Schneider, whose 36 points sparked the Cats to the championship win over KU, was absent because he was given the day off to visit his girl in Kansas City.

Tex closed the meeting with more praise for the athletic system at K-State.

"We can thank God that we have the wonderful athletic program that we have."

## Good Break In Regional

By ROGER MYERS

"Playing at Lawrence in the NCAA playoffs will be an advantage for us," Coach Tex Winter said. "Because Lawrence is close, many of our people will go to see the game, and friendly cheering means a lot," he said.

"I think quite a few KU people will come down and yell for K-State and that should help us too."

K-State will play the winner of the Oklahoma City U-Memphis State game a week from Friday night at Lawrence in the first round of the western regional NCAA tournament.

OCU and Memphis State, at-large teams, will play each other at Wichita Tuesday night to determine who will meet the Wildcats at Lawrence.

Winter said he would go to Wichita Tuesday and scout the two teams. "It will be the first time I've seen either team play, but I expect Oklahoma City to win."

"OCU will be tough competition," Tex said. "They've been rated all year and K-State has only been rated among the top 20 once this season," he said. At one time this year the OCU Chiefs were rated 10th in the nation and they finally finished the season with a 14th ranking.

The second game of the Tuesday night double header at Wichita pits Southwest Conference winner SMU against Border Conference champion, Texas Tech. If K-State wins the first round game it will play the winner of the SMU-Texas Tech game.

## KS Mermen Go Varsity

Swimming is now a varsity sport. The K-State swimming club's hopes of becoming a team were realized today when the athletic council recognized swimming as a varsity sport.

Dean John C. Weaver, member of the council, said the council took action yesterday to recommend varsity status for swimming and to give financial support to the activity. "I think it was a wise decision and a good move to increase our over-all sports program," Weaver said. "I hope it proves successful," he added.

Bill Thrall, swimming club coach, said that he was very very pleased at the news. "Now the wheels will start to roll to make next season a good one," he said.

Excitement among the swim-

mers ran high. Jerry Fitzgerald, freestyler on the club, said, "This will really go over big and attract interest."

"Once we get started we can hold our own with any other school in this area. We have been putting in our time and work for personal satisfaction up to now. Now we have something to work for," he said.

"It's great," said Wally Brown, who swims the individual medley relay. "We have been waiting a long time for this. I'm sure glad to hear it."

The decision climaxed two years of work by Bill Thrall and a small group of swimmers who were determined to form a swimming team at K-State.

## Final U.P. Poll Rates Dons First

Ho hum.

The San Francisco Dons led the United Press selections as the top team in the nation again this week.

The Dons were named the national basketball champions for the second straight season. United Press had named the Dons the number one team in the pre-season ratings and they led the poll every week of the season.

The Dons will begin their quest for their second straight NCAA title next week when they go against UCLA in a regional meet.

Three other teams besides the Dons received first place votes in the U.P. ratings. They were received by Dayton, Alabama, and Louisville.

The Standings:

1. San Francisco . . . 24-0
2. North Carolina State . 24-3
3. Dayton . . . . . 23-3
4. Iowa . . . . . 16-5
5. Alabama . . . . . 22-2
6. Southern Methodist . 22-2
7. Louisville . . . . . 23-3
8. Illinois . . . . . 18-3
9. UCLA . . . . . 19-5

# U.S., Britain Agree On 'Show of Force'

Compiled from United Press  
By HARRY MACHIN

London—The United States and Britain have agreed on a show of force in the Eastern Mediterranean to prevent a threatened war between Israel and its Arab neighbors, informed sources said today.

Diplomatic sources said the tipoff came when the United States announced it was sending 1,800 marines into the area at a time when Britain was reinforcing its Cyprus garrison with troops who could be flown to the Middle East within hours.

Prime Minister Anthony Eden called his cabinet into emergency session today to study the growing demand for firm British action in the area. Eden previously had requested U. S. aid in preventing possible war.

Though Washington still had not answered Eden's SOS, talks on the future of the Middle East were under way in Cairo among the Arab nations; in the United Nations; in Karachi, Pakistan; in Washington; and in London.

## Ike's Health an Issue

Washington—Senator John Sparkman (D-Ala.) served formal notice last night that Democrats would make President Eisenhower's health a major campaign issue.

Sparkman said Eisenhower was working only a 35 to 40 hour week now compared to the 60 hours he devoted to the affairs of state before his heart attack.

# Alexander Is Big Help To Student Committees

If you have passed the new Student Union in the last two weeks at almost any time of the night you couldn't have missed seeing the lights on the second floor at the southeast end of the Union.

That's the student activity center. If you had looked closer, you would have seen Bob Alexander, program director of the Union, working along with committeemen planning tonight's opening of the new Student Union.

Alexander, a native of St. Louis, Mo., joined the K-State Union staff last September. Prior to his staff appointments here, he spent 3½ years at Illinois university as assistant social director for the Illini Union.

It was there I met my wife Connie," Alexander said. "She was a Union committee member, and I was staff adviser." Mrs. Alexander is now chief dietitian at Southeast hall.

After graduating from high school at Chicago in 1946, Alexander served 18 months in the U.S.

Bob Alexander

Army with overseas duty in Japan. He entered Illinois U., where he became interested in Illini Union social activities.

In March of 1952, his senior year, he accepted an assistantship on the Union staff. At that time he directed the activities of the University of Illinois Spring Carnival, which drew a crowd of 25,000 people.

"Mr. Alexander's ability to work with, rather than over, the students on their committee projects is a big factor in his popularity," said one student.

"He shows a genuine interest in every idea we committeemen have; whether it's a new design

for the arts lounge or an advertising scheme we have thought up. He is always willing to let us express ourselves in our work here, then he will show us both the good points and bad points of our ideas."

"K-Staters are on our Union committees because they chose to be. When a student slips up, I don't think they really goofed; just the opposite. They have learning by doing," Alexander said.

"I point out the mistake to the student; therefore he has gained knowledge that only experience

and a little guidance can teach him."

Alexander stated the purposes, which affect both committee members and participants, of the Student Union activities program.

1. To provide experience that will complement formal classroom training.
2. To create and train leaders.
3. To enrich and enhance the social, cultural, and educational life of students.
4. To develop poise, personality, and confidence in students.
5. To offer opportunities for fun and enjoyment to the students.

## Coed Meets Caliph During Iranian Visit

By MARILYN McKNIGHT

Teaching English to Iranian children, and meeting the Prince of Iran were highpoints of a 10-month visit to Iran by Karen Skiver, Soc Soph.

Karen left for Iran in October of 1954, and returned to the States last July. Her father is employed by the state department in Iran.

Living in an Iranian town with only 16 other Americans, Karen said she soon learned the customs of the Iranian people.

She found that tea is served in all homes, and its serving is considered a hospitable way of entertaining. Tea also is drunk in offices, she said. It is served by tea-boys, who are employed for that purpose.

"A girl is considered an old maid if she isn't married by the time she is 16 or 17," Karen said. "Men usually are much older when they marry."

A wedding is the people's best excuse to get together, Karen said. The priest always comes to the bride's home. During the ceremony the bride stays in one room and the bridegroom in another. Only a few persons attend the ceremony, but all the friends and relatives are invited to the reception.

Karen noticed a friendliness and an interest toward the Americans wherever she went. The children always spoke to her, and seemed happy for anything given to them, she said.

Karen said that she noticed three types of Iranians: The

wealthy people in the cities; the farmers in the villages; and the tribesmen. Most of the people farm for a living, she said.

Only the wealthy can afford to attend school, and no one is required to go, Karen said.

Men in the cities in Iran wear suits; even ditchdiggers can be seen wearing vests, ties, and suits, she said. Tribesmen wear large baggy pants, sashes, long coats, and Persian lamb hats. The women wear long Moslem robes.

Karen was impressed most of all by the hospitality of the Persian people. "They really know how to make a person feel at home," she said.

## Union Engineer To Direct Behind-the-Scenes Action

As part of his duties as Student Union engineer, Clarence Shandy will be in charge of directing the simultaneous lighting of the new building following ribbon-cutting ceremonies this evening.

Students will be stationed at the various electrical switch boxes to turn the lights on when they receive Shandy's signal.

Shandy will have charge of plumbing, heating, mechanical, and electrical operations in the new Union. He will also direct the custodial work, which will be done by five full-time janitors and about eight student part-time helpers.

Shandy said the student helpers will arrange and prepare the rooms for meetings and banquets.

Dean McIntyre will assist the engineer and take charge of operations in the evenings.

Shandy was employed by Sears Roebuck prior to joining the Union staff last December. He is married and has four children.

# Six to Eight Thousand Expected for Opening

Between six and eight thousand visitors are expected to rush into the new Student Union for their first glimpse of the \$1.6 million structure following ribbon-cutting ceremonies at 8 o'clock this evening.

Following the ceremonies, lights in the building will be turned on and activities throughout the building will begin. A circus theme will be carried out.

**Matt Betton and his band will play for dancing from 8:30 p.m. to midnight in the ballroom. A variety show will be presented during intermission.**

A movie of the Wisconsin Student Union will be shown in the Little Theatre at 8:30, 9:30, and 10:30 p.m.

An art exhibit, will be shown, in the art room, and the music listening rooms, the library, and snack bar will be open.

Members of the hospitality committee will be in different parts of the Union to answer questions. They have prepared brochures explaining the activities of the Union and showing diagrams of the three floors.

A dance, featuring the Four Lads, will be held Friday night in the ballroom from 9 p.m. to midnight.

## Temporary U. Manager Now Is Union Accountant

Students drank 1,700 cups of coffee daily in the temporary Student Union. More coffee was sold than everything else added together.

Who should know this better than Verlyn Richards, student manager of the temporary Student Union? Purchasing supplies, keeping records, and hiring help were only some of his duties.

Since his January graduation in business administration and accounting, Richards has been full-time accountant for the new Student Union. This job includes keeping accounts and managing the information desk.

"The experience I gained as manager of the temporary union added a practical side to my education," Verlyn said.

"Lack of time" was the biggest disadvantage, Richards said. His day at the union lasted from 7 a.m. to 6 p.m., with time off

for classes. In addition, Richards found time to be a member of Scabbard and Blade.

"I started working here as a student, then moved up in June of 1953 to manager," he said. "In my freshman year, I worked in a Manhattan drug store. Ever since I can remember, I've been doing some kind of sales work."

With a staff of 18 students, Richards daily served about 1,500 students who used the temporary Union. Rush hours were from 8:30 to 11:30 a.m. and from 2:30 to 4:30 p.m.

Some areas, such as the ping pong tables, were always in use, he said.

## Jack Lockett Is To Direct New Cafeteria

Hiring personnel and planning the Union kitchen layout and operating procedures have been some of the duties of Jack Lockett, food service director of the K-State Union.

Lockett graduated from Oklahoma A.&M. in 1954 with a degree in hotel and restaurant management, and was hired as the assistant food manager for their student union building.

While a student at Oklahoma A.&M. he was a member of the Theta Chi fraternity, and belonged to the Junior Hotel Greeters society, an organization for people in hotel work.

Lockett began his duties at K-State last September. He is very enthusiastic about the new Union and thinks it has "excellent facilities and food services."

One of the things he likes to do most is travel. Lockett lived in Turkey for six months when his parents were with an oil company there. In 1954 he took a world tour.

Lockett also likes to fly. He has a private pilot's license and flies about 2 or 3 times a month.

Although he is from Oklahoma City, Lockett says he feels at home in Kansas because he has lived here for short periods of time.

You'll be pleased with a Collegian want ad.

## Name Dances, Concerts Planned for New Union

Getting things off to a flying start in the new Union, the Four Lads will be featured tomorrow evening in the first big-name dance in the building.

The quartet will sing to the instrumental music of the Del Clayton orchestra in a four-hour dance, sponsored by the Union dance committee.

Each semester the committee will sponsor one or two dances or concerts with big-name groups. On most weekends throughout

the school year, the Union will sponsor smaller dances with local orchestras.

Work on these dances is done largely by students who are members of the committee. They handle various jobs as members of six subcommittees—arrangements, ticket sales, publicity, secretarial, decorations, and entertainment.

Nearly all dances, both small and large, will be in the Union's grand ballroom.

## JOB INTERVIEWS

Seniors seeking jobs may schedule interviews for next week at the Placement office in Anderson hall, said Chester E. Peters, director of the placement bureau.

The interview schedule:

March 12—Communication Accessories—EE—E 120; Sears Roebuck—BA, Ec, BAA, liberal arts—A 110; Northwestern Mutual—BA, Ec, liberal arts—A 110; Civil Aeronautics—Ce, EE, (summer work also)—E 142; Commonwealth Edison—EE, CE, ME—E 120.

March 12-13—Pittsburg Plate Glass—ME EE, Chm, Pys, (Juniors only)—E 109.

March 13—Pittsburgh-Des Moines Steel—ME, CE, IE—E 142; Bureau of Ships—ME, IE, CE, EE—E 109; Black & Veatch—CE, ME, EE, Ar, ArE, (summer work also)—E 142; Fleming—BA, AG, (summer work also)—A 110.

March 13-14—YWCA—all women—A 110.

March 14—Sylvania—EE, Pys, Mth, ME, IE—E 120; Atlas Powder—CE, ME, IE, EE, Chm—XX 105; Borg-Warner—ME, IE, EE—E 109.

March 15—Carnation—Ba, Ag, milling accounting, Chm, IE—A 110; Socony—BA, Ec, engineering sales—A 110; Westinghouse—EE, ME, IE, CE, Pys, Mth—E 120; Hallmark—Men: BA, BAA, ART, IE.

TJ, Mth, Sta, marketing, liberal arts, Eng. Women: BA BAA Eng, Mth, Ec, Art, TJ, marketing—A 110.  
March 16—Carnation—Ag, DH, dairy technology—Wa 123; Touche, Niven, Bailey, & Smart—BAA—A 110.

Students seeking teaching positions should contact the placement bureau immediately for appointments, said Chester E. Peters, director of Placement.

Dr. Byron L. Shepherd, assistant superintendent of schools, Tulsa, Oklahoma, will conduct interviews March 18.

Mr. Clark H. Gogges of the Stockton public schools, Stockton, Calif., will interview March 16. Mr. Gogges is especially interested in students seeking jobs as kindergarten through third grade teachers. He is also looking for 7-12 grade teachers in Homemaking and Industrial Arts.

Students seeking jobs as U. S. Civil Service commission accountants, auditors, and geophysicists may apply for examinations with Roy E. Drown, representative, at the Manhattan Post Office.

These jobs, paying from \$3,770-\$11,610 a year, are open in headquarters offices in Washington, D. C., and in field offices through the nation. Applicants must have had appropriate college study, accounting experience, or a combination of the two. They must also have a CPA certificate, which they can get through a written examination in their state.

# A CHALLENGING CAREER in FOOD DISTRIBUTION

## ATTRACTIVE SALARY— RAPID ADVANCEMENT

THE GRAND UNION CO. offers the college graduate outstanding opportunities for personal development in an industry that has remarkable growth potential.

For 83 years the GRAND UNION CO. has been pioneering new and better ways of merchandising and distributing food to the consumer. Today GRAND UNION operates hundreds of large modern super-markets from Virginia to Canada and is opening new stores at a rate that will double our present sales volume in the next five years.

A GRAND UNION Personnel Representative will be on your campus soon to interview interested Seniors. Those who qualify will be invited to visit our headquarters in East Paterson, New Jersey. The men that are employed will participate in a formal 18 months Management Training Program that is rigorous but rewarding.

All personnel benefits including a retirement plan, medical-hospital-surgical insurance, group life insurance, profit sharing plan, stock option plan.

Contact your college placement office for interview appointment.

## Students Carrying Paintings Not 'Frustrated Art Lovers'

By ROSELYN KIRK

Students seen dashing across campus burdened down with large framed pictures tucked under their arms may be frustrated art lovers, but the chances are they are members of the psychology of art class.

Roy C. Langford, professor of psychology and instructor of the class, said that he "gets a lot of kidding" from burdening his students down in this unorthodox way.

### Enjoyment Is Purpose

There is no "gimmick" in connection with these portable art galleries, Professor Langford said, "no tests or papers. The only purpose is enjoyment."

This should be enjoyment because all but two of the pictures are original etchings, lithographs, or oils by such well-known artists as Benton, Sehn, and Sandzen. Local talent has not been disregarded in the collection as Prof. Elmer Tomasch and Prof. John Helm's work is also included.

Psychology of art students do more than

transport pictures though. Almost every class makes an all-day trip to the Nelson Art gallery in Kansas City, Mo. Many classes also journey to Lindsborg to see Sandzen's studio and view many of his original paintings.

### No Textbooks Used

Psychology of Art is unique because "it is not a textbook course," Langford said. The purpose is "to look behind the canvas and see what makes the wheels go round."

Psychological principles are combined with art appreciation in studying such concepts as the language of design and the psychology of color.

A special feature of the class is when students are invited to the Langford home to see the effects of colored lights on colored objects or to observe the psychological phenomena that enter into mixing pigments. One year students were handed a brush and paper and told to try a picture themselves.

"Some of the results weren't outstanding but others were surprisingly good," Langford said.

### An Uncommon Course

The study of art in a psychology curriculum is "uncommon" Langford admitted, but he went on to note that it has been tried in other colleges. Uncommon too is the wide variety of students enrolled. Students in home economics, architecture, journalism, and many others are represented.

**FAMILIAR SIGHT**—Not a "frustrated art lover" smuggling Rembrandt originals, just a student of psychology of art taking home his assignment.

## College Cheese Lab Churns Only Locally Made Cheddar

**CHEESECAKE**, K-State style—Appearing in one of the holes in a piece of Swiss cheese, Barbara Starnes, DIM Soph, appears to enjoy her role. "I'm glad it isn't Limburger!" she exclaimed.

## Want an Ash Tray, Pocketbook? Try Design in the Crafts Class

Want to make your own wedding ring, pocketbook, salad bowls or ash-trays? These are only a few of the articles are being made this spring by students enrolled in a design in the crafts class.

"We serve the whole College," explains Kurt Matzdorf, instructor. "We emphasize both artistic design and practical use. Our purpose is to turn out people who will be able both to hold down teaching positions and to go into professional designing."

"Students should be allowed to have some time to forget about studies and learn of the more artistic things of life, as we are doing in this class," Matzdorf said.

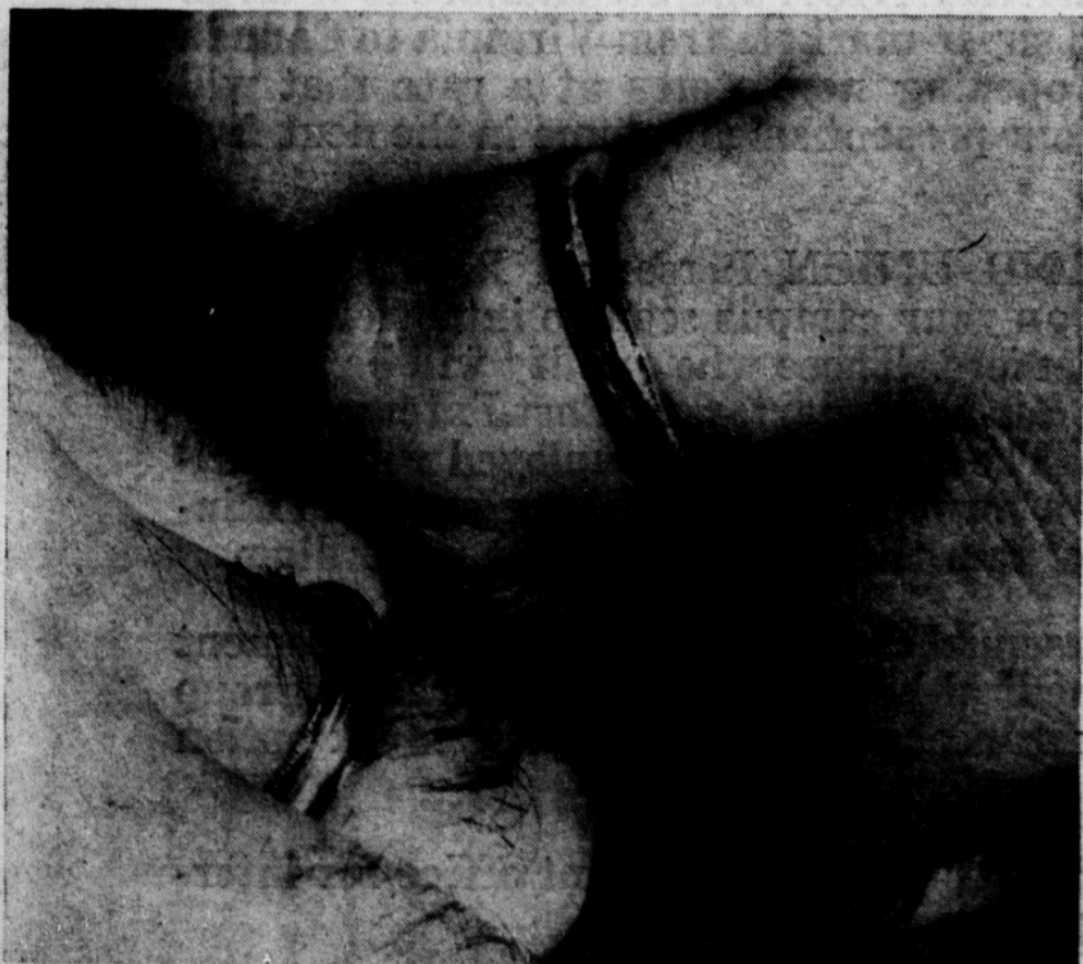

"All benches and other equipment

we use have been built with specifications in mind for the proposed new Home Economics building. We could transfer and set up our equipment in the new building within half an hour," Matzdorf pointed out.

Each student does at least one piece of work in wood, leather, and metal during the semester, he said.

Matzdorf has been at K-State since September teaching metal work, pottery, weaving, and design in the crafts. Next year he will teach silversmithing, which will be offered as a separate course for the first time at K-State.

The crafts room is on the third floor of Anderson hall.

**WHICH TWIN** has the phoney? One of these masculine hands is wearing a wedding ring made by a jeweler and the other by a design in the crafts class.

By ESTALEE VAN SICKLE

"The only cheddar cheese actually produced in Manhattan is made in the college cheese lab," F. H. Warner, plant superintendent of the College creamery, said.

"Students enrolled in the cheese class work in the lab where they gain experience in making many types of cheeses, including American cheddar, Monterey, Swiss, brick, processed, cream, and cottage."

### Cheese Sold on Campus

All the cheese that is made is sold on the campus to the residence halls, the athletic cafeteria, and the College cafeteria. Some is sold on the College milk route, and in the Waters dairy bar for 60 cents a pound.

"The class uses an average of 75 gallons of milk for cheese making during each lab period," he said. The cheese is formed into molds weighing 5 pounds, 12 pounds, and 20 pounds. Then it is dipped into paraffin to

keep it from molding or drying out. It is then put in a cooler to age for at least 6 months before being sold, according to Warner.

### Ozone-Making Machine

An ozone-making machine is kept in the cheese room to sterilize the atmosphere and prevent the cheese from molding.

"The whole process of cheese making from start to finish takes seven to eight hours," Warner said. "The cheese class runs tests on the finished cheese to determine moisture content, butter fat content, and its keeping quality."

At the beginning of the semester, Warner reported there were 3,500 pounds of aged cheese on hand. He expects it all to be sold before the end of the semester.

Students enrolled in dairy manufacturing take the cheese lab course, which is offered every two years for 3 hours credit.

# New Student Union Fulfills Students' Thirty-Year Wait

A 30-year-old dream of K-State students and alumni will come true at 8 p.m. tonight, when the new \$1,650,000 Union formally opens.

Gerry Day, student body president, and Rick Harman, president of the K-State Alumni association will preside at the formal ribbon-cutting ceremony.

The first suggestion for a Union at K-State was made by J. C. Christensen, K-State alumnus, in 1926. Ten years later a group of student leaders formally requested President F. D. Farrell to appoint a commission to begin planning the building.

Students, in 1938, voted to finance the structure with self-assessed fees, and a \$5 a semester fee and a \$2 fee for summer sessions was formally established in 1941.

The fee was increased to \$7.50 in 1953 and now is being used to retire a million dollar bond issue, which will be paid off in about 20 years.

Hopes were high and blueprints for an elaborate five-story structure soon were drawn up, but World War II forestalled construction, and zooming labor and material costs forced abandonment of the plans.

A temporary student union building, acquired in 1947, eased student pressure for a union, and in 1949, after 13 years of work, the original student union committee was dissolved.

However, when James A. McCain became president in 1950, he gave the Union top priority in future K-State building plans, and his enthusiasm enabled the long-time dream to become a reality.

In the fall of 1950, Porter Butts, a nationally known consultant on unions, came to K-State to inspect existing facilities, hold conferences with key personnel, and outline surveys and studies needed for planning a union building.

With the full cooperation of the state architect's office, plans and specifications for the building were drawn up in time to let contracts early in 1953, and on April 30, 1953, ground for the building was broken. Early last year, Loren Kottner, union director, was on the job to plan for staffing and operating the building.

The entire building will be in use except for the fourth floor on the east wing, which is not yet completed. It is a four story building of concrete and masonry with an exterior of native split-face limestone and glass.

The first floor, or basement, contains the game and crafts room, a student hangout, dish-washing and mechanical equipment center, and storage area.

The cafeteria, snack bar, and kitchen are located on the west end of the second floor, or main level, while a cultural center consisting of lounging areas, art lounge, browsing library, music listening rooms, and lecture hall, is found in the east end.

The ballroom and banquet areas dominate the west end of the third floor, with the east half of the

floor devoted to meeting rooms, a student activities center, and Union offices.

The new Union, planned especially for K-State students, is among the largest unions in the country. It will offer ideal recreational lounging, eating, and meeting facilities for students, and will be

more than just a plaything, emphasized President McCain at ground-breaking ceremonies nearly three years ago.

He predicted that through its art gallery, music and book rooms, and lecture hall, the Union will be a vital and enriching cultural influence in the community.

**Engineers, Physicists, Mathematicians, or Metallurgists:**

## The Westinghouse Man With The Facts will be here on March 15

**Ask your placement officer for an appointment NOW!**

You'll soon have to make that crucial decision . . . where to start your career. But, before you decide, you owe it to yourself to talk with the Westinghouse Man With The Facts. He'll be here on campus on the above date to interview engineering graduates. Be sure to get on his schedule. He wants to talk with Electrical, Mechanical, Chemical or Industrial Engineers, Physicists, Mathematicians and Metallurgists. Ask him about career opportunities at Westinghouse . . . the million-dollar Education Center with its complete training program . . . how you can select a career in an industry of your choice, doing the kind of work you prefer . . . Master's and Ph.D. degrees at company cost . . . chances for advancement . . . how other men made fast progress. He can tell you . . . he has the facts.

You'll want to know, too, about the big Westinghouse expansion program, and how it offers you exciting opportunities for growth. And, about interesting and rewarding work in such promising new fields as nuclear energy, automation, decision devices, semiconductors, military and industrial electronics. There's plenty of room to move around . . . and up . . . at Westinghouse.

A frank talk with him will help you make a sound decision. So, contact your Placement Officer now and have him make a date for you with the Westinghouse Man With The Facts.

# KSC's Union Is Third Kottner Helped Establish

"Size and cost are not proper criteria for judging the quality of a student union," Loren Kottner, new Student Union director, said.

"K-State's Union is one of the finest in the country. Every union should be built to meet the needs of the campus where it is located. K-State's Union is going to fulfill most of the needs and desires of the students," Kottner added.

Kottner should know what he is talking about. The K-State Student Union is the third new union Kottner has helped establish.

Before coming to K-State in February of 1955, Kottner was assistant director of the Wilson Compton union at Washington State college.

He worked there two years be-

fore the opening in 1952, and continued there until 1955. He was in charge of operation of food service, games, scheduling, information service, and maintenance.

From 1948 to 1950, he was activities director at Case Institute of Technology in Cleveland. This union also was new at the time. His chief task was working with student committees.

Kottner previously was boys' secretary of a YMCA at Princeton, N. J.

He received his bachelor of arts degree in sociology from Nebraska Wesleyan. At the present time, he is working on a master's degree in recreation from New York university.

K-State's Union is unique in that student clubs have access to ditto machines, typewriters, meeting space and assistance from the Union staff, Kottner said.

Welcome

## Former President To Address VIPs At Opening Banquet

The step-by-step progress toward a Union building will be traced by President Emeritus F. D. Farrell at a banquet marking the opening of the Student Union tonight.

Farrell, who was president when the Union plans were developed, will use as his theme the old maxim: "Everything Comes To Him Who Waits—and Hustles."

President McCain will preside at the banquet and give the welcome. The Rev. B. A. Rogers will give the invocation and remarks will be made by Leon Armantrout, Union governing board chairman, and Loren Kottner, Union director.

Several members of the Student Council that first formulated plans for the Union in 1936, other Student Council members from past years, past Union planning board members, state government officials, and other dignitaries will attend the banquet.

President McCain will also speak at the ribbon-cutting ceremonies before the main entrance at 8 p.m.

Following the ribbon-cutting ceremonies, lights will flood the building and facilities of the Union—the ballroom, game rooms, lecture hall, "Dive," and other areas in the structure—will be put ot immediate use.

Bob Alexander, Union program director, said that the entire campus community is invited.

## Attire for Tonight Party Dresses, Suits

Dress for the Union opening this evening will be party dresses for girls and suits for boys, Bob Alexander, program director, said this morning. He emphasized no formal attire is expected.

**DEDICATION BANQUET**—Among guests at the Student Union dedication banquet last night were (left to right) Union Director and Mrs. Loren Kottner; Mrs. John McCuish, wife of the lieutenant governor; McDill Boyd of the Board of Regents; Mrs. Herbert Wunderlich; and President Emeritus F. D. Farrell. President McCain introduced other prominent guests.

## New Union Praised At Opening Banquet

"Here is the greatest event of all the culmination of 20 years of planning and aspirations," President McCain told more than 160 guests at a dedication banquet celebrating the opening of K-State's new Student Union last night.

"I can with great appropriateness say here at K-State, our cup runneth over," he said.

The President summed up the events of this year including a larger enrollment than was expected, dedication of a library wing, a new extension building, a new feed technology wing, the Chapel auditorium to be dedicated April 15, and the Big Seven basketball championship. He then pointed out that the New Union was the greatest of all.

President Emeritus F. D. Farrell, principal speaker at the event, told the group that the dedication of the Union building verifies an ancient maxim, "everything comes to him who waits," modernized.

Dr. Farrell said that this maxim has been modernized to "everything comes to him who waits and hustles for it."

"It is almost 20 years since students ceased to wait and began to hustle," he said.

A proposal to build and conduct a Student Union was begun by students. On March 11, 1938, the Student Council held a vote to determine student sentiment on the proposed Union. Seventy-eight percent of the students voted and were three to one in favor, Dr. Farrell said.

This vote and the obvious need for the building

prompted the state legislature to vote the necessary authority for students to begin the project, he said.

"World War II and other developments delayed construction of the building but it is open now and should contribute to the ability of the College to provide students a liberal education," Dr. Farrell concluded.

Dr. McCain introduced the directors of unions from several universities who have been closely following the progress of the new Union.

Abe Hesser, director of the Oklahoma A&M union: "Students and staff of Oklahoma A&M wish you all success with your new union."

Frank Noffke, director of the union at Washington State college: "As much as I like K-State's basketball success, tonight marks the winning of a new and greater victory. I bring our best from Washington State."

"One item of advice, regard your union, K-State's living room, as your own. To Loren Kottner, well done!"

Duane Lake, director of the University of Nebraska union: "The basketball victory and the Union opening have put K-State on the pinnacle. This is a magnificent building and I feel it will have one of the greatest impacts on student life."

President McCain continued to introduce guests attending the banquet. He expressed his appreciation to A. L. Pugsley, dean of academic

# Kansas State Collegian

VOLUME LXII

Kansas State College, Manhattan, Kansas, Friday, March 9, 1956

NUMBER 100

Collegian photo by Gary Haynes

**A SNIP ADMITTED THE MULTITUDES.** Gerry Day (left), student body president, snips the ribbon which allowed more than 5000 persons to view the new Student Union last night. Also shown are Loren Kottner (center), Union director, and Rick Harman, president of the K-State alumni association.

## Doors of New Union Opened at Ceremony

With the slashing of a purple and white ribbon by Gerry Day, student body president, at 8:37 p.m. yesterday, over 5,000 impatient K-Staters poured into the new Student Union.

The ribbon-cutting ceremony, starting 37 minutes late, began with a peppy number

by the K-State band. Pi Beta Phi and Phi Delta Theta members entertained the crowd with cheers for the Union.

In dedicating the Union, President McCain said it promised "a richer and more satisfying life for students at K-State."

Gerry Day officially received the Union from McCain.

"The Union is now the responsibility of our present students—both to past and future K-Staters," Day said.

Other speakers at the ribbon-cutting were MacDill (Huck) Boyd, member of the Board of Regents; Rick Harman, alumni association president; Leon Armantrout, Union governing board chairman; and Ed Gillette, head of the Union program council.

## SC Committees Seek Applicants

Students desiring positions on the Student Council ethics and honors committee and orientation committee may phone applications to Mark Drake, Council president, at 8-4495 or to Gerry Day, student body president, at 6-7734 before 5 p.m. Monday, said Drake.

Students may also submit written applications at the Dean of Students office.

## First Dance Will Feature Four Lads

Appearing in person for the first big-name dance in the K-State Union this evening will be the "Four Lads", nationally-known recording quartet.

Their career began at clubs and hotels in their hometown, Toronto, Canada, and in nearby cities.

The first big break for the group came when they were asked to sing on Elwood Glover's "Canadian Cavalcade," coast-to-coast radio program.

They went to New York for a short engagement which lasted for 30 weeks at a nightclub.

The Four Lads were originally signed to back Johnnie Ray on the Columbia recording label.

Before long they were making their own recordings. Recent popular recordings include "Is-tanbul," "Skodiam," and "Moments to Remember."

The four, Frank Busseri, baritone; Bernie Toorish, tenor; Connie Codarini, bass; and Jimmy Arnold, tenor, have a unique bouncy style of singing.

Instrumental music will be provided by Del Clayton and his orchestra, a group chosen by the quartet.

"Moments to Remember," the title of their recent hit, will be the theme of the dance.

## Ron Bryant, Sondra Tate To Reign at Open House

Ronald Bryant, ME Jr., and Sondra Tate, Art Soph, have been elected St. Pat and St. Patricia for the 1956 Engineering Open House, March 16 and 17. The couple will be crowned March 17, at St. Pat's Prom.

St. Pat and St. Patricia are elected from

pairs of candidates selected by each of the seven departments in the School of Engineering. Each engineer votes for four of the candidates, the two St. Pats and two St. Patricias of his choice.

Miss Tate and Mr. Bryant were both candidates for the mechanical engineering department.

Miss Tate is from Wichita. She is a member of Pi Beta Phi social sorority and is acting as activities chairman. She is a cheerleader and has been attendant for Royal Purple and homecoming queens.

Miss Tate is a graduate of Hays High school where she was yearbook queen, cheerleader, homecoming attendant, and a National Honor society member.

Ronald Bryant is from Tahlequah, Oklahoma. He is a member of Sigma Chi social fraternity, and Pi Tau Sigma honorary. He is secretary for Scabbard and Blade, ROTC honorary, and vice president of junior assembly of ASME, professional fraternity.

Bryant is a graduate of Tahlequah high school where his activities included football, baseball, Key Club, and the National Honor society. He was president of the junior class, vice president of the student body, and delegate to Boys' State.

# Birthday Wishes for KS's Superlative Student Union

It was a little over five years ago that I had the opportunity to advance the proposition on this campus that a Union is not just a building, but something beyond—in the best sense, a well-considered design for the community life of the college. And this is the course Kansas State set out upon.

Now, happily, tonight there is the building—the essential beginning. For when the informal, out-of-class activities of students and faculty are grouped around a recreative, cultural and discussion center like this kind of building, there can be a new college life of great richness; and what was once perhaps only a campus neighborhood can now develop, indeed, into a strong, closely knit, culturally active, and socially conscious community.

There is one thing more to come.

When students and faculty take the further step of actively managing the affairs of the campus themselves, as I am sure they will at Kansas State, learning thus to participate personally and responsibly in the conduct of community enterprise, the highest hopes of all will be realized—for then there will be a salient advance in education for democracy. "Education for citizenship," President Eisenhower has said, "is the first function of our educational system." To strengthen the cause of effective citizenship, I think, is the ultimate Union purpose.

May I join others, by proxy, in the hope that these new superlative facilities will bring to students the maximum means of learning through their common life together the ways of leadership in our democracy.

Porter Butts,  
Director of the Wisconsin Union

President James A. McCain,

"Students and staff members of 248 college unions join in sending warm greetings on the occasion of the dedication of your magnificent new union. Our association is grateful to Kansas State college for providing not only a fine building but strong leadership in helping to make the Union an educational complement of the class room and laboratory."

Frederick Stecker, president,  
Association of College Unions

The Governing Board:

"The Board and staff of the University of Colorado's Memorial Center extend congratulations and best wishes on the occasion of your grand opening. May you enjoy many great personal satisfactions and valued group experiences as you develop your program and services to meet the needs of your campus."

Jude Elliott, Chairman  
Lisle Ware, Director.

Loren Kottner:

"Congratulations to you, your administration, staff, and Governing Board on your grand opening."

Jack H. Overman, Director,  
Student Union  
Kansas State Teachers College.

Loren Kottner:

"Congratulations on this opening day of the Union. May it quickly take its place in the traditions of your campus."

Memorial Union staff,  
University of Missouri,  
A. C. Stotler, director.

Loren Kottner,  
Director, K-State Union

"Great day for the Wildcats. Sorry to miss the grand opening. Congratulations. Stay away from nickel hamburgers. Keep President McCain out of the Dive and let me know when you wash the windows."

William G. Craig,  
Dean of Men, Stanford.

## Comments—Wise and Otherwise

Man, what an unique week!

The schennanigans started at Lawrence Tuesday night when K-State whipped KU and won the Big Seven title; the delirium spread to Aggieville, branched out all over town and settled down on Ahearn Field House, where K-Staters whooped it up at the craziest pep rally ever.

All sorts of mad things happened—K-Staters (with the exception of the Collegian staff) got a holiday; the girls in the dorms, after being allowed to stay out until midnight, were let out again about 2 a.m. to attend the pep rally in Ahearn; K-State beat KU in Allen Field House as Phog Allen lost the last home game of his long coaching career; K-State won the Big Seven title as a Tex Winter-coached team beat an Allen team for the first time.

Then, last night K-State's fabulous new Student Union was opened to the public. Everything was so wonderful I hardly noticed it when they short-changed me 75 cents.

Top comment at the Union opening was made by Gordon Jump, emcee at the talent show. "Welcome to the house that Jack built—your jack and mine," he said.

The talent show was wonderful. I especially enjoyed it after Hayden Abbott and Dick Stone left. I was standing behind them.

But the Union does have its drawbacks. When I went into the ballroom to watch the talent show, I was smoking a cigarette. I suddenly realized that I didn't have an ashtray and couldn't get one. I couldn't bear to drop a burning cigarette on the ballroom floor. I had a helluva time swallowing it.

Automation has hit the campus. I really got a kick out of the cream dispenser in the cafeteria. You merely push up the lever and let it fall, and a little ole stream of cream pops right into your coffee cup. Providing, of course, that your cup is there. One poor fellow I noticed pushed up on the lever twice and got two shots of cream right in his suit pocket. I think he had one too many.

As far as I can tell, there's only one thing wrong with the Union. It has no landing lights. Just think, 30 years from now—when you and I send our kids to K-State with brand-new, hotrod-type helicopters—they won't be able to find the Union to land.

But that day will have its advantages. If a romantic couple (and there will be a few) wants to find a place to park for a little old-fashioned spooning, they simply can climb to 10,000-15,000 feet, throw their 'copter into neutral, and spoon by the light of the moon (even if

## Poll Shows

# K-Staters Are Impressed With 'Terrific' New Union

By JUDY WILLIAMS

K-STATERS had nothing but glowing compliments when asked their impression of the new Student Union at last night's grand opening.

Some of the comments were:

● MAL SKINNER, Psy Soph—That

building is slightly terrific. Much more so than I expected.

● RAMONA LATHAN, FdN Sr—It's beautiful. You can't help but be impressed.

● JAMES SCRIVEN, Ed Gr—This will sure save me a lot of steps going down to the old Union for coffee. Lush is the word for this.

● FRANCIS GRILLOT, ChE Jr—It's really outstanding. Something this campus has needed for a long time.

● BETH O'HARA, EEd Soph—"Wonderful" about describes it. I intend to use it all I can.

● BOB SCHAFER, ME Soph—This new Union is the greatest thing that ever happened to K-State. It's well worth the money we paid for it.

● NORMA HANSEN, Sp Jr—After my three years of waiting I'm sure happy I've gotten to see it open.

● RAY ROSE, assistant dean of arts and sciences—This is one of the most beautiful Unions that has ever been on a college campus.

● ELDON JOHNSON, BA Soph—It's wonderful. It's designed to be practical and usable and shows that our money has been spent wisely.

● ESTHER VALDES, PrL Fr—What a tremendous job of interior decorating! This building really should add a great deal to K-State.

● KAY WADSWORTH, HT Soph—Very impressive. It far exceeded my expectations.

● RALPH SCOTT, ME Fr—The new Union is a wonderful place for students to get together. We're going to enjoy it now and in the future.

● MRS. JOHN GIBSON, Van Zile director—I saw it when there wasn't any furniture in it and I loved it then—let alone now.

● JOYCE LARSON, PEW Sr—It's fabulous. Think of all the opportunities it offers.

## Top Ten Tunes

# 'I'll Be Home' Still Leads Poll

By CLANCY SLOAN

"I'LL BE HOME" still leads the survey of the top ten tunes in Manhattan, as Rock-and-roll sinks lower and lower.

Here are the ratings as compiled from record sales in Manhattan stores the past week.

- 1—"I'll Be Home," Pat Boone
- 2—"Poor People of Paris," Les Baxter
- 3—"No. Not Much," Four Lads
- 4—"Three-Penny Opera," Dick Hyman Trio
- 5—"Why Do Fools Fall in Love," Gale Storm
- 6—"Seven Days," Crew Cuts
- 7—"Lullaby of Birdland," Blue Stars
- 8—"Rock and Roll Waltz," Kay Starr
- 9—"Lisbon Antigua," Nelson Riddle
- 10—"Eleventh Hour Melody," Al Hibler

COMING HITS recently released include:

"Heartbreak Hotel," Elvis Presley  
"A Tear Fell," Teresa Brewer  
"Theme from Man with the Golden Arm," Richard Maltby

The most talked about album in town the past week has been the soundtrack music from the movie "The Man with the Golden Arm." This music was arranged by Shorty Rogers, one of the foremost jazz men in the country, and is played by Shorty and His Giants, featuring Shelly Manne on the drums. Released by Decca, the music is descriptive of the many moods in the picture.

OTHER GOOD albums released this week include "More Harry James" in Hi-Fi, an excellent follow-up of his first big album; a new album by Belafonte, exemplary of the moving ballads and spirituals he does so well; a new album by Tennessee Ernie Ford, spotlighting many of the western ballads with such tunes as "John Henry," and other Burl Ives numbers.

As a followup to the original album "Autumn Nocturne," the Ray Charles Singers have released "Spring Is Here," including "Easter Parade," "June Is Bustin' out all Over," and others in a similar vein. They also plan to release albums of summer and winter in the near future.

## Laud Union At Banquet

(Continued from page one)  
administration, for his "great enthusiasm and efficiency" in expediting Union plans.

Thanks went to R. F. Gingrich, superintendent of the physical plant, and his staff for the many hours spent in readying the Union for use.

A. R. Jones, dean of financial administration, came in for a share of praise from Dr. McCain.

Mr. Jones was able to sell bonds for the Union at an interest rate of one per cent lower than a similar bond issue for another project. This one per cent might well have saved the students enough money to provide for air conditioning the Union in the next few years, the President said.

Lt. Governor of Kansas, John McQuish, extended greetings and best wishes from the State of Kansas to K-State and those responsible for the Union.

"I bring special greetings from the taxpayers of Kansas because this building didn't cost them a dime," he said.

Special greetings from Mr. Frederick Stecker, president of the association of college unions, and Mr. Porter Butts, director of the University of Wisconsin union who was a special consultant for K-State's Union, are printed on page two.

Slanted "by the swift current flowing east through the Straits of Florida, sea level on the north coast of Cuba is about 17 inches higher than at Key West. They are less than 100 miles apart.

Collegian ads pay.

## Talent Show Top Hit Of New Union Debut

A near-capacity crowd in the Student Union ballroom saw K-State's talent at its best in a talent show that was part of last night's grand opening.

Master of ceremonies Gordon Jump, Sp Jr, got the show off to a fast start by welcoming everyone "to the house that Jack built—yours and mine."

The six "Divettes", all members of Pi Beta Phi, began the show with a vocal advertisement of the all-red Union dive.

The "Four TKE's" got together for some good harmony in "I Can't Give You Anything But Love, Baby," "Riding Down the Canyon," "He," and "Margie."

Jerry Weaver, MAI Sr, put in a notable performance on the piano, playing "Tephisto Waltzer".

"Harpo" Griffith, Sp Fr, imitated a grade-schooler attempting to give a reading entitled "The Horse".

Last on the program, the K-State singers under the direction of Prof William Fischer, sang to a very appreciative audience.

Their selections included the "K-State Fight Song," "Great

Day," "If I Loved You," "June is Busting Out All Over," "Love is Where You Find It," and "You'll ever Walk Alone."

Quite fittingly, their last number was the Alma Mater, which the audience sang with them.

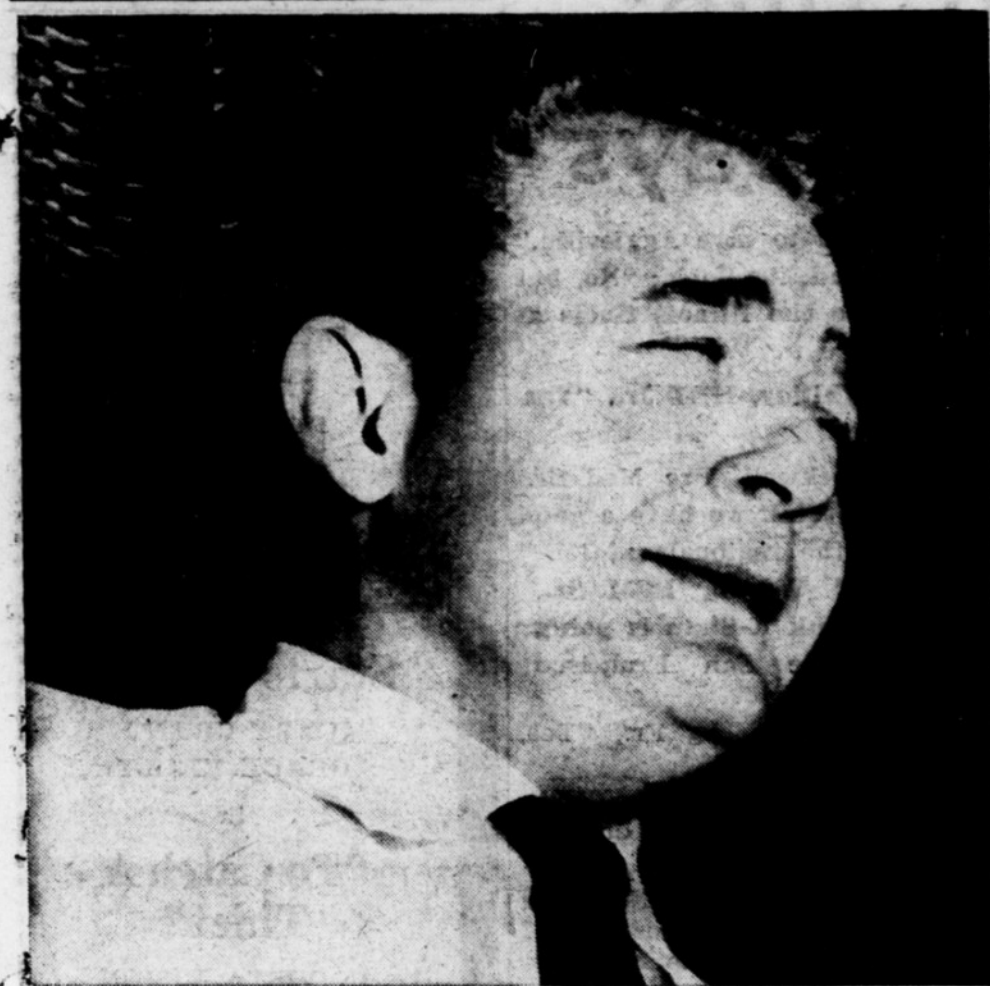

## Senior Honors Blank Mailed

Application blanks for senior leaders honors have been sent to scholastically eligible seniors by senior leaders selection committee.

To be eligible for senior leaders honors the student must have a 1.75 grade average up to the fall semester of 1955-1956.

Students who are eligible for this honor who have not received blanks should call at OB 202.

One of every 15 business firms in the United States—corporations, partnerships or individual enterprises—used match books as an advertising medium in 1952, the Match Industry Information bureau reported today.

Collegian photo by Gary Haynes

"MY HORSE" . . . has four legs . . . one on each corner. Harpo Griffith, Sp Fr, said at the Union opening night talent show.

# Rainsberger Doubletimes At Football and Wrestling

By JOHN TOMS

Ellis Rainsberger, 6-0, 195-pound Wildcat grappler, is working overtime this spring.

A sophomore, he is the heavy-weight competitor on the Cat wrestling squad. Now, during

Ellis Rainsberger

spring football practice, Rainsberger really keeps in shape as he battles to keep his first team berth with the Wildcat gridders.

"Ellis shows more competitive spirit than anyone on the team, and that's tough to do with the whole team working as hard as it has this year," wrestling coach Fritz Knorr said.

"Because of his weight, Rainsberger usually spots his opponent 20 or 30 pounds when he

steps on the mat. He was out-weighted 75 pounds once this season.

Ellis sprained his right wrist and right index finger in football scrimmage Monday; so he'll be handicapped even further in the Big Seven wrestling tourney at Ames, Iowa.

In his first year of varsity wrestling competition, Rainsberger has held his own with the "big men." In eight outings, he holds a 3-3-2 record.

Rainsberger pinned 6-4, 250-pound Doward Johnson of Colorado State and drew with Earl Lynn, 270-pound grappler of defending NCAA champion Oklahoma A&M. Another of his opponents was Sam Salerno, Colorado's defending Big Seven champ, who shaded him 3-2.

Rainsberger won a numeral as a freshman wrestler and copped the Missouri Valley Athletic Association crown in the heavy-weight division at Kansas City, Mo., last year.

Ellis says of all the competition he has faced this year, Dave Herbold was his toughest. Herbold was second in the Big Ten last year.

Rainsberger was cited by football coach Bus Mertes as "Player of the Week" along with Jim Rusher after the Iowa State game last October. He lettered on the team playing guard, tackle and center. He was selected by Missouri players on their All-Big Seven opponent team. The 1956 Wildcat footballers selected him as varsity captain for the 1956 season.

Rainsberger is from East St. Louis, Ill. He lettered in football, track, and baseball at Christian Brothers of St. Louis. He played freshman football at the University of Missouri before entering the Army in 1952.

# 'No NCAA Title' Student Poll Says

By NANCY MOLTER

Since the Wildcats' victory over KU last Tuesday night, the thoughts of the student body have turned to K-State chances in the regional at Lawrence,

If the Cats win the regionals, they will enter the finals at Evanston, Ill.

Fifteen K-State students were asked the question: "Do you think K-State will take the NCAA championship?"

Results of the check showed that 9 do not believe K-State will take the championship, 5 think we have a good chance of winning, and one student was undecided.

Bob Garcia, PEM Gr., "No, but I do think we have a good chance of winning the regionals at KU."

Maxine Utt, BAA Soph., "Yes, if we play ball the way we did at KU."

Bud Levin, BA Jr., "No, but I do think we'll go into the finals at any rate."

Evie Warner, AR 02, "No, it surprised me when we took the Big Seven—happily."

Barbara Puhr, PEW Sr., "I can't form an opinion as yet. I will have to wait 'till the first game to see the ability of the boys under the NCAA pressure."

Hubb Mansfield, Psy. Sr., "No." Joan Smith, Ch W Jr., "Yes, I think we have a very good chance. I'd like to see Fritz Schneider play another good game so he can go to Kansas City." (Schneider's girl lives in Kansas City.)

Larry Meadows, Pre Law Fr., "No, I wish we would, but I think we will get pretty far in the tournament. If we do win it, they better call out the Na-

tional Guard to save Aggieville."

Joe McFall, Ag Soph., "No, but we'll get to the Illinois finals at least."

Diane Whitley, HET Jr., "Yes, definitely."

Allan Rockwell, Pre Med Sr., "No, but I think we have a good chance in the regionals at KU."

"Willie" Wilson, PEM Sr., "Yes, I think K-State is going to beat the San Francisco Dons."

H. C. Ruckert, Ag Fr., "Yes, we have a chance."

Aura McConnell, Pre Vet Soph., "No, but we can dream, can't we?"

Keith Bell, CE Jr., "No, we'll win some of the games, but I can't say about all the way."

## Santee's Lawyer Set for Hearing

New York (U.P.)—Both Wes Santee's lawyer and the national AAU said today they were ready for today's hearing in the New York State Supreme court.

Charles P. Grimes, Santee's lawyer, will ask for a continuation of the temporary injunction he obtained last Thursday. This injunction prevented the AAU from enforcing its lifetime ban against the star miler and he ran in the Columbian mile last Saturday night.

Grimes previously had indicated he might have to ask for postponement because of "pressing business" in Washington.

## Last Home Meet For Gym Team

The K-State gymnastics team will meet University of Illinois at Chicago gymnasts in the final home meet of the season tomorrow at 2 p.m. in Ahearn Field House gymnasium.

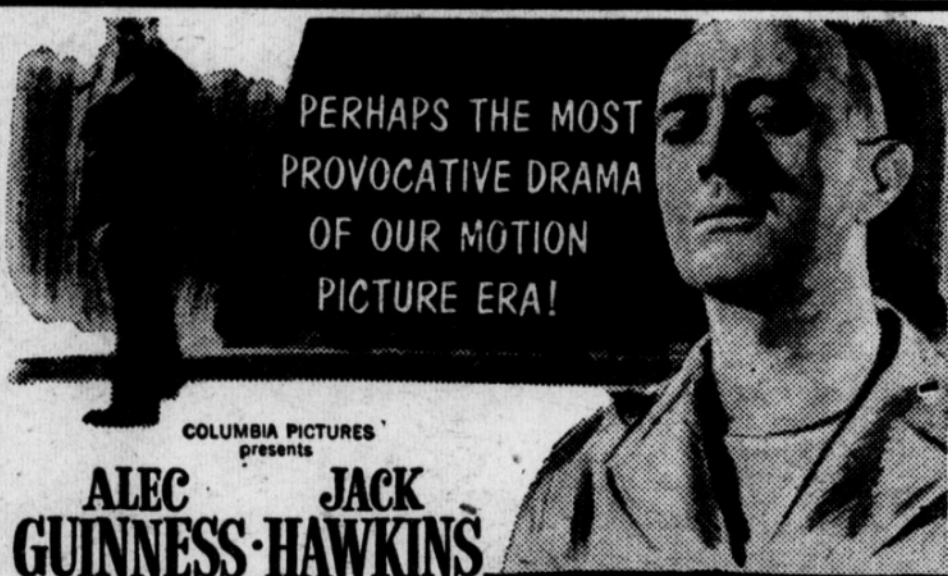

The Illinois team is one of the strongest teams in the nation, according to Frank Thompson, K-State gymnastics coach.

Illinois recently won the Midwest Invitational Tournament and will give Cat gymnasts stiff competition in tomorrow's meet, Thompson said.

# Pigskin Practice Resumes; Squad Short of Tackles

Collegian photo by Gary Haynes

**WILDCAT FOOTBALLERS** are going into blocks with their heads low at spring practice. Coach Bus Mertes has made sure of this by using a starting chute with a steel bar on the front about 3 feet above the ground. The chute was made in the Kansas State metal shops.

With the return of warm weather, K-State returned to spring football workouts yesterday after a two-day layoff and Coach Bus Mertes sent the Wildcats hurrying through play patterns.

Carefully sorting for backfield strength, Mertes tested a potfull of halfback candidates. Although

Mertes has two lettermen at the halfback slots and some promising freshmen, he still lacks break-away threats.

Speedy sophomore Keith Wilson, who played at left half last

season, has been moved to quarterback and promises to stick there.

"Practice went well considering there was a two-day layoff," Mertes said. "Both linemen and backfield men are coming along in fine fashion," he said.

"Our biggest trouble right now is lack of depth at tackle," the Cat grid coach said. "We're strongest at the halfback position, and all our candidates look good," he said.

Yesterday Cat footballers ran through line scrimmage aimed at sealing splits in the line and filling in holes on defense. The backfield ran through rotary scrimmage for about 30 minutes.

Thursday's workout marked the eighth day of off-season drills for the Cats. They will hold their second game-condition scrimmage in Memorial Stadium Saturday.

## Cat Baseball Season To Open March 29

The K-State baseball team opens the 1956 season with a double-header at Wichita March 29. The first home game is April 27th when the Cats play MU.

At present about 70 men are out for the varsity team, but this number will soon be out to a more workable 25-man squad, Wauthier said.

The 1956 Schedule:

March 29 ..... Wichita  
(double header)  
April 3 ..... Arkansas State  
April 4 & 5 ..... Memphis Naval  
Air Station

April 20 & 21 ..... Nebraska  
April 23 & 24 ..... KU  
\*April 27 & 28 ..... MU  
\*April 30 ..... OU  
\*May 1 ..... OU  
May 4 & 5 ..... CU  
\*May 11 & 12 ..... Nebraska  
\*May 14 & 15 ..... Iowa State  
\* home games

In 1829 Prof. Joseph Henry, of the Albany Academy, Albany, N. Y., built the first electromagnetic motor, an oscillating machine with automatic pole changer.

## Reception Held For Hoffmans In Calvin Hall

Mr. and Mrs. Wendell Hoffman were honored at a reception in Calvin lounge Wednesday by members of Home Economics and Extension.

Mrs. Hoffman is the former Miss Doretta Schlaphoff, dean of the School of Home Economics.

Chairmen of the faculty group giving the reception were Prof. Tessie Agan, Prof. Merna Zeigler, Mrs. Louis Hafermehl, and Prof. Gertrude Lienkaemper.

### Parties

The Lambda Chis will be hosts to a "Roaring 20's" costume party Saturday night. There will be dancing to records and refreshments.

Phi Beta Phi and Phi Delta Theta are planning a breakfast Sunday morning at the Phi Delta Theta house.

### Dinner

Alpha Kappa Lambda plans an exchange dinner with Delta Delta Delta sorority for Tuesday. Next Thursday the AKL's will have an hour dance with Waltheim hall.

### Engagement

Larson-Sternsdorfs

Chocolates at the Alpha Chi Omega house Wednesday night announced the engagement of Laverne Larson, EEd Jr, to Carl Sternsdorfs. Both are from Effingham and Carl is employed there.

### Initiation

Formal initiation for Farm House pledges was held last weekend. Those going active were Delmar Connor, DH Soph; Paul Faidley, AEd Soph; James Gammell, Ag Jr; Clinton Peirce, Ag Soph; Elson Seitz, TA Soph; and Leon Sucht, AH Jr.

You'll be pleased with a Collegian want ad.

# USF To Host State Universities at Meeting

United Student fellowship will be host to delegates from Wichita, Washburn, and Kansas universities for a workshop Friday and Saturday at Pioneer hall of the Congregational church.

Sessions will begin at 2 p.m. Saturday and continue until 10:30 p.m. Problems and organization of a religious group will be discussed. Some religious discussions will also be conducted, according to Clinton Peirce, Ag Soph, who will preside.

## Theta Epsilon

Theta Epsilon, Baptist women's sorority, is to meet Tuesday at 7:30 p.m. at 1220 North Eighth.

Final plans will be made for a Union church sorority meeting. The Union meeting is to be March 20 at 7:30 p.m. at the First Baptist church. Theta Epsilon will be host at this meeting.

## First Christian

A panel discussion following the theme of Lift week is planned for Rec center Tuesday at 7 p.m. Speakers will be Galen Hughbanks, Hst Soph; Francis Reichart, Agr Sr; Marilyn Rundel, HEN Sr; and Joan Carter, HDA Fr.

## Newman Club

A Newman club retreat for all Catholic students is planned for this weekend at Seven Dolores church. The Rev. Joseph M. Freeman, SJ, is to be retreat master. Retreat will begin Friday at 7:30 p.m., and will last through Sunday. Closing exercises are to be Sunday at 3:30 p.m.

## Roger Williams

The 9:45 a.m. Sunday school for Roger Williams fellowship will have as its speaker, Clifford C. Roan, associate professor of entomology. Fellowship hour will be

devoted to a followup on Lift week.

## EUB

Evangelical United Brethren fellowship will meet at 7 p.m. Sunday in Danforth chapel. An informal discussion following Lift week is to be led by Lynn Anduss, ArE Fr, and Sally Anduss.

## DSF

The Christian church plans a 9:30 a.m. Sunday service in the sanctuary, plus a 10:40 a.m. church school hour.

Sunday evening services at Disciples Student fellowship will include a followup discussion of Lift week.

## Canterbury Association

"Why We Go to Church" is to be the topic for a Canterbury members' panel discussion at a 6 p.m. Sunday supper meeting.

## Westminster

Mr. J. McGehe will speak about "The Christian in Business" to a 4:30 discussion group at Westminster fellowship. In keeping with the theme of "A Look at U. S. Foreign Policy," a film entitled "Not by Might" will be shown at 5:30 fellowship. "Presby Weds" Sunday church-school class will meet at 9:30 a.m.

The new Union will be used for a discussion group about "Enemy of American Society—Racial Discrimination" at 4 p.m. Monday. A Bible discussion group will meet at the Union at 9 a.m. Thursday.

## Hillel

B'nai B'rith Hillel foundation members will attend Sabbath services at 7:30 p.m. in the Jewish chapel, Tenth and East streets, at Camp Funston in Fort Riley.

Hillel Foundation plans its annual Passover supper March 26

at the Congregational church. Students can call 84241 or 68584 for reservations.

## Kappa Phi

The Manhattan Women's Society of Christian Service will give a dinner for Kappa Phi members Tuesday at 6 p.m. at the First Methodist church.

## Wesley Foundation

"Jesus, the Hope of the World," will be discussed at a 6 p.m. forum at Wesley Foundation. The Wesley Singers will sing; Cecil Vining, AEd Soph, has devotions; Al Unruh, MGS Soph, has special music; and Judy Crawford, Hst Soph, is organist.

Bible study is at 4; fellowship at 5 with Donna Turner, MEI Fr, and Gary Swenson, FT Soph, as leaders; and lunch is at 5:30 with Marjorie and Joe Vanderweide as cooks.

Those going to the skating party tonight are to meet at Wesley at 9:45.

## Society of Friends

The Society of Friends will hold its regular weekly meeting Sunday at 9:30 a.m. in Danforth chapel.

Used clothing which will be sent to needy persons in Europe and Asia can be left in the YMCA office in Anderson hall. The

clothing will be distributed by committee, a Quaker relief agency, the American Friends Service.

## A Campus-to-Career Case History

On the left, William Nock Colonna, B.S. in Business Administration, Virginia Polytechnic Institute, '52.

## "Sales results...and something more"

Two and a half months after he began training with The Chesapeake & Potomac Telephone Company of Maryland, Bill Colonna went into the army, spending a year in Korea.

"While in the service," Bill says, "I never thought of having to look for another job. I resumed my career in the telephone business as soon as I got back. What's more, my rate of pay was increased by crediting my time in the army."

"After training, I was promoted to Sales Manager in Salisbury, Md. I'm responsible for initiating, planning and coordinating sales activities in an area serving 50,000 customers in nine counties

on the Eastern Shore of Maryland. I select and train men for my sales force, and help business office managers with their sales problems.

"Sales and marketing in the telephone business are growing more important every day. We've many new and different services to offer people. It's a job with scope, variety and challenge."

"Arranging for customers' communications requirements keeps me in touch with all departments of the company. These contacts add valuable experience that will always prove useful. I wanted a career that was broad and full of opportunities, and that's what I've got."

Bill Colonna is typical of the many young men who have interesting jobs in the telephone business. Career opportunities of many kinds exist in other Bell Telephone Companies, and in Bell Telephone Laboratories, Western Electric and the Sandia Corporation. Your placement officer has more information about these companies.

## World News Briefs

# Arabs Restless Despite UN

Compiled from United Press  
By HARRY MACHIN JR.

Jerusalem, Israeli sector (U.P.)—

The United Nations truce supervisor said today he believed he had made some progress in averting an Israeli-Arab war, but massed crowds in Cairo shouted today for the "annihilation of Israel."

Maj. Gen E. L. M. Burns, head of the truce supervisory group, flew back to Israel from three days of high level talks in Cairo on the increased tension along the Egyptian-Israeli border.

Burns said his talks with representatives of Egypt, Syria, and Saudi Arabia "indicated progress." But there were shouts of war even as Burns left by plane for Israel. They came as the leaders of the "big three" Arab nations knelt in prayer in Cairo's Mosque before a cheering crowd of 3,000 persons.

"Israel must be annihilated!" they shouted. "Down with imperialism and the Baghdad pact. Long live Arab unity."

### Missile Work Approved

Washington—The House Armed Services committee has tentatively approved a \$2,000,000 construction program that would speed work on ballistic missiles. The bill also would speed work

on development of an atomic-powered airplane.

♦ ♦ ♦ ♦

### Ike Gives GOP Dinner

Washington—President Eisenhower held a small White House dinner last night for most of the top charter members of the "I like Ike" movement.

The guest list strongly indicated the purpose of the dinner was to map some major campaign plans—and possibly to discuss who will fill the number two

place on the Republican 1956 ticket.

## OH YOU KIDS! LUCKY DROODLES!

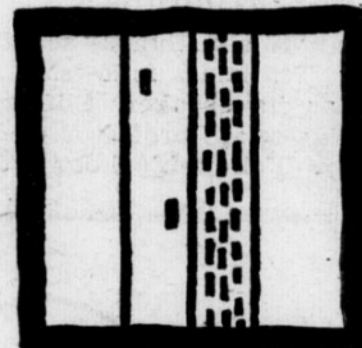

WHAT'S THIS? For solution, see  
paragraph below.

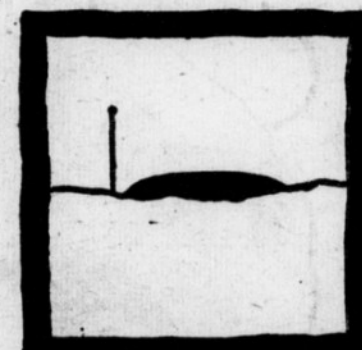

**DROODLES—POCKET EDITION.** There's a pocket edition of almost everything these days. Why not Droodles? This one's titled: Shirt pocket of Lucky Smoker. This smoker might give you the shirt off his back—but he'd sure hang on to that pack of Luckies. Reason: Luckies taste better. You see, they're made of fine tobacco—light, mild, good-tasting tobacco that's **TOASTED** to taste even better. Matter of fact, you'll say Luckies are the best-tasting cigarette you ever smoked! Better pocket a pack today!

VOLUME LXII

Kansas State College, Manhattan, Kansas, Monday, March 12, 1956

NUMBER 101

**MAKING AFROTC PLANS** for the rest of the semester are Cadet Col. Bill Kennedy (left) and Major Bayred Vermillion, commandant of cadets.

## Bill Kennedy Named To Top AFROTC Post

Cadet. Col. William C. Kennedy, BA Sr, has been named new AFROTC cadet wing commander.

Other AFROTC cadets have been assigned ranks by order of Col. Charles H. Wilkins, commanding officer. Lt. Ralph D. Oakley, service information officer, said the cadet appointments were effective March 5.

Cadet Majors with special assignments are Donald D. Allen, director of personnel; Donald H. Lenhart, deputy commander; Hubert D. Mansfield, wing inspector; Thomas E. Wakefield, director of material; Donald V. Upson, director of operations; Norvin G.

Stunkel, commander of Company 271; Phillip R. Stiles, commander of Company 272; and Duncan E. Dodds, commander of Company 273.

Cadet Capt. Grant E. Brolier is adjutant officer; Cadet Capt. John C. Landon, information service officer; and Cadet Capt. George J. Yapp, aide de camp.

Other cadets and their appointed ranks are Cadet Captain—Martin K. Eby Jr., Freeman L. Higgason, Richard R. Robertson, Francis R. Stone, Gene L. Youngstedt, Rodney D. Bentson, Irl L. Franklin, Leo C. Lessor, Donald

G. McDonald, Jariel D. Schmidt.

Bernard F. Albers, Stanley W. Braman, Bill D. Ericson, Glen R. Horton, Leon F. Lunt, George W. Atkeson, John R. Coupe, James D. Hotchkiss, Delburn R. Hutchinson, Jerry L. Laird, Harvey J. McCarter, Ross E. Meyer, and Norman J. Tetlow.

Cadet First Lieutenants—Starr A. Byarlay, Charles M. Copple, Edwin C. Cotner, Eddie R. Fowler, Gene W. Geil, Roger F. Orban, Charles F. Scholer, Leonard D. Schwab, James D. Stamm, Eldon W. Zeller, Roderick D. Booth, Melvin L. Brose, William M. Dickson, George L. Eib, Freddie W.

Figge, Orlo K. Jantz, William L. Ruggles, James R. Schafer, Orlo D. Welch, Eldon D. Woodward, Roger E. Alexander, Jackie D. Barrett, Mark K. Drake, Phillip C. Gregory, Paul L. Miller Jr., John L. Oltjen, Wayne K. Riley, David F. Snider, Jerry E. Van Zant, and Ralph L. Webb.

Cadet Second Lieutenants—John C. Christopher, James M. Hall III, Walter W. Martin, John E. Ricklefs, Frederick J. Schneider Jr., Robert L. Shipp, Donald O. Smith, Eldon E. Stout, Donald M. Taylor, Dennis G. Albright, Richard G. Davis, Dale E. Dickson, James W. Goebel, Ralph T. Johnson Jr., Raymond E. Johnson, Ralph F. Kenworthy, Charles L. Thompson, and Ray A. Zimmerman.

William C. Hanna, Gary E. Hughes, Carroll E. Lewis, Nelson E. Lundgrin, Ray E. Maddux, Estel J. Schultis, Marvin F. Swanson, Leonard B. Toxrea, and Ronald L. Young.

Cadet Technical Sergeants—Danny N. Burgess, Jerome J. Ewald, Dewayne E. Hamilton, Robert E. Quanz, Andrew N. Bengston, Joseph L. Bosko, Wesley D. Hedden, Robert L. Schober, Leon H. Armantrout, Sam H. Peplatt, Maurice L. Sproul, Donald F. Swartz, William C. Bowman, John C. Poelma, Harry L. Shank Jr., and Leo W. Stotzer.

Cadet Staff Sergeants—Wallace E. Brown, Stanley W. Cowan, George L. Hooper, Joseph P. Johnson, Terry E. Lee, David C. Smith, J. Brent Adair, Jay R. Keeling, John R. Roberts, Richard L. Rudman, George J. Vetsch, Edwin V. Wilson, James H. Abbott, Buddy D. Frye, Robert F. Mansfield, Cameron E. Moore, Sylvester O. Nyhart, Richard L. Hohlf, Robert A. Boyd, and Larry A. Rash.

Cadet Airmen First Class—Daryl L. Baker, Tom A. Dana, Robert L. Jedwabny, James D. Murry, David W. Stone, Larry P. Willis, Gilmore M. Dahl, Darrel V. Dyer, Allen E. Fort, Charles E. Johnson, Robert B. Lawrence, Harold H. Van Horn, Harry D. Haas, Palmer R. Haynes, Robert L. Nelson, George A. Rood, Roy C. Russell, and James M. Stockham.

Cadet Airmen Second Class—Warren K. Andler, Gordon L. Bute, William E. Cole, Willis E. Easter, Warren A. Godfrey, Rockwell N. Greene, William Grossnickle, Gerald D. Hannemen, Gilbert D. Helling, Jack A. Hurd, James M. Hurd, Paul F. Inman, Carl E. James, Henry W. Johnson, James W. Lyle Jr., John R. Milton, Stanley L. Rieb, LeClair F. Slade, John H. Sudduth, Lawrence B. Robert H. Williams, Calvin K. Adams, Winston J. Barr, Albert R. Bemis, Ronald L. Boucek, Peter

(Continued on page 4)

## Choir on Spring Tour, To Sing Eight Concerts

The annual spring tour of the A Cappella Choir, scheduled for today through Wednesday, will feature 8 performances before high school audiences, or at concerts sponsored by high school groups.

The 74-voice organization, directed by William R. Fischer, will perform popular and religious numbers, and there will be special selections by the girls' and boys' glee clubs, and the K-State Singers, a trained group of 12 voices.

Soloists this year are Peggy Hodge, MAV Fr; Virginia Roenbaugh, HT Jr; Georgiana Rundle, MAV Soph; Royce Johnson, MGS Soph; and Jack Hartle, MGS Fr.

Two of the A Cappella Choir numbers, "A Modern Madrigal," and "Music When Soft Voices Die," are compositions by Fischer, and he also is responsible for special arrangements for five other numbers.

The K-State choir left this morning and was scheduled for appearances at the Dickinson County Community high school at 10 a.m., at Abilene high school at 1 p.m., and at the McPherson high school at 8:30 p.m.

On Tuesday the choir will be at Winfield high at 10:30 a.m., at Wellington high school at 1 p.m., and at Kinsley high school at 8 p.m.

The tour concludes Wednesday with a concert at Ellsworth high school at 11 a.m. and another at Herington high school at 8 p.m.

## Pepsters To Meet

Whi-Purs, Wampus Cats, and Purple Pepsters are to meet at 5 p.m. today in W 115. A system of flash card display will be explained by Bob Alexander. He will explain other pep club activities.

## SC To Consider Student Elections

Student Council tonight will consider a motion to have SGA primary elections April 6, and SGA general elections April 26-27. The motion is to be presented by Bill Johnson, Geo Sr.

Council will meet at 7 in the Student Union.

## 'Bernardine' Seen By About 1,500

About 1,500 persons attended the three presentations of "Bernardine," a K-State Players production, Wednesday, Friday, and Saturday nights, Earl Hoover, play director, said.

The two-act comedy provided the audience with 1½ hours of entertainment, based upon the problems of a gang of teenage boys when they start taking an interest in girls.

Hoover pointed out that the large number of other activities, such as the Union opening, kept the K-State Players from making any profit on their production.

## Four Lads, Chi O Formal 'Firsts' in KS Student Union

The new Student Union collected two "firsts" the past weekend—its first big-name dance featuring the Four Lads, and its first sorority formal, a Chi Omega dinner dance.

Attendance at Friday night's performance by the Four Lads, nationally known vocal quartet, was 475 couples.

"At that we fell a little short on the money angle," Conrad Smith, chairman of the Union dance committee, reported.

Close to \$1,500 was paid for the Four Lads and for Del Clayton's accompaniment orchestra, Smith said. The evening's total was \$1,067.

The Lads, who sang for 2 half-

hour periods during the evening while the audience sat on the floor of the grand ballroom, set feet tapping with their rhythm and bounce.

The four—Frank Busseri, baritone; Connie Codarini, bass; and Bernie Toorish and Jimmy Arnold, tenors—sang such favorites as "Moments to Remember," "No, Not Much," "Istanbul," and "Skokiaan."

They also sang numbers they wished they had recorded. "The Great Pretender" was one of these. They also sang several of the religious numbers for which they are noted. Among these were "Rain, Rain, Rain," and "He." The audience was invited to parti-

cipate in several of the numbers.

"Those four are a wonderful group of fellows," Smith said. "Characters, too. While the orchestra was playing for the dance they were backstage jitterbugging."

At the Chi Omega dinner dance Saturday night, both the banquet and the dance were in the grand ballroom.

Tables were decorated with carnations and snapdragons. After banquet tables were removed, Gordon Bute and his orchestra played for a dance. The dance ended at midnight with singing of "My One Chi Omega Girl."

**DANCING TO DREAMY** music Saturday night, the Chi Omegas and their dates had the honor of having the first formal dance in the Student Union.

## World News Briefs

### Kefauver Predicts N.H. Primary Win

Manchester, N.H. (U.P.)—Sen. Estes Kefauver predicted today he would win "more than a majority of the delegates" from New Hampshire in tomorrow's first-in-the-nation primary.

On the Republican side of the primary there has virtually been "no contest" since President Eisenhower announced he would run. All 26 candidates for the GOP national convention favor Mr. Eisenhower's renomination.

### New Israel Incidents

Jerusalem (Israeli Sector)—Israeli today reported new border incidents with Egypt, Syria, and Jordan and accused Egypt of concentrating troops and armored forces along the frontier in a warfare atmosphere.

# Good Manners Essential For K-Staters at NCAA

KANSAS STATE COLLEGIAN  
Monday, March 12, 1956-2

K-STATE basketball fans will have a chance to show how mature they are when they go to Lawrence for the NCAA playoffs this weekend.

KU fans have adopted K-State as the home team in the playoffs. "We (KU) have a wonderful opportunity to be good hosts and show the nation how Kansans stick together for a common cause," the Lawrence Journal-World editorialized. "Now it's the state of Kansas, not Kansas State, against the field, and the healthiest thing we can do is get behind the Wildcats."

PRACTICALLY everyone in Lawrence, from Phog Allen to the mayor and city manager, seems to have adopted this attitude. And it definitely leaves K-Staters in a spot where good manners are essential.

With the entire state aware of KU's good sportsmanship in this instance (although there'll probably be some Jayhawks yelling against K-State), any poor sportsmanship or lack of appreciation on K-State's part will stick out like Wilt the Stilt on a basketball floor.—Darrel Miller.

Inquiring Reporter

## Is Compulsory Basic ROTC Worthwhile? Majority Answer Negatively When Asked

By Jim Bell

"IS COMPULSORY ROTC at Kansas State worthwhile?" A majority of those interviewed answered negatively to the question, indicating that they believed the basic program to be out-dated.

Kansas state law, Section 76-436, states that in all land-grant colleges in this state, all physically fit male students must take a two-year basic ROTC course. The law was passed by our state legislature in 1945.

● **LOWELL STARR**, Geo Jr—"No. Students look at it as something they have to do. When you try to make somebody do something, he isn't going to do a good job."

● **RON MOLINARI**, CE Soph—"I believe it is. Especially ground ROTC. It'll give you a fundamental knowledge of what you should know when you get in the army. I don't see how anyone going through four years of college would want to pass up advanced ROTC."

● **GEORGE SMIDT**, ME Soph, a veteran—"I am against telling someone that he has to take ROTC, but I think he should be encouraged to take it. An ROTC-trained student does not receive nearly as good training as the OCS (Officers' Candidate School) trained officer. There is some doubt in my mind as to whether the ROTC program merits the money which has to be spent on it."

● **CHARLES COPPLE**, AEd Sr, an advanced AFROTC student—"It's a good idea because it will give the student an idea of what the military is like when he does go into the service. Compulsory ROTC doesn't help the attitude of the basic cadets."

● **ELDON STOUT**, BA Jr—"I believe it's a good deal for most of the boys

who are in it. It would be better if it were optional. The boys that realize what it can do for them can get something out of it."

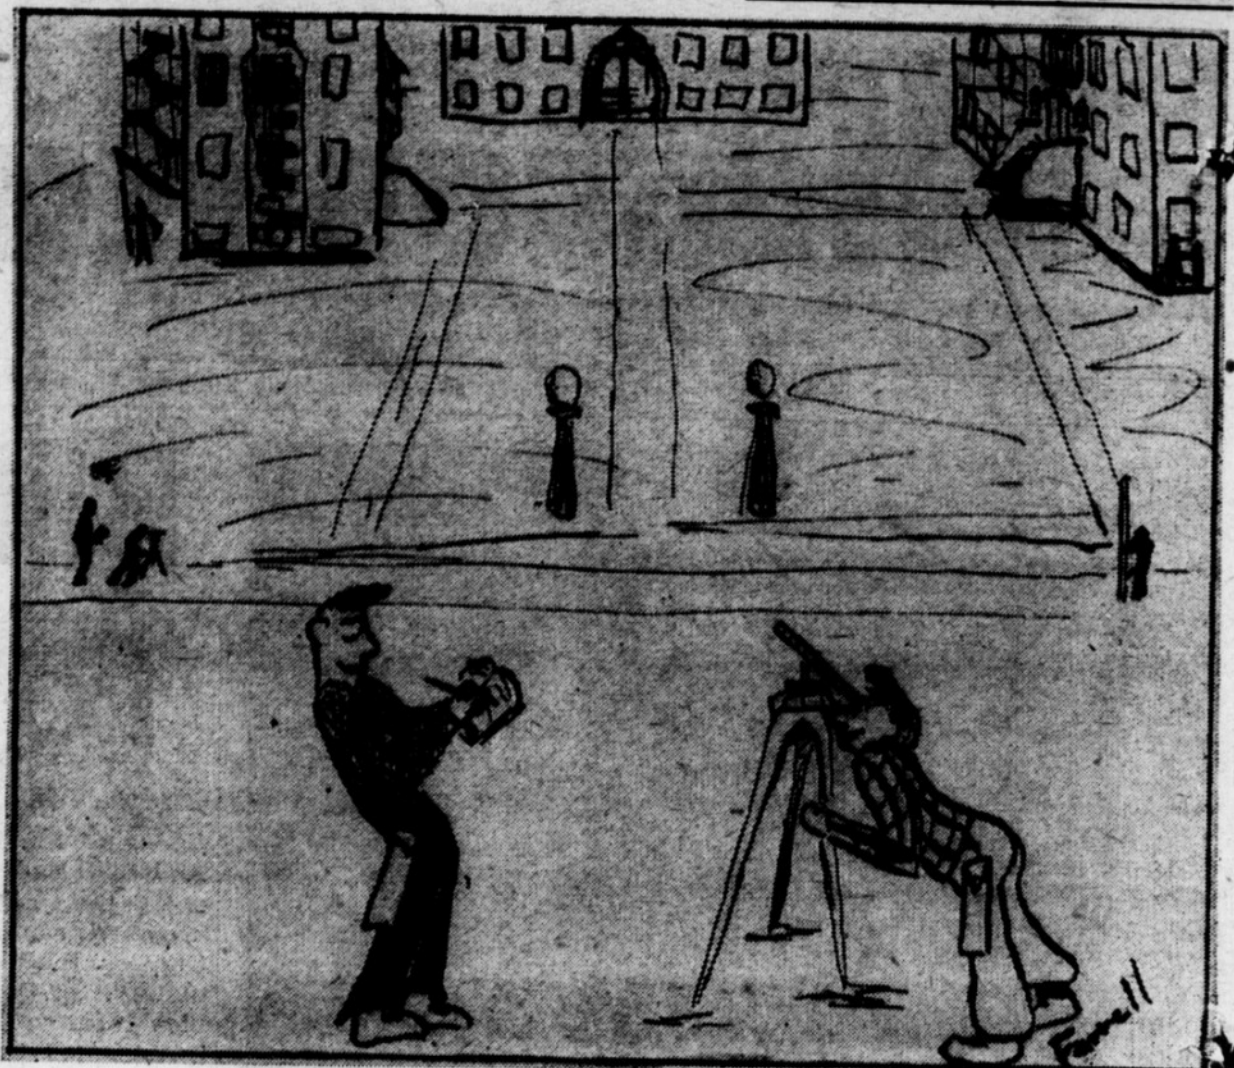

● **DON PORTER**, ME Soph, a veteran—"I think it's a good idea. The fellows don't get the full training that they would get if they were to go into the service for two years. They do get a good background for the service in discipline and military law. It's quite a shock for the average American boy when he tries to adjust to military life. It's too bad ROTC isn't taken more seriously, you learn how the army works."

● **BOB CHANDLER**, ChE Jr—"It's required for advanced ROTC. That's the only real purpose I can see it. I don't think it should be compulsory because there are lots of people who don't want to take advanced."

● **CHUCK GRAHAM**, CE Jr, a veteran—"ROTC is the easiest way in the world to buy a commission. Just because a man has a B.S. degree in Ag or Business, or something doesn't mean he's qualified to be an officer in the service."

● **SAM PEPIATT**, Geo Jr, an advanced AFROTC student—"There are a lot of good boys that go into the program and eventually make good men for the service because of their education. It is a waste of time for those who don't have any hankering for the service at all. A good background in the armed forces shouldn't hurt anyone."

● **RALPH HANDLIN**, IE Jr, a veteran—"The training they receive up here is not adequate for leadership in active service. Therefore, ROTC doesn't warrant the granting of a commission. You can't learn about the army in books."

"Wow! 36-24-37"

## Comments—Wise and Otherwise

**WE JOURNALISTS** (as I sometimes like to put it) are in our seventh heaven these days. Not only is the new Student Union with its snack bar just outside our back door, but B and R also waxed all the floors in Kedzie hall.

This does have its problems, though. When we stagger back to Kedzie in the throes of a coffee jag, it's hard to stand up on those darned slick floors.

**THE CULTURAL** area in the new Student Union should add a lot to the gentle side of K-Staters. Take the browsing library, for instance. It is filled with interesting reading, and K-Staters naturally gravitate to the higher-type books.

This fact struck me as I noticed some of the books that had been taken from the shelves and left laying on the tables: "Barefoot Boy with Cheek," "Anthology of American Humor," "Best Cartoons from Punch," etc. Ah, yes, culture marches on.

**TALK OF** culture always takes me back to the time I was in Paris. Ah, the grandeur of it all. 'Twas there I learned that Notre Dame isn't necessarily a football team. 'Twas there I heard things that led me to believe that Pigalle isn't a farm.

In my ignorant, barbarian way, I tried to enjoy the finer things of life. But I couldn't. For instance, it wasn't until years later, in Humanities II, that I realized that the palace of Louis XIV at Versailles is one of the finest examples of Baroque architecture. To me, it was an extravagant, rambling, ugly mess.

I BECAME acquainted with the Pa-

risienne traffic. There are three different factions: Cars, zombies (back home we call 'em pedestrians), and taxicabs. This makes for three states of existence: Dead, alive, and rundown. The latter is inflicted by taxicabs.

I was standing on a bridge over the Seine, watching a garbage barge go by. A taxi came down the street about 50 kilometers an hour. I went insane (jumped in the river).

I WENT into a quiet little cafe to eat and to dry off. I ordered food in French. At least, I thought it was food—the waitress slapped me. I apologized as best I could.

"Un hamburgair," I drawled in my best dirtfarmer tone of voice. She didn't understand. "C'est la guerre?" I asked frantically. "El burro est un animal. Ip-switch a la carte. Cashmere bouquet!"

"Talk English, buster," she said. "I'm in a hurry."

I WAS A little shocked when I finally ordered filet mignon and got a piece of raw beefsteak with blood running out of it. It's health though, I guess—at least there was no trichinae.

But all of that barbarianism is behind me; I've reformed. From now on, with the help of Humanities, record-listening rooms, browsing libraries, etc., I am striving onward and upward toward the pinnacle of culture.

Who knows? If I work hard enough at being cultured, I might even get to the point where I'll like that raw beefsteak.—Darrel Miller.

# Cat Matmen Third In Big Seven Meet

K-State wrestlers placed third in the Big Seven tournament at Ames, Iowa Saturday as they took two runner-up spots, two third-place awards, and a pair of fourth-place positions.

Bob Mancuso, 130-pound Wildcat grappler, was edged out in the finals by Bobby Lyons, OU's defending 130-pound champion, and took second place.

Roland Alexander, 147-pound Cat grappler, took the other K-State second place. He was pinned by Oklahoma's Don Studebaker in 6:30 of the championship match.

Gary Haller, 177-pounder, and Ray Glaze, 167-pounder, took third place spots for K-State. Haller pinned Iowa State's Frank in 6:32 of a consolation match. Glaze pinned Nebraska's Pickett in another consolation match.

Kyle Mines, 137-pound wrestler, and Dale Blume, 157-pounder, collected fourth place spots. Ellis Rainsberger, who was hindered by a sprained wrist and finger, returned to Manhattan after his first round loss to compete for his first-string berth on the football team in an intra-squad scrimmage.

Oklahoma collected 88 points to win its seventh straight conference title, outdistancing runner-up Iowa State with 67.

Kansas State took third with 31 points, Colorado took fourth with 27, and Nebraska held down the cellar with 8.

This marked the first time K-State has ever come out ahead of Colorado in tournament competition.

The wildcats wrestle Illinois at Urbana, Ill., Saturday. The Illini meet marks the Wildcats, last dual meet this season.

The grapplers then will enter the National Collegiate Athletic Association tournament at Stillwater, Oklahoma. This tourney lasts two days, March 24 and 25. This is the last meet of this season for the Cat grapplers.

## Parr Suffers Charley Horse

Jack Parr was admitted to Student Health Friday with a charley horse. He was dismissed Saturday after treatment for the bruise.

"I received the injury in a collision during Friday's basketball practice," Parr said. "I don't think it's serious enough to hurt my playing ability in the Regional," he added.

Parr said he "will know in a couple of days" whether the bruise is of any consequence.

Coach Tex Winter said, "Jack's absence from workouts has held us up, but we hope he will be able to start practice today or tomorrow."

"I don't think there is any question about him being ready for the regional games," Winter added.

The Cats regional foe will be the winner of the Memphis State-Oklahoma City university game which will be played in Wichita tomorrow night.

## K-State Gym Team Loses to Navy Pier

K-State gymnasts bowed to the University of Illinois (Navy Pier branch at Chicago) Saturday, 63½ to 48½.

The Wildcats took the lead in the first event with a first place, but fell steadily behind after that.

High point man for K-State was Wendell Holt with 23 points. Ted Muzyczko took top honors for Navy Pier and the meet with 27½ points.

Holt earned his points on firsts in free exercise and tumbling,

seconds in parallel bars and trampoline, and a third in the hibar.

Muzyczko was first in parallel bars, side horse, and hibar, second in flying rings, tied for second in free exercise, was fourth in trampoline, and fifth in tumbling.

Albert Bumpus was second high for K-State with 9½ points, and Wendell Minckley was third with 7 points.

The loss brings the Wildcat's season record to five wins and six losses.

## Volleyball Will Resume Tonight

Intramural volleyball games scheduled tonight at 7 are:

Alpha Tau Omega vs Sigma Nu, Theta Xi vs Sigma Phi Epsilon, West Stadium vs Y.M.C.A., and Wesley Foundation vs Kasbah.

At 8 p.m.  
Jones Boys vs Aeropolis, Disciples Student Fellowship vs House of Williams, O.K. House vs VETS, and House of Brec vs Rho Alphas.

## Tourney Tickets On Sale Today

Reserved seat tickets for the NCAA regional tournament at Lawrence Friday and Saturday are on sale at the athletic ticket office. The reserved seats are \$2.50 a night.

Nine hundred seats in the south bleacher section of Allen Field House have been reserved for K-State students, selling at \$1 a night. These tickets have arrived and now are on sale, according to Frank Mosier, athletic ticket manager. Activity cards must be shown and only one ticket for each night will sold to each student.

## Basketball for Girls Tonight in Nichols

All games are played in Nichols 105 at 5 p.m.

This week's schedule:  
Monday: Waltheim vs. Chi Omega; Southeast vs. Pi Beta Phi  
Tuesday: Van Zile vs. Kappa Kappa Gamma; Delta Delta Delta vs Alpha Delta Pi  
Wednesday: Van Zile vs Northwest; Alpha Xi Delta vs Kappa Kappa Gamma  
Thursday: Southeast vs. Kappa Delta; Chi Omega vs. Alpha Delta Pi.

## What young people are doing at General Electric

## Young engineer works on new ways to remove heat from atomic reactors

An atomic reactor running at full efficiency creates a tremendous amount of heat in its core. By removing this heat and putting it to work boiling water to make steam, atom-made electricity is produced.

One of the men responsible for designing new, more efficient ways to remove heat from atomic reactors is 29-year-old Doctor Salomon Levy — Design Analysis supervisor in the Atomic Power Equipment Department's Reactor Engineering Unit.

### Levy's Work Interesting, Vital

To study this problem of heat transfer, G.E. recently constructed a heat-transfer system. By electrically simulating the heat produced in a reactor, it is possible to determine the maximum rate at which heat can be removed from a reactor to make steam.

Dr. Levy conceived the idea of building this complex system, designed it and supervised its construction. At present, Levy works with this system to study new problems of heat transfer and fluid flow encountered in atomic power plants.

### 25,000 College Graduates at General Electric

When Salomon Levy came to General Electric in 1953, he already knew the kind of work he wanted to do. Like each of our 25,000 college-graduate employees, he was given his chance to grow and realize his full potential. For General Electric has long believed this: Whenever fresh young minds are given the freedom to make progress, everybody benefits—the individual, the company, and the country.

Educational Relations, General Electric Company, Schenectady 5, New York

DR. SALOMON LEVY joined G.E. in 1953 after receiving his B.S. in M.E. from the Univ. of Calif. in 1949. In 1951 he received his M.S., and in 1953 his Ph.D. From '49-'50 he was teaching assistant at U. of C., and '50-'53 he was Junior Research Engineer at the Institution of Engineering Research.

Progress Is Our Most Important Product

# Kansas State Collegian

VOLUME LXII

Kansas State College, Manhattan, Kansas, Tuesday, March 13, 1956

NUMBER 102

## Council Tables Elections, Appoints Ethics Group

The Student Council voted to table a motion setting dates for the primary and general elections.

The Council appointed eight persons to the new Ethics and Honors committee. They are Gary Swenson, FT Soph; George Peters, PrV Soph; Loy Dee Reinhardt, BA Fr; Clinton F. Peirce, Ag Soph; Margery Cornwell, Eng Fr; Marylyn McCready, Eng Soph; Gaylord Stunkel, ChE Soph; and Phillip F. Warkman. Miss McCready was appointed temporary chairman.

Two applications were received for appointment to the Student Orientation committee. Six or seven persons will be appointed to this committee, according to Mark Drake, Council chairman. Applications can be made at the Dean of Students office.

The Council requested applications for appointment to the Student Alumni relations committee. Judy Crawford who was appointed last time is already a member of the committee. Applications can

also be made at the Dean of Students office.

C. J. Terharr reported that letters will be mailed to organized women's houses requesting them to elect candidates for the Football Queen contest. Organizations may also sponsor candidates according to Terharr.

The candidates will participate in a style show, tea and have personal interviews.

Judges have been selected to judge the girls at these events on the basis of personality and poise. Judges names will be withheld.

Names of candidates are to be in by April 3. The girls will be judged during the week of April 9-13.

Pat Wilkerson requested that the Council take some action on the championship - celebration which caused \$668.85 damage. He reported that four of the five firemen's hats which had been taken have been returned. Other items of value may be returned which would ease the damage, he said.

### 'Status of Science'

## Scientist To Speak At College Assembly

"The Status of Science and Technology in Modern Society" will be the title of the Engineering Open House all-College assembly speech of Dr. Detlev W. Bronk. The assembly will be tomorrow at 9:30 a.m. in the Auditorium.

Dr. Bronk is president of the Rockefeller Foundation for Medical Research, New York City, and was recently named chairman of the National Science Foundation board.

Dr. Bronk graduated from Swarthmore and the University of Michigan, and was a member of the staff of the University of Pennsylvania and the Columbia University Medical college before being named president of the Johns Hopkins univers-

ity in 1948. He joined the Rockefeller Institute in 1953.

The assembly speaker has received the Atomic Energy commission's award for exceptional nuclear service, has been Coordinator of research for the Air Surgeon's office and Chairman of the National Research council.

He is presently serving as vice chairman of the National Advisory Committee for Aeronautics and is a member of the Science Advisory boards for both the office of defense mobilization and the chief of staff of the United States Air Force.

Dr. Bronk will be the guest of honor at a luncheon in the Union tomorrow noon.

**MURDERER'S ROW**—Members of the K-State AFROTC rifle team that defeated all army, navy, and air force ROTC teams in nationwide competition are Paul Parsons, Floyd Cummings, Terry Poling, James Niernberger, Stanley Braman, and the team coach, S/Sgt. James Hart.

### Tops in Nation

## AFROTC Team Wins Marksmanship Prize

K-State's AFROTC rifle team has defeated the nation's top army and navy ROTC units to win the highest ROTC marksmanship prize of the year, the department of defense trophy, Lt. Ralph D. Oakley, instructor in air science, announced yesterday.

The K-Stater's, previously named the nation's top AFROTC team, scored 958 of a possible

1,000 points. Second place went to the navy champions of the University of California with 949 points, and Akron university's army champions were third with 948 points.

The K-State team members, coached by S/Sgt. James B. Hart, are Floyd Cummings, ME Fr; Stanley Braman, BPM Jr; Terry Poling, BPM Soph; James Niernberger, ME Soph; and Paul Parsons, IE Soph.

The department of defense

trophy is awarded to the best of 1,600 ROTC teams throughout the nation that compete in the annual William Randolph Hearst National matches. Competition for the trophy took place in school armories of the three finalist teams under the supervision of officers assigned to the ROTC units.

K-State team members and their coach will appear on a television program Friday at 5 p.m. over channel 13, WIBW-TV.

### Cheerleaders, Rally Committee To Meet

The pep rally committee and cheerleaders will meet today at 5 p.m. in SU 209, according to Phil Stiles, head cheerleader.

## Union Board Announces Open Hours

The operating hours for the Student Union were formally set by the Union Governing board last night. Effective immediately, the Union will be open from 7 a.m. till 10:30 p.m. Sunday through Thursday and from 7 a.m. till 12:30 a.m. on Friday and Saturday.

The Union has been observing these hours but it was necessary for the board to approve them, director Loren Kottner said.

The closing hours vary a little from the ones that were set up before the Union opened. The change was necessary so that working shifts could be arranged, Kottner said.

The board commended the staff for the work that was put in on the opening of the Union. The staff members are Kottner, Clarence Shandy, Verlyn Richards, Jack Lockett, Bob Alexander, and Frank MacCreary.

In the five days that the Union has been open, five sizeable banquets and luncheons have been served by the food service department, Kottner said. In addition, the department also had to get the cafeteria open.

## First Dive Program Postponed to Mar. 23

The first night club program in the Union Dive, originally scheduled for next Friday, has been postponed to March 23.

Art work by K-Staters is to be exhibited in the Union art lounge beginning tomorrow as campus activities continue to center in the Union.

The Dive talent show and other night club plans were postponed because of lack of physical arrangements involving food service, Judy Sortor, member of the Dive committee, said.

"The Dive still will be open Friday, but there will be no show or charges," she said. Students who are interested in reserved seats for the opening-night show may get them in the activity center after March 20, she added.

Art work by K-State students is to be the next exhibit in the art lounge, John Ricklefs, chairman of the art-lounge committee, said.

The student display will replace the present "From Renoir to Picasso" display, 49 etchings and lithographs from the George Binet collection.

Works of 19 students, all members of the local chapter of Delta Phi Delta, national art honorary, will be on display March 14-24.

They will include oils, water colors, pencil sketches, sculpturing, charcoal drawings, and duco, Harvey Rundquist, Delta Phi Delta president, said.

## Agronomy Senior Wins \$300 Grant

Kenneth Munkres, TA Sr, has been awarded a \$300 scholarship by Standard Milling company.

Munkres is a member of Phi Kappa Phi, and is president of the K-State Agronomy club.

In addition to school work, Munkres has assisted with plant breeding and plant genetics research projects. He also has worked as an assistant in plant breeding at the Colby branch of the experiment station.

## Engineer Royalty To Be 1st in Union

When engineering students stage their annual St. Pat's Prom in the Student Union Saturday night it will mark another "first" for the Student Union.

Sondra Tate and Ronald Bryant, the 1956 St. Patricia and St. Pat, will be the first royalty to be crowned in the Union.

## Primitive Nature Revealed In College Wild Boar Hunt

By Ann Weathers

THE ANIMAL husbandry department at California State Polytechnic college recently reverted to the primitive and engaged in the rare old sport of wild boar hunting.

The wild boar, confined more or less in their swine lab, decided he didn't care anymore for the accommodations and left. After a mile and a half chase, the porker was cornered and roped by the "hunters." Upon return to the lab, however, it was found that the ungrateful board had died of exhaustion.

Undaunted, the boar warriors dissected the animal and took it to their respective boards.

So "this little Piggie went to pieces."

HERE'S MORE on the typical K-State professor—

● "The Let's Go Type—is purely a production of the chemistry laboratory. He's more interested in closing up the lab than in discovering a new way to split the atom.

● Mr. Apologizer—verbally makes amends for every mistake, each unanswerable query, lateness in correcting

and preparing papers, and sometimes for even being the instructor.

● "Dr. Outside Reader Assigner—never seems to get around to reading the outside reading himself. He holds to the theory that if a student covers enough territory he's bound to remember some of it.

● "DR. PASSIVE—attends the classes physically by habit. He is content to let the class run its own course with slight recourse to the helmsman. It's the modern way. Let the class develop its own program. It's so much easier. When he is forced to make a decision one way or the other, he puts the issue to class vote.

● "Dr. I Couldn't Be Wrong and Dare You Even Euggest It?—How could he be? He's taught the same course 20 years. The student is advised not to contradict or take issue with this type. But if the student feels he can't restrain himself, he should wait until a classmate agrees with the good Doctor, and attack his classmate's statements. On rare occasions this professional type will acknowledge the indirect correction.

## Do You Recognize Yours?

DO YOU RECOGNIZE your car among this mess in the center of the parking lanes in the Union parking lot? If so, you're way out of line.

Cars with student stickers 1509, 703, 1234, 1381, 3322, and 136, plus

faculty sticker 891, were blocking exit for 13 other cars in this lot at one time yesterday afternoon.

THERE SEEMS to be but one possible conclusion from this mess—new Union, same old students.—Darrel Miller.

## America Differs from Italy Because There Is Room for Everyone, Foreign Student Says

(This is the third in a series of articles about foreign students attending K-State)

By PAT ROBERTS

"THE FIRST thing that I noticed in America that was different from my country was that there was room and space enough for everyone and everything," said Chiara Bini from Bologna, Italy.

"Everything was so nice and big it made you feel free," she said. Chiara, who is a Fulbright exchange student, said there were many differences between Italy and the United States but that the main one was in education.

"IN AMERICA college is like a big family, everyone knows everyone else and there is a lot of social life. In Italy you go to college to study, there is no Student Union or any social life at all," Chiara said.

Chiara pointed out that in Italy the students are not friendly with the professors. She said that the students are there to learn and they don't become friendly with the faculty.

"THERE IS much more tradition involved in the University of Bologna than at K-State," she said. "Our schools in Italy are almost 1,000 years old."

Chiara is living at the Pi Beta Phi sorority during her stay at K-State. The Pi Phi's gave her a room and board scholarship. She is planning on attending Colorado university next year and continue taking courses in Biology which is her major.

"I AM ALWAYS in contact with my professors back home as to what subject to take," said Chiara. "All of my courses have to do with Biology," she added.

"The average American thinks since I am from Italy I should sing opera, eat spaghetti, and push a fruit cart," Chiara said. "America has a very high standard of living and Americans think that since their country is the best that they have

no reason to learn about other countries.

I KNOW all about America but all most Americans know about Italy is that they have opera singers, eat spaghetti, and that Mussolini once ruled there. Americans should study about other countries too," she said.

Chiara said that she thought Americans were too carefree and that they lived from day to day and didn't plan for the future. She said that the people "took

it easy" and weren't serious enough.

"IN ITALY people think of America as a dream, a heaven, or a paradise," she said. "Most of the Americans that come over to Italy have a lot of money and spend it, that is why Italians think of America that way," she said.

"In Italy there is much unemployment and ignorance in some sections," she said. "That is why there is such a large Communist party in Italy, the people believe

what the Communists say and offer. If they could come over to America and get some sort of job they would not follow the Communists. However, if Americans were put in Italy and were unemployed and uneducated, Communism would grow with them too," Chiara said.

"IN THE UNIVERSITIES we have political clubs that run candidates to sit in the Magistratus, our student governing body," she said. "The clubs run hand in hand with the national parties. We have Socialists, Communists, Liberalists and all kinds in the University," Chiara said.

"The Communists aren't very strong, the balance of power usually lies with the Socialists and Liberals," she said. "The Magistratus governs the college policy on student affairs and that all Universities have them."

THE REAL ITALIAN government has a President, a Committee of Deputies, and a Senate, Chiara said. The committee makes suggestions to the Senate to enact certain laws and the Senate decides on whether the proposal should be a law. The President is more or less a figurehead, she said.

"I think that segregation is a crazy thing," said Chiara. "All people are equal no matter what color or race. In Italy there is no problem at all. It will probably take time to solve the problem, after all it has only been 100 years since the Civil war and that isn't a very long time to settle the problem," Chiara said.

WHEN ASKED what her hobbies were, Chiara said she liked all sports, but "skiing is my favorite." Chiara thought that Americans should participate more in sports instead of watching others perform. "Most of the students are too lazy," she laughed.

"I want to thank the Pi Phi's very much. They have been wonderful to me," Chiara said. "Everyone at K-State is very friendly and I really like it here."

AT THE END of three years Chiara plans to go back to Italy and work toward her Doctor's in Biology. She plans to work in laboratory research or industry after her schooling.

# Spring Grid Practice Ahead Of Schedule, Mertes Says

Collegian photo by Gary Haynes

**PLENTY OF BEEF** on the K-State line this season. If the backing these footballers showed yesterday at practice has anything to do with the quality of football they play, the Cats will be tough to beat. Spring practice will end March 24 with a varsity-alumni clash.

K-State football players are progressing faster than was expected, coach Bus Mertes said.

The squad has been working hard and they're ahead of the spring practice schedule, he added.

The team worked for an hour and 15 minutes yesterday afternoon in weather which limited

them to light workouts. There was little contact drill as Mertes gave the team a rest after last Saturday's intrasquad scrimmage.

The line worked on defensive fundamentals while ends and backfield men were drilled on pass defense. "The boys are shaping up fast," Mertes said. The Wildcat grid mentor said

all the men who have been switched from one position to another are coming along good. The only position switch made since Saturday's scrimmage was Dean Skaer's move from fullback to center, where the Cat line is weak.

Yesterday was the 11th day of spring practice. There are nine practice sessions remaining including the varsity-alumni game to be played March 24.

Mertes said the team showed improvement since the Saturday scrimmage. "We looked at the films today and found plenty of mistakes," he said, "But we've got a lot of work to do yet."

Although work yesterday was light, Mertes promised heavy drills for the rest of the week with next week's work to be in preparation for the varsity-alum game.

## SE, Sig Eps Win in IM

Southeast Hall won over Pi Beta Phi 35 to 25 and Chi Omega forefited to Waltheim in women's intramural basketball yesterday.

Tuesday's schedule will match Van Zile against Kappa Kappa Gamma and Delta Delta Delta against Alpha Delta Pi.

Each game is played in Nichols 105 at 5 p.m.

Last night's men's intramural volleyball scores:

Sigma Phi Epsilon over Theta Xi 2-1, Sigma Nu over Alpha Tau Omega 2-0, YMCA over West Stadium 2-1, Wesley Foundation over Kasbah 2-1, Jones Boys over Acropolis 2-0, OK House over the

Vets 2-1, and the Rho Alphas over House of Breck 2-0.

Tomorrow night will be the last night of the intramural games.

The schedule for tonight:

7 p.m.—Delta Sigma Phi vs Alpha Gamma Rho, Phi Delta Theta vs. Phi Kappa Tau.

8 p.m.—Sigma Alpha Epsilon vs. Kappa Sigma, Beta Theta Pi vs. Alpha Tau Omega, Alpha Kappa Lambda vs. Tau Kappa Epsilon.

## Big Seven Play Over; Cats Head to Regional

Kansas City, Mo., (U.P.)—Kansas State, champion of the Big Seven conference with a 9-3 mark, begins its drive toward the NCAA championship in a regional NCAA game at Lawrence Friday night. Its opponent will be either Memphis State or Oklahoma City university, two "at large" teams which meet at Wichita tonight.

The final 1955-56 Big Seven standings:

	W	L	Pct.
Kansas State .....	9	3	.750
Iowa State .....	8	4	.667
Missouri .....	8	4	.667
Colorado .....	7	5	.583
Kansas .....	6	6	.500
Nebraska .....	3	9	.250
Oklahoma .....	1	11	.083

The Colorado Buffaloes, who once were in strong contention for the Big Seven title, ended the season in fourth place by defeating Kansas, 75-64, at Boulder Saturday night.

The game, last of the season,

dropped Kansas to fifth in the final standings.

It was the last game for Colorado coach H. B. (Bebe) Lee, who becomes athletic director at Kansas State April 1. It might also have been the last game for Dr. F. C. (Phog) Allen of Kansas, who is scheduled to retire.

## Open House To Feature 15 New Cars

Fifteen new automobiles will be among displays of the industrial arts and engineering department at Engineering Open House, March 15 and 16. The cars will be furnished by the New Car Dealer's association of Manhattan.

The three industrial arts and engineering divisions, each displaying at open house, are industrial education, industrial technology, and industrial engineering.

Plastic key-chain tags will be given away by the forging section of IE. This section will also make ash trays and paper weights that will be sold to the public at a nominal price according to Don Smith, IE Jr.

Automatic machines will turn out screws and shape gears in shop displays. Woodworking machines and some of the produced products will be shown by the woodworking section.

Tempering and welding techniques will be demonstrated by the IE's. Metallic specimens will be open to examination through microscopes and a special metallograph machine.

Special displays will concern safety in industry and plant layout, including a model of a complete factory.

### Club Column

## Alpha Zeta Selects Sixty Candidates

Sixty candidates have been selected for membership in Alpha Zeta, Ag honorary, Henry Burmeister, TA Sr, announces.

Final selection will be made at a smoker March 22.

Dr. F. D. Farrell, president emeritus, will be the speaker at the annual banquet, in the Student Union, March 28.

### Psychology Club

The Psychology club will meet tonight at 7:30 in SU 206. Dr. Marchotti, a psychiatrist from Ft. Riley will speak on the subject, "Basic Personality Factors in Social Adjustment."

All students interested in sociology and education are invited to attend the meeting.

costumes were used in place of elaborate staging. Musical numbers were mostly ballads, blues, and ancient voodoo melodies.

Highlight of the evening was a drum solo by Chris Chestnut, as he produced varied tones and tempos from a native drum.

Esther Rolle sang "Stone Cold Dead," the story of a woman who killed her unfaithful husband and then convinced the rest of the islanders that the killing was justified.

Ken Freeman led the male performers with "Ruckoombay," a ballad about an innocent young man who attends a voodoo ceremony, and "West Indian Blues," the story of a homesick native boy.

The players seemed completely unaware of their audience in some of the more genuine native songs and dances, and appeared to enjoy themselves immensely as they interpreted the music and rhythm of the islands.

## 'Ogden' Tryouts Will Start Today

Try-outs for "Major Ogden," next K-State Players production, will be held in G 206 March 13-15 at 7:30 p.m.

Copies of the play are available in J 5. Presentation of "Major Ogden" will be April 12-13.

## Sts. Pat, Patricia In Starring Roles

**DEAN DURLAND "PINNED"**—Dean M. A. Durland of the School of Engineering (left) is "pinned" with an Engineers' Open House button by St. Patricia Sondra Tate. St. Pat Ron Bryant (center) looks on approvingly.

Sondra Tate and Ron Bryant, reigning royalty of Engineers' Open House, are to give their impressions of Open House over WIBW-TV and Radio Station KSAC today.

The pair, who as St. Patricia and St. Pat will cut the ribbon to initiate Open House Friday, will appear on Bill Barton's Guest Room today at 5:45 p.m. on WIBW-TV, Topeka.

At 5:15 this afternoon, KSAC will broadcast a rundown of Open House displays and an interview with Sts. Pat and Patricia. Open House chairman Harold Lonsinger, ME Sr, and Dean M. A. Durland of the School of Engineering will give Open House details.

Sts. Pat and Patricia already have appeared on KAKE-TV, Wichita, in connection with Open House.

Miss Tate, Art Soph, said, "It's quite an honor to be elected St. Patricia. Everything has been real nice." Bryant, ME Jr, said, "It's been a pleasure and a lot of fun being elected St. Pat." He said K-State has an engineering school comparable to any, and that this year's Open House should be the best ever.

Sts. Pat and Patricia are to be crowned March 17 at St. Pat's Prom, which concludes Open House. Attendants to St. Pat will be Jim Hotchkiss, IE Jr, and Ralph Smith, EE Jr. Attendants to St. Patricia will be Kay Benjamin, EEd Soph, and Sue Wyant, OE Soph.

### 'Ideals Worth Defending'

## Scientists Can Further American Ideals—Bronk

"The ideals which made our country great still are worth developing and defending," Dr. Detlev W. Bronk told the Engineers' Open House kickoff assembly in the Auditorium this morning.

Bronk, president of the Rockefeller Foundation for Medical Research, said that through science the United States can develop the heritage left it by the founding fathers.

"We must have material means for maintaining and developing our way of life and preserving human freedoms in this time of international conflict," he said.

Bronk said that the nation's greatest natural resource is educated youth. He said that to keep

our superiority in the present international situation, the U.S. must train more youngsters in the fields of science.

Bronk used comparative figures for the U.S. and Russia in demonstrating the lack of scientific education in the secondary schools of this country.

He pointed out that 100 per cent of the students in Russia study chemistry, physics, and mathematics, while a small percentage in the U.S. works in these fields.

Americans should not squander their heritage and leave to their descendants less than they derived from their ancestors, he said.

Bronk called for more scientists in the governing councils of the nation. "There is a grave need for scientists to man society and secure our freedoms," he said.

Bronk said the public needs to be educated to the trend of science in order to understand science advances.

The public fears the changes that scientific advances bring, he said. The people are afraid of change, and rely on the concept of security in their lives, he said.

There is hope and growth in change, while security breeds a wasting away of the human spirit, he said. Courage is needed to withstand the pressure of reactionary forces toward change, and education of the public is needed to acquire this courage, he said.

"Science is not a mere means of technical competence, but a great odyssey of human spirit," he said.

There are two qualities of science evident in the human spirit—curiosity and the desire to bring order out of chaos—Bronk said.

Curiosity is the spark that leads man upward, he said. "Curiosity is the very primal spark of science, and should not be suppressed."

Science can help further the spiritual qualities of man and bring order to the times, he said.

## Religious Council Poll To Probe Segregation

More than 100 volunteers from religious groups on campus have begun a poll of K-State male students to determine their feelings on whether Manhattan barbershops should serve Negroes, according to Bill Rogers, BA Sr. Rogers is chairman of the Religious Coordinating Council committee leading the project.

This poll will give students background information on the matter and asks if they would be willing to patronize a barbershop in which Negroes' hair was cut. It also will ask if the student would sign a petition to the fact, Rogers said.

"In order to insure the validity of the poll, Jack I. Northam of the statistics department, was

consulted to help decide how the poll should be taken," Rogers said.

"It was decided that every

### Winter To Speak At Thursday Rally

Coach Tex Winter will speak at a pep rally north of Ahearn Field House tomorrow at 12:45 p.m., head cheerleader Phil Stiles said. The basketball team will leave for the NCAA playoffs in Lawrence tomorrow afternoon.

A pep band will be present, Stiles said. All pep clubs are required to attend, he added.

10th male student of the campus would be contacted," he said. "The 11th student of the list was picked as an alternate in the event that it was impossible to reach the 10th."

A complete list of the K-State male students was obtained for this purpose.

Walter H. Crockett, assistant professor of psychology, was asked to help write the questionnaire so that it would be worded fairly to the barbers, Rogers said. He added that the poll would be completed by the end of this week.

"I am very pleased with the tremendous response from religious groups," Rogers said. Because of this response, he feels that "a poll of Manhattan can be made in the near future."

## Old Man Weather Is Problem of Landscaping

By DON MILLER

"With the acquisition of much needed rainfall and a reasonable amount of nice weather, we should be ready to put the campus grounds in good shape for the season," T. B. Shackleford, recently appointed landscape architect at K-State, said.

Shackleford, who took office January 1, said that at present most of the work being done includes pruning dead wood from trees, fertilizing lawn areas, and beginning grass seeding operations.

"Almost every foot of the campus ground area has been fertilized," he said, "and approximately half has been seeded to grass."

Kentucky blue grass is the main variety being used, with several other types and mixtures used according to the particular need of the area, Shackleford said. In front of the Student Union and the Vet hospital plans are being made to seed the lawns with Bermuda grass because of the heat, he said.

"Dandelions will cause trouble when we get moisture. Before much of anything can be done with them, however, we must have a good stand of grass," he said.

There are plans for three systems of irrigation

which will greatly help the lawn situation, Shackleford said. The systems will be placed in large areas such as north of the library, east of Anderson hall, and east of Calvin hall, he said. Plastic pipe may be used because of its economical price, he said.

"Since many new buildings have been constructed on the campus, there are various areas which need trees and shrubs. Trees and shrubs have been ordered and should be in by April 1," Shackleford said. "Most of them will be put around new buildings, with emphasis on the Union and Extension buildings," he said.

Shrubs will be taken from the specimen-planting area at the proposed site of the new Home Ec building.

"I appreciate the help students have given us by staying off the lawns around new buildings, and by showing respect for shrubs," Shackleford said. "With everyone's cooperation, we can make this campus nice enough for the students to respect it," he said.

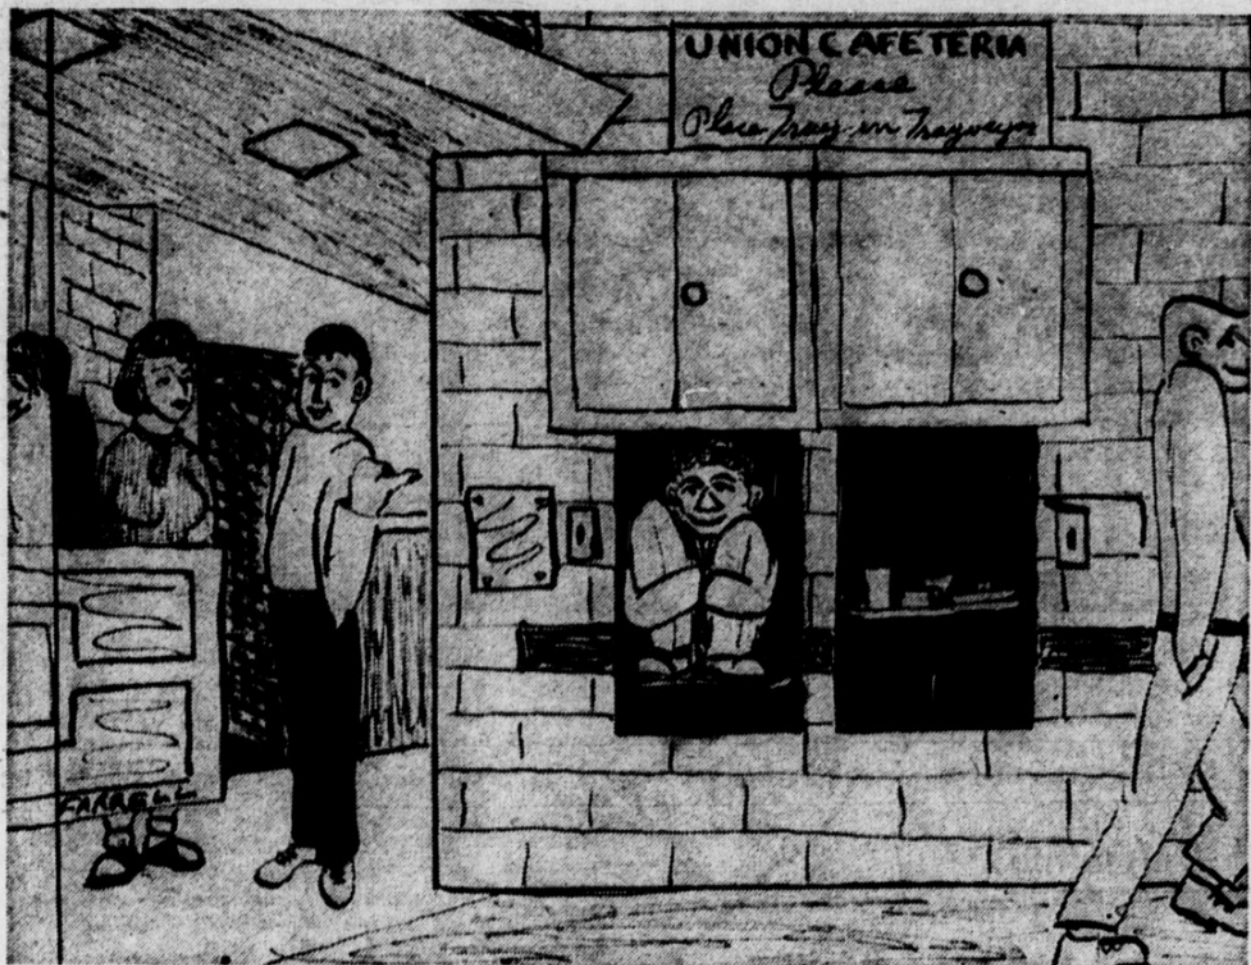

"With the new machinery and equipment we have, we should be able to get into full swing as soon as the weather permits," he said.

Collegian photo by Gary Haynes

**AERATING THE LAWN**—That's the job of F. H. Coolen of the College grounds department.

"Looks like Al's finally going to see where the trayveyor goes."

## Comments—Wise and Otherwise

Thomas Shackelford, K-State's newly hired landscape architect, hopefully is having areas of the campus fertilized and seeded on theory that grass will grow on campus.

This is a reasonable aim, but two things stand in Shackelford's way: 1) Lack of rainfall, and 2) K-Staters who walk across the lawns because they are in too big a hurry (or too lazy) to use the sidewalks.

Realizing that rainfall in Kansas is a dubious phenomenon, Shackelford is planning to water some spots on campus to nurse along the grass.

But, unaccustomed as we are to adequate rainfall, I still think there is a better chance of getting rain than there is of keeping K-Staters off the grass. I base this on the old saying that "You can take the clod out of the boy, but you can't take the boy out of the clods."

A pretty, green campus would be nice for a change. After all, we want the campus to look nice so the basketball team will be proud of it.

K-State's candidate for Berkeley Football Festival queen will be chosen during the week of April 9-13. I'd wager even money that tickets could be sold for the tea at which the candidate will be chosen. That tea should be a real free-for-all.

The girls who are entered will be judged on the basis of a personal interview, modeling at a style show, and personality and poise (plus beauty) shown at a Student Council tea. The girls won't know who the judges are.

This presents all sorts of interesting possibilities. For one thing, by merely walking into the room at the tea, any fellow remotely resembling a judge would be treated like a king.

Can you imagine anything more entertaining than room full of would-be queens who are trying to impress everyone with their personality and poise?

The K-State basketball team, the hottest thing to hit Lawrence since Quantrill, plans to storm down the Kaw this weekend into the open arms of friendly KU fans.

But that's not the point of my story—only the introduction. The point is that they'll be coming back. And, if our hopes are answered, they'll be coming back victorious.

Which brings me to my second and main point, viz.—there may be another victory celebration.

Far be it from me to suggest that we plan a spontaneous celebration. However, we might remember to build our bonfires in fireproof places. At the same time, authorities perhaps could FORESEE victory demonstrations and try to keep them in line without antagonizing the students.

This I've got to see!

I've heard nasty rumors that one Engineers' Open House display will show a television set that, when you turn it on in a certain way, produces a newspaper.

After all of the blood, sweat, tears,

and black eyes that I've suffered to learn the newspaper business, I yet may be replaced by a TV set. Oh, most horrible of fates!

Must be a new type of asexual reproduction.—Darrel Miller

## Desegregation Issue Is Splitting White Churchgoers in South

By UNITED PRESS

NEW ORLEANS—The Racial segregation issue is splitting white churchgoers into bitter rival camps in the deep South.

It is turning church members against each other, pitting clergymen against their congregations, rousing community anger at ministers who side with the Negro on any aspect of integration.

THERE ARE those who feel that if true racial equality is ever to come in the South it must certainly come early in the houses of Christianity.

There are others who are determined to keep the churches racially separate. They say the Negroes themselves definitely prefer to worship in their own churches, with their own race and in their own deeprooted rituals. This group is in the vast majority.

THE PLAIN fact is that, right or wrong, there has been no real attempt by Protestant religious groups to attempt integration.

The Roman Catholic church is another matter and the fiercest religious fight over the problem is now at fever pitch in New Orleans, a city with large Catholic population and influence.

A PRONOUNCEMENT has come out from Archbishop Joseph L. Rummel, highest Catholic authority in this area, that segregation is a mortal sin and that parochial schools under his jurisdiction will be desegregated. Earlier he closed a rural parish which refused to accept a Negro priest.

His stand has brought flat, unprecedented resistance from many Catholic laymen and unrest among a segment of the priesthood.

ACTUAL TESTS of integrating the 8,000 Negro and 39,000 White parochial students probably will not come before next September, but the fight already is on.

E. A. Wagner, staunch Catholic member of the Orleans Parish school board

# Deferred Pledging Issue Brings Divided Opinions

By JANET SCHIEFEN

"DO YOU BELIEVE freshman girls should be allowed to pledge?" This question was recently asked of several K-State coeds.

Deferred pledging at K-State has been a discussed question for some years. Of the group questioned 12 girls were for deferred pledging and 8 against.

SUE GOSS, TJ Fr, "I believe deferred pledging is much better. It helps girls to know what they want to do. The freshman year is merely the time for adaptation to college life in general."

ELDORA EDGERTON, EEd Fr, "I believe girls should be allowed to pledge when freshmen because it gives them a chance to adjust to sorority life before they are thrown into it."

DOTTIE NEWTON, DIM Fr, "Deferred pledging should be put into effect because girls can't be as loyal to the dorm as they otherwise would be. It gives girls a chance to look over the sororities and the sororities time to look over the girls."

CAROLYN GUARD, EE Fr, "Yes, I think they should. It gives a girl more social contacts while a freshman."

BETSY BRIDGES, PEW Fr, "For town girls, pledging when freshman is fine—but for others, they shouldn't be allowed to pledge until sophomores."

MARILYN QUICK, EEd Sr, "I think they should be allowed to pledge if they want to. It gives them longer to be in the sorority. The only reason they shouldn't be allowed to is that they can't live in the house. It should also be as easy for a sophomore or senior to get into a sorority as a freshman."

PEGGY FARRAR, HEJ Soph, "No, because I don't think sororities can judge a girl in the few days of freshman rushing. Also, freshman girls coming to college don't know enough about the sororities to know which to join."

JUDY THATCH, HEN Fr, "I think pledging gives a girl more incentive to make her grades because she wants to go active."

JUDY FISHER, HEJ Fr, "I've seen KU girls that worry so much during their freshman year about whether they'll get into the sorority that they want. They aren't friendly with the girls in the other dorms because they don't have any bond between them and they don't even know the upperclassmen."

DEANNA MURRAY, EEd Fr, "I think they'd have more opportunity to get acquainted with different sororities during the freshman year if they were not allowed to pledge. Girls are not as apt to go into cliques if all are equal while they live together in the dorm."

and father of five children in parochial schools, is among lay leaders openly opposing Archbishop Rummel.

THE SITUATION is causing the most serious division within the Catholic church in this area in my memory and has shaken the faith of those not too strong," Wagner says.

"I feel it has reached the point where Pope Pius should take a position for or against desegregation. I believe it is of sufficient worldwide importance for his Holiness to make a pronouncement to set at rest the confused condition of intellectually sincere Catholics."

MOST CATHOLIC authorities feel it is most unlikely the Pope will intervene.

The Catholic situation is, however, only a small segment of the overall church picture in the overwhelmingly Protestant south.

Most Protestant churches have treaded gingerly around the issue or acted as though it were not there. A number of church boards have met quietly, pondered the problem and decided privately to stay segregated and say nothing. Some denominational groups, notably the Southern Presbyterian assembly, have declared themselves against segregation in principle.

IT IS IMPORTANT to note that Negro church groups themselves are bringing little real pressure for integration. Memphis Negroes voted down a proposed merger of White and Negro ministerial associations on grounds that already "racial animosity has become so intense that at times it has been explosive."

The flareups have come in cases where individual White ministers aligned themselves on the side of the Negroes. In most places where clergymen have taken a positive stand for integration, reaction has been swift.

THE PASTOR of the Batesburg, S.C., Baptist church, where Gov. George Bell

Timmerman formerly attended, was dismissed for stating privately he thought segregation was wrong. A Methodist minister in that state was quickly transferred after he criticized the White citizen's council.

In Montgomery, Ala., a White Lutheran minister, the Rev. Robert Graetz, has become the subject of hot controversy for his open assistance to Negroes who have boycotted buses since Dec. 5, in a dispute over seating arrangements.

THE PASSIVE resistance demonstration there was organized and is being kept at almost 100 per cent effectiveness by Negro ministers led by a young Baptist pastor, Dr. M. L. King, Jr.

A Protestant leader in South Carolina who asked that his name not be mentioned said most leading churchmen appear "sympathetic toward desegregation in principle, but like most moderates they feel they are in a no-man's land, being shot at by both sides."

The Rev. Thomas O. Paris, head of the White ministerial association in Memphis, puts it this way:

"DESEGREGATION will not come in church life immediately, but will be a slow and gradual procedure. Whether that is as it should be is a different question. We must be realistic."

A quiet-spoken Jewish Rabbi here in New Orleans sits on the sidelines, counseling that both sides agree to a "cooling off period to give reason a chance to prevail over emotions."

## NCAA Playoffs

# OCU Will Oppose Cats; SMU Wins

Wichita (U.P.)—Two Southern fighting teams, Southern Methodist university and Oklahoma City university, needed stiff rallies in the closing minutes last night to advance to the NCAA second-round playoffs at Lawrence Friday.

OCU will meet Big Seven champion K-State, and SMU will clash with Houston, Missouri Valley titlist, in second-round games in Allen Field House.

Southern Methodist, Southwest Conference winner, edged out Texas Tech, 68-67, in its first rounder here. Oklahoma City, an at-large delegate, whipped stub-

born Memphis State, 97-81.

The OCU Chiefs went in front to stay, 71-70, in the final 6 minutes. Memphis State baffled Oklahoma City in the first half with its buzz-saw offense, and led 41-33 at intermission. Hubert Reed provided punch for the Chiefs with a 27-point scoring display.

A 15-point spree by Jim Krebs and Joel Krog in the final 6 minutes gave SMU its victory. Krebs' layin with 55 seconds left was the winning shot.

## Cage Tickets on Sale

Student tickets for the NCAA regional cage playoffs at Lawrence this weekend will be on sale here until tomorrow afternoon, ticket manager Frank Mosier said. Students who present their activity card can buy a bleacher ticket for \$1, he said.

## Parr in Condition For Friday Play

Wildcat trainer Porky Morgan said that Jack Parr's injured left leg is responding well to treatment and that Parr definitely will be in condition to play in the NCAA regionals at Lawrence Friday.

"Parr is the one I'm worrying about," he said. "We've only got one center."

# AA Cagers To Invade Ahearn Tomorrow

The state class AA high school basketball tournament opens tomorrow at 2 p.m. when Newton, second in the state, meets the No. 10 team, Ottawa.

The second afternoon game at 3:30 pits third-rated Parsons against sixth-rated Topeka. Thursday night action starts at 7:30 p.m. when undefeated Wyandotte takes on the only unranked team in the tourney, Winfield.

The last game of the opening round is between Central Kansas League champion Manhattan and the No. 7 team, the Hutchinson Salt Hawks.

Wyandotte's Bulldogs, who haven't lost a game all season, bring a 20-0 record into the double-A meet. The Bulldogs won last year's state tournament and are the first team in a dozen years that has a chance to win two in a row.

Fred Harder, class AA scoring champ from Ottawa, comes to the tournament with a 25-point scor-

ing average, but he is the shortest of the top scorers who will appear in the tournament.

One of the most interesting games will be the 2 p.m. contest which pits Harder against Newton's 6-5 center Dennis Walker. Walker owns a 19.1 scoring average through 21 games this season.

Most highly respected of the individual players is Wyandotte's Alan Donaghue, who last year as a junior was good enough to be voted the most outstanding player at the state meet.

The final 1956 United Press coaches' top 10 ratings are:

1. Wyandotte (20-0)
2. Newton (19-2)
3. Parsons (17-2)
4. Coffeyville (16-3)
5. Manhattan (18-3)
6. Topeka (16-5)
7. Hutchinson (16-4)
8. Hays Cadets (16-1)
9. Salina (15-5)
10. Ottawa (16-5)

# Freshman Matmen Win Seven Medals

K-State freshman wrestlers walked away with seven medals Saturday night as the Manhattan

Wrestling club they represented won the Missouri Valley Amateur Athletic Union meet at Kansas City, Mo.

Billy Younger took the 125 1/2 pound title. Jimmy Good and Riley Miller took first and second place, respectively, in the 136 1/2 pound class.

Jim Roberts took the 147-pound title. Pat Doyle took first place and Perry Brinley took second in the 160-pound class.

Jim Dietrich and Larry Hodges took first and second, respectively, in the 174-pound class.

Bob Schmidt, who is also on the K-State football team, took the heavyweight crown.

# Cool Baseball Practice; Wauthier Is Optimistic

K-State baseballers, who were stopped in a 2-inning practice session Saturday by Jack Frost's shifting winds, ran into the same trouble yesterday as they closed another practice session in five innings.

"The pitchers are shaping up pretty good for what little work we've had outside," Wauthier said. "It was too cold today for them to throw anything but straight pitches, no curves. It looks as though we'll have a better pitching staff than last year's."

Returning lettermen who pitched yesterday's game are Jim Rhoades, Ron Bergren, and Bill Sinderson. Dick Renfro, a new man, also pitched.

"We have no holdover catchers from last year," Wauthier said. "But the boys—Ben May, Jim Berg, Laverne Billenger, and Wally Carlson—really pleased me today."

"I didn't pick a regular infield yesterday but let all the boys see action," Wauthier said. I want

the newcomers to show me what they can do. We have one returning letterman for the first base spot in Kerry Clifford. Dick Pearson, another first-sacker, was on the squad last year."

# Touring Debaters To Test K-Staters

The touring international debate team will visit K-State for the first time in a decade, Caroline Drummond, debate instructor, said. They will debate at 7:30 Monday evening in the Little Theater of the Student Union.

Members of this year's team are Harald U. Serner, repre-

## World News Briefs

### Kefauver Wins N. Hampshire Demo Primary

Washington (U.P.) — Returns from New Hampshire gave Sen. Estes Kefauver a breakaway start today in the race for the Democratic presidential nomination.

Incomplete returns from the New Hampshire Democratic primary indicated a clean sweep for the Tennessee Senator against Adlai E. Stevenson.

On the GOP side in normally-Republican New Hampshire, President Eisenhower won easily as expected. A surprisingly heavy write-in vote for the renomination of Vice President Richard E. Nixon strengthened his still clouded prospects.

♦ ♦ ♦ ♦

### Kimbell Acquitted

Sumner, Miss.—A white cotton gin operator was acquitted last night of slaying a "highly respected" Negro in the same courtroom where two white half brothers had been freed in teenage Negro Emmett Till's murder.

An all-white jury deliberated only four hours before finding Elmer Kimbell, 34, "not guilty" in the shotgun slaying of Clinton Melton, 33-year-old Negro service station attendant.

You'll be pleased with a Collegian want ad.

## Day Asks Return Of 'Hot' Goods

Two firemen's helmets, one nozzle, and one hydrant wrench still are missing after K-State's victory celebration rally last week, according to Gerry Day, student body president.

Day said that if these articles were returned to the Dean of Students' office there would be no prosecution.

"Let's give everything back so we can have something to do when K-State wins the NCAA," Day said.

## Riley and Eplee Lead Debaters At St. John's

A score of three wins and no losses was made by Kay Eplee, Clo Fr, and Charlotte Riley, Sp Fr, at the debate tourney at St. John's college last weekend.

Dave Nuttle, AH Soph, and Dan Hahn, Ar 01, took third in the tournament. Ed McCoy, PrL Soph, and Jim Shane, Hst Soph, were eliminated in the finals.

Individuals scored in several events. Larry McDonald, ME Soph, took second in book reviewing. Nancy Porter, Sp Soph, placed third in poetry reading, and McCoy placed third in impromptu speaking.

Ray North, PrL Soph, and Anita Grimm, TJ Soph, made a four win-two loss record at the Notre Dame Invitational tournament.

## No Firearms, Firewater

Jackson, Miss., (U.P.)—The Mississippi house of representatives has adopted a rule forbidding lawmakers to carry firearms or whiskey into the capitol buildings.

senting the University of Stockholm, Sweden, and Poul J. Svanholm, representing the University of Copenhagen, Denmark.

K-State debaters taking part are Tim L. Bowman, ChE Soph, and Ed McCoy, PrL Soph. Bowman was on the team representing K-State at the West Point national debate tournament last year. Both Bowman and McCoy have been active in debate here this year.

The topic for debate will be "The Far Eastern Policy of the United States Is Deplorable." The Scandinavian team will uphold this resolution, while the K-Staters will defend our Far Eastern policy.

The debate, which will last about an hour, will be open to the public. The debate will be followed by an open forum period, at which members of the audience may question the debaters.

Gerry Day, VM Sr, will serve as chairman for the debate and the open forum.

Kansas State College, Manhattan, Kansas, Thursday, March 15, 1956

NUMBER 104

Collegian photo by Gary Haynes

**HUNDRED-DOLLAR SMILE**—Loren Kottner, Union director, displays a check for \$100 given him by Vergil Wright (center) and Don Scoby, representatives of the Interfraternity council. The money will be used to help pay for two drinking fountains in the building, and plaques acknowledging IFC will be placed on the fountains.

## President McCain Says

### Bookstore in New Union Might Not Be Far Off

A bookstore in the Student Union is a certainty if the Board of Regents approves it and the students still want it, President McCain said yesterday.

"We are committed to a bookstore and probably could finance one right now," he said.

### Positions Are Open On SC Committees

Gerry Day, student body president, has announced that four positions are now open on student governing committees. One vacancy exists on the alumni relations committee and three on the freshman orientation committee.

Anyone wishing to apply should send a letter of application to Day or the Student council.

### Got Old Clothing? 'Friends' Want It For Europeans

K-State students who have extra clothing can aid the suffering people in Europe who have been victims of floods and cold waves, according to Warren Rempel, YMCA executive secretary.

"Clothing for these people is being collected by the Manhattan Friends committee in the YMCA office," Rempel said. This committee is a part of the Society of Friends.

The committee is interested mostly in shoes, socks, jackets, sweaters, and any other warm clothing.

"We want clothing that is in good condition or which can be mended and put into immediate use by its recipients," Rempel said.

Students should "go slow" in choosing a location for the bookstore in the Union, McCain warned. "When students learn to use the Union, we will have a better idea where to put a bookstore."

The President indicated he thought the Union should be in operation about six months before a definite location is chosen. This would allow time to observe where the best place would be, he said.

McCain pointed out he thought now the best place for a bookstore could be gained by enclosing the ground-floor area under the main lounge in the south wing of the Union.

"This would be an ideal arrangement and provide students easy access to the bookstore. It would also permit future expansion," he said.

Air conditioning for the Union will probably be possible by 1958 if the enrollment keeps increasing, since part of the \$7.50 building fee now charged students might be diverted to a special fund for this purpose, he said.

The College hasn't received a bill from the city for damages done to fire department equipment in the Aggieville victory celebration after the basketball team won the Big Seven championship, he said.

Until the College receives this bill, no action can be taken and no settlement made with the city, the President added.

Looking forward to the NCAA regionals in Lawrence, McCain said that he doesn't care how loud the students get, how long they march the streets, or how big a bonfire they build, as long as no property is endangered.

## 2600 Students

### Delegates Are Named For Mock Convention

About 2,600 students will represent state delegations in the Mock Political Convention, ChE Soph Tom Bowman, delegations committee chairman, said.

"The convention is set up with 1,323 delegates and about the same number of alternates," he said.

Various organizations will represent each state delegation.

The delegations with the names of the organizations representing them and the number of delegates are: Alabama, 21, Delta Tau Delta; Arizona, 14, Phi Delta Theta; Arkansas, 16, Beta Sigma Psi; California, 70, Sigma Phi Epsilon and Chi Omega; Colorado, 18, Pi Kappa

Alpha; Connecticut, 22, Northwest Hall; Delaware, 12, Sigma Chi and Pi Beta Phi.

Florida, 26, and Georgia, 23, Kansas State Veterans' organization; Idaho, 14, Acacia; Phi Kappa, Lambda Chi Alpha, and Van Zile; Illinois, 60, Indiana, 32 and Iowa, 26, Southeast Hall; Kansas 22, Delta Tau Delta; Kentucky, 26, Delta Delta Delta; Louisiana, 20, Young Men's Christian association; Maine, 16, Tau Kappa Epsilon and Alpha Delta Pi.

Maryland, 24, Beta Theta Pi; Massachusetts, 38, Van Zile; Michigan, 46, Cosmopolitan Club; Minnesota, 28, Delta Sigma Phi; Mississippi, 15, Alpha Gamma Rho; Missouri, 32, In-

dependent Students; Montana, 14, Acacia, Phi Kappa, Lambda Chi Alpha and Van Zile; Nebraska, 18, Walthelm.

Nevada, 12, Sigma Phi Nothing; New Hampshire, 14, Tau Kappa Epsilon and Alpha Delta Pi; New Jersey, 38, Kappa Delta and 1834 Club; New Mexico, 14, Phi Delta Theta and Kappa Kappa Gamma; New York, '96, Northwest Hall; North Carolina, 28, Independent Students association; North Dakota, 14, Alpha Tau Omega; Ohio, 56, Sigma Chi and Pi Beta Phi; Oklahoma, 22, Young Men's Christian association; Oregon, 18, Acacia, Phi Kappa, Lambda Chi Alpha, and Van Zile;

Pennsylvania, 7, and Rhode Island, 14, Alpha Kappa Lambda, Alpha Xi Delta, and Alpha Chi Omega; South Carolina, 16, Young Men's Christian association; South Dakota, 14, La Citadel; Tennessee, 28, Sigma Nu; Texas, 54, Phi Delta Theta and Kappa Kappa Gamma; Utah, 14, Young Men's Christian association; Vermont, 12, Tau Kappa Epsilon and Alpha Delta Pi; Virginia, 30, Sigma Alpha Epsilon.

Washington, 24, Acacia, Phi Kappa, Lambda Chi Alpha, and Van Zile; West Virginia, 16, Sigma Alpha Epsilon; Wisconsin, 30, Young Men's Christian association; Wyoming, 12, House of Williams; Alaska, 4, District of Columbia, 6, Puerto Rico, 3 and Virgin Islands, 1, Chancery Club; and Hawaii, 10, House of Breck.

### 'K-State Hour' To Feature Talk on American Indians

Linwood L. Hodgdon, sociology professor will tell the "Story of the American Indian" on this week's K-State Hour on WIBW-TV, Topeka, tomorrow evening from 10:15 to 10:30.

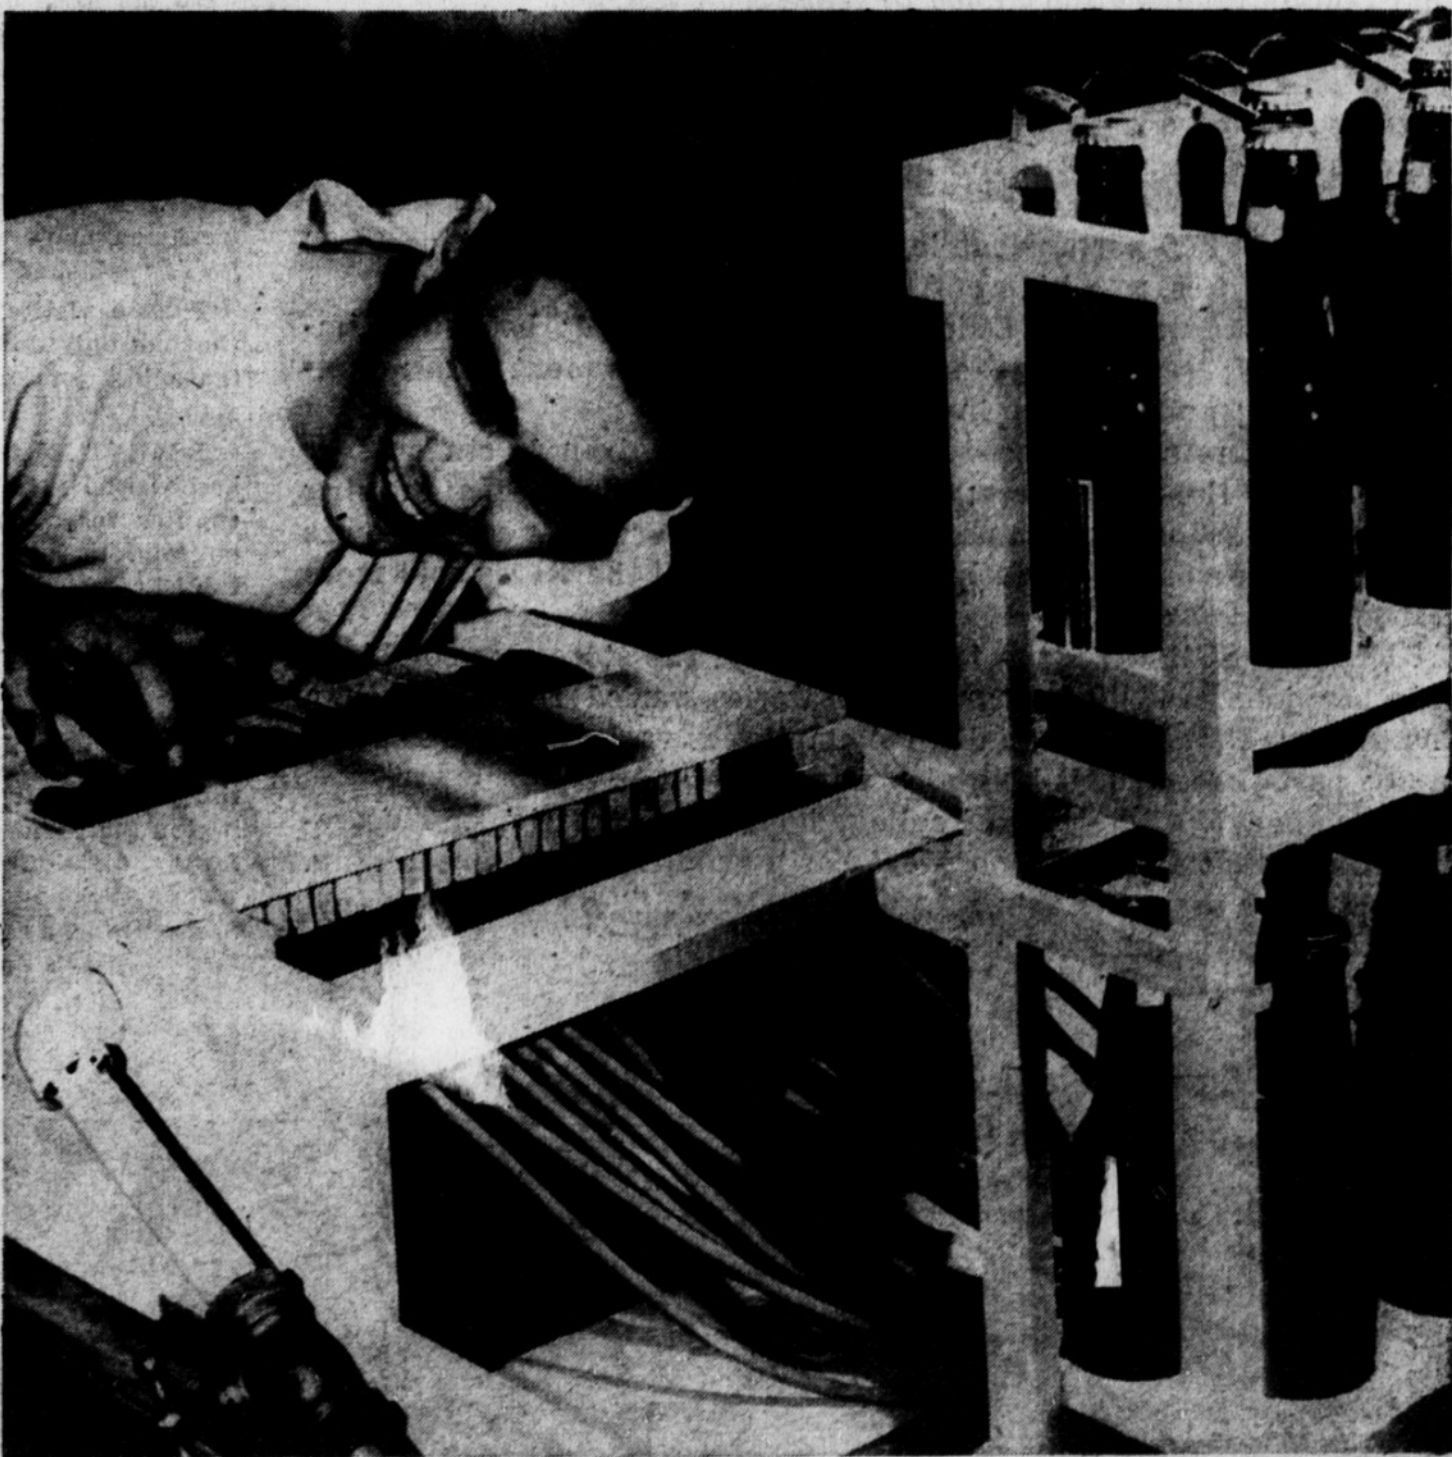

Professor Hodgdon, who holds a graduate degree in sociology and anthropology, and teaches a course in cultural anthropology, will be interviewed by Gordon Jump, member of the staff in charge of the TV show.

Hodgdon assisted workers from the Smithsonian Institute

in the summer of 1953 when they made excavations in the Tuttle Creek dam area to salvage prehistoric cultural remains of the American Indians.

A small Indian museum on the top floor of the College library has grown out of the findings, Professor Hodgdon said.

He plans to explain the background of Indians and methods of dating cultural remains found in excavations, and show slides of cultural sites in the Plains area.

# 'Right Road' To Integration Up to 'You and I' GI Says

Dear Mr. Miller:

I WAS PRIVILEGED recently to read your most interesting editorial in your school publication.

As you so well put it, one should clean up his own back yard before he tells others to clean theirs.

One has to realize, however, that those left who still display active racial and religious prejudice and discrimination are only doing what they feel to be right. While one cannot commend them, neither can one condemn them. It is up to us, people like you and I, to show them the "right road."

PERHAPS, IN September 1954, you read in the national newspapers of a racial incident at Hofstra college in Hempstead, N.Y.

The incident concerned a Negro student who had been invited to reside with a white professor and his family. The professor, who was Jewish, lived in an otherwise Catholic neighborhood. When the word got out that this man had asked a Negro to live with him, the rest of the block rose up in arms and threatened to force the professor and his family to move and, among other things, burned a cross in the front yard.

I KNOW THE story well. You see, I was that Negro student and I was almost forced to give up all dreams of going to college because of it. As it happened I couldn't get a job to help me subsist on the GI bill. Subsequently, I had to quit school and find a way to get money. I had gone so far in debt because of that "scandal" that I came back into the army to find a way to continue my education and pay my obligations as well.

Since this is supposed to be a congratulatory letter and not a synopsis of my life, I shall not go into too many details.

HOWEVER, I would like to let the students at K-State know that their problem is felt more acutely by one like myself than they ever could imagine.

After my "problem" at Hofstra, I was called on to give a series of lectures to the various student groups in the Hempstead area. I can say that my speeches helped those who wanted to meet the crisis, go to it and conquer it with the determination needed.

I AM PROUD to say that my lectures were the basis of the formation of quite a few committees that studied AND DID SOMETHING ABOUT the segregation in Long Island. The students there showed the rest of the city that they weren't going to be held back by petty grievances. I was elected President of my freshman class a bare two weeks after I was "splashed" in the newspapers.

I have visited Manhattan and I find that not only do the barbershops discriminate but an Aggieville drugstore does also.

I WENT IN there one morning after I had visited your campus and sat at the counter for a cup of tea. I was asked, politely, to leave and told that the establishment did not serve Negroes. I was under the impression that the College had had some effect on the practices of the businesses around its area. I see I was wrong.

I am seriously considering writing to the Department of the Army in Washington and demanding that the First Infantry division be moved to an area where the populace, at least, tries to make life away from home a little better

for the American. (And I, too, am an American).

WHILE I AM not actually a part of your campus life, I am enrolled in your extension courses here at Fort Riley. I'd like to be so bold as to consider myself, "ad instar," a student of Kansas State college.

May people someday realize that we here in America have to be above reproach in order to meet the conflicts of the world.

GOOD LUCK to you in your endeavors and I would like to be kept posted on what is being accomplished. I have more of an interest in your task than you could ever imagine.

Your most sincerely,  
Melvin A. Smith  
Cpl. U.S. Army

## Governing Board Thanks Staters

Dear Sir:

THE UNION Governing board extends a hearty thanks to all K-Staters for their enthusiastic welcome of the new Union. Campus life is richer and more integrated now, due partly of course to the fine facilities provided, but certainly due more to the admirable cooperation and attitude of all toward the Union which began opening night and has prevailed during its first week of operation. We feel this is an indication of days to come when the Union will increasingly become the campus nucleus.

We wish also to commend Loren Kottner and his staff who have worked many long and tiring hours to open the Union on schedule and successfully continue its operation. Their accomplishment was gained through work and interest far beyond the normal demand of duty.

WE WELCOME suggestions and observations from all K-Staters which will greatly aid the perpetuation of improvement of the Union and its program.

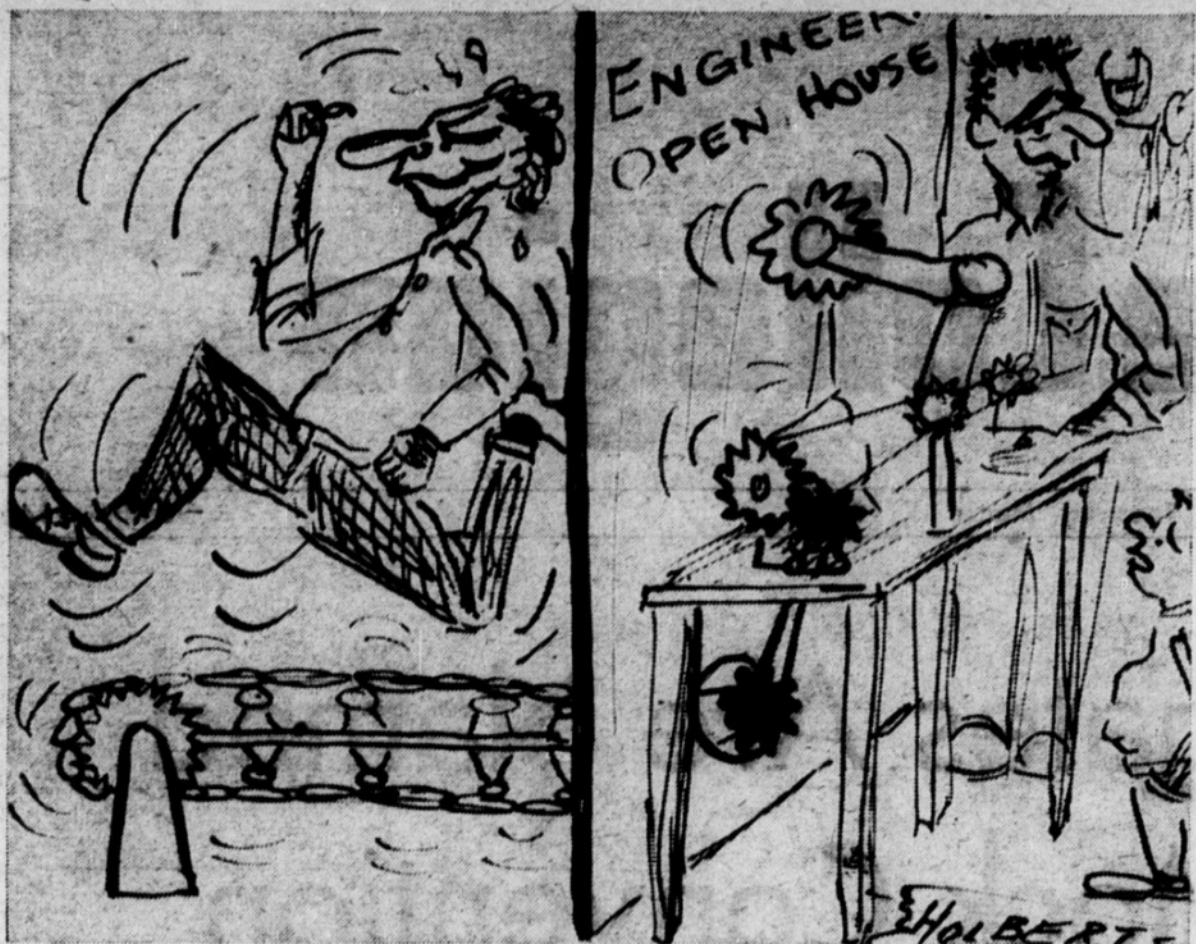

Sincerely,  
L. H. Armantrout, Chairman  
Union Governing board.

## Phog-Alcoholics?

A HUMOROUS sidelight on the interest that is currently being directed at Dr. Phog Allen, KU basketball coach, on his retirement appeared in an editorial in last night's Manhattan Mercury.

"Thirty-six years of coaching Jayhawk teams gives Phog more than a little sentimental attachment for the job. He do in directing alcoholics back into sober better physical specimen than many men 20 years his junior."

HOW ABOUT that? Could this be the answer to KU's phenomenal basketball successes under the tutelage of Dr. Allen?  
—George Vohs

"It's our new idea for perpetual motion."

## Poll of Union Bookstores Indicates Chance of Profit

PRESIDENT McCAIN has indicated that a Student Union bookstore is possible if the students want it.

"We are committed to a bookstore and probably could finance one right now," the President said. Replies to a 1952 questionnaire of 41 college bookstores indicate that, once the bookstore were started, it would pay its own way and probably would bring in a profit.

At any rate, the President's warning that students should go slow in choosing a location is good advice. It will be necessary to observe student habits in using the Union; then it will be necessary to make multitudinous plans. But the essential fact is that, if K-Staters want such a bookstore in the Union, they can have it.

AT THIS STAGE it seems pertinent to point out information gathered from a questionnaire answered by 41 college bookstores in 1953. This questionnaire was sent to the schools by the K-State comptroller's office. Replies were compiled by the statistical laboratory.

Highlights of the report:

1) Of the 41 bookstores, 71 per cent were owned by the schools, 17 per cent by students, while 12 per cent had unusual forms of ownership.

2) In general, bookstore policies and operating practices were determined by the school administrations.

3) CAPITAL INVESTED ranged from \$50,000 to \$500,000.

4) This capital was provided from earnings and operation funds; student fees, and funds and loans; university funds and budget; stocks and bonds; endowment; general funds; the state.

5) Capital invested in the building ranged from \$50,000 to \$700,000; annual rentals ranged from \$1,000 to more than \$10,000.

6) Three bookstores showed a loss; two bookstores showed no profit; 36 bookstores showed profits ranging from \$10,000 to \$59,000. Three bookstores showed a net loss as low as 11 per cent of sales; of the 36 bookstores showing a profit, the net profit varied from less than 5 to more than 21 per cent of sales.

7) NET PROFITS per student in 1951-52 varied from a minus \$1.26 for three bookstores, to a high of \$12.99.

8) Profits were used for: Union fund; general fund; bookstore improvement fund; scholarships and activities; endowment fund; construction bonds; and to repay investment.

9) No rebate, refund, discount, or dividend was given to students by 56 per cent of the bookstores; other practices included maintaining low prices; two schools gave a patronage refund. Service to students was most frequent reason for operating a bookstore; all the stores sold more than books.

10) IN NINE SCHOOLS, the job of managing the store was combined with other jobs; full-time managers' salaries varied from less than \$4,000 to more than \$10,000; full-time employees varied from 1 to more than 30; part-time student help also was used.

This summary outlines typical college bookstore operations. This report indicates that a college bookstore has a good chance of succeeding.

Perhaps there are other things to be considered. The Collegian would be glad to hear your ideas on the subject.—Darrel Miller.

# Zoology Students Study Mysteries of Animals

By ROYANNE McMULLEN

**THE MYSTERIOUS** and interesting interior of an animal body is the concern of zoology students. They examine and learn the different organs, systems, and life properties of various animals in zoology laboratory exercises.

The first weeks of the zoology laboratory is devoted to learning how to use the microscope. Simple cell animals such as the ameba and paramecium are studied. The students see a compact view of life and all the properties of life from these small animals.

**MULTI-CELLULAR** animals are then investigated—the hydra, planaria, and tapeworm. The planaria is fascinating to the students because it is cross-eyed.

Dissection of an earthworm is the first lab project. The students work in partners. They cut open and explore the body cavities, and find and identify the body organs. As they work, they make diagrams and drawings of the organs and body systems.

**NEXT COMES** the crayfish which is representative of anthropoda, the highest phylum of invertebrates. An amphioxus, the most primitive chordata, is next in line for dissection. The amphioxus is

slender, elongate, laterally compressed, and pointed at both end. It has no distinct head.

A cat dissection is the culmination of the course. The cat is representative of the class which includes man.

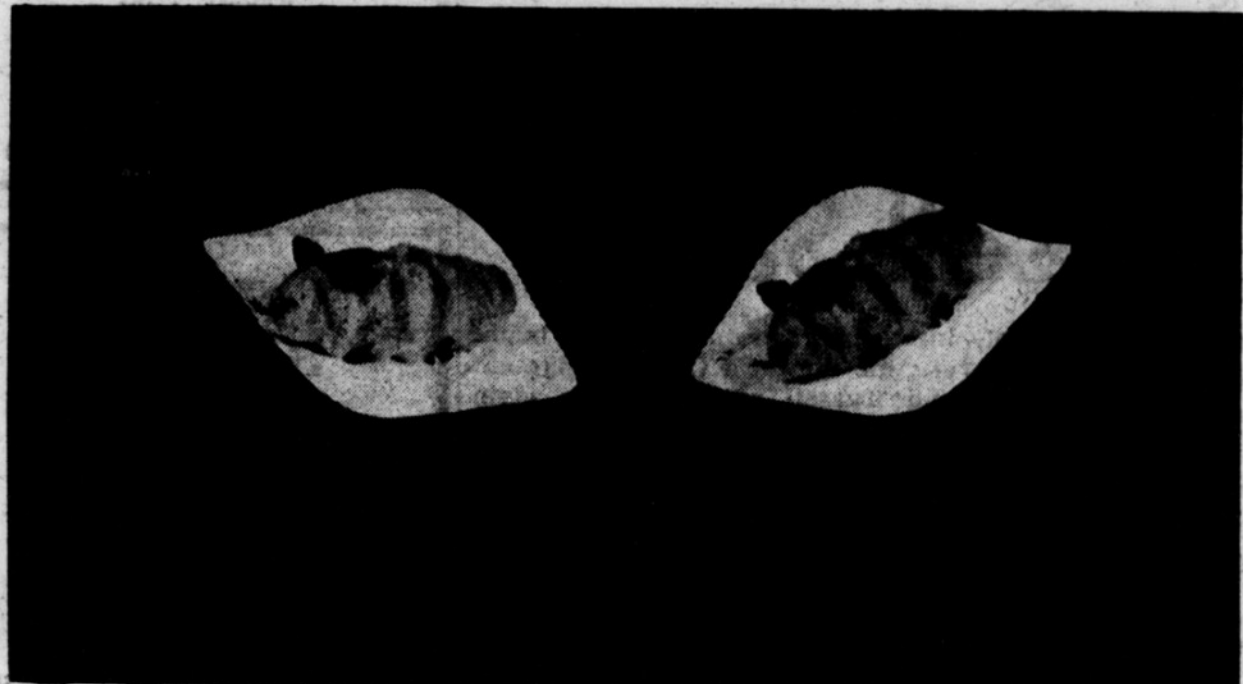

**AS THE STUDENTS** examine the cats, they develop an understanding of their own bodies and body systems.

Before beginning cat dissection, students are taken to the cat mortuary under Fairchild hall. Here they glimpse the cats they are to dissect.

**THESE CATS** have been killed and prepared by several boys hired by the zoology department. Many of the cats come from farmers who kill and sell them for a dollar each.

Carl Dixon, graduate assistant in the zoology department, said, "The boys, as well as the girls, are a little squeamish as they first cut into the cat, but they become adjusted before long."

**"THEY EVEN** become quite attached to their cats, giving them names and asking to keep them after the course is over. By the time the end of the semester rolls around, most of the students have had enough of the cat but a few actually take them home," he said.

Collegian photos by Gary Haynes

**INSIDE A CAT LOOKING OUT**—The only feline interior ever photographed to our knowledge. We found a high quality cat, however, we couldn't find a high-quality mouse "at which for the cat to look."

## Football Practice Field Has Buried 'Black Gold'

By ROSELYN KIRK

**BURIED TREASURE** is often found in the most unlikely spots, but digging for it on a football practice field sounds like the most fruitless search of all.

Such is not the case at K-State where 250,000 gallons of fuel oil are buried beneath the practice field.

The reason for this "buried oil," according to Randolph F. Gingrich, superintendent of the physical plant, is to keep the college power plant operating even if the source of supply from the regular gas line "should be cut off." Ordinarily the "boilers are fired by natural gas," Gingrich said, "but at times we've gone for as much as a month using oil."

**THIS MOTTO** of being prepared for anything has paid off for the plant. Gingrich recalls that once when the power line for Manhattan went out, though the college turbines "groaned," they supplied the whole city for a few seconds.

If the college power has to be turned off to install switches, it is done for a few minutes "in the middle of the night," Gingrich said. "And," he added, "the particular buildings concerned are always notified well ahead of time."

**HEAT IN ALL** of the newer buildings is controlled by thermostats regulated by clocks. But in the older buildings, heat valves are not automatic, Gingrich said. On cold mornings, 2 a.m. is the hour when two student employees turn on the heat.

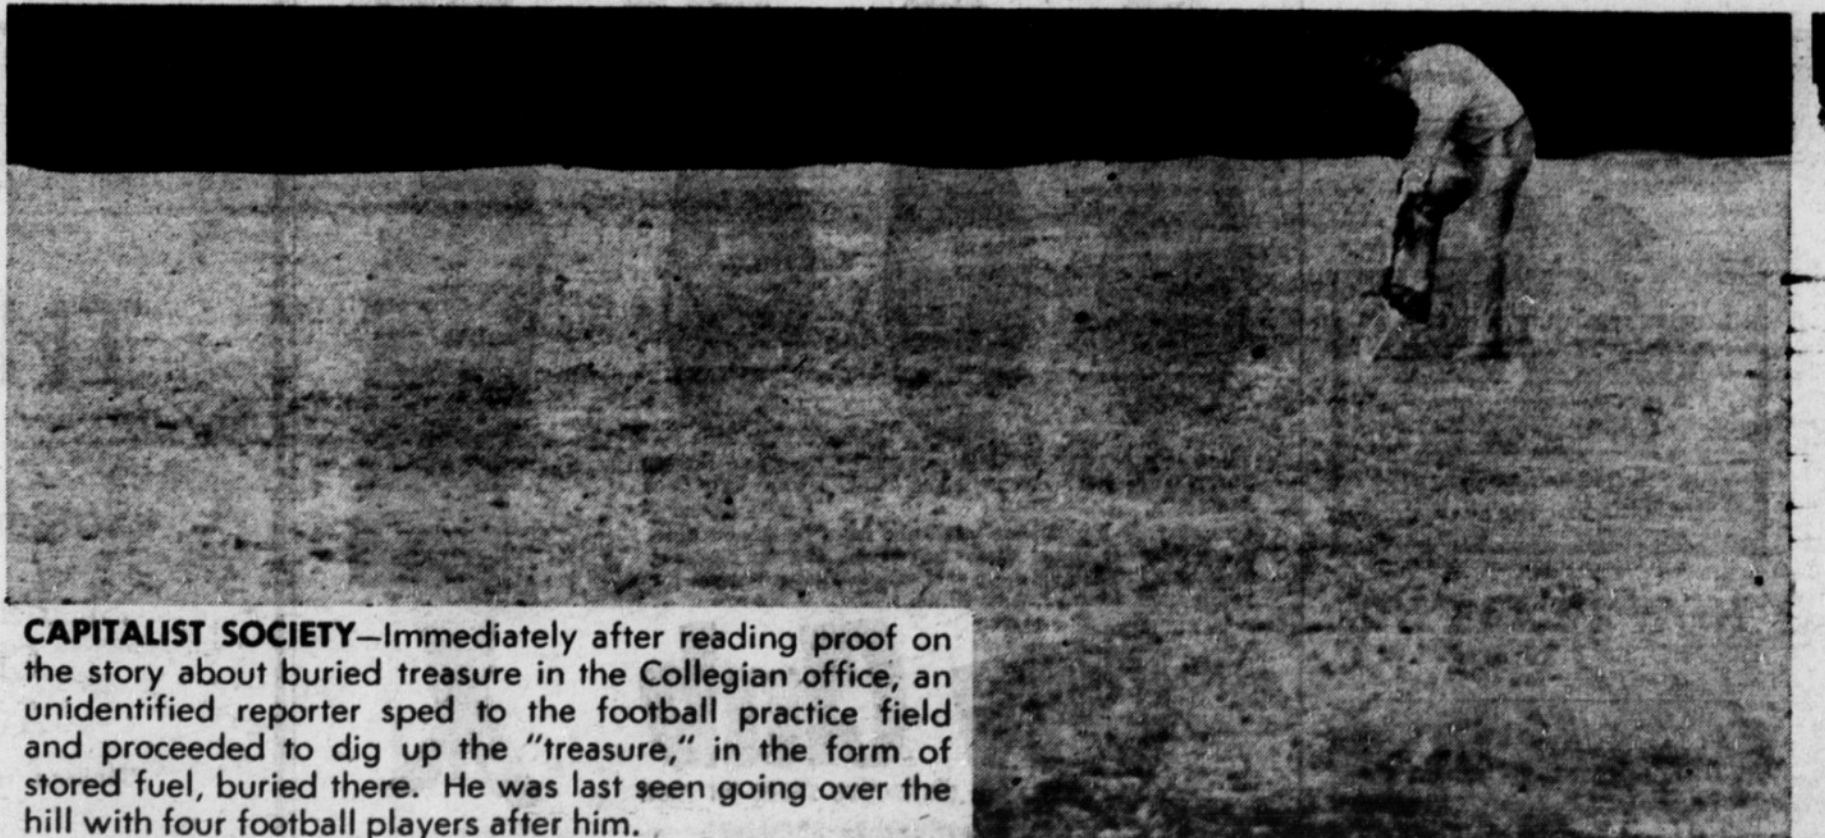

So extensive is the area the power plant serves—covering such outlying campus buildings as the agronomy farm, the sheep barns, and the poultry farm—that two men are on duty 24 hours a day.

**THE NEED** for power still grows. It

"increases with the buildings," Gingrich said. One million more kilowatts have been generated in the last eight months of this year than were used during the total fiscal year of 1947-48.

The present power plant was built in 1928. Prior to that time, power had been generated in the engineering building with the use of coal as a firing agent. Getting the coal to the plant was quite a chore, Gingrich recalls.

**"FIRST IT WAS** hauled by teams and then by a trolley car that ran up the hill." The solitary brick smokestack that stands near the present power plant, is evidence of the coal-firing days, he said.

**CAPITALIST SOCIETY**—Immediately after reading proof on the story about buried treasure in the Collegian office, an unidentified reporter sped to the football practice field and proceeded to dig up the "treasure," in the form of stored fuel, buried there. He was last seen going over the hill with four football players after him.

# ON THE HILL

KANSAS STATE COLLEGIAN

3—Thursday, March 15, 1956

**PAPER DOLLS NEXT?** Sally Baker, HEJ Sr, wonders where to put her final piece of cut-out furniture. Planning a home isn't as easy as it looks, even on paper, Mrs. Baker says.

## KS Coeds Look Ahead In Planning 'Dream Homes'

By CAROLYN LUSK

**LOOKING AHEAD** for future planning is what 75 to 100 coeds do each semester as they work on "their dream home" in a two hour course on the hill.

This course, called "The House," is planned so that students can learn more about the buying and planning of homes, said Miss Tessie Agan, instructor.

**AS PRELIMINARY** work, the girls think in terms of activities common to young families. Then, to see how realistically homes can be made to allow for these activities, they visit some Manhattan homes, and sometimes homes in Kansas City or Wichita.

After rethinking in terms of what they'd like for their own home, they begin looking through house plans and select one which they believe will best suit their needs.

**EACH COED** usually chooses a plan that has about 1,500 square feet of floor space, unless she feels a larger one could be financed.

The girls can make any changes which better fit their plans, then they ink-in the plans on heavy paper. They use furniture cut-outs which have been drawn to a scale for average pieces of furniture to furnish the planned homes.

**MOST OF THE** girls are very modern-

istic in the types of homes they choose, Miss Agan said. The tendency is toward a one-story ranch style. Many include built-in-ovens which would allow them to do their baking without having to stoop to look in, she said.

Most of the homes are planned for gas heating although some of the newer forms of heating systems such as solar heating and radiant heating are discussed.

**THE KITCHEN**, being the center of a woman's activities, receives the most attention. Even a woman's figure is taken into consideration when planning for the height of the sink and shelves, Miss Agan said.

Besides learning to place equipment efficiently, students see to it that no item is left without a place for storage. This sometimes happens with such items as a lazy susan, because these things weren't taken into consideration when planning the widths of the shelves.

**REGARDLESS** of whether the girls use the plans they worked out for their future home, they come out of the class with a better understanding of what makes a home—costs, types of payments, and a more efficient planning of rooms to suit family activities, she said.

## A Cat's-Eye View

With Dick Holdren

By BILL WHISTLER  
Guest Columnist

Fritz Schneider's torrid play against KU in K-State's last Big Seven game set a new Allen Field House record and won him a place as one of K-State's all-time greats.

Just before that game, Fritz asked coach Tex Winter if he could go to Kansas City to see his girl friend, Karen Ross, if the Cats won the game.

THAT NIGHT a car hurtled toward Kansas City, Kansas. Still in the driver's seat, and with 36 points to his credit, Fritz was keeping that date.

Karen graduated from K-State last January and now teaches at Lowell grade school in Kansas City. Her apartment was brightly lit and a chatter of voices floated down the hall as Fritz arrived.

"IT SEEMED like all of Karen's friends were there to congratulate me," he said. "The party lasted until 6 the next morning. Later Fritz went to grade school with Karen as a special guest.

"Karen teaches the fifth grade. When the children walked into the classroom I nearly dropped over," Fritz said. "The boys looked at least 15, with the girls running a close 14. It seemed as if I had walked into a scene from 'Blackboard Jungle,'" he said.

"Karen thought I should be introduced as a special guest and not as her fiance," he said. "The trouble was that the children started hollering that 'Teacher brought her fella to school.'"

FRITZ SAID he likes the 'little ones.' "We're going to have 2 boys and a girl," he said. This, of course, brought up the subject of marriage. The wedding date has been set for July 22 at Pawnee Rock, home of the future bride.

How did this enchanting romance begin? "You won't believe it, but it started in the Canteen," he said. "It was November of '54 and 2 friends were there with their girl friends," he said. "They were planning on getting married and cutting marriage licenses out of paper napkins."

"KAREN was sitting across the table from me with no one cutting out a marriage license for her. Here was my chance, so I joined in the make-believe too," he said.

"How about going steady," he asked. In fun she answered, 'OK, but I've already promised this Friday to someone else.' "I didn't know it then, but that Friday was a reprieve, because I was hooked," Fritz said.

"IT STARTED all in fun, but things sure got serious mighty quick," he said.

Fritz doesn't guarantee the Canteen is a sure-fire matchmaker. As one fellow put it, "It sounds great. The only trouble is, I've been sitting in the Canteen for 7 months, and nothing like that has happened to me."

### Podres To Be Inducted

New York (U.P.)—Col. Paul Akst, New York City director of selective service, announced today that Johnny Podres, the Brooklyn Dodgers' world series pitching hero, will be inducted into the army next Monday, March 19.

Akst said Podres will be sent to Fort Dix, N.J., after induction.

## 'Just Another Guy,' Bill Russell Says

New York (U.P.)—Bill Russell, the San Francisco star who modestly claims he would be "just another guy on the floor" without the help of teammate K. C. Jones, today was named college basketball's Player of the Year by the United Press.

The 6-foot, 10-inch Russell easily won the honor in balloting by 337 sports writers and broadcasters. He received nearly six times as many votes as any other player, drawing 182 compared to the 34 received by runnerup Robin Freeman of Ohio State. Ronnie Shavlik of North Carolina State was third with 24.

Russell and Jones both won positions on the United Press all-America team last week after helping San Francisco stretch its victory streak to a major college record of 51 games.

"I would be just another guy on the floor if it wasn't for Jones," Russell said. "He is an all-American and one-half. I wouldn't have come close to all-American without him."

Russell will test his theory during the next few days. Jones is not eligible for the NCAA tournament and Russell will carry the main load when San Francisco opens defense of its title Friday night against UCLA in the western regionals at Corvallis, Ore.

## Phog Allen May Remain At Kansas U

Forrest C. (Phog) Allen has told KU officials he would like to stay on as Jayhawk basketball mentor for another year.

Allen made the announcement in a mimeographed statement yesterday at a press conference in Lawrence.

Phog has hinted that with Wilt Chamberlain, who he says is the greatest he has ever seen, he could bring the NCAA championship to Kansas university next year.

KU Chancellor Franklin D. Murphy said he presumed the matter would be decided by a recommendation from the athletic council to the state Board of Regents who would decide whether or not Phog would stay.

Allen said he was cast in a dual role as physical education professor and varsity basketball coach. "It is in my capacity as basketball coach, not as a teacher, that I would like to continue next year," he said.

In this way Phog could get around the mandatory retirement age of 70 for Kansas college teachers. Allen was 70 at the start of the 1955-56 season.

"I don't request or expect any special considerations," Allen said. The one year extension could be because he wants to coach the fabulous seven-foot Chamberlain for at least one year.

Allen said the loss of captain Dallas Dobbs midway through the season dropped KU from a title contender to a fifth-place Big Seven finisher.

Although Phog's basketball future is uncertain he still had some comments on the upcoming NCAA regionals.

He said that Southern Methodist and 6-7 Jim Krebs is the combination to beat in the regionals. Phog said he would like to see K-State win the regionals, "but SMU is exceptionally strong."

SMU will meet Houston, Missouri Valley champion at 9:30, and Oklahoma City U. will play the Wildcats tomorrow at 7:30 p.m.

### The Case Is Clothed

Wilmington, N.C., (U.P.)—Johnny Turner has been sentenced to 6 months on road gangs for selling his mother's clothing to buy wine.

The trial had to be delayed because the mother had no clothing to wear to the trial.

Collegian photo by Gary Haynes

**SCORES AGAIN**—Pachin Vicens receives a scroll from Look magazine denoting that he made the Look 5th. district all-American team. Director of Athletics "Moon" Mullins makes the presentation while coach Tex Winter looks on.

## Look Award To Vicens For Second Straight Year

By DON MARKER

Not all basketball honors go to the tall men. Proof of this is Pachin Vicens, 5-9 senior guard of the Wildcats.

For the second straight year, Pachin recently was chosen on Look magazine's fifth district all-American team.

Earlier this season the scrappy competitor from Puerto Rico was awarded a second team berth on the Big Seven's all-star squad.

In 1954 Vicens was selected for the United Press Small American squad and he was also named Sportsman of the Year in Puerto Rico.

Although he's only 5-9, Pachin isn't handicapped by his size. As anyone who has watched the Cats play this year will say, "He gets a lot of places and does a lot of things with that basketball that few men in the conference can."

Vicens and Eddie Wallace, junior guard, are the smallest men on this year's basketball squad, but "Pancho's" height prolific scorer as well as the best ball-handler on the team.

He also is a good rebounder. This season in 23 Cat games "Pancho" has pulled down 133 rebounds. This is second only to Jack Parr's 303.

While functioning as playmaker

"Pancho" has also held up his end of the team scoring. He's hit 280 points in regular season competition for a 12.2 average. That's a 39 per cent shooting average—pretty good considering the difficult shots "Pancho" gets off.

The perfect climax for the little guy's shiny basketball career at K-State would be for the Cats to go all the way in the NCAA tournament. Whatever honors Pachin wins, he'll earn.

## Volleyball Playoffs Will Decide Independent Title

The independent volleyball champion will be decided the first of next week when group champs, OK House, Hui-O-Makules, and Hillbillys, meet in a playoff.

OK House will play the Hui-O-Makules Monday at 7 p.m. The winner will play the Hillbillys Tuesday at 7 p.m. for the independent title.

A three-way tie in Group IV of the fraternity division will be played off the first of next week.

Beta Theta Pi will play Sigma Nu, Monday at 7 p.m. The winner of this match will play Sigma Phi Epsilon, Tuesday at 7 p.m.

Last night's volleyball scores were:

Acacia over Alpha Kappa Lambda 2-0, Phi Kappa over Tau Kappa Epsilon 2-1, Delta Tau Delta over Phi Delta Theta 2-1, Sigma Alpha Epsilon over Phi Kappa Tau 2-0, Kappa Sigma over Lambda Chi Alpha 2-1, Sigma Chi over Delta Sigma Phi 2-0, Farm House over 1834 Club 2-0, and Beta Sigma Psi over Alpha Gamma Rho 2-0.

Intramural managers will meet on the third floor of the field house gym, Wednesday at

7 p.m., Frank Myers announced. The managers will receive entry blanks for remaining sports of the semester.

The fraternity division will play volleyball semifinals Thursday, March 22, at 7 p.m. Finals will be played Friday, March 23, at 7 p.m.

The winner of each volleyball game receives 18 points and the loser receives six, Myers said. The champion team will receive a bonus of 25 points and the runner-up will receive 10.

Points for all intramural sports will be totaled up at the end of the semester to determine the over-all intramural winners in both fraternity and independent divisions.

A trophy will be awarded to the champion fraternity and individual medals will be given to each player on the winning independent team, Myers said.

Badminton is the next intramural sport scheduled. Teams will play March 26, 27, and 28. Singles, up to the finals, will be played March 28, Myers said.

## AIRLINE HOSTESS for TRANS WORLD AIRLINES

START NOW AT AGE 20

NOW RECRUITING FOR JUNE CLASSES

You can now fly with the finest airline in the world with routes both in the United States and overseas if you can meet these qualifications. High school graduate; age 20 to 27; height 5' 2" to 5' 8"; weight 100-135; attractive; unmarried; eyesight 20/50 or better; training at TWA's headquarters in Kansas City, Missouri, at company expense with pay.

Mr. R. Paul Day  
Trans World Airlines  
10 Richards Road  
Kansas City, Missouri

### A short story on comfort . . .

Plain or fancy, boxer style or brief, our Arrow shorts give you comfort in any position. The Arrow Tee (shown here) is right for sports, or worn as an undershirt. Any way you use it, it has comfort plus. Tee, from \$1.25. Shorts, from \$1.50. Guards (knitted briefs), \$1.20.

## BELL SYSTEM JOB OPPORTUNITIES

... for Engineering  
and Physical Science  
Graduates

The Bell Telephone System offers challenging careers in providing an essential public service—plus interesting work in special military projects vital to national defense.

You will find good salaries and excellent opportunities for advancement in this progressive industry that has doubled in size in the past ten years.

Seniors and graduate students in engineering and the physical sciences who are completing work on their degrees in June, 1956, are invited to register for interviews by representatives of:

Southwestern Bell Telephone Company  
Western Electric  
Bell Laboratories  
Sandia Corporation

Bell System representatives will be on the campus Wednesday, March 21, and Thursday, March 22. Arrangements for an interview can be made at the electrical engineering office or the mechanical engineering office.

BELL TELEPHONE SYSTEM

## Comfort has always been a college requirement

And, Arrow underwear offers pure comfort in any position. The Arrow Tee has a neckband that won't enlarge, keeps its good fit always. \$1.25. Boxer shorts, with contour seat, in novelty patterns or solid colors give you style with no-bind wear. \$1.50. Arrow Guards (knitted briefs), offer the same complete comfort as all Arrow underwear. \$1.20.

# Rainbows in Raincoats For Spring Showers

Spring's rainbow of raincoats will brighten up even the duller days for K-State coeds.

New fabrics, rainbow colors and new styles shower on raincoat fashions.

Velvet, treated to repel water, is now being used in rainwear. The slim, well-tailored, beige, velvet coat modeled by Marie Price, HE Soph, is an all-weather coat. This rain repellent garment is also an all occasion coat. It can be worn as an evening coat, for casual wear or rainwear.

Black corduroy trim slicks-up the pastel slicker modeled by Margie Slaughter, EEd Soph. A matching sou'wester hat completes the ensemble.

Combining geometric designs with a touch of glamour results in an attractive poplin raincoat for Bette Brown, Clo Sr. Black designs on a white background are highlighted with a black tie and rhinestone clip at the throat. Bette wears a matching cloche.

Ivy League influence is also noted in rainwear. The classic blazer has been converted into a cotton poplin coat suitable for any weather. The piping on the coat is also carried out on the "boy's" style cap.

Matching ensembles of coat, cloche and umbrella are shown predominantly in checked acetate taffeta.

Many cotton poplin coats are stitched to copy the trench coat's swagger.

Sou'westers are being shown in every color of the rainbow. Bright vinyl plastic sou'westers have a corduroy-lined collar and snug, metal fasteners. Other advantages are roomy pockets for purse, small books and sou'wester hat.

Showers of flowers on rain re-

sistant cotton chintz is styled into a semifitted princess coat. It has a velveteen collar and is lined in acetate taffeta.

Flowers bloom inside one of the cotton poplin raincoats. It is lined with rose print poplin and has a matching kerchief.

One smooth and free swinging raincoat of vinyl plastic twinkles with embossed stars.

Pinwale multicolor tweed corduroy raincoats are highlighted by two interesting patch pockets

with flap and side button accent. Clever notched club collars and turn-back cuffs are other features of this raincoat.

Spring raincoats are styled with the new modified slim silhouette, club collar, raglan sleeves, deep, slanted pockets and turn back cuffs.

You'll pray that rain will come to stay if you purchase one of these fabulous new raincoats that are as right in the rain as they are bright in the sun.

Coats courtesy of Stevenson's

Collegian photo by Gary Haynes

"OUT IN THE RAIN." Bette Brown, Clo Sr, (left) and Margie Slaughter, EEd Soph, seem to be hogging the umbrella but Marie Price, HE Soph, isn't worried. Her coat is rain repellent.

## Fools Rush In Where Angels Fear To Tread

### Pinnings

#### Harkins-Kidd

Cigars announced the recent pinning of Caroline Harkins, Liberal, to Robert Kidd ME Soph, Liberal, member of the 1834 Club. Caroline attends Lindenwood College.

♦ ♦ ♦ ♦

#### Thomasson-Newlin

Betsey Thomasson, Sp Jr, and Bob Newlin, ME Sr, recently announced their pinning with the passing of chocolates at the Chi Omega house and cigars at the Phi Delta Theta house. Betsey is from Belleville; Bob is from Parsippany, N.J.

♦ ♦ ♦ ♦

#### Bosse-Kreitler

Cigars at Theta Xi and chocolates at Van Zile Sunday announced the pinning of Loleta Bosse, EEd Jr from Wheaton, to Frank Kreidler, BPM Jr from Bush City.

♦ ♦ ♦ ♦

### Engagement

#### Hinman-Burgoon

Jackie Hinman, EEd Jr, recently announced her engagement to Ken Burgoon, '55, with the passing of roses at the Chi Omega house. Jackie is from Larned; Ken is from Pomona. They plan to be married May 20.

## Greeks Hold Spring Initiations, Pledgings

KANSAS STATE COLLEGIAN  
Thursday, March 15, 1956-6

New initiates at Delta Tau Delta are Dwight Bennett, Ar 01 Sterling; Melvin Burdorf, CE Soph, Peabody.

James Carpenter, FT Fr Phillipsburg, Michael Dole, ChE Fr Phillipsburg; John Floyd, Ag Soph Sedan.

Stanley Hansen, Ar 01 Peabody; Richard Hotz, MT Fr Almena; Harold Hutchinson, EE Fr Wichita.

Joe Kashner, PrV Fr Lebanon, Ind; Norman Keyse, TA Fr Scott City; Walter Mayden, ChE Fr Abilene; James Marnier, Zoo Fr Kansas City.

Wilbur Newman, ME Fr Wichita; Lowell Novy, PrV Soph Friend; William Ryan, PrL Soph Norton.

Karl Stutterheim, BA Fr Phil-

lipsburg; David Yerkes, ArE Fr Canal Zone; and Curtis Zeigler, ME Fr Abilene.

♦ ♦ ♦ ♦

Sigma Alpha Epsilon initiated 20 pledges Saturday, in the Wareham hotel. The new initiates are Darrell Grove, Frank Chrisbens, Jerry Emerson.

David Cool, Engle Scott, Everett McGalliard, Jon Weigand, Jack Hanks, Jesse Unruh.

John Jung, Art Fromm, Ralph Wareham, Joe Evans, Fred Kaiser, Jim Allen.

Robert Martem, Paul Bader, Charles Weingert, Vaughn Shamburg, Hayden Abbott.

♦ ♦ ♦ ♦

Initiation was held the weekend of March 9 and 10, at the Acacia chapter house. The new initiates include Jim Zinn, Ag Jr, Tom Rodgier, Ag Fr, Gerald Hodges, Ag Fr, George McCormick, Ag Soph, Don Edson, Ag Fr, Eldon Yeager, Pys Fr, Bob Clark, Chm Fr.

♦ ♦ ♦ ♦

New initiates of Alpha Xi Delta are Sandra Morissette, ArE Soph from Beloit, and Kathy Dodd, EEd Soph from Great Bend.

♦ ♦ ♦ ♦

Larry R. Foulke, NE Fr, Kiowa, John P. Doyle, BAA Fr, Douglas, Tommy King, EE Fr, Douglas, and Terry E. Lee, ME Soph, Olathe, are new Delta Tau Delta pledges.

♦ ♦ ♦ ♦

Sigma Phi Epsilon pledged Bob McDonald, ME Fr from Larned; Jerry McKee, Geo Fr from Blue Rapids; and Verlin Turner, Ar 01 from Salina.

## Alpha Delta Pi Has Prominent Dinner Guests

Dinner guests at the Alpha Delta Pi house Sunday were Dean Helen Moore, Miss Virginia Smith, director of Northwest hall, and Miss Virginia Combs, director of Southeast hall.

♦ ♦ ♦ ♦

Members of Pi Kappa Alpha held their Founder's Day banquet in the Student Union Sunday. Among those present were 30 alumni and several special guests.

♦ ♦ ♦ ♦

Sigma Nu had a western party Saturday night for its members, rushees and their dates.

♦ ♦ ♦ ♦

The members of Kappa Sigma held their annual paddle party Saturday night for the pledges, actives, and their dates. All pledge sons honored their pledge fathers with paddles.

## J. Paul Sheedy\* Was Up A Tree Till Wildroot Cream-Oil Gave Him Confidence

"Gentle my dreams, I love you," said Sheedy outside his sweetie's window. But she was playing it cagey. "Get lost Gargantua," she said. "I've seen better heads on coconuts." Then Sheedy got wise to Wildroot Cream-Oil. Now he has confidence in his ape-earance because Wildroot keeps his hair handsome and healthy looking the way Nature intended... neat but not greasy. Contains heart of Lanolin, Nature's finest hair and scalp conditioner. So don't monkey around with messy hair. Get Wildroot Cream-Oil, America's largest selling hair tonic. In bottles or unbreakable tubes. It gives you confidence in any situation. Use Wildroot Cream-Oil every day and you Congo wrong.

\* of 131 So. Harris Hill Rd., Williamsville, N. Y.

**Wildroot Cream-Oil  
gives you confidence**

"I feel like a Coca-Cola,  
Do you?"

Of course. Most everyone does—often. Because a few moments over ice-cold Coca-Cola refresh you so. It's sparkling with natural goodness, pure and wholesome—and naturally friendly to your figure. Feel like having a Coke?

## Kroger Banquet To Honor State Scholarship Holders

The annual Kroger scholarship banquet, honoring recipients of the scholarships, will be March 21 in the new Union.

The \$200 Kroger scholarships are awarded each June to four freshman students—two in the school of agriculture and two in the school of home economics.

Freshmen who received scholarships this year are Thomas Appleby, Ag Fr; Laurice Margheim, Ag Fr; Peggy Bunyon, Clo Fr; and Sandra Sue Jones, HEN Fr.

Past scholarships winners who

will attend the dinner are Nathan Greene, TA Soph; Carlyle Thompson, Ag Soph; Brent Adair, MT Jr; Theodore Colson, DM Soph; J. W. Johnson, VM Soph; William Birtell, VM Soph; Irvin Schwalm, VM Jr; Charlotte Henry Neilan, HEJ Jr; Marilyn McNelis, FdN Jr; and Velma Finkenbinder, HE Soph.

Representatives of the Kroger company, personnel from the Schools of Agriculture and Home Economics, and members of the Kroger scholarship committee will also be guests at the dinner.

### Club Column

## Judy Crawford Named New President of RCC

Judy Crawford, Hst Soph, has been elected president of the Religious Coordinating Council. Judy is a member of the Wesley Foundation and YWCA.

Other new officers are Ken Brackney, EE Soph of the Newman club, vice-president; Barbara Root, EEd Jr of the Canterbury club, secretary; and Bernie Schleicher, Bac Gr of Hillel foundation, treasurer.

### HE Demonstration Club

Members of the Home Ec Dietetics and Commercial Demonstration club will meet in SU 206 this afternoon at 4. Richard Harman, manager of Myron Green's restaurant in Kansas City, will be guest speaker. His topic will concern professional attitude and appearance on the job.

### Ag Ed Club

The Ag. Education club will meet Tuesday at 7:30 p.m. in J15. Prof. F. C. Fenton, head of agriculture engineering, will speak on "The Growth of Farm Mechanics and Its Value to the Farmer." Awards won in the recent Farm Mechanics contest will be presented.

### HE Extension Club

Home Economics extension club will meet Thursday at 4 p.m. in A207. Fran Russell recent IFYE delegate to Finland, will show slides taken on farms visited last summer.

### Gamma Sigma Delta

Members of Gamma Sigma Delta will meet in Dickens 108, at 4 p.m., March 20 to elect new members and officers. Prof. John A. Johnson announced.

### Chaparajos Club

The Chaparajos club rodeo will be Sunday, April 15 at 2:30 p.m. at the Manhattan Round Up lot. Vice President Clark Wilson announced at a meeting Tuesday.

### Dairy Club

The dairy products judging contest will be May 12, it was decided at the regular meeting of the Dairy club last evening. Ed. Jackson, a dairy product plant manager, spoke on dairy trends.

### Phi Epsilon Kappa

Phi Epsilon Kappa, physical educational professional fraternity, held initiation for five members on Monday. Those initiated were John W. Carlson, Vermil-

lion; Robert Eshelbrenner, Fort Scott; Karl Kastens, Kiowa; Ronald Radford, Blue Rapids; and Hubert Wilson, Manhattan.

### Family and Child Development Club

Family and Child Development club will meet this afternoon at 4 in Calvin 208. Nomination of officers for next year will be made at the meeting, according to Betty Straub, president.

### HE Economics and Teaching Club

The Home Economics and Teaching club will meet this afternoon at 4 in Calvin 101. Sylvia Hyde, former president of the club, will speak. All girls enrolled in Home Ec and Teaching are invited to attend.

## HOW TO BE A THUMPING BIG SUCCESS ON CAMPUS

While up in the attic last week hiding from a bill collector I came across a letter, yellow now with age, that dear old Dad had sent me when I was a freshman. I read the letter again and recalled, with many a sigh and not a few tears, what an inspiration it had been to me back in my freshman days. I reproduce it below in the hope that it may light your way as it did mine.

"Dear Son, (Dad always called me Son. This was short for Sonnenberg, which was originally my first name. I later traded it with a man named Max. He threw in two outfielders and a left-handed pitcher... But I digress.)

"Dear Son, (Dad wrote)

"I suppose you are finding college very big and bewildering, and maybe a little frightening too. Well, it need not be that way if you will follow a few simple rules.

"First of all, if you have any problems, take them to your teachers. They want to help you. That's what they are there for. Perhaps they do seem rather aloof and forbidding, but that is only because they are so busy. You will find your teachers warm as toast and friendly as pups if you will call on them at an hour when they are not overly busy. Four a.m., for instance.

"Second, learn to budget your time. What with classes, activities, studying, and social life all competing for your time, it is easy to fall into sloppy habits. You must set up a rigid schedule and stick to it. Remember, there are only 24 hours in a day. Three of these hours are spent in class. For every hour in class, you must, of course, spend two hours studying. So there go six more hours. Then, as everyone knows, for every hour of studying, you must spend two hours sleeping. That accounts for another twelve hours. Then there are meals—two hours each for breakfast and lunch, three hours for dinner. Never forget, Sonnenberg, you must chew each mouthful 288 times. You show me a backward student, and I'll show you a man who bolts his food.

"But college is more than just sleeping, eating, and studying. There are also many interesting and broadening activities, and you would be cheating yourself if you neglected them. You'll want to give at least an hour a day to the campus newspaper and yearbook, and, of course, another hour each to the dramatic and music clubs. And let's say a total of three hours daily to the stamp club, the foreign affairs club, and the debating society. Then, of course, a couple of hours for fencing and bird-walking, a couple more for square dancing and basket weaving, and one or two for cribbage and ice-sculpturing.

"Finally, we come to the most important part of each day—what I call 'The Quiet Time.' This is a period in which you renew yourself—just relax and think green thoughts and smoke Philip Morris Cigarettes.

"Why Philip Morris? because they are the natural complement to an active life; they are gentle, they are benign, they are tranquil, they are a treat to the tired, a boon to the spent, a haven to the storm-tossed. That's why.

"Well, Sonnenberg, I guess that's about all. Your mother sends her love. She has just finished putting up rather a large batch of pickles—in fact, 350,000 jars. I told her that with you away at school, we would not need so many, but lovable old Mother is such a creature of habit that though I hit her quite hard several times, she insisted on going ahead.

Your ever lovin'

Dad."

©Max Shulman, 1956

'Advice to freshmen is not the business of the makers of Philip Morris, sponsors of this column. But cigarettes for freshmen is. Also cigarettes for upperclassmen, graduate students, profs, deans, and everybody else who enjoys a gentle, modern smoke. We mean Philip Morris, of course!'

# Twirling Lass Teaches New Class in Twirling

"Throw, spin, and leg-pass," says Karen Blume, Sp. Fr., Wichita, as she instructs "Twirling Choir," a class of about 100 student twirlers, each Saturday from 2 to 3 p.m. in Manhattan's Civic Recreation hall.

Karen, a freshman twirler for the K-State Marching Band, has won some 25 medals and trophies for her outstanding twirling ability.

She was selected as "out-standing twirler" from some 300 twirlers at a three-state festival in Enid, Okla. She had placed first in her class the three years previous, but this time won top honors for all classes.

She has participated in several national contests, placing third in a contest at Monett, Mo., and second last year at Joplin, Mo.

As a majorette for the junior state champion American Legion Drum and Bugle corps, she attended American Legion national conventions in New York, Washington D.C., Miami Beach, and Los Angeles.

She is one of four Kansas girls who are members of National Twirling Teachers' association. She is also a member of National Baton Twirlers association, and International Baton Twirlers foundation.

Karen began taking twirling lessons while in the sixth grade and placed first the following year in Wichita's State American Legion contest.

Besides teaching the class here, which she began a week ago, she has done some teaching at summer twirling clinics in Kansas and other states. She has also given private lessons to pupils in Wichita.

She is practicing now for a minstrel show under the direction of Frank Anneberg, Manhattan recreation director, for March 18 and 19.

"I like to teach," she said, "as I enjoy watching younger people gain poise and learn to become good twirlers."

## World News Briefs

# Middle East Disputes Make U.S. Look Again

Washington (U.P.)—A dangerous rise in Middle Eastern tensions has sparked a new look at U. S. policies in that area, including the controversial arms-for-Israel question, administration officials reported today.

One indication of new deep-rooted Washington anxiety over the Israeli-Arab dispute was the fact that President Eisenhower, despite his heart attack convalescence, has been working overtime on the problem.

The President and his advisers have placed on Russia responsibility for sharpening prospects of a Middle Eastern war through Communist arms sales to Egypt.

### Malenkov in London

Russia's Georgi M. Malenkov is in London today getting his

first look at the free world he and his colleagues in the Kremlin seek to destroy.

Malenkov is to tour Britain for three weeks, as Soviet minister for electric power stations, with a delegation of experts.

His presence in Britain is expected to give a preview of the

reception to be accorded to Soviet Premier Nikolai A. Bulganin and Communist party leader Nikita S. Khrushchev, who will arrive in London April 18 for a 10-day stay.

The entire period will be a nervous one for Britain's counter-intelligence services.

## Dusty Copies Of Organ Mag Find a Home

Fifteen years of back copies of "The Diapason," a monthly magazine of organ music, are being packaged by Kansas State College music students for shipment to Bombay, India.

When a man in India recently advertised for back copies of the magazine, it reminded Robert Wilson Hays, College organist, that his predecessor, Richard Jesson, had left behind a considerable number of the old magazines when he left the K-State staff back in 1946.

Hays, who is faculty adviser of the K-State Guild chapter, said the Indian organ enthusiast apparently plans to use the back issues of the magazine to compile card-indexed scrapbooks.

## Two Lumps? Cream?

# 'Goldberg' Machine Will Make Coffee

By GARY YEAKLEY

Can a cup of coffee be produced from thin air?

Not quite, but a cup passing in front of an electric eye can activate a machine to measure and heat a cup of water, add it to coffee, and in 2 to 3 minutes run the resulting coffee into the cup, and turn the machine off—all automatically.

## Judges of Exhibits To Be Anonymous

By MARY JANE SHERER

Engineering departments with displays at Engineering Open House won't know who the judges are or when they will be judging.

"Their identity will be kept secret to insure efficient handling of displays at all times," Bob Miller, chairman of Open House, said.

A trophy sponsored by Steel Ring is to be presented at St. Pat's Prom to the best departmental display.

Last year, the Steel Ring trophy was presented to the Mechanical Engineers for their mouse trap, and hiltch tube. A hiltch tube is a device in which air under pressure is blown through a tube; the air is circulated and comes out two tubes into two model houses; one house receives hot air, the other cold air.

The civil engineers had the best individual display last year, a model of the Kansas turnpike. They were recognized at St. Pat's Prom.

This "Rube Goldberg" coffee maker, credited to Ralph Knox, ME Fr, will be a mechanical engineer attraction at Engineers' Open House, March 16 and 17.

Another ME attraction will be Pi Tau Sigma's, ME honorary fraternity, beer bottle organ. The organ has a keyboard of 24 keys and plays by compressed air and a system of valves.

Different sounds are produced as air is directed over the necks of the bottles which contain different levels of water.

A working model of a rocket ship designed by Fred Suellen-trop, ME Jr, for Open House. The ship's rocket engine, weighing  $\frac{3}{4}$  of an ounce, will propel the ship to the 3-story height of the Engineering building.

Another stationary model of a 3-stage "moon" rocket will be on display.

A pump with no working parts will be a ME display made by Tom Rumsey, ME Jr. The pump is used in practical application to pump liquid and molten metals in nuclear reactors. The pump is powered by an electromagnet.

A baseball throwing machine, designed by Joe Giovagnoli, a ME graduate in 1947, will be a ME commercial display.

The machine is the property of the athletic department. This over arm pitcher is used for batting practice.

Other displays will include a solar steam engine, designed by Phil Gregory, ME Sr, that uses a sun lamp or sunlight for power.

A script-writing machine, made by Harry McNary, ME Sr, will write KSC repeatedly on paper by means of a rotating cam guiding a pen.

## Energy from the Sun

Collegian photo by Gary Haynes

**SUN-FRIED BACON, ANYONE?** Warming his hands as bacon fries on a solar furnace is Bill Hunt, ME Sr. This concave-mirrored surface converges the sun's rays on the pan in its center, frying the bacon to a sunny brown. It was designed by Phil Gregory, ME Sr.

# Jobs Outnumber Engineers

By ESTALEE VAN SICKLE

"There are ten times as many job opportunities for engineers as there are students available to fill them," according to M. A. Durland, Dean of Engineering and Architecture.

"Demands are just about as good in one field as in another," he continued. "At present time there appears to be a more critical shortage in chemical and electrical engineering fields."

"The opportunities are so good that relatively few engineering students attend graduate school," he said. "Starting salaries for a student with a bachelor of science degree is from \$400 to \$420 a month."

"Salary depends on the company—not the curriculum," he said.

Durland added that many of the companies have educational programs that make it possible

for employees to take graduate work along with their regular duties. Often the company pays his fees.

Various companies have scheduled 35 interview dates with K-State this year. At these times, recruiting teams will interview engineers who are interested in the company they represent, according to Chet Peters, Placement Bureau director.

# Sts. Pat, Patricia Busy with Public Appearances

By CAROLYN SNELL

Sondra Tate, Art Soph from Wichita who recently was named St. Patricia of Engineers' Open House, finds television appearances advertising the 32nd annual Open House a new experience in preparing to receive royalty honors.

Sondra appeared on station KAKE-TV, Wichita, Monday and on station WIBW-TV, Topeka, Wednesday with St. Pat Ron Bryant.

Sondra said she and Ron think every candidate for St. Pat and Patricia was just as deserving as they were. She added that she was glad Ron was named St. Pat, because he is a "fine engineering student."

From her experience a year ago as Homecoming queen attendant, and as K-State's representative in the Miss Football of 1955 contest, plus being a 1956 Royal Purple queen attendant, Sondra believes the important thing is remember when receiving any honor is that "you are the same person as before."

It is just as much an honor to be a candidate or an attendant as to receive actual royalty honors, she said. "It's better to have run the race, than not to have run at all," she said.

Engineers' Open House Royalty  
... Sondra Tate and Ron Bryant

By MARILYN McKNIGHT

Television appearances, posing for pictures, and making recordings were all on this week's agenda of Ron Bryant, ME Jr, who was chosen St. Pat for the annual Engineers' Open House.

Ron, who is from Tahlequah, Okla., said, "I was very happy and really surprised to be elected St. Pat, because Mechanical Engineering isn't the largest engineering department."

"I'm glad that I came to K-State, because in my three years here I've met some of the finest people, both instructors and students, that can be found anywhere," he said.

Ron and St. Patricia, Sondra Tate, appeared on KAKE-TV, Wichita, Monday evening. While in Wichita, they toured the Boeing aircraft plant.

They appeared on WIBW-TV, Topeka, Wednesday afternoon, and also made a recording with Dean M. A. Durland that was played on Radio Station KSAC Wednesday.

This evening, Ron and Sondra will cut the ribbon to officially begin Engineers' Open House, and will go on the first tour through the displays. St. Pat's Prom, where the couple will be crowned tomorrow night, will climax Open House activities.

# Engine, Truck, Float Parade Initiated Open House in 1913

By MARY FABIN

Engineers' Open House, being held at K-State for the 32nd time this year, dates back to 1913 when its forerunner included a parade of engines, trucks, and floats.

In 1914, the Engineering School extended Engineers' Day into a 2-day open house. Plans were set in 1917 to have an Engineers' Parade every 4 years.

In 1921, the Engineers' parade celebrated the dedication of what is now the central portion of Seaton hall.

The first annual Engineers' Week was initiated here in 1923. The first week in May was designated for that purpose.

Engineers' Week activities expanded to several buildings throughout the campus in 1930. A then-record attendance of 3,000 persons saw engineering exhibits in eight buildings on campus.

By 1931, Engineers' Open House was considered an annual affair. More than 5,000 spectators attended the two-day program.

Three hundred high schools were invited to attend the 15th annual Engineers' Open House in 1935.

Radio broadcasts, which carried news of the Open House to 500,000 people, were featured in 1938. Radio stations KSAC, WIBW, KANS, and KFJ participated in these broadcasts. More than 10,000 persons were registered in attendance by an electric eye in Engineering hall.

Three engineering students toured Kansas to publicize the 1939 Open House. High schools, newspapers, and radio stations were visited by the three students that year.

"Research or Recession" was the keynote address at the 1940 Open House.

The estimated 16,000 persons who attended the 21st Open House in 1941 were welcomed by a 17-gun salute and by a 30-second

blast of the College whistle.

Despite controversy because of wartime conditions, it was decided to hold Open House in 1942 as usual. Open House that year was built on a defense theme.

For the first time in 23 years, K-State had no Engineers' Open House in 1943. St. Pat's prom was not held that year either, because no name band was available. In 1944, it definitely was decided to discontinue Engineering Open House for the duration of the war.

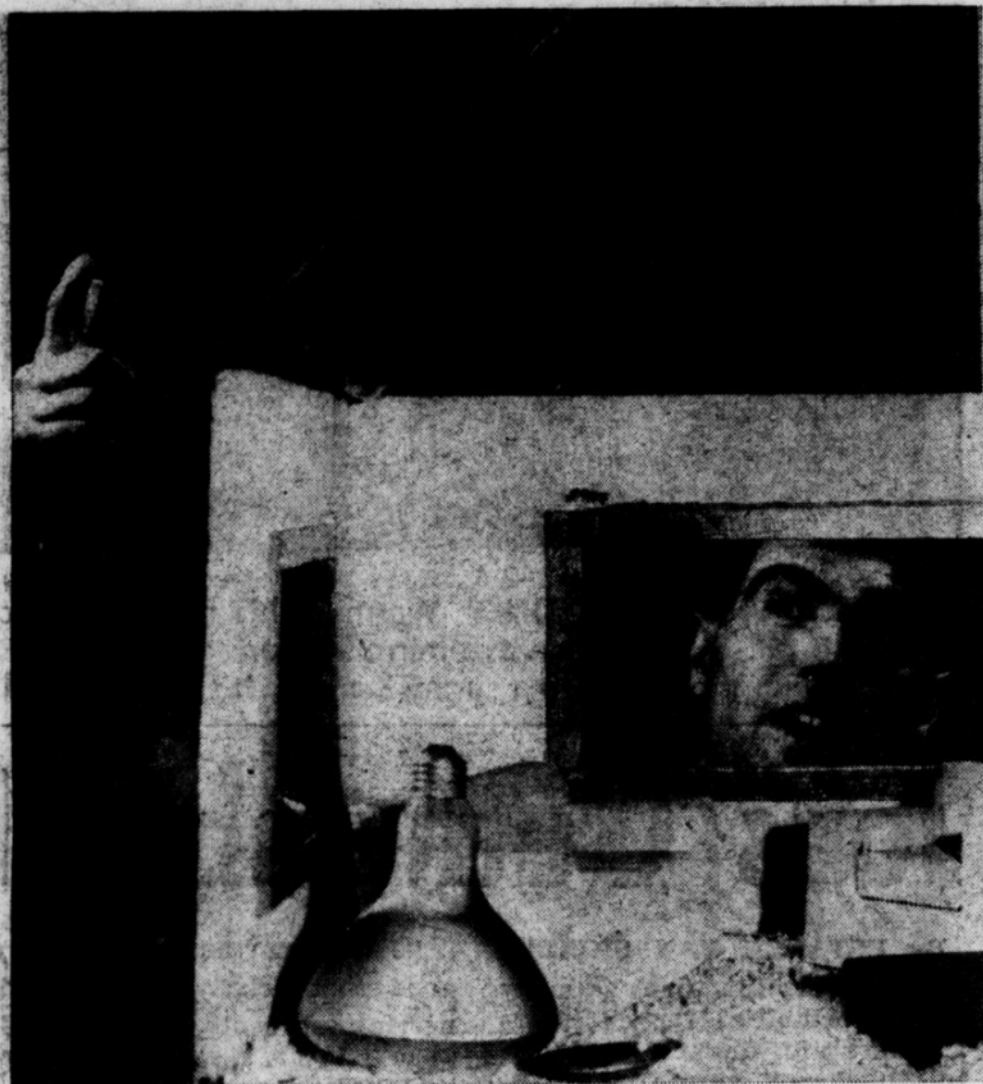

Open House activities resumed in 1947 with "Kansas Industry" as the theme. The 1947 Open House missed being called off by a narrow margin when a flu epidemic took its toll of spectators. However, an estimated 22,000 persons attended the ex-

hibits, which took 1½ hours to tour.

Television, atomic-energy, and jet-propulsion exhibits gave the Open House a new look in 1948. "Better Living Through Engineering" was the 1949 theme. The year 1949 marked the Silver Anniversary of the Open House.

In 1954, a \$40,000 analog computer was one of the highlights of Open House. More than 17,000 persons attended the activities that year.

The 1955 Open House set a record in attendance when 20,687 persons attended. W. H. Zinn, director of Argonne National laboratory, was kickoff speaker at the 31st annual Open House. He spoke on "Atomic Energy and its Non-Military Use."

Collegian photo by Gary Haynes

**GIANT IN THE WINDOW**—Giants aren't in style nowadays, so it's only George Schurr, AgE Sr, directing a fellow engineer to place lighting on a model house. The display will demonstrate the amount of winter and summer sunlight that reaches a home, and benefits that can be gained by picture windows.

## Nuclear Reactor Display Doubtful

By PAUL BOCQUIN

The department of nuclear engineering will display a nuclear reactor at the Engineers' Open House, if it arrives in time, Albert Blubaugh, NE Sr, announced.

The reactor is designed to detect leaks in pipes and is used commercially in the manufacture of cigars, Blubaugh said.

If the cigars are filled with too much tobacco, the reactor automatically slows down the rate of tobacco flow, he explained.

If the reactor fails to arrive in time, the department will demonstrate some of the commercial uses of nuclear radiation, Blubaugh said.

Another possible substitution will be a demonstration of how to determine liquid levels in tanks or other liquid containers. This will work by remote control, Blubaugh said.

"We will also display samples of uranium ore, he said.

### Dean Says

## Open House Is Organized By Students

By ROSELYN KIRK

"Students organize the Engineers' Open House," Dean M. A. Durland said, and added with a twinkle in his eye, "I'm just there to keep them out of trouble."

Durland has had lots of experience in "keeping students out of trouble" since he first took over supervision of the Open House in 1928 when he became assistant dean of the school. "Theoretically," he said, "I'm not supposed to supervise now, but I haven't been able to get anyone else to run it."

Durland's memories of Open House date back to his undergraduate days when the school sponsored an Engineers' day. "It was just an annual play day," he recalls. The 32nd annual Open House is quite different from the first, he added. "The event has grown with the College."

First hired as an engineering drawing instructor, Durland came to Kansas State on a "temporary basis." In 1919 after his release from the army "I came here looking for a job," Durland said, "and they put me to work. I was warned that the position was strictly temporary, but I've been here ever since."

In addition to teaching drawing and mechanical design, Durland became a "professional substitute. If anyone ever got sick or a job was vacant, I was the one who taught the class," he said.

He was appointed head of the department of mechanical design prior to becoming assistant dean in 1928. Then in 1949, Durland took over the deanship of the School of Engineering.

This administrative job is not as much "fun" as teaching, he observed, "since I like students more than forms. I still try to keep in touch with students," he continued, "my door has never been shut since I've been dean."

Durland is known for his ability to remember students' names and faces. For many years he knew every student in the engineering school and says that he is now "embarrassed" when he can't recall all the names.

# Engineering Mag Seeks 14th National Award

By LANCE GILMORE

The K-State Engineer magazine, which recently put out 3,000 copies of its Open House issue, is seeking its 14th national award this year.

The magazine, first published in 1915, has been a consistent award-winner in national collegiate ranks since the late thirties.

Put out mostly by engineering majors, with little or no journalism experience, the publication won its first major award in 1939 when it was named the best all-around collegiate engineering magazine. It also was cited for having the best cover during that year.

Awards are made by the Engineering College Magazine association, which annually judges such publications, and now has a membership of more than 40 colleges.

In 1940, K-State's magazine won a first place for the best illustrations, and a second place for editorials. The following year brought a first in student articles, and another second in editorials. Student articles were third in 1943.

In 1947, the Engineer won two prizes for outstanding editorials.

A second place for special features was won in 1948.

In the 1950s, the magazine's covers came to the fore. First came an award for the best single cover in 1952, then a third place in 1953 for outstanding covers throughout the year. Most recent achievement came when the Engineer had the best single cover of 1954-55.

Editor of this semester's Engineer is Dick Peterson, ME Jr. "We are trying to accumulate and groom a staff that can turn out a top-notch magazine," Peterson said. "The work is on a voluntary basis, and is almost exclusive of faculty participation." Editors and subeditors get one hour credit for staff work.

### Language New, Story Old

London (U.P.)—Student Patrick Huggins was fined one pound (\$2.80) for wantonly discharging a missile, to wit a snowball, "to the damage or danger of persons in Kensington Court." The target was a policeman.

# Garage Door Pops Open

By PAUL BOCQUIN

An electronic ignition system and automatic garage door opener will be displayed by the Electrical Engineering department at the Engineers' Open House, Leo Wirtz, EE instructor, announced.

The ignition system is designed to increase power and efficiency of automobile and internal combustion engines, Wirtz said.

The automatic garage-door opener will be the highlight, Wirtz said. A transmitter will be installed in a model car. By pressing a button on the transmitter, the doors to a model garage open up automatically.

A radio-controlled boat, built by Kenneth Schroeder, EE Jr., should interest lazy fishermen. The boat moves through the water while the operator controls it from the land, Wirtz said.

Gordon Heeke, EE Sr., will demonstrate how to operate a television set. He will explain problems of tuning and getting clearer pictures.

Tom Lethcho, EE Sr., will demonstrate a low voltage electrical relay system for houses. The wiring system is controlled from a master switch.

Any number of master switches

can be installed, Lethcho explained. Each one is designed to operate any light in the house.

One of the most interesting demonstrations is a disk which floats in mid-air, Wirtz said. This is accomplished by electromagnetic repulsion.

## Hubby Eggs On Guests

Pasadena, (U.P.)—Mrs. Elizabeth Smith, 63, won a divorce from her husband, Clifton, 80. She testified that he refused to pass out sandwiches to house guests, but rather tried to sell them eggs instead.

## K-State To Host Greek Conference

Thirteen Midwestern schools are to meet April 26-27-28 on campus for a Panhellenic and Interfraternity Council conference, Charlene Bell, local Panhellenic president, said.

Big Seven schools, plus Washburn, Tulsa, Oklahoma A&M, Colorado A&M, Drake, and Baker, will be represented.

The conference is to be a repeat of a similar conference at Ohio State last year, Miss Bell said. K-State was selected for this year's conference because of its central position, and because of facilities such as the new Student Union.

The conference will be concerned with the problems of Greek groups on campus. Possible solutions will be discussed.

### 3 Curricula Plan Exhibits

## Fifteen New Automobiles A Highlight of IE Display

By DON MILLER

Fifteen new automobiles are to be the display of the auto mechanics section of Industrial Engineering at Engineers' Open House.

Three curricula composing the department—industrial engineering, industrial technology, and industrial educa-

## Education Grads Expected To Take Jobs in Kansas

More than 90 per cent of the new teachers to be placed this spring from K-State will take jobs in Kansas' elementary and secondary schools, Chester Peters, placement bureau director, predicts.

"The high percentage of K-State graduates remaining in Kansas is encouraging," Peters said, "but the real problem is keeping them in Kansas. Higher out-of-state salaries and fringe benefits lure too many away."

Teacher training at Kansas State College is at an all-time high with 1,125 enrolled, an increase of 70 percent since 1952.

Approximately 225 new teachers will be graduated this year. Of this number, some 45 will give up teaching during the first year because of marriage, business and industrial opportunities, and military service, Peters explained.

tion—are to be represented by exhibits, Don Smith, IE Jr., publicity chairman, said.

Automatic machines are to be the highlight of the machinshop display this year, he said. Gear blanks will be produced on an automatic turret lathe, and a gear shaper will make the keys on the gear blanks.

The plant planning and layout section, another phase of Industrial Engineering, is to have models of a complete factory laid out.

Molds are to be made in the foundry section. Many welding procedures are to be demonstrated in the welding section. An automatic pattern-tracer is to be on display.

In the metallography section, a process is to be demonstrated with which metal in a hopper is tempered by an induction heater and then quenched.

A metallograph machine that is used to examine metallic specimens is to be on display. This metallograph machine uses carbon arcs for light and is equipped with a camera.

The woodworking section will feature a display of products made by students in that class, along with demonstrations of woodworking machines.

Plastic keychain tags are to be made in the forging section, and will be given away. Paperweights and aluminum ashtrays, which are to be sold to the public, also are to be made in the forging section.

The paperweights will be made of an aluminum alloy, and will be painted white with a purple "KSC." They will have a synthetic felt base. The ashtrays will be made of aluminum, and will have an emblem in the bottom.

### Six Schools Included

## 'Y' Sponsoring Eastern Tour

A Washington-UN trip, sponsored by the YMCA and YWCA will include students from six Kansas colleges, according to Richard Mansfield, chairman of the committee.

On March 29 the students will leave Manhattan and will arrive in Washington March 31. The next three days will be spent touring Washington.

April 4 the group will leave for New York City, and for three days will visit the U. N. Seminar and tour New York City.

Other schools included in the trip are Kansas State Teachers college, Wichita university, Kansas university, Pratt Junior college, and Southwestern college.

### This Thief Auto Quit

Chicago, (U.P.)—Edward Desecki confessed to keeping a list of some 200 cars he stole during the past three years because "I didn't want to steal the same car twice."

"That would be unlucky," he explained.

# Communications, Air Attack Shown by ROTC Displays

By SHARI SHELLINGER

Opening the eyes of the public to the present military situation in America is the purpose of the AFROTC display in the second floor reading room of Seaton hall, Capt. Dudley Kavanaugh said.

AFROTC will use films, aircraft models, and maps to inform Engineers' Open House visitors. James Hall, ME Jr, is student chairman of the display. Assisting him are Richard Wilbur, AE Soph, and Gene Westhusing, EE Fr.

A large world map will show visitors the ring of U.S. and Allied air force bases around Communist nations.

Flying time required to H-bomb selected Communist targets will be given on the map, along with a polar concept that shows how Communist nations can be reached by "great-circle" routes.

Models of aircraft from World War II through the new Century-series jets will show progress made by the U.S. Air Force.

Continuous showings of three films will give the public an idea of how its money is used in military circles. A 20-minute film on the Strategic Air Command concerns a combat-readiness mission with a B-36.

Methods of army communication will be displayed by the army ROTC department for Engineers' Open House, Lt. Charles Hughes said.

The display will consist of communications equipment borrowed from the First Signal company, at Fort Riley. It will be set up south of Memorial stadium. Floodlights will illuminate the display Friday night, Edward Bowdon, EE Jr, student chairman of the display, said.

Of special interest will be radio equipment that will be linked with similar equipment at Fort Riley. Visitors will be able to send and to receive messages from operators at Fort Riley.

Other types of communication equipment to be displayed are radio relay and carrier systems, telephone-line construction equipment, a mobile photographic laboratory, tactical teletype equipment, and a display of different types of telephone cable.

The equipment will be mounted in vehicles, and this will be demonstrated and explained by 50 soldiers from the First Division.

## Virus Study Aid Renewed

Renewal of a navy biological research grant under the supervision of Dr. Abraham Eisenstark, associate professor of bacteriology, has been negotiated, A. R. Jones, dean of financial administration, said.

The 2-year grant totals \$8,457, allowing a yearly expenditure of about \$4,000 for virus study. The project's objective is to gather information on the manner in which viruses attack bacteria, and consequently are altered genetically.

## Oxygen Plant Built by ChE's

By CAROL WARD

A model of an automatically controlled oxygen plant will be featured in the Chemical Engineering Open House exhibit.

The non-working model, which is located in the hall of the Chem Engineering building, is 3 feet tall at the highest point.

Related equipment, pipes, and controls are painted the same color to show "what is connected to what."

"A color-keyed flow chart explains the relationship of one piece to the others," exhibit chairman Gordon Rieg, ChE Sr, said.

A larger model of the oxygen plant's fractioning tower, with one side cut away to show the controls, is beside the smaller model. This tower would be used to separate nitrogen and oxygen in the air, Rieg said.

The model is a copy of an oxygen plant in Tonawanda, N. Y., Rieg said. He and Bob Kranock, ChE Sr, drew the plans 3 weeks ago. They and the other members of the exhibit committee made all the parts for the wooden model.

Members of the exhibit committee are Kevin Winegardner, Don Nichols, Gary Rogers, Don Ochs, Leo Lessor, Don Lockwood, Norman Tetlow, and Jack Tyler—all seniors in chemical engineering—plus Soph Phil Weaver.

# Push Buttons Replacing Brawn Down on Farm

By RAY LIPPE

Push buttons are replacing brawn on the farm. The Agricultural Engineers will prove this with their automatic displays at Engineers' Open House.

An automatic feed handling unit will be one of the main attractions in the Ag Engineers' section of Open House, said George Larson, Ag Engineering professor.

The feed handling display is made up of scale models of regular farm feeding equipment. After the grain leaves the truck or grain bin, it is automatically mixed, concentrate is added, it is ground, and put in the feed trough ready to eat.

A three-foot elevator, run by a tiny electric motor, carries the grain to an overhead bin in front of the hammermill. If both doors on the bins are opened at the same time the feed can be mixed as it rolls out. A moving belt carries the grain to the mill.

The grain is ground in the hammermill and is blown into another overhead bin that is directly above a feed trough and is distributed to the far ends by a moving belt of canvas. As the cattle eat, more feed can be distributed.

"In a real outfit, the entire unit would stop if one of the bins feeding grain to the hammermill was emptied, but ours doesn't," Gilbert Christopher, AgE Jr, said.

Paul Turnquist, AgE Jr, pointed out that the belt carrying feed to the end of the feed trough would automatically stop when the trough is filled. This was not possible for the display, because it has to be running continuously.

You'll be pleased with a Collegian want ad.

## TV Speeds Up Open House

By JUDY WILLIAMS

TV has eliminated some of the biggest problems of Engineers' Open House, publicity chairman Robert Miller said.

"Preparations usually get started late. But because everything had to be ready for seven TV shows on every channel in the state, we got things done early this year," he said. "We have a lot better displays too," he added.

Another Open House problem not so easily solved is that of finance, Miller said.

"We run on a pretty tight budget," Miller explained. "Each of the 10 departments is allowed somewhere between \$70 and \$120 for its display."

Head of Open House is Harold Lonsinger, ME Sr. Members of his executive committee are Danny Burgess, AgE Jr, secretary; Donald Hutchison, EE Sr, treasurer; Harrison Pallett, EE Jr, routing chairman; Larry Ehlers, ARE Sr, program chairman; and Miller, ME Sr.

Graduate Study Center  
Near Main Plant

Engineers participating in graduate study program complement their classroom training with laboratory experience gained through their daily employment.

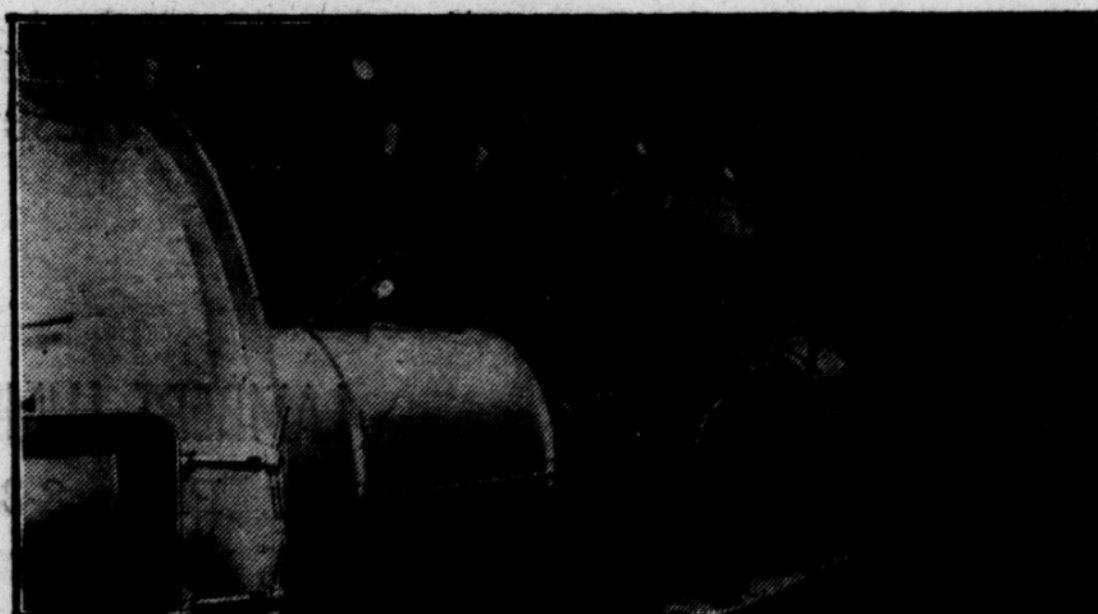

Engineers from Pratt & Whitney Aircraft waiting for classes to begin at R.P.I.'s new graduate study center. Courses, leading to advanced degrees in specialized fields, include Aeronautical Engineering, Applied Mechanics, Higher Mathematics, Thermodynamics, Nuclear Technology.

The dedication last month of a full-fledged graduate center near the Pratt & Whitney Aircraft plant in East Hartford, Connecticut, set a precedent in relationships between industry and education. At a cost of \$600,000, P & W A's parent company purchased and equipped the building that was presented outright to Rensselaer Polytechnic Institute for its Hartford Graduate Center. Moreover, an additional grant by this industry leader to R.P.I. was used to establish a liberal fellowship fund. Since last fall, when classes first began, this tuition-assistance plan has functioned to assure advanced education for Pratt and Whitney Aircraft's applied scientists and engineers.

The new graduate study center, 115 miles away from its home campus in upper New York State, is staffed by a resident, full-time faculty. Engineers at Pratt & Whitney Aircraft and other companies in the vicinity are able now to continue their education without interrupting their normal employment.

Designed to raise the level of knowledge and to broaden the base from which research can be approached, this unique new concept of education will lead enrolled engineers to greater achievement in their careers through pursuit of advanced degrees in specialized fields from the nation's oldest engineering college.

The vast facilities required for practical application of advanced technical knowledge to the development of future aircraft engines are housed in P & W A's Willgoos Laboratory — the world's most complete, privately owned turbine laboratory.

R. P. I.'s Hartford Graduate Center, a modern, one-story building in a suburban location, is just a few minutes' drive from the P & W A plant. Student facilities include a large lecture room, a library, classrooms, seminar rooms, a cafeteria, and parking areas.

Congratulations  
Engineers  
for your  
continued success  
in the  
years to come.

# Open House To Begin Tonight

## Kansas State Collegian

VOLUME LXII

NUMBER 105

Kansas State College, Manhattan, Kansas, Friday, March 16, 1956

### At the Union

## Meal Change, Dances Planned for Weekend

Meals will not be served in the cafeteria of the Student Union Sunday morning or Sunday noon, according to Loren Kottner, union director. The Sunday evening meal will be served, he added.

The State room will open at 2 p.m. and will be open until 10:15 p.m., he said.

Beginning next week three meals will be served daily including Sundays. Several pieces of equipment are in need of adjustment and this work will be done over the weekend.

The Union snack service has been temporarily discontinued due to the opening of the new Union. An announcement will be made when the snack service is resumed.

Two dances will be featured in the Union tonight, one in the Dive and the other in the grand ballroom.

Gordon Bute and his orchestra will be featured in the first dance sponsored by the Union dance committee in the grand ballroom. The dance, from 9 p.m. until

midnight, will be for both stags and couples, the committee said.

Howard Haas and the Dream-Aires, a combo from Junction City, will provide music in the Dive from 9 to 12 p.m. There will be no admission charge. The regular night club program will begin next Friday, March 23.

### Free German Film Set for Next Week

Described as a picture that only free men can make, "Der Hauptmann Von Kopenick," a satire against German government and militarism, will be shown in J-15 at 4 p.m. March 20 and 21.

"The Captain from Kopenick," its English title, is sponsored as a part of the foreign film program by the department of modern languages.

Collegian photo by Gary Haynes

**OUT OF THE MOTHBALLS.** "Open House," the traditional greeting placed above the main entrance to Seaton hall by the Electrical Engineers, is brought out of storage and dusted off by James Reynolds, EE Sr, and Richard Kirkland, EE Sr. The sign is run by a generator in the EE labs in the basement of the building.

Days and nights of preparation by K-State's engineers will come to an end tonight at the opening ceremony of the 32nd annual Engineers' Open House.

St. Pat and St. Patricia, Ron Bryant, ME Jr, and Sondra Tate, Art Soph, will open the doors to the Open House by cutting a ribbon at the main door of Seaton hall at 6 p.m.

St. Pat and St. Patricia then will be escorted through the Open House by Darold Barb, ChE Jr. Harold Lonsinger, Open House chairman, will escort President McCain through the display.

Dean Nehrig, ChE Jr, will be master of ceremonies at the opening ceremony.

Following the opening ceremony the public will be admitted to view the engineers' predictions of "Your Automatic Tomorrow."

In a second ceremony at 7:30 p.m. the annual marathon race ending on K-Hill will be started.

This ceremony will begin with the reading of a brief history of the race. Dean M. A. Durland will make a few remarks and then light the torch and hand it to the first runner of the marathon relay.

The eight runners this year are Jim Peters, EE Jr, Ken Ross, Ag Fr, Bob Jones, EE Fr, Melvin

Burdorf, CE Soph, Eldon Leager, Darrell Dodds, PEM Fr, Bruce Thompson, BA Fr, and Thomas Swearingen, PrV Fr.

The race will be run down Seventeenth street to Poyntz and then to K-Hill where the torch will be used to light kerosene torches to illuminate the letters.

The runners this year will be attempting to break the record 12:10 for the run set at last year's Open House.

They will be escorted during the race by a police patrol car and will be followed in a convertible by St. Pat and St. Patricia.

The first marathon race was run in 1952 with a time of 12:32. This record was broken in 1954 with a time of 12:17 and the record time was set last year at 12:10.

The letter K was erected on the hill in 1921 by the engineering department followed by the letter S in 1930. Early in the history of Open House the letters were lighted by searchlights from the Union Pacific depot and from Bluemont hill.

The letters are now maintained by Sigma Tau, engineering honorary, and are white-washed by their initiates each semester.

## St. Pat's Prom To Be Finale Of Open House

St. Pat's Prom will bring down the curtain on the 32nd annual Engineers' Open House Saturday night.

The all-College, semiformal dance sponsored by Sigma Tau, engineering honorary, will be from 9 to 12 p.m. in the Union grand ballroom.

Music for the dance will be by the Pastels. The band, directed by Marshall McNutt, furnished the music for the Military Ball last month.

Tickets for the dance are on sale at the reception desk in the Union, Anderson hall, and Seaton hall. Arrangements for the Prom were made by Darold Barb, ChE Jr.

## College Deans To Meet For Transition Conference

The second annual Junior College Conference on Transition of Students from Junior College to Kansas State will be March 19-20 in the Student Union, said Director of Admissions E. M. Gerritz.

Students who formerly attended one of the 15 junior colleges will be excused from classes between 10 and 12 a.m. on March 20 to meet with their junior college representatives.

Students and representatives will discuss problems which the students encountered in making the transfer to Kansas State.

Members of the Kansas State College faculty and deans from the 15 junior colleges will meet Tuesday afternoon for a discussion of student problems. The student conferences will be used as a guide for helping future transfer students to avoid similar difficulties.

The 15 junior colleges include Arkansas City, Chanute, Coffeyville, Dodge City, El Dorado, Fort Scott, Garden City, Highland, Hutchinson, Independence, Iola, Kansas City, Kan., Kansas City, Mo., Parsons, and Pratt.

Room assignments in the new Student Union for student conferences are Arkansas City, southwest corner of Banquet Room B; Chanute, 208; Coffeyville, 203; Dodge City, southeast corner of Banquet Room B; El Dorado, 205; Fort Scott, third floor east; Garden City, 204; Highland, third floor east; Hutchinson, 207; Independence, northwest corner of Banquet Room B; Iola, third floor east; Kansas City, Kan., 206; Kansas City, Mo., third floor east; Parsons, third floor east; and Pratt, northeast corner of Banquet Room B.

**CONCRETE "BOARD"**—Claudette Frank, EEd Jr, (left) and Kay Randall Playter, BMT Jr, try out the pre-stressed concrete diving "board" at the Engineers' Open House. The board is a part of the Civil Engineering department's exhibit.

# Students Can Aid Confab By Telling of Transition

KANSAS STATE COLLEGIAN  
Friday, March 16, 1956-2

STUDENTS WHO transferred to K-State from junior colleges can help make successful a conference to be held here next Tuesday. These students also can be excused from classes from 10-12 a.m. that day if they participate.

These junior-college transfer students have been invited to spend those 2 hours relating problems they encountered in making the transfer to K-State. They are to tell these problems to representatives of the junior college they attended.

AFTER THE problems are listed, officials from K-State and from the junior colleges will seek ways to solve them, with the goal of improving the transition from junior college to K-State.

It is obvious that the conference cannot be a success unless transfer students attend the morning meetings and list their complaints.

Representatives of the following junior colleges will be present: Arkansas City, Chanute, Coffeyville, Dodge City, El Dorado, Fort Scott, Garden City, Highland, Hutchinson, Independence, Iola, Kansas City, Kan., Kansas City, Mo., Parsons, and Pratt.

TRANSFER STUDENTS can find the room number assigned to their school in a front-page story in today's Collegian. All meetings are set for the Student Union from 10-12 a.m. Tuesday, March 20.

Transfer students should plan to attend. They won't be counted absent from class, and they can help future transferees.—Darrel Miller.

## Comments—Wise and Otherwise

COULDN'T HELP but feel sorry for some high school girls I saw on campus yesterday. They weren't dressed especially appropriately, and therein lies a story.

This story began about midway through the basketball season. One sunshiny day it dawned on these girls that their school basketball team had won 11-straight games, and had a chance of coming to the state tournament in Manhattan.

AWE-STRUCK by this thought, the girls nevertheless started making plans. Their minds began rotating furiously. "Manhattan is a college town," they reasoned. "Therefore, there must be a college there. And college kids dress real cool. Therefore, we must dress real cool when we go to Manhattan for the state tournament." And dress cool they did. (But I'm getting ahead of my story.)

Well, their high school team came through and won the regional. And they were ready. They had their pep-club sweaters cleaned, had their shoes shined, and laid out their Bermuda shorts and long socks.

STATE-TOURNEY day dawned cloudy, cold, and snowy, but these girls were undaunted. They bravely donned their Bermuda shorts and came to Manhattan; and everyone who saw them agreed that they were dressed real cool.

There is a side of me that hasn't been reached by the finer things of life. This crass, barbarian side just can't dig abstract-type art.

So, when I looked at the latest Union art exhibit—the works of 19 K-State students—this crass side rebelled at a couple of abstractions (which no doubt are fine works, if only I could understand them).

A FRIEND asked what the first ab-

straction reminded me of. It did ring a familiar bell, so I mulled it over for a while. Then it hit me. "I know," I shouted. "It reminds me of New Year's Eve, 1949!"

After making this discovery, I had no trouble figuring out the second abstraction. There was no doubt to me that it represented Fourth of July, 1953.

But I could be wrong. . .

Unless you're blind you've noticed that Engineers' Open House begins today. Displays to the theme of "Your Automatic Tomorrow" range from a Rube Goldberg coffeemaker to an automatic feed-handling unit for modern barns.

WHILE I LIKE the slogan of "Your Automatic Tomorrow," I really prefer a little quote that I saw in the latest Engineering magazine, to wit:

As the soil and water teacher walked out of the room, someone called: "See ya later, irrigator."

The reply: "After while, drainage tile."

Engineering students have been slaving night and day to get their displays set up. But if you've begun to feel sorry for them, reconsider.

THERE ARE 10 times as many jobs for engineers as there are students available to fill them. Starting salaries for graduates with a BS degree in engineering range from \$400 to \$420 a month.

Sometimes my pragmatic side gets the best of me, and I begin to wish I could make that kind of money. You too?

As if to prove that journalists are people, a cat has adopted the inhabitants of Kedzie hall. This creates a problem, since someone must feed the cat.

NO ONE REALIZED that the cat was hungry until someone saw it eating the wax off the newly waxed floor. We couldn't understand this until we discovered that the wax has an alcoholic base. Every once in a while now, I catch someone down on the floor licking the wax.

Last night the photo editor fed the cat some popcorn. This angered one fellow. "What the heck," he said. "Let that darned cat live on cigarets and Cokes the same as the rest of us. He's no better than we are."—Darrel Miller.

"Looks like we might break the Open House attendance record this year."

Over the Ivy Line

## Women Smokers, Arise!

By Ann Weathers

WOMEN SMOKERS, arise!

You have been accused by the Los Angeles Collegian of smoking with the finesse of a 3-year-old child sucking a licorice stick.

There are three main specimens. The first is that campus oddity known as "Shakespeareus Longhairus." Her name is, "Gotta smoke? Gotta smoke?" Short, jerky puffs distinguish her from others of her sex. Pseudo-intellectual observations mix freely with tobacco smoke as she expounds loudly on any and all subjects, meanwhile exhaling in your face.

THE NEXT SPECIMEN is "genus devotus exercitus." This short haired variety has an affinity for king-sized cigarettes, which she clutches as if they were fencing foils and gayly scatters ashes over your best white shirt.

Finally, there is the "immaturas teenagerous," who leaves much to be desired. She attains the road to sophistication in her more tender years by acquiring a cigarette holder. She is the type that concludes the only reason they put olives in martinis is for ballast.

TWO PROFESSORS at Michigan State have come up with a new way to grade papers. One uses an A-B-C-D-F-H system (H for horrible) while the other returns papers with small faces in an upper corner. If the face is smiling, the prof liked the paper and vice-versa.

That's enough provocation for a situation like the Osaka, Japan, affair. Japanese police arrested three student leaders of a 20-member high school group who beat up their teachers immediately after receiving diplomas.

I admire their courage.

IOWA STATE marksmen have to be extra careful what they shoot at these days. That stray bear or coon wandering across campus stands a good chance of being a certain freshman coed.

Seems she decided Iowa winters were just too much, so she swiped her father's raccoon coat from a couple of hungry moths. Now, instead of wolf-whistles, she gets coon-calls and bear howls.

OTHER SCHOOLS have been having

their own animal troubles. The SAE's at the University of Colorado woke one morning to find their Saint Bernard mascot coated with permanent red enamel, as well as several of their windows, sidewalks, and cars.

## Four Lads On Top Of Local Tune List

By CLANCY SLOAN

"NO, NOT MUCH" reappeared in first place in the Manhattan top ten tune survey for last week, due to the appearance of the Four Lads at the Union last Friday.

Here is the list of top tunes in Manhattan compiled from record sales.

- 1—"No, Not Much," Four Lads
- 2—"I'll Be Home," Pat Boone
- 3—"Poor People of Paris," Les Baxter
- 4—"Bo Weevil," Teresa Brewer
- 5—"Lisbon Antigua," Nelson Riddle
- 6—"Why Do Fools Fall in Love," Gale Storm
- 7—"Theme from 'Man with the Golden Arm,'" Dick Maltby
- 8—"Eleventh Hour eMelody," Al Hibler
- 9—"Three-Penny Opera," Dick Hyman trio
- 10—"Heartbreak Hotel," Elvis Presley

NEW TUNES picked as coming hits include:

- "Eddie My Love," Teen Queens
- "Missing," McGuire Sisters
- "Dungaree Dan and Chino Sue," Jane and Audrey Meadows.

Those who have been Roger Williams' fans up to now will really be convinced by his new album "It's a Big, Wide, Wonderful World" that he is really going places.

IN THIS ALBUM he plays mostly contemporary numbers. His presentation of such tunes as "St. Louis Blues," leads one to think that this young man could be a wonderful jazz pianist.

Although I try to stay away from western musicians as much as possible, a new album this week, "Chet Atkins in Three Dimensions," is a good performance by a good guitarist. The album is strictly instrumental, and features folks songs, classical, and popular numbers.

FANS OF "Der Bingle," will want his new album titled "Home on the Range," a collection of cowboy ballads by the Groaner.

Frank Sinatra has a new album out called "Music for Swinging Lovers." A bit energetic for mood music, but maybe I'm just not the energetic type.

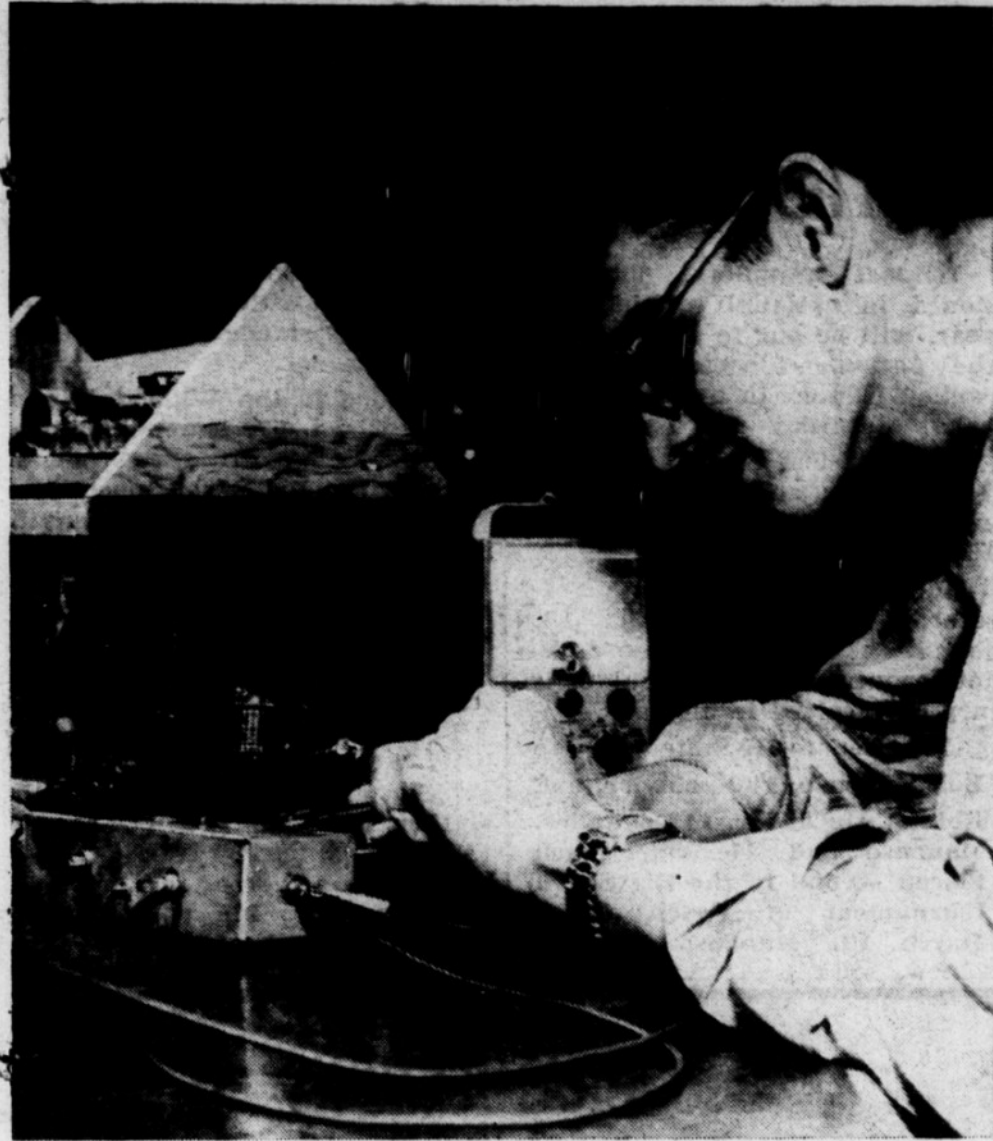

ATTENTION must be called to one of this week's choices for coming hits. The title of the song is "Dungaree Dan and Chino Sue." We realize that rock and roll lyric writers must indeed use available ingenuity to think up new titles for the same old music, but this?

## By Walt Kelly

## Pogo

**SPOOKS?**—Garage doors will open by themselves with an impulse from the small transmitter operated by Phillip Johnson, EE Sr. As soon as the signal reaches the receiver the doors are opened by small motors in the garage.

## Architects Satirizing 'Automatic Tomorrow'

By JOHN TOMS

A satirical showing of what "Your Automatic Tomorrow" will be like will be the theme of one section of the Architecture Department's Open House display, according to Lynn Burke, Ar 04, director.

A dummy sitting in a chair will fire a ray gun directed at a machine which will set off a chain reaction of blinking lights and ringing bells on the panel of the machine.

The finished product of the machine will be a newspaper. The display will be in the freehand drawing studio in Seaton hall.

The second part of the display will be a panoramic version of the automatic equipment of tomorrow. Nine projectors will be used to project color slides on screens set in a panoramic circle. Students will narrate the showing of the slides.

The third section of the Architects' display will illustrate automatic construction methods of tomorrow. This display is divided into three sections.

The first section is a 3-foot model of a prefabricated 10-story building. The walls are constructed on the ground and then lifted into place.

The second section is a model of a telescoping scaffolding which can be collapsed to fit within the bottom section.

Section three will show a 5-boom automatic derrick capable of picking materials off the ground and lifting them 17 stories.

Displays of models designed by students and local architects will form another part of the exhibit.

The final part of the Architects' display is a model town to house the families displaced by the construction of Tuttle Creek dam.

## Extension Program Seeks To Improve Farms in Kansas

By ORVAL JACKSON

The job of the Engineering Extension department is to visit the counties in Kansas and explain the new methods of farming and improving farms, according to John Ferguson, head of the department.

"We, as a department, do not carry on any experiments or projects. We are strictly an educational department. We take the data that has been compiled by the other extension departments and then we go to farm meetings and give the farmers the latest information," Ferguson said.

The meetings are arranged by the various county agents, home demonstration agents, and the county 4-H club agents, he said.

The engineering extension department works hand in hand with the county agents. This work is carried on in every county in the state, Ferguson said.

When the department started in 1910, it dealt chiefly with drainage and irrigation. Since that time the department has come a long way, he said.

Subjects that have been added since that time include control of soil erosion, water conservation, farm structures, farm machinery, conveniences for the farm home, and farm electrification, he said.

Farm safety and the prevention of farm fires are a definite part of the over-all engineering extension program, he added.

One of the big projects that the department has been working on is that of irrigation, Ferguson said.

"The increased interest in irrigation has been brought about by the past three years of drought. The farmers realize that they will have to irrigate to keep the farms going," he said.

You'll be pleased with a Collegian want ad.

PLASTER OF PARIS and wood are used instead of limestone and dirt in a model of Tuttle Creek dam prepared by the Department of Civil Engineering. Putting the final touches on the model are Cloyd H. Scott, CE Jr, Del Holm, CE Sr, Sue Wyant, CE Soph, and Monroe Funk, CE Sr.

# Cats To Face Oklahoma City In First NCAA Regional Game

**THE 1955-56 WILDCATS**—(front row, left to right) Bob Boyd, student manager; Jack Kiddoo, Pachin Vicens, Don Richards, Eddie Wallace. (2d row) Moon Mullins, athletic director; Roy DeWitz, Hayden Abbott, Dean Plagge, Fritz Schneider, trainer Porky Morgan. (third row) coach Tex Winter, Larry Fischer, Joe Powell, Jack Parr, Bob Jedwabny, Dick Stone, Howard Shannon, ass't coach.

K-State's basketball team steps into NCAA-playoff territory tonight for the first time since 1951. On their last NCAA sojourn, the

Wildcats drove all the way to the finals before losing to Kentucky.

The Cats will be attempting to start a similar drive when they meet Oklahoma City U's Chieftains tonight at 7:30 at Allen Field House in Lawrence.

The Cats will go into the showdown part of the campaign without sophomore guard Roy DeWitz, who held down a starting berth most of the season. DeWitz still is on crutches as a result of a broken foot he suffered in the Missouri game.

Two other Wildcats may be handicapped by injuries suffered in practice. Jack Parr, the team's leading scorer, has a charley horse. But latest reports from trainer Porky Morgan and coach Tex Winter indicate that Parr will be ready for the OCU game.

Fritz Schneider, who lowered

the boom on KU in the last league game for the Cats, suffered an ankle injury in Wednesday's practice. Coach Winter said the extent of Schneider's injury was not determined, but as far as he's concerned, "he's OK."

Just how much these players will be handicapped in tournament action remains to be seen.

Winter still gives the Cats a good chance of coming home with the regional trophy, however.

"I have seen each of the other 3 teams (Houston, OCU, and Southern Methodist university) play once, and I rate them good, but I rate us right along with them," Winter said.

OCU can start a team that averages 6-4. Winter pointed to the size of Hubert Reed, 6-10 sophomore center, as typical of the height his Wildcats will have to face.

Although Parr was the tallest center in the Big Seven this year, he takes a back seat in size to other centers in the tournament at Lawrence. Houston's Don Boldebuck is 7 feet tall. SMU's Jim Krebs is even with Parr in height, but outweighs Jack, 225 to 200 pounds.

"Height and depth will be our big problems," the K-State mentor said. "We're a thin squad now, relying heavily on seven or eight boys, and can't match height with any of the others."

Kansas State, through 23 games this year, has a 74 point-a-game scoring average. The Cats' defensive average is 66.2.

The starting lineups:

Kansas State	Pos.	OCU
Stone (6-3)	f	(6-5) Bradshaw
Abbott (6-3½)	f	(6-5) Lee
Parr (6-9)	c	(6-10) Reed
Vicens (5-9)	g	(6-0) Magana
Schneider (6-3)	g	(6-6) Holloway

# Wildcats Will Wrestle Illinois U Tomorrow

Wildcat grapplers, not mentioned in national rankings this year, will be out to smash one of the nation's top teams, ninth-ranked Illinois, in a match at Urbana, Saturday at 2 p.m.

But, the loss of two grapplers, Gary Haller and Joe Landholm, will cause the Wildcats to forfeit 10 team points.

Haller, 177-pounder with a 6-2 record, is ill. Landholm, 123-pounder with a 2-1-1 record, has not recovered from a shoulder injury he received in January.

Best bets for K-State wins are Bob Mancuso, 130-pounder, and Roland Alexander, 147-pounder. Mancuso and Alexander each placed second in the Big Seven tournament at Ames, Iowa, March 10. Mancuso still re-

mains undefeated in dual match competition with a 7-0-1 record. Alexander stands 4-3 for the dual season.

Included in the Wildcat lineup is Ray Glaze, 167-pounder with a 4-3 season record. Glaze placed third in the Big Seven meet.

Dale Blume, 0-8, placed fourth in the tourney. Blume is K-State's 157-pounder. Ellis Rainsberger, heavyweight, will enter the dual meet with a 3-3-2 record. Pete Everist, 137-pounder, has a 0-4 record.

Probable starting lineup for the Illini is Dave Moore, 123 pounds; N. Sargent, 130 pounds; Bill Muther, 137 pounds; Bill Gabberd, 147 pounds; Larry TenPas, 157 pounds; Don Pierre, 167 pounds; H. Brownstein, 177 pounds; and Bob Alexander, heavyweight.

## Blowout Planned If Wildcats Win

An organized celebration is planned for the Student Union Saturday night if K-State wins the NCAA regional playoff at Lawrence, head cheerleader Phil Stiles said.

If the Cats win tonight, they won't play until 9:30 p.m. Saturday. Post-game ceremonies wouldn't permit the team to get home until 3 a.m. Sunday.

## Water Safety School Planned For April 9-13

The annual water safety instructor school will be April 9-13, according to Katherine Geyer, head of the women's physical education department.

Anyone who has passed senior lifesaving or who has taken the course before is eligible to attend. However, those who have not taken the course must attend three sessions.

These sessions will be in the swimming pools in Nichols gym from 7 to 10 p.m. on March 27, April 3, and April 5. Swimming strokes and general swimming ability will be tested at these sessions.

Those planning to attend should register in the physical education offices in Nichols gymnasium or Ahearn Field House by March 23.

# Two Meets Remain For KS Gym Team

The Kansas State gymnastic team, with two meets remaining on its schedule, has a choice of entering three meets, according to coach Frank Thompson.

The meets are a dual at Illinois and invitationals at Louisiana State and the University of Texas.

"Our biggest problem is getting the boys together to travel," Thompson said. "And we will have to choose our schedule accordingly."

The reason for the problem in scheduling is that many of the team members have lab work and class study that conflicts with the meets.

The Cats gymnasts own a 5-6 record for the season "for an extremely successful season considering that we had our toughest schedule this year," Thompson said.

"We've run up against some outstanding teams this season," he said, and went on to add, "Our remaining schedule should be much easier."

Two of the Cat foes to date, Minnesota State and Illinois State, are top flight teams in their own conference.

Added to this is the fact that gymnastic team candidates at K-State start from scratch, Thompson said. Kansas does not have a gymnastic system in its high schools and scholarships are not offered at K-State for gymnasts.

The team will lose three of its top veterans in seniors Wendell Holt, Albert Bumpus and Robert Eshelbrenner.

"Compensating for this loss will be the biggest turnout we will have had in gymnastics," Thompson said.

"We will lack experience, however, because most of the squad will be sophomores," Thompson said.

Thompson hopes to build his squad around freshman Richard Rood.

Rood specializes in the trampoline, tumbling, parallel bars, and the flying rings.

# Manhattan HS Loses 58-49; Wyandotte To 2nd Round

The Manhattan High school Indians were mowed down by a second half Hutchinson Salt Hawk scoring splurge and that eliminated them from further AA tourney competition by a 58-49 loss.

The Indians, who led by one point at half-time 28-27, came back onto the court after intermission and collided with an offense they couldn't keep up with.

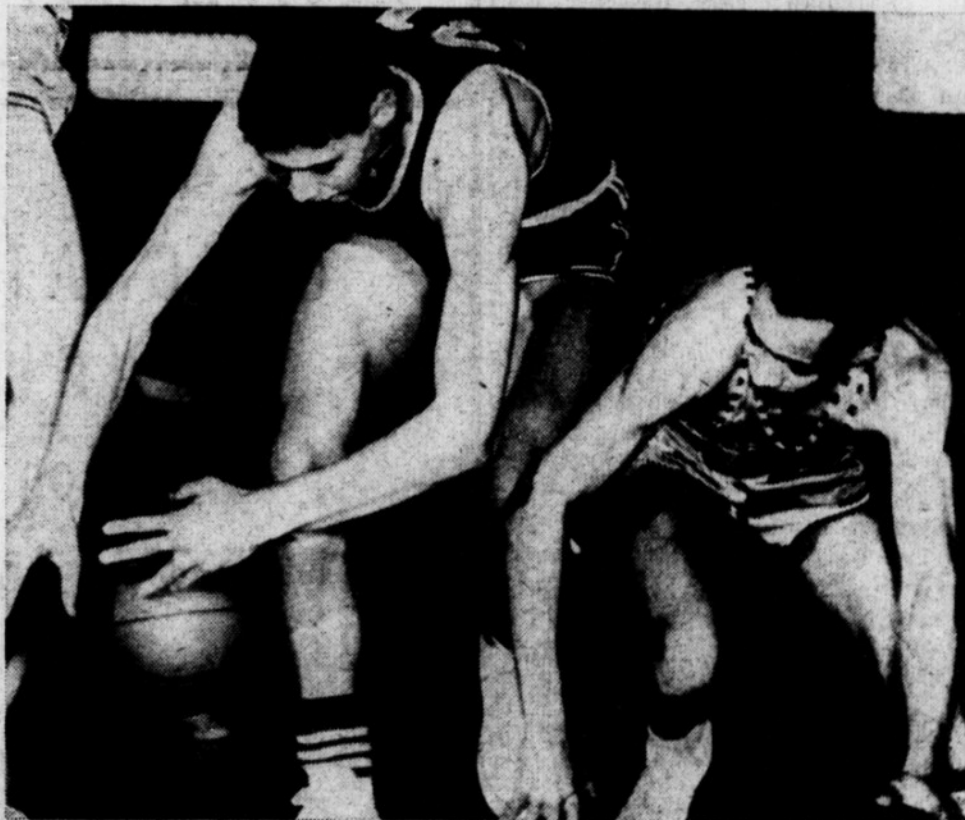

Salt Hawk long shots were Manhattan's downfall as the Hutch quintet hit 22 of 58 field goal attempts for a 38 per cent average.

Hutchinson moved to a 52-43 edge with 3 minutes left in the game and then put the ball into a deep freeze. The Hawks went for two and a half minutes without firing a shot and forced Manhattan to foul to get the ball.

The Salt Hawks used a balanced scoring attack to beat the Indians. Jerry Johnson hit 14 points, Larry Phillips, Jerry Forney, and Bill James hit for 10 points each. Sonny Ballard was high point for Manhattan with 18 counters.

In the 7:30 game, Wyandotte eliminated Winfield 62-58 in a game which bordered on the mediocre until midway through the fourth quarter when Winfield started a rally which fell short by only 4 points.

Jim Miles kept Winfield in the running in the third quarter by scoring all his team's points on three jump shots. Clarence Palmer carried Winfield's scoring load as he dumped in 21 points and hauled down 6 rebounds.

"MOVE OVER" seems to be the idea Smith of Newton, (in white) is trying to get across to Harder of Ottawa. This action took place in the first game of the AA state tournament yesterday in Ahearn Field House. Newton won over Ottawa 49-39 to advance to the quarter-finals tonight.

**LEGISLATIVE PROTOCOL**—Jesse Unruh, PrV Soph, checks last minute plans for Sigma Alpha Epsilon's 100th founders day banquet with housemother Mrs. P. F. Johnston, (left). Mrs. Lawrence Allingham, (center) whose husband and son are SAEs, listens intently. The evening's program included a network telephone hookup with chapters across the nation and Tuscaloosa, Ala., where the fraternity was founded in 1856.

Collegian photo by Gary Haynes

## Sig Alphas Celebrate 100th Anniversary

Sigma Alpha Epsilon members celebrated the 100th anniversary of their founding, March 9, 10 and 11.

A nation-wide closed-circuit broadcast from the University of Alabama, site of their founding, describing the founding and growth of SAE, was heard by the members Friday night at the Wareham hotel.

A banquet was held Saturday night and a dance followed honoring the centennial.

Minerva club, an organization for wives and mothers of SAE, also held a banquet at the Country club, Saturday. Sixty-five alums were in town for the weekend.

Sigma Alpha Epsilon, organized in 1914, was the first national fraternity at Kansas State.

The 1956 "Sweetheart of Phi Kappa Tau" will be crowned at the fraternity's annual formal, the "Red Carnation Ball," in the

Wareham Terrace ballroom Saturday at 8 p.m.

The three finalists are Annette Tighe, TJ Fr; Barbara Kethcart, EEed Fr; and Pat Henry, Ent Sr. A dinner at 6:30 p.m. will precede the formal.

Lambda Chi Alpha had an exchange dinner with Kappa Kappa Gamma March 8.

Saturday night the Lambda Chis entertained their dates at a house party. Founders' Day Banquet is Sunday evening in the Student Union.

♦ ♦ ♦ ♦

More than 100 Phi Kappa Tau members and alumni of K-State and KU will celebrate the fraternity's 50th anniversary at its annual founders' day banquet Sunday at 2 p.m. in Student Union banquet room.

Alumni speakers will be Prof. George Montgomery, head of the department of economics and sociology, and W. A. Talbot of Kansas City, Mo. Fred Koster, Hst Jr, will be master of ceremonies.

## 'Heaven and Hell' Party Scheduled by KKGs

Members of Kappa Kappa Gamma will have a Heaven and Hell house party Friday night. The girls and their dates will wear appropriate costumes to carry out the theme of the party.

Alpha Tau Omega will have a rush weekend March 16-17. They will have a houseparty Saturday evening.

Members of the Chi Omega pledge class took their sneak Wednesday evening. They went

to Keck's for dinner and then to the new Student Union.

The Acacia fraternity will have a rush weekend. Rushees and their dates are going to the Skyline for a party Saturday night.

Sigma Nu had a rush weekend for 25 Kansas boys. After Sunday dinner Dr. Claude Shenkle, their faculty advisor, talked, to the rushees on fraternity and campus life.

### Officers

Ron Backer is the new president of Sigma Phi Epsilon. Jim Brass is vice-president; Berdel Nolte, historian; and Phil Barnes, secretary.

Newly elected officers of Alpha Tau Omega are Gene Randall, AA Sr, president; Bob Haas, MGS Soph, treasurer.

Semi-annual officers that have been elected are Dean Joslin, Ag Jr, vice-president; Don Hutchinson, EE Sr, secretary; Raleigh Eggers, AEd Sr, sentinel; Dale

Blume, BA Jr, pledge trainer; Jim Goebel, EE Sr, keeper of the annuals.

Recently elected officers of the 1834 Club pledge class are Larry Olsen, president; Ralph Willard, Chm Soph, vice-president; Tom Price, secretary.

Henry Androde, ME Fr, treasurer; Larry Wills, ChE Fr, social chairman; Don Kearns, BA Soph, parliamentarian; J. D. Barber, IPC representative; and Loren Davidson, ME Fr, pledge intramural manager.

Members of Kappa Kappa Gamma were hosts last week to their Province President, Mrs. Leland Hosto, from St. Louis, Mo.

### Initiation

Formal initiation recently took place at the Phi Delta Theta house for George Wilson, EE Sr, George Davidson, MT Fr.

Ronald Boucek, BA Soph, Harry Gaffin, EE Sr, Richard Pearson, BPM Soph; and Burnette Earp, ChE Soph.

## Women's Fashions Sketched at Races

By JUDY WILLIAMS

Picking the best-dressed women at a horse race is one of the main assignments of a fashion reporter in New York City, according to Barbara Craigie, K-State instructor in home economics art.

Miss Craigie, who spent five years in New York before coming here two years ago, did fashion reporting for the Women's Wear Daily, largest trade fashion paper in the world.

"The horse race I was to cover was at Monmouth Park. I was to sketch and list what was worn by important society people. I took time out to make one bet—never

having done it before. Then I was so busy sketching all afternoon that I couldn't watch the race to see how my horse came out," Miss Craigie said laughingly.

"We had to look casual, while actually dashing down descriptions of all the fancy hats worn and the names of the people wearing them," Miss Craigie said.

A similar assignment was to cover Easter fashions. Several members of the staff stood outside the biggest New York churches on the two Sundays before Easter and sketched the latest style hats for an article on Easter fashions, Miss Craigie said.

# Creating Less World Conflict Is Aim of Society of Friends

The only new religious organization on the campus this year is the Society of Friends, commonly known as the Quakers. Interest among townspeople and College students has led to forming a group of about 25 active members.

The group holds its worship service at 9:30 a.m. each Sunday at Danforth chapel. Business meetings are held the first Sunday evening of each month at various members' homes.

Presiding officer at business meetings is the clerk, Lloyd Hulbert, assistant professor of botany and plant pathology. Assistant clerk is Jim Perkins, AA Jr.

The Society of Friends has no discrimination of any kind, but welcomes anyone who believes there is some truth left within each person, said Hulbert. The worship meeting is a service of silence, with persons speaking when so motivated.

"Quakers are basically pacifists, with ideals of creating a world of less conflict and disagreement," he continued.

One of the ways in which Friends further peace and understanding is through their service projects. These may include assistance on Indian reservations, in mental hospitals, and with community service programs in slum areas.

The society also organizes work camps in various countries to help with rebuilding and reconstruction programs.

These service projects are instigated by Friends members,

but are carried on by persons of all faiths, said Hulbert.

One such project that all College students can help with is the society's present undertaking of sending winter clothing to needy persons throughout the world. The clothing is being collected in a box in the YMCA office in Anderson hall.

Friends members will meet with interested persons at 4 p.m.

Tuesday at the YMCA office to plan possible service projects for their society.

"We want to stress that persons of any faith can work with a service project sponsored by the Society of Friends," said Jim Perkins, who will conduct the meeting. Interested persons who cannot attend should call Perkins at 84495 for further information.

**CLOTHING TO** be sent to needy persons throughout the world is packed by Society of Friends members. Elin McCandless, HDA Soph; Bruce Cutler, graduate assistant in English; Lloyd Hulbert, assistant professor of botany and plant pathology; and Jim Perkins, AA Jr.

## Four Church Sororities To Hold Union Services

Four College church sororities will meet in a union service Tuesday, March 20 at 7:30 p.m. at the First Baptist church. Theta Epsilon will be host to Kappa Phi, Kappa Beta, and Sigma Eta Chi.

"Today's Workers are Tomorrow's Leaders" is to be the theme, according to Phyllis Loseke, HT Sr, Theta Epsilon president. Guest speaker is to be Mrs. Jane Koefod, College YWCA Director. Janet Teague, HEN Soph, will play special music.

Committee chairmen are: Mary Jo Higgins, Eng Sr, recreation and social hour; Loretta Magers, HEJ Fr, hostess; Evelyn Sadler and Marilyn Peterson, program; Rosa Larson, HDA Sr, and Betty Johnson, HE Fr, refreshments.

## Gamma Delta To Meet Sunday

Careers in social welfare work will be explained by the Rev. Sam Widiger, Lutheran church director for social welfare work in Kansas, at Gamma Delta meeting Sunday evening.

Gamma Delta meets in the students' room of Saint Luke's Lutheran church, 330 N. Sunset.

Doctor Widiger's talk will be preceded by supper at 5 p.m. and will be followed by vespers.

Lenten season vespers are on "Christ and the Student" and are held each Thursday at 5 p.m. at the College chapel.

## Lenten Services in Danforth Chapel

Devotions at Danforth chapel at 7:30 a.m. Tuesday, March 20, will be led by Margaret Crouch, HEB, and Beverly Somers, ML Fr. The subject will be "I Must Believe," which follows the series of "Living in the Imperative Mood."

Future devotions will be: March 26, "I Must Believe," led by Phyllis Burdorf, EEd Soph; March 27, "I Must Confess," led by Charlotte Chastain, Psy Fr, and Judy Horn, MGS Fr; March 28, "I Must Witness," led by Rogena Long, MBT Fr, and Anne Pederson, BPM Fr; and March 29, "I Must Share," led by Dick Gayek, PrV Fr.

Persons of all faiths are welcome at the services, said Don Gier, religious life chairman of the YMCA, the sponsoring group.

# Officer Candidates Named by AROTC

# Civil Engineers Feature Tuttle Creek in Exhibit

KANSAS STATE COLLEGIAN  
Friday, March 16, 1956-8

**BALL, CRYSTAL, M-1**—The ROTC crystal ball predicts future commissions for 71 candidates recently listed by the ROTC department.

Names of 71 seniors who are candidates for ROTC commissions have recently been listed by the department of military science.

Those receiving their second lieutenant's bars and their respective fields for two years of active duty are: Elmer Karstensen and Marion Soder, infantry; Don Ubel, armor; Norman Dawson, Peter Dahlquist, Hoyt Eells, Darrel Gale, Charles Hutchinson, Wendell Holt, Billie Johnson, Ivan Mills, Richard Mosier, Donnie Parsons, Alan Van Nice, and Robert Worley, artillery.

Paul Nixon, corps of engineers; John Hodges, Kenneth Long, Warren Sommer, and Arnold Von Soosten, signal corps; Stephen Weckel, army security agency; Edwin Rieg, chemical corps.

Those serving on active duty for six months of training are: Jan Brumm, David Dary, James Furey, and Denis Sweat, infantry; Frank Farrell, Donald Hayes, Roger Rankin, Marvin Taylor, and Fred Woodbury, armor; Gary Rogers, Jack Smith, Barrie Thorp, and Hayes Walker, artillery; Thomas Wesselowski, Corps of Engineers; and William Rogers, signal corps.

Receiving commissions after summer school are: Douglas Ericksen, Robert Esterl, Dennis Holm, Donald Reed, and Max Romeiser, artillery; Edward Bowdon, army security agency; Raymond Petr, ordnance corps; and Eldon Johnson, chemical corps.

Receiving a commission for six months active duty after summer school is Pekka Marttinen, infantry.

In January 1957 commissions

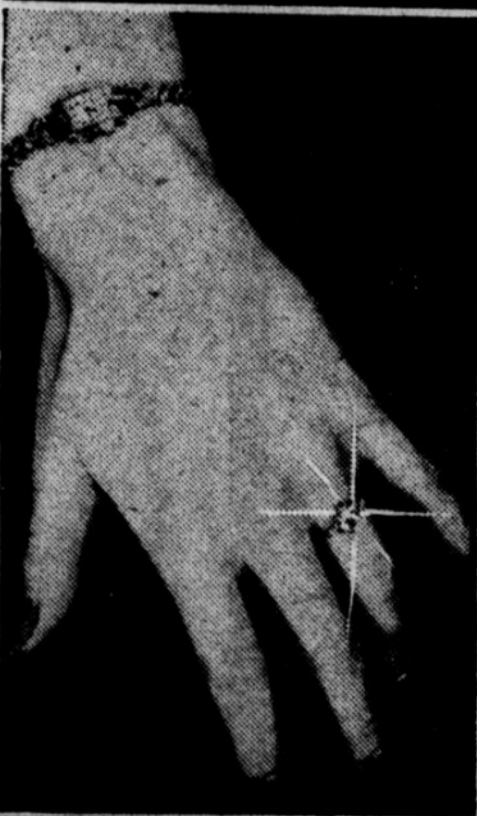

will be presented to Ronald Barton, Ludwig Bezemek, Chester Hiner, and Larry Nelson, artillery; Archie Graham, James Marsh, and Herbert Webb, corps of engineers; Walter Dietz, Albert Kaine, and Henry Windisch, signal corps; Richard Hiner, Gene Martin, Harry McNary, and Gary Trull, ordnance corps; James Conboy, medical service corps.

Commissions for active duty for six months training are to be given in January 1957 to Richard Boyd, William Stanners, and Taplin, infantry; George Berg, Robert Cullins, and Juan Vicens, armor; Wendell Wright, corps of engineers.

Receiving commissions in May, 1957 are Donald Goeckler, and Roger Haberman, artillery.

**LANG'S**  
419 POYNTZ

By JUDIE ROSS  
A plaster of paris and wood model of Tuttle Creek dam is the feature of the civil engineers' Open House display, according to Monroe Funk and Cloyd Scott co-chairmen of the display.

Charts explaining the geography that resulted in the design and construction of the dam have been prepared by Eldon Hammeke and Edward Smith.

Another display demonstrates the use of prestressed concrete in a diving board. Kay Chappell, Maurine Schrag, Dixie Viar, Kay Playter, Marcis Herles, Lou Ann Steinle, Judy O'Hara, Judie Ross, and Suzie Bates assist the display by posing on the diving board. Charles Scholer and Paul Giana-Kon are in charge.

A display of bridges shows the progress in design and construction from the early covered bridges of wood to the modern steel suspension bridges.

Along with this is a bridge made of paper loaded with concrete blocks. Visitors guess the weight it would take to make the

bridge collapse. A prize will be given for the closest estimate. In charge of this are Kenneth Couch and Donald Schneider.

Photogeometry will be handled by Kendrick Fetrow and Frank Jones. This includes a display of aerial photography.

A model of a sanitation installation will be on exhibit under the direction of Dale

Holm, Vearl Lamb and James Sullivan.

Bill Fixen and Billy Stalcup are in charge of a display of all kinds of slide rules and calculating machines suitable for an engineering office.

A movie, "Building the Golden Gate Bridge," will be shown under the supervision of Danny Porter and Ed Young.

Kansas State College, Manhattan, Kansas, Monday, March 19, 1956

NUMBER 106

Beer-Bottle Organ, Etc.

## Steel Ring Trophy To M.E.s For Second Consecutive Year

The Mechanical Engineering department won the Steel Ring display trophy at the 32nd annual Engineers' Open House attended by approximately 14,000 persons, publicity chairman Robert D. Miller said.

Dean M. A. Durland presented the trophy to department chairman Gene Martin

for such displays as a beer bottle organ, a solar-energy display, and a script-writing cam mechanism. The Mechanical Engineering department won the trophy for the second consecutive year. Any department

winning for three consecutive years may keep the trophy, Miller said.

Second and third-place Steel Ring honors went to Civil Engineering and to Architecture.

Project chairmen Paul Nixon, CE Sr, and James McCallister, CE Jr, accepted Steel Ring recognition for best individual display for the Civil Engineering department's Tuttle-Creek-dam and pre-stressed-concrete diving board exhibits.

Other individual displays receiving Steel Ring mention were the Agricultural Engineering department's automatic feed-handling mechanism, the Department of Architecture's slide-circle machine, Chemical Engineering's model liquid oxygen plant, and Electrical Engineering's radio-controlled boat, Miller said.

St. Pat's Prom, climaxing Open House events, was attended by approximately 700 couples dancing to music by The Pastels. Ron Bryant, ME Jr, and Sondra Tate, Art Soph, were crowned St. Pat and St. Patricia at the dance Saturday night. They were attended by Ralph Smith, EE Jr; James Hotchkiss, IE Jr; Sue Wyant, CE Soph; and Kay Benjamin, EEd Soph.

The K-Hill marathon race was run in 15 minutes, 5 seconds Friday night from Seaton hall to K-Hill, Miller said.

## SC To Discuss New Proposal About Parking

A parking plan aimed at relieving congestion and parking hazards in the Student Union parking lot will be submitted tonight to the Student Council. Council will meet at 7:30 in the Union.

The plan will be submitted by Pat Wilkerson and Keith Swenson. The plan calls for five lots featuring alternate straight-in and parallel parking. If passed, the plan would be submitted for publication so students would know the new arrangement.

The plan would be enforced by the campus patrolmen, who could be authorized to give tickets to violators.

The Council also will be asked to consider putting a netting on the bottom of the south backdrops of the tennis courts. This proposal will be submitted by Marilyn McCready.

The Council may reconsider a motion by Bill Johnson to have SGA primary elections April 13 and general elections April 26 and 27. The motion was tabled at the last meeting.

## Senior Invitations Will Go on Sale

Senior-invitation orders will be taken at the KSC Press office in Kedzie hall beginning tomorrow, George Eaton, superintendent of KSC Press, said. Payment must be in cash at time of order, he said. Checks cannot be accepted.

## Transfer Students To Meet Tuesday

Transfer students who have attended one of 15 junior colleges are excused from classes Tuesday from 10 to 12 a.m. to meet with representatives from their previous colleges and discuss problems encountered when they entered K-State, Director of Admissions E. M. Gerritz said.

Junior colleges represented are Arkansas City, Chanute, Coffeyville, Dodge City, El Dorado, Fort Scott, Garden City, Highland, Hutchinson, Independence, Iola, Kansas City, Kansas City, Mo., Parsons, and Pratt.

Collegian photo by Gary Haynes

**SPRING HAS NEARLY SPRUNG.** Janet Easson, HT Fr, absorbs the late afternoon sunlight near Northwest hall. Aside from a strong wind, the weekend provided resort weather that lured would-be scholars away from their books, temporarily.

## 'Far East Policy'

## Staters To Debate With Foreign Team

The foreign debate team that will be at K-State tonight is on a tour of the western half of the United States, according to Caroline Drummond of the speech department, who is in charge of local arrangements.

The visiting debaters—Harold U. Serner of the University of Stockholm, Sweden, and Paul J. Svanholm, University of Copenhagen, Denmark—are meeting college teams in California, Oregon, Washington, Idaho, Montana, North and South Dakota, Wisconsin, Minnesota, Iowa, Missouri, Illinois, Colorado, Oklahoma, Texas, Arizona, and Kansas.

At K-State the foreign team will debate the proposition, "The Far Eastern Policy of the United

States is Deplorable." Tom Bowman, and Edward McCoy, will take the negative side of the issue. The debate will be at 7:30 in the Union Little Theater, and is open to the public.

## Unicycle Act To Be Minstrel Highlight

A unicycle act by David E. Davies, CE Fr, a vocal solo by Pat Noll, MGS Jr, and a humorous monolog by Bill Patterson, AgE Soph, will be highlights of a minstrel show at Manhattan high tonight and tomorrow night at 8, director Frank Anneberg, said.

Phi Kappa Tau and six members of Theta Xi will furnish the minstrel chorus.

# Tex Optimistic About Next Year

By DON MARKER  
Collegian Sports Editor

Coach Tex Winter is optimistic concerning next year's chances in the Big Seven following underclassmen's performances in the regionals at Lawrence Saturday night that helped K-State win third place by trouncing Houston 89-70.

Friday night the Cats lost their opening tournament game to Oklahoma City university 97-93.

Eddie Wallace, playing his best games of the season, was picked on the all-tournament team. Others on the team were Hubert Reed of OCU, Jim Krebs, Joel Korg, and Bobby Mills, all of Southern Methodist university.

Even though the Cats placed third and with the prospect of facing Wilt (The Stilt) Chamberlain next year, Tex looks ahead with confidence to the 1956-57 season.

Concerning the effect Wilt will

have on next year's Big Seven basketball, Tex says, "I don't think it's a lost cause for the rest of us in the conference. A team with Wilt in the lineup can lose a game."

"I definitely think this—with Wilt in the league, and the material returning at other schools, the Big Seven will be the toughest conference in the country next season," Winter added.

Tex looks to Jack Parr, 6-9 all-conference center, to fill the center spot again next year. Roy DeWitz, who Tex says is "due to grow some more," may be switched to forward to make room on the starting lineup for Eddie Wallace at a guard spot.

Two possible starters may come from this year's freshmen. Bob Boozer, 6-7½, is a candidate for a varsity forward position and Jim Holwerda, 6-footer from Lindsborg, is also being mentioned on next year's starting five.

If this combination does materialize, the Cats starting lineup next year would include 2 sopho-

mores, 2 juniors, and a senior.

Tex heaped praise on the Wildcats for the effort they made in the OCU game, though it was a losing one.

"We didn't play a real good game, but we never quit. Those kids showed they were champions, even in losing. I was really proud of all of them," Tex added.

In the championship game Saturday night Southern Methodist university scored a surprisingly easy 84-63 win over OCU.

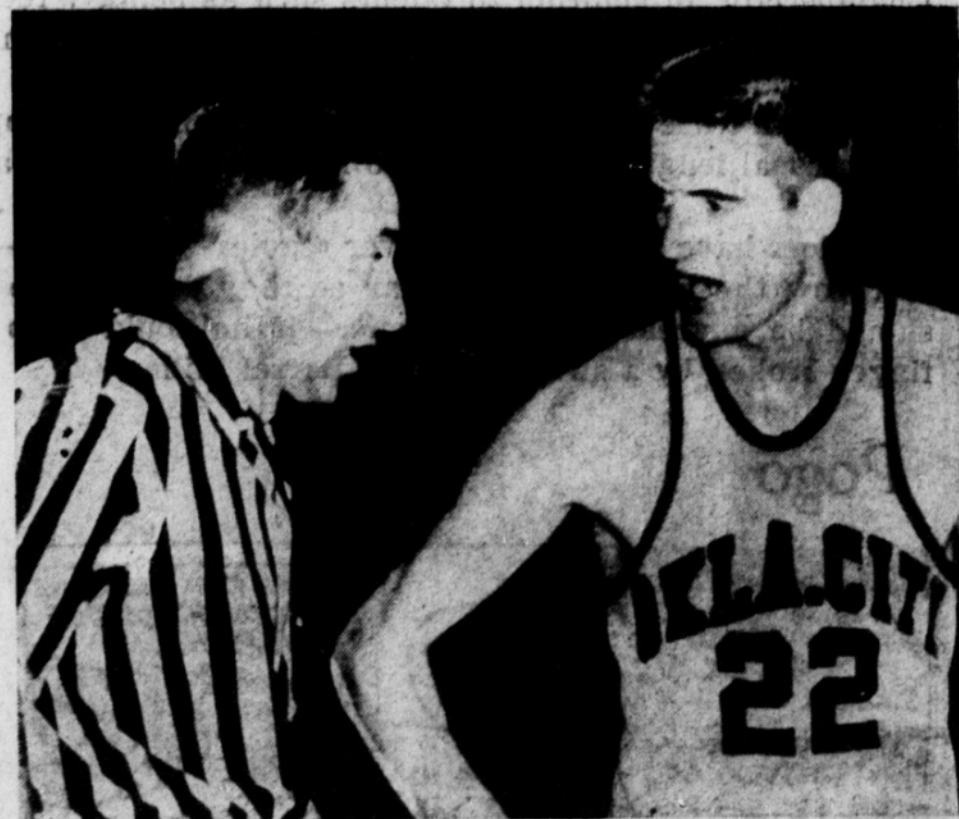

In the K-State win over Houston, the Cats outclassed their Missouri Valley foes all the way.

The Cougars appeared shaken in the latter stages of the game, and K-State used fast breaks to account for points before it went into a stall with 3 minutes left.

K-State reserves played the last minute against a Houston team that showed little spirit.

The win brought the Cat season record to 17-8, the brightest a Tex Winter-coached K-State team has had.

In the opening game against OCU Friday night, K-State (Continued on page 3)

"PARDON ME, SIR, but aren't you making a mistake?" Larry Bradshaw, No. 22, Oklahoma City U player says to referee Al Lightner during the first-round game with K-State at the NCAA regional playoffs at Lawrence Friday.

# Parking Lot Bad Contrast To 'Automatic Tomorrow'

SOME OF OUR parents, who haven't had the advantages of a college education, probably had a hard time reconciling the Union parking lot with such displays as the automatic garage-door opener at Engineers' Open House.

It must have been a shock to come to Manhattan to see all of the latest developments in the field of science, and then to have encountered the teeming, writhing mass of metal we K-Saters laughingly call the Union parking lot.

AT LEAST THERE is one consolation. By this time next year, the parking lot will be laid out in an orderly manner. In the meantime, of course, there is no need to do anything about the lot. Let the darned visitors shift for themselves; we don't care about THEM.

The important thing is that the campus police continue to give tickets to students who park in the faculty parking lots.

## Pinch Me—I'm Dreaming!

K-STATERS CAN be proud of themselves—especially those who attended the game at Lawrence Friday night. Though the K-Staters thought the officiating was especially poor, they—like the gentlemen and gentlewomen that they are—refrained from booing or carrying on in an unsportsmanlike manner.

Such sportsmanship in the face of such injustice is enough to warm the cockles of a person's heart. (or harden his arteries).

AND THE K-STATE cheering was a thing of wonder. Even though K-State lost a heartbreaker Friday night, the fans didn't give up on the team. The student body turned out en masse for the Saturday game, and with their support the K-Staters swamped Houston.

Somebody pinch me. I'm dreaming.

## Wilt Had Better Be Good

COACH TEX WINTER and K-State basketball fans are looking forward to the 1956-57 basketball season with enthusiasm despite KU's Wilt the Stilt.

Coach Winter has said that he thinks KU will lose some games, even though the Hawks have Wilt. And K-State fans are looking with glee at a strong K-State freshman team, and at a group of returning starters.

K-STATE LOSES senior starters Pachin Vicens and Fritz Schneider, and seniors Dick Stone and Joe Powell, who saw limited action this season.

With the return of such men as all-Big Seven Jack Parr, and with Roy DeWitz, and Hayden Abbott from this season's starting lineup; plus the blossoming in the NCAA playoffs of Eddie Wallace, who made the all-tourney team, and of Jack Kiddoo; plus the addition of frosh Bob Boozer at 6-7½, and of frosh Jim Holwerda, both of whom are expected to grab starting spots, Winter will have his headaches. But they'll be pleasant headaches—trying to figure out which player is best.

And most of these men will return year after next. So Wilt the Stilt had better live up to his clippings.

## Stilt Has Bowling Problem

K-STATERS WHO went to Lawrence last weekend report that Wilt Chamberlain, in addition to talents such as being 7 feet tall, is an outstanding bowler. Not only is he a good bowler, but he deserves additional credit because he bowls under a handicap.

Wilt can't use the normal four-step or three-step approaches, due to the unusual length of his legs. So he takes a step and a skip, and there he is.

He does have one advantage over regular-sized folks—he doesn't have to throw the bowling ball as far as they do. By the same token, he should be a great baseball pitcher—if he could keep from getting a finger broken by a swinging bat.—Darrel Miller.

# Minnesota Primary Slated As Demo Test of Strength

Compiled from United Press

Adlai E. Stevenson makes a last bid for votes today on the heels of Sen. Estes Kefauver's stumping tour in their first head-on test of strength in tomorrow's Minnesota presidential primary.

KEFAUVER left the state on the eve of the election to vote on the Senate farm bill in Washington. He said he was convinced that he has cut deeply into Stevenson's edge.

Stevenson, Kefauver's rival in the Democratic primary, returns to Minnesota tonight in a last bid for votes. His supporters conceded that the Tennessean has gained ground, but predicted Stevenson would still walk away with all of Minnesota's 30 delegate votes.

Tomorrow's primary is the first head-on clash between the two candidates for the Democratic presidential nomination. Kefauver won handily over a slate of delegates favorable to Stevenson in last week's New Hampshire primary, but Stevenson did not campaign in that state.

THE DEMOCRATIC primary battle overshadows the Republican race, where voters have a choice between President Eisenhower and Sen. William Knowland of California. Knowland's name was entered before the President expressed willingness to run for re-election and the Senator has since thrown his support behind Mr. Eisenhower.

Republican party leaders organized for an early start on campaign planning today by calling a small-scale convention four months ahead of their big show in August.

THE GOP NATIONAL committee announced that about 800 Republicans from Congress and the party organization had been invited to meet in Washington April 16 and 17 for the planning session. It will be called the "Republican National Conference on the 1956 Presidential and Congressional campaigns."

With renomination of the Eisenhower-Nixon ticket now taken for granted, these other problems are now getting Republican attention:

1. How to adjust campaign techniques for increased use of television, particularly in the light of President Eisenhower's announced refusal to conduct a barnstorming campaign.
2. How to regain control of congress in the face of evidence that GOP Congress-

sional tickets have had less appeal to the voters than Mr. Eisenhower.

GOP HEADQUARTERS already has ordered national TV and radio network time to cost more than \$2 million and has estimated that upwards of \$7 millions more will go for this purpose in state and local Republican campaigns.

Some Republicans were beginning to grumble today that the Democratic-controlled 84th Congress isn't doing much. One said it may go down as a "do nothing" Congress.

Publicly, Democrats scoffed at the charges, which are aimed mainly at the House. They said much major legislation already has been passed, the House is caught up with its work, and that this is the reason members now can take it easy.

PRIVATELY, SOME Democrats were a little concerned, lest the "do nothing" label take hold.

## Kansas GOPers Shift Battle Line

THE KANSAS Republican fight shifted to Ottawa today for a convention in which friendship for Harry Darby was a principal issue in the contest over delegates to the National GOP convention.

Gov. Fred Hall went into the fight trailing four to eight in the selection of delegates, with two of the six district conventions remaining.

Saturday's session at Dodge City ended in a draw, both sides agreed. Hall forces gained endorsement of James Williams, Dodge City, as delegate-at-large. Stewart Newlin, Wellington, one of the Governor's toughest political foes, was chosen as one district delegate and Judge Roy McMullen, Great Bend, as the other. McMullen said he is friendly to both Hall and Darby.

# Cats 3d in Playoff

**DOWN YOU GO** seems to be the theme of this action in the Kansas State-Oklahoma City university game Friday night. Eddie Wallace is on his way down and Leon Griffin, OCU forward, has the inside track on the basketball.

(Continued from page 1)  
staged a gallant, but vain battle before bowing to the Chiefs 97-93.

Although they trailed by as much as 13 points several times in the first half and by 18 in the second half, the Cats fought back to have only the 4-point deficit when the final gun sounded.

Behind 52-70 with 14 minutes to go in the loosely-officiated game, K-State pulled to 67-72 on 4 points by Vicens, 5 by Parr, 4 by Wallace, and 2 by Abbott, only to have OCU again pull ahead 87-76 with 5:54 left to play.

The Cats weren't through yet, however, and fought back with 9 points by Kiddoo, 2 counters by Parr, and 6 by Stone to trail only

1 point at 93-94 with 14 seconds to play.

A foul was then called on Eddie Wallace and Leon Griffin dropped his freethrow to put the Chiefs ahead 95-93.

Larry Fischer then fouled Lyndon Lee, who hit both his charity tosses to chalk up the 97-93 win for the Chieftans.

K-State (93)	OCU (97)
Abbott 1 0	2 Griffin 6 8 20
Fisher 0 0	0 Holl'w'y 5 7 17
Powell 0 1	1 Lee 5 10 20
Stone 6 2	14 Reed 6 3 15
Parr 3 13	19 Br'dsh'w 3 1 7
Kiddoo 3 3	9 Jeter 0 0 0
Schneider 4 2	10 Juby 1 0 0
Vicens 5 7	15 Magana 5 6 1
Wallace 9 5	23
30 33 93	31 35 97

K-State (89)	Houston (70)
Jedw'bn'y 2 1	5 Evans 1 0 2
Fischer 0 1	1 Foster 2 0 4
Stone 6 8	20 Helms 4 0 8
Parr 7 7	21 Tucker 2 2 6
Kiddoo 4 3	11 Boldebu'k 5 11 21
Schneider 2 0	4 Dotson 6 2 14
Vicens 4 4	12 Lopez 4 1 9
Wallace 6 4	16 Sells 1 4 6
31 27 89	25 20 70

## Matmen Lose To Illinois U

K-State wrestlers lost their final dual match of the season Saturday to Illinois U 25-8, at Urbana, Ill. The Cats finished the season with a 5-4 dual meet record.

Bob Mancuso and Roland Alexander were the only Wildcat winners. Ellis Rainsberger wrestled Steve Szabo of Illinois to a 2-2 draw. K-State forfeited in the 123-pound and 177-pound weights.

Coach Fritz Knorr will hold tryouts this week to select a team for entrance in the NCAA tournament at Stillwater, Okla., Friday and Saturday.

The results:

123-pounds: Moore, Illinois, by forfeit.  
130-pounds: Bob Mancuso, K-State, decisioned Norb Sargent, 6-3.  
137-pounds: Bob Muther, Illinois, pinned Pete Everist, 3:56.  
147-pounds: Roland Alexander, K-State, decisioned Bill Gabbart, 5-0.  
157-pounds: Larry TenPas, Illinois, pinned Dale Blume, 6:44.  
167-pounds: Frank Robertson, Illinois, decisioned Ray Glaze, 6-1.  
177-pounds: Harold Brownstein, Illinois, by forfeit.  
Heavyweight: Ellis Rainsberger, K-State, drew with Steve Szabo, 2-2.

## League Bowling To Start Tonight

Competition in bowling leagues will begin tonight at 7:30 in the Student Union, according to Hayes Walker, Union games committee member.

There are six leagues at the present time. Three hundred bowlers, mostly students, have signed up for competition.

The following times have been named for league bowling. On Monday night, the leagues will bowl from 7:30 to 9:30. On Tuesday and Wednesday they will bowl from 6 to 10, and on Thursday they will bowl from 6 to 8.

The bowling alleys will be open to students not on league teams at other regularly scheduled times.

League bowling will run from tonight until May 16, Walker said.

# KS Trackmen Place 3d; Miller in Vault Record

K-State's Paul Miller set a new pole vault record of 14-2 3/4 in the Colorado Indoor track meet Saturday at Boulder. The old mark of 14-1/2 was set by Riddell of Colorado A&M in 1954. Miller's vault also set a new Wildcat varsity record.

K-State trackmen placed 3d out of a 15 team slate with 18 points.

The mile relay team of Renollet, Russell, Chiles, and O'Connor, set a new meet record as they covered the distance in 3:28.5.

The record is notable because of the deficit Marvin Chiles was forced to overcome before he handed off to anchorman Gene O'Connor, coach Ward Haylett said.

The big K-State boost was in the 60-yard high hurdles where Wildcat runners finished in 2-3-4 order. Gene O'Connor was runner-up to Colorado's Fritz Hageboeck and led team-

mates Cary Doupnik and Ray Russell over the barriers.

The Cats got further help from Marvin Chiles who ran fourth in the 60-yard dash and Karl Lindemuth who tied for second in the pole vault.

In the open mile, K-State freshmen Bob Rodda and Mike Peake were 3d and 4th respectively. Both were running unattached.

## AIRLINE HOSTESS for TRANS WORLD AIRLINES

START NOW AT AGE 20

NOW RECRUITING FOR JUNE CLASSES

You can now fly with the finest airline in the world with routes both in the United States and overseas if you can meet these qualifications. High school graduate; age 20 to 27; height 5' 2" to 5' 8"; weight 100-135; attractive; unmarried; eyesight 20/50 or better; training at TWA's headquarters in Kansas City, Missouri, at company expense with pay.

## BELL SYSTEM

## JOB OPPORTUNITIES

... for Engineering and Physical Science Graduates

The Bell Telephone System is seeking outstanding young men with the capacity and training to become the engineering and scientific leaders of tomorrow's communication's industry.

Here are challenging careers in providing an essential public service—plus interesting work in special military projects vital to national defense.

You will find good salaries and excellent opportunities for advancement in this rapidly growing industry that has doubled in size in the past ten years. There is a wide range of jobs suited for men trained in many different fields in the various components of the Bell System.

Seniors and graduate students in engineering and the physical sciences who are completing work on their degrees in June, 1956, are invited to register for interviews by representatives of:

- Southwestern Bell Telephone Company . . . builds, maintains, and operates telephone systems in Texas, Missouri, Oklahoma, Kansas, and Arkansas.

- Western Electric . . . manufacturing and supply unit of the Bell System.

- Bell Laboratories . . . devoted to research, development, engineering, and design in the electronics and communications fields. Most complete industrial laboratories in the world.

- Sandia Corporation . . . applied research, design, and development of atomic weapons. Albuquerque, New Mexico.

Bell System representatives will be on the campus Wednesday, March 21, and Thursday, March 22. Arrangements for an interview can be made at the electrical engineering office or the mechanical engineering office.

# Eisenhower Foreign Aid Plan Approaches \$5-Billion Mark

Washington, (U.P.) — President Eisenhower submitted to Congress today a \$4,859,975,000 foreign aid program tailored to meet Russia's "new departures in foreign policy." It included authority for long-term U.S. aid commitments to underdeveloped countries.

Although the Communists seem to have "put aside, at least temporarily" the strategy of "aggression through force," he said,

there is no reason to believe they have abandoned their "sinister objectives" of world domination.

## Radio Marathon Over

Sopkane, Wash.—A radio disc jockey, claiming a new world's record for non-stop broadcasting, finally told his listeners to "go to bed" early today and was carried

from his microphone on a stretcher.

Steve Sorenson, flat on his back and taking oxygen during his last three hours on the air, completed 85 hours, five minutes and 20 seconds of continuous broadcasting at 4:38 a.m. (EST). He gasped out that he was "going home to go to bed" and advised the listeners who had shared his marathon to do likewise.

## Klub Kolumn

# Dottie Ennis To Head Promotion for KSDB

Dottie Ennis, HEA Fr. has been selected as promotion chief for KSDB-FM, Wayne Smith, general manager, announced today. She will be in charge of publicity, which will include drawing posters and furnishing radio logs and notices of the station's activities.

## Promenaders

Promenaders, campus square dance club, will meet tonight at

## Kansas State Collegian

VOLUME LXII

Kansas State College, Manhattan, Kansas, Tuesday, March 20, 1956

NUMBER 107

### Student Council

## Election Dates Are Set; Parking Plan Approved

The Student Council last night voted to have SGA primary elections April 13 and general elections April 19 and 20.

SGA officials are student body president, Student Board of Publications members and Student Council members.

Anyone wishing to run for one of these offices must file a petition with the Student Council elections committee on or before April 3, according to Bill Johnson, committee chairman. The person filing a petition must declare which party ballot he wishes to run on or if he wishes to remain an independent candidate.

Each petition with the exception of the petition for Student body president must have 25 signatures. Student body president petitions must have 50 signatures. No one may sign more petitions than the number of representatives apportioned to his school. No one may sign a petition for a Student Council candidate not from his school.

The School of Arts and Sciences may elect seven members to Student Council; the School of Agriculture, three (this may be changed because of enrollment); the School of Home Economics, two; School

of Vet Medicine, one; and Graduate School, one.

The Student Board of Publications members and the student body president are elected at large.

Petition forms should be available at the Dean of Students office by Thursday, Johnson said. The Council approved a Stu-

dent Union parking lot plan submitted by Keith Swenson and Pat Wilkerson. The plan features alternate rows of straight in and parallel parking. The plan will not be put into effect until a few minor changes are made in the parking lot by the physical plant. After this work is completed a diagram of the new arrangement will appear in the Collegian.

## Vernal Equinox Has Snuck Into Kansas; East Snowbound

Spring arrived at K-State at 9:21 a.m. The local weatherman cooperated by predicting fair weather for the initial day of the season in this area.

But—a blizzard that has already claimed 130 lives still dumped snow on the east coast from Maine to Virginia. Temperatures were below freezing as far south as Alabama.

Spring arrives at the moment that the sun makes its annual return trip across the equator at the intersection of 41 degrees and 53 minutes north latitude and 87 degrees and 38 minutes west longitude.

Depending on how you look at

it, spring was both late and early this year. To the snow-bound east coast, spring must appear far away, but the calendar indicates that spring is a day early—thanks to Leap Year.

The extra day in the year moved the first day of the season up one day. Fall will also be a day early this year for the same reason.

The famous swallows of Capistrano, who don't pay much attention to calendars, were right on schedule. They arrived at the San Juan Capistrano, Calif., mission on St. Joseph's day, exactly as they have done for 142 years.

## Twenty Fraternities Approve Resolution

Interfraternity Council outlawed "hell week" among K-State fraternities last night.

The council adopted a resolution that outlaws all "hell week" activities into their constitution by a 20 to 2 vote. Voting was done by secret ballot. The resolution stemmed from a committee that had previously met with President McCain to iron out any differences of opinion between the administration and the Interfraternity Council on the subject of "hell week."

"This is one of the biggest steps forward for K-State fraternities in modern history. It benefits the parents and the boys coming here to school," said V. D. Foltz, faculty adviser for the Council.

In banning "Hell Week" our fraternities have once more demonstrated their responsible leadership and their genuine concern for the welfare of their members and the college as a whole. I am sure there has been a minimum of Hell Week activities on the campus in recent years, however, it is most gratifying that our fraternities themselves have taken action to outlaw all such hazing.

James A. McCain,  
President.

Dean Wunderlich said he hoped, "that all of the fraternities will live up to the resolution and enforce the bill. It demonstrates very good self government."

The resolution reads as follows:

Statement of Committee Action

"We consider the fraternity responsible for a positive contribution to the primary functions of the colleges and universities, and therefore under an obligation to encourage the most complete personal development of its members, intellectual, physical and social. Therefore we declare that any member fraternity of the Interfraternity council at Kansas State college shall not indulge in Hell Week or any activities which will:

(1) Have an adverse effect on the worth of the individual, be it mentally, physically, or morally degrading to his character.

(2) Hinder the individual's participation in any activities, academic or extra curricular, of Kansas State college.

And furthermore, it shall be the purpose of these member fraternities to promote the public relations of Kansas State college at all times.

Whereas any violation of the above declaration by any member fraternity will result in immediate action by the Interfraternity council with maximum punishment being permanent expulsion from the Kansas State college Interfraternity council.

The action was taken under the heading of old business for the fraternities discussed the proposal two weeks ago. The resolution was taken back to the individual chapter meetings and then brought to a vote last night.

To make an amendment to the Council constitution a three fourths majority of all member fraternities is required. Ballots were handed out and the Council quietly voted 20 to 2 to outlaw "hell week" activities on the K-State campus.

## Frog Club Will Present 'Broadway Splashes'

Frog club's annual water show entitled "Broadway Splashes" will be presented 8 p.m. Thursday and Friday, in the men's pool in the Nichols gym, according to Thelma Horlacher, program chairman.

The show will consist of ten numbers adapted from nine famous Broadway musicals—"Surrey with the Fringe on Top" from Oklahoma; "Make Believe" and "Dessert Song" from Showboat; "Hey There" from Pajama Game; "I Love Paris" from Can Can.

"Slaughter on Tenth Avenue" from On Your Toes; "Smoke Gets in Your Eyes" from Roberta; "Oh Devil Moon" from Finian's Rainbow; "Dancing in the Dark" from Bandwagon; and "Lullaby of Broadway" from show by same name.

Silhouettes of the New York skyline with billboards advertising the nine Broadway shows will provide the setting, with music tape-recorder in the background.

Special numbers include a solo by Thelma Horlacher, BAA Sr. and two duets—one with Thelma Horlacher and Ralph Piccola, PrV Soph, and the other with Dorinda Mears, PEW

Jr. and Leon Coup, BA Sr.

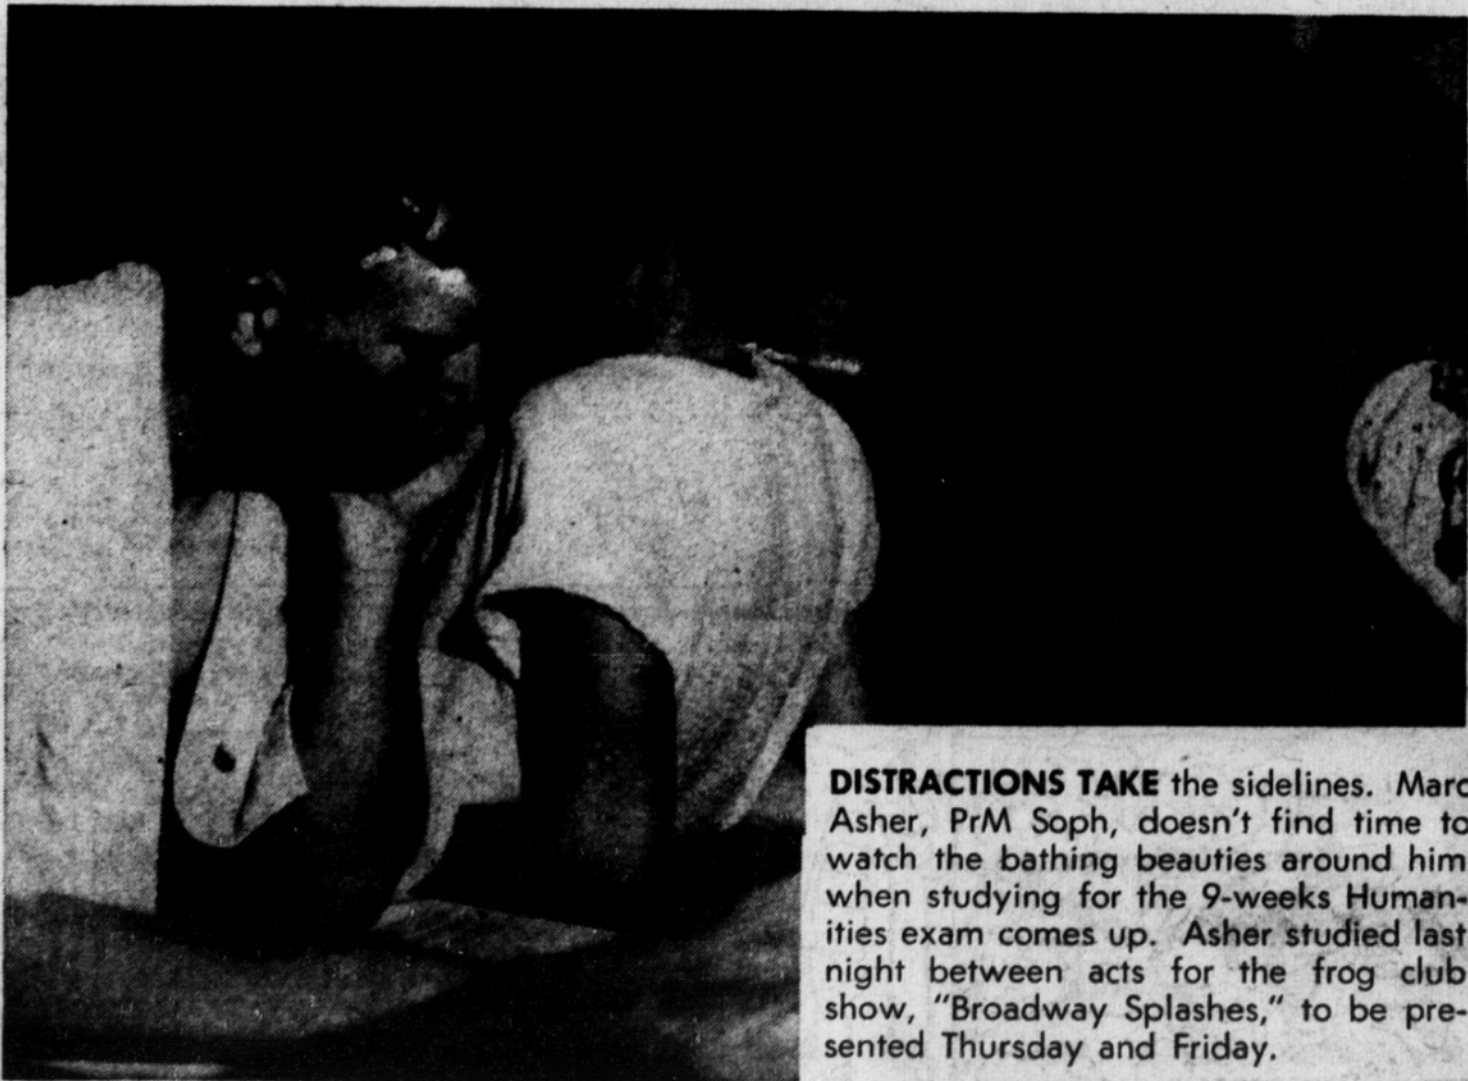

A comedy-style diving exhibition will highlight the intermission with a variety of stunts. Some will be the front and back somersaults in both tuck and pike positions; the ballet leg; marlins; the kip, and the tub.

Several types of sculling demonstrated will be canoeing—with only head and feet above the water; the eel, with just the feet out; and the seal, with only the head above water.

Numbers will vary from floating formations in pastel-colored costumes and glittering headbands to a spirited dance and precision swimming done by swimmers attired in devil costumes carrying little pitchforks.

The show will be under the direction of Alice Becker, faculty advisor. Choreography was arranged by Marilyn Tavares, modern dance instructor. Wayne Thomas, Sp Jr., will narrate.

Tickets are on sale for 60 cents and may be purchased from Frog club members or at the west door of Nichols the nights of production. There will be seating capacity of at least 200 for the hour-and-a-half show.

**DISTRACTIONS TAKE** the sidelines. Marc Asher, PrM Soph, doesn't find time to watch the bathing beauties around him when studying for the 9-weeks Humanities exam comes up. Asher studied last night between acts for the frog club show, "Broadway Splashes," to be presented Thursday and Friday.

# Work Is Resumed On Married Units

By JOHN TOMS

LABORERS RESUMED work on new married housing apartments yesterday morning following the end of a 3-week-old strike called by the Manhattan Trades and Labor Assembly February 27.

Officials of the MTLA, a local affiliate of Hoisting and Portable Engineers, Local 101, put married students housing "on the ticket" at the request of local 101's superior offices in Kansas City, Mo., Rees Warren, secretary of MTLA said. He said the purpose of the strike was to force nonunion laborers working for the Bayer Construction company of Manhattan into union membership.

UNION POLICY does not permit members to work where nonmembers are employed, Chester W. Deibler, secretary of Carpenters Local 918, said.

The problem that arises here is one of cost, in time and money, through work stoppages such as this strike. Another incidence could take place where all work would be stopped completely and indefinitely.

BURKE BAYER, president of Bayer Construction, explained the situation this way: "The 'closed shop' (only union labor) is unconstitutional as defined in Kansas state law. This union has definitely succeeded in effecting a closed shop.

But, before our request that this act be declared unconstitutional is red-taped through the courts, the union has already accomplished what they want, and the strike is over.

### We Need a Barbershop In the Student Union

To the Editor:

ANOTHER USE for our magnificent Union has occurred to me. . . We need a barbershop!

A good barbershop in the Union would provide Staters with a handy and economical (we hope) place to get their hair cut. And since Manhattan barbers refuse to accommodate K-State's colored students, it would provide a place for them to use. Also, any student who wishes to be a true American and comply with the U.S. Supreme Court's rulings could then refuse to patronize the segregated barbershops downtown.

FOR THESE reasons, I think that some of the unused space in our Union building could be utilized very effectively as a barbershop. I think that this would add greatly to the value of our Union, and would help make one of the best Unions in the country even better.

Further, I believe that a nonsegregated barbershop would go beyond improving our Union's facilities. It would help make K-State, Kansas, and the United States a better place to live. It would help us more nearly measure up to our Democratic ideals. Even more, this might set an example for other colleges and universities in the United States to follow, and could feasibly play a small part in overcoming what may well become one of the great social problems of our generation.

Sincerely,

Brent Adair, MT Jr.

# IFC Ban of 'Hell Week' Needs Strong Enforcement

INTERFRATERNITY Council last night wisely chose to ban "hell week" at K-State.

This ban, if properly enforced, will increase the general public's opinion of the College. The ban also will prevent thoughtless individuals from jeopardizing the reputation of K-State and the future of K-State fraternities.

The danger of "hell week" practices such as "walk-ins" was demonstrated recently when a Massachusetts Institute of Technology student drowned in a pond while trying to find his way back to school. He had been ditched and told to "walk in."

A WAVE OF resentment swept the country after that, and fraternities began to clean house. Thus a movement got under way to prevent such a tragedy to K-State. It culminated with last night's ban of "hell week."

The next problem is to soundly punish any "hell week" action or any action that has "an adverse effect on the worth of the individual, be it mentally, physically, or morally degrading to his character."

Maximum punishment listed in the resolution is "permanent expulsion from the KSC Interfraternity Council." If the "hell week" ban is to have any power of restriction, it must be enforced rigidly.

CERTAINLY NO right-thinking person could respect anyone who deliberately took a chance of injuring another person. Some of the more strenuous "hell week" activities would be expected of bullies or sadists.

K-State fraternities, showing that they are above such crudities, have put themselves solidly on record. In so doing, they have gained statewide prestige, and have protected the right of fraternities to exist.—Darrel Miller.

# Wheels Are Turning

THE WHEELS are turning.

The Student Council last night passed a resolution to untangle the Union parking lot.

It doesn't matter so much exactly what plan will be used. The final details haven't been completed by the physical plant. The important thing is that a PLAN will be put into effect soon, and that the plan will be ENFORCED.

THIS PLAN probably won't be a perfect solution, and may not be as efficient as the permanent setup to be put into effect next fall. But it will be a definite improvement over the present situation, and should save a large number of fenders from mutilation.—Darrel Miller.

### Students Must Push Bookstore in Union

QUOTING PAGE one of the Collegian of Thursday, March 15, 1956—"A bookstore in the Student Union is a certainty if the Board of Regents approves it and the students still want it, President McCain said yesterday. 'We are committed to a bookstore and probably could finance one right now,' he said."

First let it be said that the minutes of the Board of Regents of the State of Kansas on November 23, 1945, contained the following: "... each of the schools under the jurisdiction of this Board, may, if there be a demand therefor, establish and conduct a book store for the sale of classroom supplies and textbooks to the faculty and students of such institutions." Apparently the Board of Regents does approve.

SECONDLY IT is not a matter of the students STILL wanting a bookstore so much as it is that they DO want one. The early surveys (previous even to the 1953 report) showed that students did not want a bookstore included in the Union. The statistics of the Student Bookstore committee report of December 1955, however, show that 1,434 students favored a student bookstore compared to 74 who were opposed, and that 90 per cent of those favoring preferred a Union location. The unanimous opinion of the old Bookstore committee as expressed on July 15, 1953, was that the "bookstore should be in the K-State Union; and that profits should be used to decrease Union expenses."

IN DECEMBER of 1955, the Student Council accepted a report which recommended to President McCain that:

1) A College-operated bookstore be established as soon as space and financial requirements can be met.

2) A member of the administration set up the operational structure of the bookstore or engage a professional person to do so.

3) The operational structure should be submitted to the Board of Regents.

On February 7, 1956, President McCain stated in a letter that he was asking "Dean Wunderlich and Mr. Kottner to make a careful survey of space in our new Student Union building which might be suitable for a bookstore," and that "they will consult with the Union Governing board" (no record of such action to date). He also states that: "Assuming suitable space is found, we shall undertake to carry out recommendations two and three—thus omitting all-important item one as listed above).

SINCE THE UNION was several thousand dollars short after the juggling of the bonds and associated finances, and since requisite capital would vary from \$50,000 to \$500,000, it is difficult to comprehend just how we (the administration) could "finance one right now."

It would seem then, that the College is "committed to a bookstore" and that it eventually will be established, but the relentless efforts of the students must be kept focused on this issue and especially on the space and financial problems.

Gerry Day,

Student Body President.

**PAUL J. SVANHOLM** answers a question from the audience as **Harold U. Serner** listens intently. The two debated "The Far Eastern Policy of the United States Is Deplorable" with Tom Bowman and Edward McCoy, who took the negative side. Svanholm is from Denmark, Serner from Sweden.

## Debaters Reach No Decision on Policy

One hundred fifty people attended the non-decision debate between the touring international team of **Harold U. Serner** and **Paul J. Svanholm**, and K-State's **Tom Bowman**, **ChE Soph**, and **Ed McCoy**, **PrL Soph**.

A 30 minute open forum followed the debate in which the audience questioned the participants

on various points in the debate on "The Far Eastern Policy of the United States Is Deplorable."

A recording was made of the debate, said **Carolyn Drummond**, debate instructor.

**Serner** and **Svanholm** will leave tomorrow morning for **Pittsburg State Teachers' college** before continuing to the western states.

# 'Hard To Be Impartial When Broadcasting Sports,' Nelson

By DICK HOLDREN

The hardest part of sports broadcasting is maintaining impartiality, according to Dev Nelson, sportscaster for the K-State Sports network.

Nelson, who is leaving K-State to become sports announcer for WIBW, Topeka, in April, says he has always tried to remain impartial in the games he announces, but it was hard to do in the recent K-State-KU basketball game at Lawrence.

"I got lost in the second half and actually became a fan," Nelson said. "I must have lost myself pretty much because I've received a letter from an irate KU fan protesting my account of the game. It's the first time this ever happened to me," he said.

Dev says that football broadcasting is the hardest because the announcer is further away from the team and there are 22 players to account for instead of 10 as in basketball.

Basketball creates rapid movement while football can be slow and draggy, he said. The proximity to the fans also helps in basketball games because the announcer can pick up the crowd reaction better and regulate his announcing with the crowd atmosphere, he said.

The most pleasant football game Dev ever broadcast was the KU game this fall. "All the scoring was so lopsided the game more or less sold itself," he said.

Dev has been assistant director of radio station KSAC while at K-State and has been in charge of all farm programming, in addition to his sports chores.

He graduated from K-State in

the summer of 1949 and went to work for station KOMA, Pittsburg. Before returning to K-State, he worked in Hutchinson, Salina, and Lincoln, Neb.

"It was a rough decision to make to leave K-State for the WIBW job," he said. "It's a fine school in every respect and I've really enjoyed working here."

Nelson's first duty with WIBW will be to broadcast the Topeka Hawks baseball games. He looks upon this job as an advancement

Dev Nelson

because baseball has always been his favorite sport.

While at Pittsburg in 1951, he broadcast the games of the Pittsburg entry in the old KOM baseball league and has always had a desire to be a baseball announcer.

"Major league baseball is king but the minor leagues are not too far from the majors in caliber of play," he said. "You'll see the same errors in New York that you

do in Des Moines or Pueblo," he explained.

"When the fans of Topeka and the surrounding territory see what caliber of ball class A plays they'll support their team and make a success of it financially," he said.

Nelson firmly believes that radio has a great future in sports broadcasting. "It can do a lot for sports, as much as the newspapers and television," he said.

There's also a great future for young sportscasters, he said, but warned that the prospective sports announcer must love the sport and follow it religiously. At the same time, he must take an outside interest in speech, English, and journalism.

"The learner can do so much work on his own," Nelson said. "Go to the games and announce them in your mind, and then get a tape recorder and practice with it," he added.

When Nelson was a student he used to sit in the corner of Nichols gym with a beat-up tape recorder and announce the games. A student now has a better opportunity to get started, he said.

"KSDB-FM offers a fine opportunity to get started in sports casting," he said. Students, especially those in journalism, who are interested in sports should combine radio in their curriculum, he said. "Sports broadcasting offers a wonderful opportunity now," he said.

## Track Outlook Is Bleak, Wildcat Mentor Says

"We won't do much better than sixth or seventh in the Big Seven conference outdoor track meet this year," according to Ward Haylett, Wildcat track coach.

Haylett attributed this possible low finish to a poorly balanced team. Lack of depth and a shortage of material in certain events will also be a big drawback this year, he said.

Several of this year's freshmen will bolster the squad next year, according to coach Haylett.

Paul Bader, state AA high school champion in the 440, Deloss Dodds, class B state champ in the 440, and Tom Rodda, class AA champ in the 880 are expected to add quite a bit of depth in these events next year, said Haylett.

Paul Miller, pole vaulter, Marvin Chiles, dashman, Gene O'Connor, hurdler, and Joe Powel, high jumper, are outstanding in their events, and will be our major point-getters, Haylett predicted.

K-State will participate in 9 outdoor meets this spring.

The schedule:

March 26—Oklahoma Aggies relays at Stillwater.

April 6-7—Texas relays at Austin.

April 13-14—Southwestern Louisiana relays at Lafayette.

April 21—Kansas relays at Lawrence.

April 27-28—Colorado relays at Boulder, and the Drake relays at Des Moines, Iowa.

May 8—Nebraska (dual) at Manhattan.

May 11—Iowa State (dual) at Ames.

May 18-19—Big Seven outdoor meet at Manhattan.

## Pancho To Play In Shrine Game

Pachin Vicens was named to the West squad for the annual East-West Shrine basketball game to be played at Kansas City Monday.

Coach Tex Winter said, "I think it's a fitting honor to a very worthy and fine basketball player."

Two of Pancho's teammates are all-American Robin Freeman of Ohio State and Dallas Dobbs of KU. Floyd Stahl of Ohio State will coach the west squad.

"I'm real thrilled to have an opportunity to play with Robin Freeman, Dobbs, and other greats," Vicens said. "I hope I will be a credit to K-State."

Now Playing!

## Weather Upsets Baseball Workouts

A double-header at Wichita March 29, will be the first action of the season for Wildcat baseballers.

The team has been working out under the hardship of bad weather, but Coach Ray Wauthier said he has been well satisfied with its progress. "Yesterday's seven inning practice was the teams first real workout outdoors," he said.

"Batters have not had enough practice yet but they are hitting the ball," Wauthier said. "The pitchers have had more practice and are looking good," he said.

Returning lettermen on the pitching staff are Jim Rhoades, Bill Sinderson, and Ron Bergren. Bill Bloom, a junior college transfer, is another prospective pitcher.

Several sophomores are contending for both infield and outfield positions this spring, Wauthier said. Richard Disney and

Norm Jackson are two sophomore infield prospects and Jim Berg, another sophomore, is a contender for this year's vacant catcher's spot.

The first big cut of the season was yesterday, Wauthier said. "The team is getting down to workable size now and I will be able to tell more about it."

## Volleyball Finals To Start Tonight

The Hui-O-Makufes advanced to the finals of the independent division of the intramural volleyball tournament by pinning 15-11 and 15-13 defeats on OK House last night.

The Hui-O-Makufes win earned for them the right to play the Hillbillies for the independent title. The Hillbillies had drawn a bye in the play-offs.

The finals in the division will be held at 7 tonight.

Group 4 of the intramural fraternity division ended play with a three-way tie for first place. Teams tying for the lead were Beta Theta Pi, Sigma Nu, and Sigma Phi Epsilon.

Beta Theta Pi downed Sigma Nu 15-7, 12-15, and 15-10 last night. They will face Sigma Phi Epsilon tonight at 7. The Sigma Phi Epsilon team had drawn a bye for the play-offs.

The Beta Theta Pi-Sigma Nu game drew the biggest crowd of the year and it was one of the best games played this year. Frank Myers, intramurals director, said.

The semi-finals of the fraternity division will be played Thursday night and the finals will follow on Friday night, according to Myers.

A meeting of all intramural managers will be held at 7 Wednesday night on the third floor of Ahearn gymnasium, Myers said.

The meeting will be for intramural softball. "I want to get the softball schedules set up so that we can get them going as soon as Easter vacation is over," Myers said.

## NCAA Semi-Finals To Start Thursday

Winning streaks and dazzling records go on the block Thursday night when semi-final play in the NCAA tournament starts at Evanston, Ill.

Defending champion San Francisco heads the field with 27 straight wins this season and a streak of 53 over the last 2 years.

Southern Methodist runs the Dons a close second—in this year's won and loss record, at least. The Ponies have a glossy 25-2 mark and a 19 game winning streak going into the tournament.

Iowa comes next with a 19-5 record and 16 straight victories. The 4th team in the tourney is Temple, who has a 26-3 record.

Thursday's pairings in Northwestern university's Field House have SMU going against San Francisco and Temple against Iowa.

The winners of Thursday's games play for the championship Friday night.

SMU gained the finals by beating Oklahoma City university in the Western regionals at Lawrence by a 84-63 score.

San Francisco put the pressure on Utah in the Far West Regional and walked off with a 92-77 win in the finals at Corvallis, Ore.

Iowa nudged Kentucky in the

regional at Iowa City 89-77 and Temple dropped Canisius 60-58 in the last 2 minutes in the finals at Philadelphia.

These 4 teams are the survivors of a 25-team national field that started play March 12.

San Francisco, the pre-tourney favorite, advanced to the semi-finals without the services of K. C. Jones, star guard, who was ineligible for the playoffs. His replacement, Gene Brown scored 41 points in the Dons 2 tourney games, so Frisco apparently isn't missing Jones too much.

### Bums Pitching Ace Inducted into Navy

New York, (U.P.)—Johnny Podres, the 23-year-old Brooklyn Dodger pitcher who tamed the New York Yankees in the 1955 World Series, passed his final draft physical examination yesterday and was inducted into the navy.

The left hander from Witherbee, N.Y., probably will take his recruit training at Bainbridge, Md.

### Pi Phi Beat KDs In Gals Basketball

Pi Beta Phi beat Kappa Delta 17 to 16 and Northwest hall defeated Kappa Kappa Gamma 41 to 23 in yesterday's intramural basketball for women.

Waltheim hall will meet Alpha Delta Pi Tuesday.

You'll be pleased with a Collegian want ad.

## BELL SYSTEM

## JOB OPPORTUNITIES

... for Engineering and Physical Science Graduates

The Bell Telephone System is seeking outstanding young men with the capacity and training to become the engineering and scientific leaders of tomorrow's communication's industry.

Here are challenging careers in providing an essential public service—plus interesting work in special military projects vital to national defense.

You will find good salaries and excellent opportunities for advancement in this rapidly growing industry that has doubled in size in the past ten years. There is a wide range of jobs suited for men trained in many different fields in the various components of the Bell System.

Seniors and graduate students in engineering and the physical sciences who are completing work on their degrees in June, 1956, are invited to register for interviews by representatives of:

- Southwestern Bell Telephone Company . . . builds, maintains, and operates telephone systems in Texas, Missouri, Oklahoma, Kansas, and Arkansas.

- Western Electric . . . manufacturing and supply unit of the Bell System.

- Bell Laboratories . . . devoted to research, development, engineering, and design in the electronics and communications fields. Most complete industrial laboratories in the world.

- Sandia Corporation . . . applied research, design, and development of atomic weapons. Albuquerque, New Mexico.

Bell System representatives will be on the campus Wednesday, March 21, and Thursday, March 22. Arrangements for an interview can be made at the electrical engineering office or the mechanical engineering office.

# Phi Kappa Tau Honor 50th Year of Founding

Members and alumni of K-State and KU chapters of Phi Kappa Tau, fraternity celebrated their 50th anniversary at the annual "Founders' Day Banquet" Sunday at 2 p.m. The banquet was in SU banquet room "B".

Leroy Atwell, '53, talked of the chapter's reorganization in 1949-50. Other speakers were George Montgomery, '25, and W. A. Talbott, '38, who spoke of the chapter's prewar progress and fraternity ideals. Bob Badgley, KU '56, advocated establishing an alumni association in Kansas City, Mo.

1834 Club had an hour dance with Northwest hall Tuesday night.

## Pinnings

### Miracle-Ubel

Sally Miracle and Don Ubel, Geo Sr, recently announced their pinning. Sally is attending Emporia State Teachers college. Don is a member of Pi Kappa Alpha fraternity. Both are from Wamego.

### Taylor-Metz

Connie Taylor, EEd Soph, and Jerry Metz, Geo Sr, recently announced their pinning. Connie, a member of Pi Beta Phi, is from Salina. Jerry, a member of Pi Kappa Alpha, is from St. John.

## Connie Taylor Is Dream Girl Of PiKA Ball

Connie Taylor, EEd Soph, Salina, was crowned Pi Kappa Alpha Dream Girl at the fraternity's Dixie Ball Saturday night. The dance was held in the Student Union with the Pastels furnishing the music.

## Youth Groups Unite In Sunrise Service

Tickets for the union Easter sunrise service and breakfast, scheduled for 5:30 a.m., Sunday, March 25, can be bought from pastors and officers of the participating groups for 35 cents.

Tickets must be bought in advance if breakfast is to be prepared for the number attending, said Kathy Seaton, EEd Jr, committee spokesman for the Wesley foundation group which will prepare breakfast.

Groups uniting for the service are DSF, LSA, YMCA, Wesley foundation, YMCA, USF, Roger Williams, and EUB.

## Fireside Discussion

"Here and Now," a fireside discussion scheduled for 7:30 tonight in the YMCA office, will concern the student's religious life and its effect upon life after graduation.

Discussion leaders will be Arthur L. Goodrich, professor of zoology, and the Rev. B. A. Rogers, director of Wesley Student foundation. The discussion is a part of the Religious Life Program area of the YMCA and YWCA. All interested are invited.

BARBARA KETHCART, EEd Fr, is crowned Sweetheart of Phi Kappa Tau by Mark Hooper, NE Jr, president, at the annual formal Red Carnation ball.

## Kappa Sig, Theta Xi, Sigma Chi Initiate

Formal initiation was held at the Kappa Sigma house. Those initiated were Don Dailey, ChE Fr, Junction City; Phillip Marshall, BA Fr, Spring Hill; Vaughn Miller, Ar 01, Oberlin. A dinner honoring the initiates was held Sunday afternoon.

New initiates of Theta Xi are Gail Taplin, AgEd Fr from Waverly; Gene Porch, Hst Jr from Abilene; Paul Ridenour, DM Fr from Kansas City.

Thomas Gibson, ChE Fr from Overland Park; Donald Lundgren, BA Fr from Osborne; Roger Kraus, PrV Fr from Wichita.

Dick Rolph, PrV Fr from Delphos; and Dick Nickum, EE Fr from Kansas City.

Formal initiation was held Sunday at the Sigma Chi chapter house. Among those initiated were Bob Baldwin, CE Fr; Stan Drevets, BPM Fr; Craig Fischer, BPM Soph; Dick Miller, Ar Fr.

Darrell Rawlings, NE Fr; Sid Jones, PrV Fr; Keith Small, ME Jr; Larry McDonald, ME Soph.

Larry Pigg, BA Fr; Dean Fritzler, Chm Fr; Dick Kail, GA Fr; and Richard Weidler, ME Soph.

## Pledging

Formal pledging was held at the Delta Sigma Phi house. Those pledged were Stan Troyer, Ag Soph, Harper; Larry Lowell, Geo Jr, Topeka.

Gary Kay, AEd Fr, Wells; Larry Karlen, PrV Soph, Columbia, S.D.; and Galen Murphy, AH Soph, Maple Hill.

## Officers

Alpha Gamma Rho has elected new officers. They are Bill Bowser, noble ruler; Brent Adair, first vice-noble ruler.

Jim Perkins, second vice-noble ruler; Estel Schultis, house-manager; Therean Towns, assistant house-manager; Dean Peter, porter; and Jack Van Horn, chaplain.

## Student Painting Chosen for Show

A painting by a K-State art student has been chosen for one of three exhibitions of student work from colleges and universities to be circulated by the United States Information agency.

The work is "Crystalline Structure," by Ben Ireland, a graduate student. Ireland was awarded his bachelor's degree by K-State in 1955. Ireland expects to receive his master's degree in August.

Each of the three art exhibitions to be circulated by the United States Information agency will consist of 50 paintings enrolled in art departments of American colleges and universities. One exhibition will be used in Europe, one in Asia, and the third in South America.

K-State is the only school in Kansas being represented in the exhibitions.

John F. Helm Jr., of the K-State department of architecture and allied art, served as chairman of the subcommittee for the midwest region in assembling this exhibition. Helm obtained works from the various art departments of the colleges and universities in the midwest, and final selections were made in New York City by a national committee of members of the College Art association and the American Federation of Art.

You'll be pleased with a Collegian want ad.

## Band Leader Gordon Bute Combines Music, Studies

By JUDIE ROSS

Band leader, Gordon Bute, Sp Soph, has combined music and dances with school work. Gordon's first band rehearsal was in December, 1954. Since then he has organized a 14-piece band that plays for many school and non-college functions.

Members of his band are Larry Northway, MAI Soph, Robert George, MEI Soph, and Joe Hostetter, high school, trumpet, Owen Sherman, high school, drums, Jim Taylor, Ag Fr, string bass; Duane Brown, BAA Sr, Piano; Gordon Bute, Steve Cox, Don Haun, Ag r trombone; Linda Metz, high school, Larry Pigg, BA Fr, Tom Holder, Richard Evers, PEM

Soph, and Dean Vincent, high school, saxophone.

"I've always wanted a band," said Gordon, "so I just started out hunting musicians and trying them out." I made my first attempt at organizing a band when I was a senior in Wellington high school. I wasn't successful there."

Gordon said he enjoys band music and that is why he organized his group. "I'm doing it just for kicks."

He commented that the extra time he spends on the band makes studies more work. To make up for the loss of study time, he takes fewer hours of classes.

Gordon is in speech now, but he plans to switch to music. "Although, I think I need psychology more," he commented. "You learn a lot about manag-

ing people and you need a lot of tact."

The group has played for all-college varsities, public dances, private parties, several dances were broadcast over KSDB-FM, and his band was sponsored by Arnold Air and Scabbard and Blade to advertise their Military ball over WIBW-TV. Gordon does his own booking but he hopes to get with a booking agency for his summer work.

The band uses stock arrangements of Glenn Miller, Billy May, Stan Kenton, and others.

After school and the army, Gordon hopes to enter the professional field with a band of his own.

## Two Future Teachers Presented Cash Awards

Future Teachers of America presented two awards at their annual spring banquet Thursday in the Student Union.

Stanley Larson, AgEd Sr, received the \$100 Holton award, presented by Mrs. E. L. Holton.

Elaine Ralle received the \$100 FTA award. This is the first year that the FTA award has been given.

M. J. Whitson, assistant to the superintendent of the Topeka public schools, spoke about "Personality Characteristics of Good Teachers."

Don Scoby, Hst Jr and president of FTA, presided as master of ceremonies. Don, his officers, and various committees planned the banquet.

Special guests were Dean and Mrs. Paul Young, Dean and Mrs. Herbert Wunderlich, Dean Peairs Wilson, and Mrs. E. L. Holton.

### Dames Club

Dames club will meet Thursday, March 22 at 8 p.m. in Recreation center. Earle Davis, professor of English will be a featured guest.

Interests group chairmen for Dames club are Carolyn Gilmore, beginning bridge; Pat Couch, intermediate bridge 1; Shirley

Schoof, intermediate bridge 2; Lilly Baty, advanced bridge 1; Mickey Updike, advanced bridge 2; Pat Stuenkel, bowling; Kay Berhaus, beginners swimming; La Dona Lucas, advanced swimming, Margie Pallett, knitting 1; Mildred Wiley, knitting 2; Doris McReynolds, pinocle; o Gillum, handicrafts; Marge Holmes, calisthenics.

Sponsors are Mrs. James Carey, Mrs. Herbert Wunderlich, and Mrs. Walter Robohn.

### Chancery Club

Chancery club meets at 7:00 tonight in SU 205.

Mr. Charles D. Green, attorney in Manhattan, will speak on "Some Legal Aspects of Labor-Management Relations under the Taft-Hartley Law."

### Block and Bridle

The first Block and Bridle club meeting to be held in the new Student Union will be at 7:30 tonight in room 108, announced Don Hunt, president. He said there would be a good program and urged members to be present.

## World News Briefs

# Two Negroes Jailed for Beating Alabama Student in 'Lucy' Riot

Compiled from United Press

By FAITH MCCONNELL

Tuscaloosa, Ala.—Two Negro brothers today began serving 10-month jail terms for beating a University of Alabama student in retaliation for campus race riots against Negro coed Autherine Lucy.

Arthur Washington, 23, and his 19-year-old brother John, were sentenced yesterday for an attack on 19-year-old Samuel P. Taylor. They were convicted on assault and battery charges in a one-day trial.

The state tried the two Negroes for assault with intent to murder, but the jury returned a verdict of guilty of assault and battery and recommended maximum punishment.

♦ ♦ ♦ ♦ ♦

### Hall 7-7 in Convention

Ottawa—Gov. Fred Hall came from behind for a 7-7 tie today in the selection of delegates to the Republican national convention, with an all-important last district meeting scheduled at Beloit Friday.

Hall made a 3-0 sweep of the

second district yesterday after early votes showed he had power-plus in the home district of his strongest foe, national committeeman Harry Darby of Kansas City.

♦ ♦ ♦ ♦ ♦

### Disarmament Plan 'OK'

London—Both the United States and Soviet Union were reported today to have given favorable reception to an Anglo-French disarmament plan.

Informed sources said the United States still objected to some features of the plan and differs on "many questions of a far-reaching nature." The plan was cabled to Washington for study.

Gromyko, in one of his most cordial moods in years, went over the plan's blueprint intently while European diplomats hoped for the first break in the disarmament deadlock since the end of the war in 1945.

♦ ♦ ♦ ♦ ♦

### Georgi Is 'Anti-Stalin'

London—Georgi Malenkov, chosen successor of the late Josef

Stalin, jumped on the anti-Stalin bandwagon last night.

The pudgy ex-premier made his first public comment on party secretary Nikita Khrushchev's bitter tirade against the former Soviet dictator.

Malenkov did not go as far as Khrushchev, but he pulled no punches and members of the British Labor party who heard him speak said he gave the impression of disliking Stalin and that he was "obviously sincere."

Malenkov said in a dinner statement, "We have cleaned up Russia. We have stopped the dictatorship and the wicked things."

♦ ♦ ♦ ♦ ♦

### More Riots in Cyprus

Nicosia, Cyprus—Hundreds of flag-waving Turkish Cypriots swarmed through the streets of Nicosia today smashing Greek shop windows and shouting for revenge against Greek Cypriots.

They ran head-on into a tear gas barrage by British security forces trying to avert bloody island-wide clashes between Turkish and Greek residents.

## 'Major Ogden' Cast Selected Says Director

The cast of "Major Ogden" to be presented April 12-13 by the K-State Players has been selected, according to Earl G. Hoover, director of the play.

In the title role as commander of Fort Riley is Ken Nakari, Phy Fr. His wife, Leah, will be played by Mary Lu Compton, Sp Soph.

The supporting cast includes Baird Miller, Sp Sr, as Dr. Lord; Charley Peak, ME 01, as Sergeant Tucker; John Barry, Hum Soph, as Poker; and Lou Ann Oberhelman, Sp Soph, as Polly Tucker.

Richard Mansfield, BPM Soph, plays Rev. Kyle; Phil Fabricius, CE Fr, Georgia, and Ed Bowden, EE Jr, Maine.

Others in the cast are Dale Livengood, Sp Jr, Jim Tullis, EE Jr, Al Morris, BPM Fr, Barbara Siemers, EEd Jr, Sally Gelstfeld, HT Soph, Carolyn McGowan, HE Soph, Carolyn Cochran, DIM Soph, and Dottie Ennie, HEA Fr.

Assistant directors are Louann Oberhelman, Sp Soph, and Jim Hollis, Sp Jr. The designer is Don Hermes. The play was written by Prof. John Robson.

## New All-College Party Plans Meeting Tonight

A meeting of the New All-College party will be held tonight at 7 on the top floor, east wing, of the new Student Union.

An open election of a central control committee will be held, a committee which will establish general party policy and plan organization for the forthcoming spring SGA elections.

An open-forum discussion of possible platform issues will be held. Voting will be on an individual basis.

All K-State students are invited to attend.

Graduates in

Engineering

in  
Missile  
Systems  
research  
and development

*The technology of guided missiles is literally a new domain. No field*

*of engineering or science offers greater scope for creative achievement.*

**Research and development at Lockheed Missile Systems Division** cover virtually every field of engineering and science and have created new positions for graduates possessing outstanding ability in the following fields:

### Electronics

Research and development as applied to missile systems and associated equipment.

### Computers

For solution of complex problems and missile guidance.

### Systems Engineering

Research and development in missile systems.

### Antenna Design

Related to missile guidance.

### Communications

In the broad area of information transmission.

### Electromechanical Design

As applied to missile systems and related equipment.

### Instrumentation

Associated with aerodynamics, physics and electronics.

### Physics

Theoretical and experimental aero-physics, upper atmosphere research, optics, nuclear physics and spectroscopy.

### Structures

Structural design and analysis of missile systems.

### Thermodynamics

Aerodynamic heating and heat-transfer problems.

### Aerodynamics

Concerning performance of missile systems.

### Dynamics

As related to missile body flight problems.

### Operations Research

Applied to tactical weapons operations.

### Advanced Study Program

Graduates in Physics, Electrical, Aeronautical and Mechanical Engineering are invited to contact their Placement Officer regarding the Advanced Study Program which enables students to obtain their M.S. Degree while employed in their chosen field.

The complexity of missile systems research and development has created a number of positions for those completing their M.S. and Ph.D. degrees. The positions carry immediate responsibility commensurate with the advanced academic training and experience required.

Representatives of the Research and Engineering staff will be on campus

**Friday, March 23**

# Kansas State Collegian

VOLUME LXII

Kansas State College, Manhattan, Kansas, Wednesday, March 21, 1956

NUMBER 108

## SC Proposal

# Revised Parking Plan To Begin Next Week

Monday night the Student Council approved a plan for revision of the Student Union parking lot.

The plan, aimed at relieving the parking hazards and congestion in the Union parking lot, was proposed by Keith Swenson and Pat Wilkerson. It will be put into effect next week after some minor changes are made in the lot by the Physical plant.

The new plan features alternate rows of

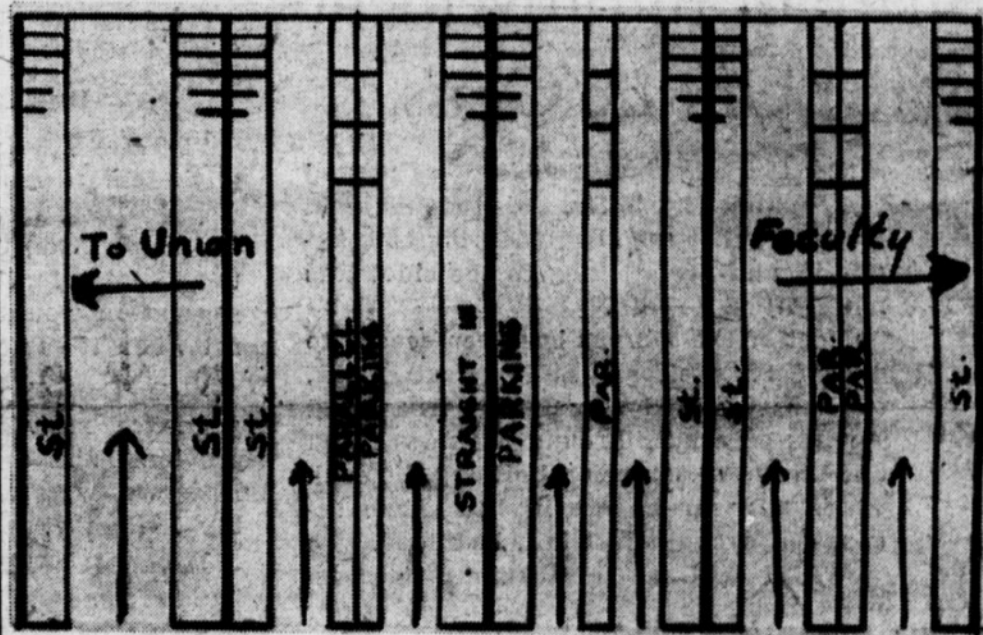

straight-in and parallel parking.

Starting at the south side of the parking lot there will be one row of straight-in parking, then the driveway and two lines of parallel parking. Then there will be a driveway and two lines of straight-in parking.

There will be one line of single lane parallel parking in the center drive; then a driveway and two lines of straight-in parking. Then there will be another driveway and two more lines of parallel parking; a driveway, two lines of straight-in parking; a driveway and one line of straight-in parking on the north border of the lot (adjacent to the Student Union).

Other Council actions included:

1. Approval of SGA primary elections for April 13 and general elections April 26 and 27.
2. Appointment of Don Hunt, Don Taylor, and Bev Sargent to a committee to plan a retreat for the new Council members and the K-State-KU peace pact convention.

Collegian photo by Gary Haynes

**THE SHOW** about to go on. Charlene Dooley applies make-up to Evan Davies, unicyclist who appeared on the Minstrel show Tuesday night.

## JC Conference

# Credit Transfer System Revised

The present junior college credit transfer system has been revised to eliminate difficulties encountered by transfer students at enrollment.

Juno deans attending a conference on Transition here aided the revision, Director of Admissions E. M. Gerritz said.

Most students do not understand the terms "no credit" used on present evaluation forms or the system of honor and credit, he said.

The "no credit" term means that credits do not carry over to certain fields and not that the course isn't worthwhile, Gerritz explained. "Students do not understand our system of balancing credit hours with grade points and commonly think all junior

college grades transfer as "C's," he said.

Future credit evaluation forms will read "excess credit" in place of "no credit," Gerritz said.

The junior college deans were appreciative of student participation because they felt student opinions formed the basis for discussions to improve relations between transfer students and K-State, he said.

About 200 students out of the 380 transfer students attended the conference and most of them said they are "satisfied and happy" at K-State.

The conference was climaxed at a dinner given by President James A. McCain Tuesday night in the Student Union.

# Integrity, All-College Set Policies

The New All-College party met last night and outlined a tentative party platform. The platform is made up of suggestions that were voted on by the members present.

The tentative party platform as adopted by the New All-College party is:

(1) The inclusion of a parking regulation fee for all students with cars.

(2) The party adopted a plan to endorse the Association of Women Students.

(3) The party will back the students in their efforts to gain a bookstore in the Student Union.

(4) The party wants a coordinating committee in the Student Governing association to keep track of what all of the committees are doing and to report to the association any action that is going on in a committee that deserves the action of the Student Council.

(5) The party endorses the idea of having an open primary instead of the closed primary.

(6) The party believes that if the married students have Blue Cross they should be exempted from paying the student health fee. This plan is to apply only to married students.

(7) The party is against segregation of any sort and will fight any type of segregation that is evident in Manhattan.

(8) The party will propose that the Student Council include the idea of freshman representation on the general election ballot in the spring in an effort to decide how the students of K-State feel on the subject.

A central committee was elected at the meeting. This committee is comprised of twelve elected students plus the three officers of the party and will act as a steering committee.

Members elected to the committee were Nancy Hayes, Gov Soph; Zach Ekwebelem, Soc Sr; Rhea Serpan, EE Fr; Evert Asjes, LDs Fr; Cy Moyer, Ag Jr; Ron Pettit, Pys Sr; George Atkeson, DH Sr;

Dwight Bennett, Ar 01; Bob Raffety, ME Jr; Jim Graves, BA Jr; Margo Widner, TJ Fr; and Barbara Root, EED Jr.

The three officers that are on the committee are Chuck Broman, president, Denni Joy, secretary, and Karen Smith, treasurer.

Collegian photo by Gary Haynes

**HEADS TOGETHER.** Gerry Day, VM Sr, and Lee Ruggels, TJ Sr, appear to be collaborating at the New All-College Party meeting last night. Day, elected student body president on the Integrity ticket last fall, and Ruggels, who supported Day in the election, said they were "just window shopping," when asked what party they would support in spring SGA elections.

The promotion of bachelors of arts degrees at K-State and the reorganization of K-State to Kansas State university head the 14-point platform passed by the Integrity party last night.

The platform includes several proposed campus reforms proposed by the party, according to president Nathan Greene, TA Soph.

Planks in the party's platform include an appeal to the administration to save the married students housing that now exists, after the new married student apartments are constructed; organize an educational retreat for campus leaders to give them an opportunity to get to know each other and their respective jobs, and to insure more efficient student leadership.

They proposed an increase in general scholarships, to help the Associated Woman Students to become an effective organization, and to urge the administration to hurry the establishment of a Student Union bookstore.

The platform urges revision of the traffic control system with emphasis on the safety of children near the married students housing areas and major parking improvements, the establishment of a baby sitting service to function on days of big events, and the construction of an auditorium to replace the present one.

Student representatives to the State Legislature on matters directly connected with students and a system of student discount services at Manhattan stores are included, along with a proposal to revise the ROTC and physical education requirements toward the goal of making them optional, and improvements on the road to Blumont hill.

Greene was recently elected president of the executive council of the Integrity party. Other officers elected include Kay Eplee, Clo Fr, vice president; Barbara Brown, HEN Fr, secretary; Dick Hotz, MT Fr, treasurer; and Barbara Ericson, Sp Soph, publicity. Members at large are Gene Randall, AA Sr, Dick Peterson, ME Jr, and Dan Farrell, PrL Jr.

# Have Frats Done Enough To Stop Initiation Danger?

KANSAS STATE COLLEGIAN  
Wednesday, March 21, 1956-2

K-STATE fraternities who this week set out to ban "hell week" activities may have overlooked one potential source of trouble. They may have to set up some limitations on initiation ceremonies.

This was brought home forcibly to local Sigma Chi's recently when a pledge was participating in initiation ceremonies. This pledge was to walk into the country and find a certain spot as part of his initiation.

There was no hazing involved; in fact, the initiation ceremony is prescribed and okayed by the national fraternity. The danger element entered when the pledge wandered onto the premises of a nearby farm.

**THE FARMER'S DOG** began barking and awakened the farmer, who only recently returned home from an operation and had just managed to fall asleep. The dog chased the pledge, and nipped at his legs before the pledge was taken into the farmer's house. The farmer, who had had trouble with fraternities before, called the sheriff and reported the pledge for trespassing. Because of other trespassing by frats, plus thefts by unknown persons, Riley county sheriff B. E. Deckert says he wouldn't be surprised if the farmer blasted away with a shotgun next time he heard someone on his farm.

The pledge was supposed to have been supervised closely. That the supervision was lax is testified to by the fact that the pledge was in the vicinity of the farmer's house, causing the dog to bark periodically, from about 2 a.m. until about 4:30 a.m. In addition, the pledge had to walk back to town.

The hazard was heightened by the fact that, in the close vicinity of the goal of pledge's mission, was an open basement of a burned-down house, plus a well that is covered only in a haphazard manner. Another hazard was on a nearby farm in the form of about a dozen dogs, including hounds, running loose.

**THE SIGMA CHI's**, realizing the potential danger of this setup, have changed the site of their initiation, and plan to supervise the initiates more closely in the future. This incident, though not serious, had potential dangers that needed to be eliminated for the good of the fraternity and for the good of all K-State fraternities.

If any other Greek ceremony includes activities that might take persons into potential danger, those Greeks would be wise to take precautions. It would be extremely injurious to the group if a ceremony, such as an initiation, were to be marred by injury to the person involved. Even though there were no hazing, it would be hard to sell the general public that fact in the face of an accident.

A ceremony that forms the heart of an organization deserves protection from such an incident.—Darrel Miller.

## Students Should Share in Improvement Of Campus by Staying Off the Grass

**THE RAIN** last night is just what Thomas B. Shackelford has been hoping for.

Shackelford, who came here January 1 as landscape architect, said only yesterday that the most important thing in his plans for beautifying the K-State campus is a good rain.

If the campus has green lawns, the problem of students walking on the grass will be at least partially solved, Shackelford believes. The students will take pride in their green campus, and will want to keep off the green, he said.

"IT'S REALLY remarkable the change that has taken place since the campus has been aerated," Shackelford said.

Since the aerating machine has dotted the campus with holes, the students seem to realize that somebody's trying to beautify it, and are sticking to the sidewalks more often, he said.

Most of the campus has been seeded to grass, Shackelford said. Next week, workmen will be planting trees and shrubs, especially around the new Union and the new Extension building, he said. Trees and shrubs are in bad shape because of drought last fall, he added.

**WITH ALL** of this campus improvement under way, K-Staters should do their share to make our campus green. Right now, they can do two things: 1) Walk on the sidewalks, 2) pray for rain.

—Darrel Miller.

"COWPATHS," like this one south of Kedzie hall are a definite eyesore to the campus. Students can help get rid of these by using the sidewalks.

## Pogo

LEN LEGAULT, Cat lineman receives an assist from assistant grid mentor Sol Kamph.

## Canada Likely To Separate From Britain, Student Says

(This is the fourth in a series about foreign students attending K-State.)

By PAT ROBERTS

"I THINK THAT Canada will eventually separate from the British Commonwealth," said Len Legault, PEM Jr. from Kirkland Lake, Ontario. Len, who is on the K-State football team, said that the separation would be friendly and peaceful when it came.

"We Canadians actually have independence now. We decide all of our problems and are under no one's rule. However, we are still considered part of the British Commonwealth," he said.

**LEN, OR "FRENCHIE"** as he is called by his friends, said that Canada was completely independent from England in all of her decisions. However, he said that most Canadians are grateful to England for what they have done for Canada.

"That is why everyone in Canada thinks highly of the Queen. We feel that we can show respect to Great Britain by respecting the Queen," Len said.

Len came to K-State on a football scholarship and because he had a persuasive friend that was enrolled in Veterinary Medicine.

"MY FRIEND kept talking to me about K-State and I finally wrote and asked them about a scholarship to play football. That was in 1953 when Bill Meek was here," Len said.

Len is now a tackle on the football team. He is majoring in physical science and also wants to get a degree in French. "I guess that is because I am French Canadian," he said.

"There are many small differences between the United States and Canada but on the whole the only major difference is the border. All of our impressions and actions stem from the United States and there is really no big difference between the two countries," he said.

"THE FIRST thing that I noticed that was different was the language," he said. Len said that the people here draw out

their words more than they do in Canada. He said that he didn't have any trouble speaking the language, he just wasn't used to it.

Len said that American industry was much larger and impressive than anything the Canadians had in that field.

"The industry in Chicago really impressed me. We do have some industry in Ontario but they are merely American companies in Canada. Agriculture and mining are the two major enterprises in Canada," Len said.

**HE SAID THAT** the weather here was much hotter than he was used to. "I am used to weather that gets down to 56 degrees below zero; this weather is much too hot for me. However, the southernmost part of Ontario is only 17 miles north of Chicago so we get approximately the same weather the States have," he said.

"Most American slang is old stuff to me because all of our fads come from the States. When the movies 'The Wild One' and 'Blackboard Jungle' were shown, kids wearing leather jackets caused riots in Montreal. All of the popular songs come to us only about a week late. There really isn't much difference in the people at all," Len said.

**LEN SAID** that the Canadians feel the same way Americans do as far as Communism is concerned. "They work the same way the world over and are a threat to peace; Canadians feel the same way Americans do about them," he said.

"There is one thing that America has that Canada doesn't," Len said. He emphasized that Canada does not have any race prejudice. "There is no sense in it, but I guess you can't cure people's emotions. It will merely take time and patience to solve the problem," he said.

**LEN POINTED** out that in Canada there is no military draft. "We feel that we have enough volunteers to quell any national threat," he said. He said that the Canadian army is also one of the highest paid in the world. "You can even go to school four years out of five in a five-year term in our army," he said.

When asked how he liked K-State, Len said that everyone here treated him very nice. "Everyone has been wonderful to me, I like K-State very much," he concluded.

By Walt Kelly

### YM-YW Trip Roster Still Has Vacancies

More students are needed to fill vacancies for the UN-Washington trip sponsored by the YMCA and the YWCA. All students who are interested in going on the trip may contact Warren Rempel at the YM office as soon as possible.

On March 30, the group will leave for Washington where they will visit various points of interest. The remaining three days will be spent touring New York City and the UN Seminar.

### SESAC Music File Added At KSDB-FM

SESAC, a transcription music library, containing over 4,100 musical compositions, has been added to the programming facilities of KSDB-FM, George Carroll, faculty advisor, said.

Barbershop quartets, hymns, American folk dance songs, square dances, band music, concert masterpieces, jazz, spirituals, South American and Spanish music, and popular recordings are the kinds of music offered.

Through the courtesy of SESAC, KSDB may use the library until July 1 free of charge, Carroll said.

## Wrench Is Missing; Other Items Safe

A fireman's helmet and a nozzle, taken from a Manhattan fire truck during the Aggieville rally after K-State's victory over KU, have been returned. A hydrant wrench is the only thing missing as a result of the rally.

Gerry Day, student body president, said that the cooperative

attitude shown in returning these articles should help in lessening the pain of the city over the results of the rally.

Day said that a vacancy still exists on the alumni relations committee. Applications for this post can be made in the dean of students' office or to Day or the Student Council.

The Homecoming and Parents' Day committees will be appointed soon, Day said. A few applications have been received for the committees but persons wishing to apply may still do so in the dean of students' office.

### Workshop To Be March 28 and 29

Better treatment of foreign students is one problem to be discussed at the Home Economics workshop to be held here March 28 and 29.

# Brooklyn Is Picked In National League

Vero Beach, Fla., (U.P.)—The world champion Brooklyn Dodgers are "hurting" this spring, but they still look like the class of the National League.

They're hurting because Johnny Podres, their World Series pitching hero, is navy-bound; pitcher Karl Spooner is having more arm trouble, and their captain and sparkplug, Pee Wee Reese, has a back injury.

But they are loaded with talent and even Walt Alston, their tactician manager, agrees "We are the club to beat."

Podres will be the only key player missing from their first world championship team. The rest of them are back, and both Spooner and Reese are confident they will be all right.

They'll have Gil Hodges at first, Duke Snider in center, Carl Furillo in right, Roy Campanella behind the plate and such pitchers as Don Newcombe, Carl Erskine, Billy Loes, Don Bessent, Roger Craig and Clem Labine out there on the mound.

They, together with Reese—and in the series, Podres—formed the backbone of the club in 1955.

For the positions open, there are plenty of candidates. For instance, Randy Jackson, obtained from the Cubs, and Jackie Robinson are battling for the third base spot. No matter which one makes it, the Dodgers do not figure to be weak there.

The same is true of second base, shortstop and left field. If Reese should come to the end of the road, Brooklyn has spunky Don Zimmer and rookie Chico Fernandez, who hit .301 at Montreal last year, ready to take over.

At second, Junior Gilliam, who also can play left field; Zimmer, and rookie Charley Neal, another Montreal graduate, are available. And for the left field spot there are Sandy Amoros, whose catch

saved the Dodgers in the series; rookie Gino Cimoli, a .306 hitter at Montreal in 1955; and Gilliam and Robinson—if they should be beaten out of their infield posts.

The Dodgers have depth in every position except first and that isn't much of a worry when you have a durable guy like Hodges out there. But if something should happen to the slugging first baseman, Robinson can play the bag.

Pitching long has been rated as Dodger weakness, but actually is one of their strong spots. Newcombe was 20-5; Erskine 11-8; Loes 10-4; Bessent 8-1; Craig 5-3; Labine 13-5.

As for catching, Campanella stands out in the National League like Yogi Berra of the Yankees does in the American. The Dodgers finished second in 1954 when Campanella came up with a hand injury which handicapped him all season. But they hit the top again with a healthy Campanella.

"And I'll guarantee you there will be nothing wrong with me this year," Campanella assures.

Should something happen to the National League's most valuable player, there always is Rube Walker, a pretty fair country catcher even if he's not in Campanella's class. There are a lot of National League ball clubs who would like to have him.

# All-Tourney Team Selection A Great Thrill for Wallace

By MARY JANE SHERER

"It's a pretty wonderful feeling to be chosen for the all-tournament team after sitting on the bench all year waiting to play some ball," Eddie Wallace, Mth

Eddie Wallace

Jr. said. "It's really a great feeling."

When asked how he felt to be approached by so many autograph seekers after the OCU game at Lawrence, he replied, "It was a new experience for me but I didn't turn them away."

The 5'9" guard from Minneapolis scored 39 points in the NCAA Western Regional tournament at Lawrence, Friday and Saturday nights. This was more than twice his total scoring for the regular season.

Wallace said there were plenty of boys at the tournament just as good as he was and he couldn't quite understand why he was chosen to be on the tournament team.

"My height doesn't seem to be a disadvantage to me, it just makes me have to move faster,"

Eddie said. He was the only boy chosen for the team who was under 6' tall.

His opinion of Tex—"He's definitely the best coach in the U.S." Basketball isn't the only sport Eddie is experienced in. He lettered in basketball three years in high school, in tennis four years, in football and track two years.

Eddie says the next year Wildcat basketball team will go as far or farther as this year's team did. Eddie is being mentioned as a starting guard on the 1956-57 K-State basketball team.

## ADVENTURES IN SOCIAL SCIENCE: NO. 3

Today, ranging again into the fascinating world of social science, let us take up the subject of anthropology—the study of man and his origins.

The origin of man was indeed a vexing question until the Frenchman, Jean-Louis Sigafoos, discovered the skull and shinbone of Pithecanthropus Erectus in Java in 1891. (What Sigafoos was doing in Java is, incidentally, quite an odd little story. Sigafoos was a Parisian born and bred. By day one could always find him at a boulevard cafe, sipping Biere de Racine and ogling the girls; each night he went to a fashionable casino where he gambled heavily at roulette and jacks; in between times he worked on his stamp collection.

...the study of man and his origins...

(Well sir, one summer Sigafoos lost his entire fortune gambling at the casino, and he was seriously contemplating suicide when a ray of hope appeared in an unexpected quarter. It seems that Sigafoos, through the international stamp collectors journal, had long been in correspondence with a girl in Java, a mission-educated savage named Lotus Petal McGinnis, herself an enthusiastic stamp collector. The nature of their correspondence, though friendly, had been entirely philatelic. Now, suddenly, a new kind of letter came from Lotus Petal. She declared that although she had never laid eyes on Sigafoos, she loved him and wanted to marry him. She said she was eighteen years old, beautiful, and her father, the richest man in his tribe, would give half his fortune to the husband of her choice. Sigafoos, in his reduced circumstances, had no alternative; he sold his last few belongings and booked passage for Java.

(The first sight of his prospective bride failed to delight Sigafoos. She was, as she said, beautiful—but only by local standards. Sigafoos had serious doubts that her bright red pointed teeth and the chicken bones hanging from her ear lobes would be considered chic along the Champs Elysees.

(But sobering as was the sight of Lotus Petal, Sigafoos had an even greater disappointment coming when he met her father. The old gentleman was, as Lotus Petal had represented, the richest man in his tribe, but, unfortunately, the medium of exchange in his tribe was prune pits.

(Sigafoos took one look at the mound of prune pits which was his dowry, gnashed his teeth, and stomped off into the jungle, swearing vilely and kicking at sticks and stones and whatever else lay in his path. Stomping thus, swearing thus, kicking thus, Sigafoos kicked over a heap of old bones which—what do you know!—turned out to be the skull and shin of Pithecanthropus Erectus.)

But I digress... From the brutish Pithecanthropus, man evolved slowly upward, growing more intelligent and resourceful. By the Middle Paleolithic period man had invented the leash, which was a remarkable technical achievement, but frankly not terribly useful until the Mesolithic period when man invented the dog.

In the Neolithic period came far and away the most important development in the history of mankind—the discovery of agriculture. Why is this so important, you ask? Because, good friends, without agriculture there would be no tobacco, and without tobacco there would be no Philip Morris, and without Philip Morris you would be without the gentlest, mildest, sunniest, pleasiest, happiest smoke that money can buy, and I would be without a job.

That's why.

©Max Shulman, 1956

To their Neolithic ancestors, the makers of Philip Morris extend a grateful salute. And so will you when you try today's new gentle Philip Morris in today's new pack of red, white and gold.

## Bill Thrall Coaches Without Payment

When swimming was okayed as a varsity sport at Kansas State this month, Bill Thrall became the third Wildcat varsity coach to coach for the fun of it.

Thrall is full-time physical education instructor at K-State and will handle duties as swimming coach without pay. In similar positions are Karl Finney, agricultural specialist who coaches Wildcat tennis; and Frank Thompson, physical education professor, who coaches gymnastics.

## Former Wildcat Footballer Dead

George W. Maddox, captain and tackle on K-State's 1934 Big Six champion football team and an All American that year, died March 14 in Lubbock, Texas, according to word received here.

Maddox, 44, had been ill for some time. He was buried March 16 at Greenville, Texas.

The former K-State grid hero is survived by his wife, the former Jane Kahl of Topeka and a 1935-graduate in industrial journalism, and one son Mike.

Maddox lived in Topeka a number of years prior to World War II. During the war he was awarded a battlefield commission in Germany while with the 3d Infantry Division. He was discharged with the rank of captain.

# Horse Sense Key for Athletics Director—Mullins

By DICK HOLDREN

Horse sense is all that is needed to do a good job as a director of athletics, according to Laurence A. (Moon) Mullins, K-State athletics director, who is leaving to take over a similar position at Marquette after April 1.

"There's nothing difficult about being a director of athletics, providing a guy shows up for work and does a day's work while he's there," Moon said.

Moon took over the K-State post in February 1951, replacing Thurlio McCrady, and his appointment was a complete surprise to him.

K-State was looking for a football coach to replace Ralph Graham. Moon, who was head coach at St. Ambrose college in Daven-

port, Iowa, had been contacted about the job and came to Manhattan for an interview.

"I came to town one day to see about the coaching job and left the next day as athletic director. I was very surprised as I had no thought of an athletic directorship. I understand that President McCain recommended me to the athletic council. I felt very lucky to have the chance to step up in the field of athletics," he said.

The suddenness of Moon's appointment prompted one of his friends to say later, "Moon, the only reason you're director is that the opposition didn't have a chance to organize."

Moon started his athletic career at Notre Dame, where he played football under the late Knute Rockne. After graduating in 1931, he was a backfield coach at KU. From there he went to St. Benedicts at Atchison, Kan., where he was director of athletics and coached football, basketball and baseball.

Next he went south to Loyola of the South at New Orleans, where he was director of athletics and football coach, and from there went to the University of Florida as assistant football coach.

He was called into the Navy in World War II and served as physical and military training director of the intermediate training command at Corpus Christi, Texas, and director of athletics at Iowa Preflight.

team while Moon was there. After the war, Moon went to St. Ambrose as football coach, and was there until taking the K-State job.

Moon says he has learned at least one important thing about

athletics from each of his jobs. At KU, Phog Allen taught him never to let up when you had your opponent on the run. "If we were playing handball and Phog had me down 19-6 he would try just as hard to beat me 21-6. You've got to bear down harder when you've got the other guy on the run."

"The Benedictine monks at St. Benedicts taught me the value of simplicity," he said. "No one is outstanding unless he is blessed with the virtue of simplicity."

"At Loyola of the South I learned that you don't have to win, provided you try to do things right. We had mediocre seasons there but I had as much fun and satisfaction there as I have had anyplace."

"Most people will have consideration for a coach unless they feel that he is cutting a few corners and throwing a few curves. That type of coach must win and fortunately there aren't too many of them," he said.

"The great need for small colleges was taught me at St. Ambrose. Many students who can't adjust to the bigness of some large schools need a certain amount of personal attention. A small college performs a fine service for the country by providing this," he said.

In Moon's five years at K-State the most important lesson he has learned has been that "if you hang in long and tough enough, fate will sooner or later direct good things your way."

"I found that administrators are constantly confronted with the conflicting opinions of the outspoken minority and the true majority. The great majority of the people want the highest ideals to prevail in intercollegiate athletics. This is especially true of K-State people," Moon said.

"The dignity of athletics is almost wholly dependent upon the coaches who actually coach the boys. People depend on the coaches for their information. The administration is up against it if the individual coach doesn't possess the desire to do what is right, despite anything," he said.

Moon applies these principles to K-State athletics. "I feel that any coach at K-State has a lifetime job if he leads a good life in the community and if he will always put winning secondary to what is right. There will always be enough winning, under those circumstances, to satisfy those who really have a high regard for K-State."

"You must remember that institutions with the broad influence of K-State belong to the whole state. You have to have as much consideration for the people in Podunk as for the people in Manhattan or Topeka."

Moon has had many thrills in athletics while at K-State. He ranks as his top thrills the win over KU this year in basketball and the 1951 K-State

basketball victory over Illinois. K-State defeated the Illini 91-72 as a warm-up game for the NCAA playoffs that year.

"The win at KU this year was a just reward for the high class caliber of students playing the game and to the type of men who direct the basketball activities," Moon said.

Moon's second greatest thrill came in track, watching the running of Thane Baker, K-State's Olympic sprinter. "If I was asked who I thought typified those things that go to make up the Great American Athlete, my first

thought would go to Thane. He had the humility which goes with greatness," Moon said.

Football has given Moon his share of thrills, too. "My greatest thrill was when we 'nosed out' KU 46-0 last fall. The best K-State football team was the one that beat Missouri 21-0 last fall," he said.

Moon has been associated with the rise of K-State football since he came here at the same time as Bill Meek, former Cat football coach. "The turning point in K-State football actually came when we beat Nebraska 28-0 in 1953.

From then on, everyone has had to respect our football teams."

"None of this could have been accomplished without the loyalty and devotion of trainers, equipment publicity personnel, and the ladies in the athletic cafeteria—all of whom have made major contributions to whatever success we have had."

"No one has ever been happier on a job than I have here at K-State," Moon concluded.

You'll be pleased with a Collegian want ad.

"Moon" Mullins

# Varsity-Alumni Game Will Be Saturday

When Kansas State's varsity football team squares off against Wildcat grads in the annual spring game here Saturday, the Cats' current crop will be facing one of the best alumni teams in K-State history. Included are six all-Big Seven Wildcats from the past three seasons, and 8 of the probable starting alumni hold professional football contracts. Game time is 2:00 p.m.

The grads can use this year's seniors—7 of them first-team Wildcats last fall. That leaves them only four spots to fill from graduates. They can call on Tommy O'Boyle, 1953 all-conference guard; Ron Marciniak, 1954 all-conference guard; and halfbacks Veryl (Joe) Switzer, 1953 grad who earned all-American laurels, and Corky Taylor, 1954 all-conference halfback.

"Figure the alums will have the two greatest halfbacks in Kansas State's history," said Wildcat Coach Bus Mertes. "And both men are in shape to go since they were in professional football last season."

"Now add Doug Roether, all-conference last season at fullback, and Bob Whitehead whom I rated one of the league's best last season at quarterback. See what a backfield we'll be facing?"

To go with O'Boyle and Marciniak in the line the grads have Chuck Zickefoose and Jim Rusher, tackles Ron Nery and Frank Rodman, and center Jim Furey—all from the 1955 team.

The Wildcat varsity faces the last stages of getting ready for the alumni game this week, the last round of spring drills. Mertes continues to juggle manpower in a search for replacements. Biggest headache is the hunt for linemen. "We are hurting from lack of experience at tackle and from lack of reserves at guard," the K-State coach said. "We have 'old reliables' at guard in Ellis Rainsberger and Rudy Bletscher, but we don't have reserves with experience. At tackle we don't even have those first-stringers with experience."

The Wildcat coach is expected to use varied combinations of sophomore talent Saturday as he gives promising candidates a chance to prove themselves in game action. Most of the new faces are likely to appear in the line. Starting varsity backfield is an all-lettermen one with quarterback Dick Corbin, 6-0, 170-pound sophomore from Stafford; halfbacks Kenny Nesmith, 5-11, 185-pound junior from Manhattan, and Jerry Hayes, 5-5, 165-pound junior from Eldorado; and fullback Ralph Pfeifer, 6-0, 190-pound sophomore from Hays. Pfeifer lettered at halfback last season when he was leading Wildcat scorer, but has been shifted to fullback for next season.

Admission for the varsity-alumni game will be \$1 for adults and 50 cents for high and grade school students. Activity tickets will admit college students.

KANSAS STATE grid coach Bus Mertes readies an all-Kansas backfield for use in Saturday's spring game with Wildcat alums. Mertes stands beside fullback Dean Skaer, Augusta. Halfbacks are Jerry Hayes, left, El Dorado, and Kenny Nesmith, far right, Manhattan. Quarterback is Dick Corbin, Stafford. Ralph Pfeifer, Hays, will open in the fullback spot Saturday, but was sidelined with a minor ankle injury when this picture was made.

## Hillbillys Win IM Independent Title

The Hillbillys whipped the Hui-O-Makules 15-3 and 15-7 last night in intramural volleyball to win the independent division championship.

In the other game, Beta Theta Pi beat Sigma Phi Epsilon 15-6 and 18-16 to win the Group IV fraternity championship.

Pairings for the fraternity division semi-finals were drawn Tuesday with these results. Pi Kappa Alpha will play Delta Tau Delta at 7 tomorrow night and Beta Theta Pi will meet Sigma Chi, last year's winner, also at 7 tomorrow.

## Waltheim Captures Group Cage Title

Waltheim beat Alpha Delta 38-14 in women's intramural basketball yesterday to win first place in their division.

Northwest and Southeast, the winners of the other two divisions, will play Thursday. The winner of that game will meet Waltheim next Monday for the women's intramurals championship.

## LUCKY DROODLES! PURR-FECTLY HILARIOUS!

WHAT'S THIS? For solution see paragraph below.

"IT'S TOASTED" to taste better!

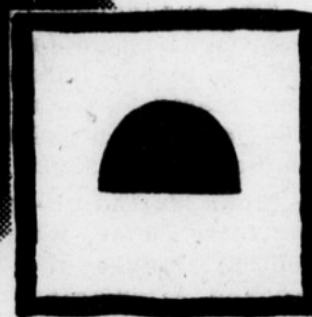

YOU'RE ON THE RIGHT TRACK when you light up a Lucky, because Luckies taste better. Only fine tobacco—naturally good-tasting tobacco that's TOASTED to taste better—can give you taste like this. All of which goes to explain the Droodle above: Light-up time in caboose, as seen by halted motorist. Switch to Luckies yourself. You'll say they're the best-tasting cigarette you ever smoked.

# Alpha Xi Deltas Elect; KDs, Phi Kaps Pledge

## Officers

New officers of Alpha Xi Delta are Jean Cox, BMT Jr, membership chairman; Phyllis Burdorf, EEd Soph, assistant treasurer.

Joyce Brodrick, Hst Jr, chaplain; Twila Irvine, EEd Jr, marshal; Pat Stover, BAA Soph, mistress of the robes; and Sheila Dickson, BMT Jr, historian.

## Pledges

Second degree pledging was held at the Kappa Delta house for Dixie Roberts, HEA Soph; Rhonda Johnson, DIM Soph; Judy Williams, HEJ Soph.

Peggy Tillotson, HEJ Soph; Helen English, BAA Fr; Linda Carlson, Clo Fr; Sally Smith, BMT Soph.

Nyla Arents, EEd Soph; Ester Edwards, HDA Soph; Barbara Duncan, Eng Soph; Peggy Missimer, HEJ Fr.

Sondra Cool, HE Fr; Sue Green, HEA Fr; Carol Stephenson, Chm Fr; Beverly Miller, Mus Soph.

Caroline Davis, Chm Fr; Mary Beth McCoy, HE Fr, and Mary Rose, EEd Fr.

New pledges at Phi Kappa are Gregory Vitt, Dan Whitmore, and Francis Hageman.

## Initiation

The following have been initiated into Phi Kappa fraternity: Pete Wimsatt, Conrad Nelke, Martin Klotzbach.

Glen Obrien, Walter Douthit,

Roger Day, Jerry Farrell.

Yacil Sullens, Pat Schmiedeler, and Pete Dimond.

## Party

An hour dance was held at Northwest hall last Tuesday night with the Sig Eps and ATOs.

## Dinners

Alpha Xi Delta and Farm House held an exchange dinner Tuesday.

Dinner guests at the Alpha Delta Pi house Sunday were Dean and Mrs. Weaver, and Mrs. Jane Prier, Waltheim housemother.

## Pinning

Chocolates at the Alpha Delta Phi house and cigars at the Sigma Nu house announced the pinning of Margaret Hill, Sp Soph, and Ron Coryell, Geo Soph. Margaret is from Topeka and Ron is from Junction City.

## Engagements

Roses at Van Zile hall on March 18 announced the approaching marriage of Caroline Wahl, HET Sr from Gocham, and Donald C. Peterson, '55 TA graduate from Clifton.

Peterson is a lieutenant in the Air Force, stationed at Malden, Missouri.

The wedding will be at Danforth chapel on April 27.

## Badeker-Day

Marge Badeker, Clo Jr, passed roses, at Northwest hall to announce her approaching marriage to Gerry Day, VM Sr. Marge is from Overland Park. Gerry is from Emporia.

## Missimer-Eis

Peggy Missimer, HEJ Fr from Abilene, announced her engagement to Cpl. Lauren Eis, also of Abilene. Cpl. Eis is stationed at Camp Pendleton, Calif. Peggy is a member of Kappa Delta sorority.

## Fooshee-McGhee

Shirley Fooshee, EEd Fr, Northwest hall announced her engagement to Gary McGhee, Colony.

## Wedding

Ann Robinson and Loren Tregellas were married at the Methodist church in Soldier. Loren is a member of Delta Sigma Phi. Both are from Topeka and plan to reside there.

# Joan King Tours NY

"This will be my first experience at real travel. I'm looking forward to this trip as an educational experience and for the pure enjoyment," said Joan King, SED Jr. Joan is one of the students leaving March 29 for the YM-YWCA sponsored UN Seminar trip in New York City.

The bus will arrive at Washington, D.C., where the group will spend four days. Easter Sunday, Joan said she plans to see the annual children's Easter egg rolling on the White House lawn.

While in Washington, the students will tour the nation's capitol. "I feel going to Washington first will give me a little better insight on the workings of our own government and perhaps through that we can gain a better understanding of our place in the UN," Joan said.

The bus will leave Washington, April 4 and travel through Phil-

adelphia en route to New York City.

Joan considers New York and the UN Seminar the most important part of the trip. She will be allowed personal interviews with representatives from India, Yugoslavia, and France. "While talking with these people won't let me see the situations as they exist in these countries, we can perhaps gather a better insight through their representatives," Joan said.

"I have never been too enthusiastic about the UN because I have never really understood its objective. On this trip I hope to gain a better understanding of the UN and its goals," she stated.

Sightseeing tours of the city will be on the agenda and Joan said, "We're planning to spend our evenings visiting Radio City and Broadway."

April 8, the students return to Manhattan.

## Three Receive Science Fellowships

For the first time in history, three students from Kansas State college have received fellowships from the National Science Foundation, S. E. Whitcomb, head of the physics department announced. Each will receive more than \$1,800.

Raimo Bakis, Pys Gr, Warren Sommeier, Pys Sr, and Gary B. Rogers, ChE Sr, were the winners, out of 13 K-Staters who took a science examination recently, Whitcomb said.

Ronald Dee Parks, Pys Sr, Richard K. Fry, Pys Jr, and Donald Lenhart, EE Sr, were among the students receiving honorable mention.

NORTH AMERICAN HAS BUILT MORE AIRPLANES THAN ANY OTHER COMPANY IN THE WORLD

engineers, scientists, physicists, mathematicians...

## CAN YOU THINK BEYOND MACH 2?

Designing Airborne Vehicles of the Future traveling at speeds so great that thin air becomes a blazing, solid wall... is the challenge that North American offers to aeronautical engineers and to specialists in most other sciences.

Join North American's engineering operations at Los Angeles. Here's where the F-100 SUPER

SABRE — holder of the world's first supersonic speed record — was designed and built. Share the knowledge and experience that has led to North American's supersonic supremacy. Be a part of a compact team of top engineers and scientists. Work on the most advanced projects right from the start. Enjoy personal rewards and recognition from challenging assignments.

See your Placement Office for an appointment with the North American Representative, or Write: Bill Nance, Dept. 56COL, Engineering Personnel Office, North American Aviation, Inc., Los Angeles 45, Calif.

# 'Carmen Coed' Set For Hospitality Day

"Carmen Coed," the winning Y-Orpheum skit by Alpha Delta Pi, will be presented at the general assembly April 21 for high school girls attending Hospitality Day.

Dean Doretta S. Hoffman will welcome the girls by speaking on the Hospitality Day theme, "Home Economics Campaigns for Better Living."

## Students Should Sign Cards for English Pro

All students assigned to English Proficiency this semester should report to their dean's offices by March 21-29, Prof. Nellie Aberle, chairman of the examinations committee, said.

The students should sign record cards for the examination to be given on April 5, from 7:00 to 10:00 p.m. in Eisenhower hall.

A student is not eligible to take the examination if he has not a record card, Prof. Aberle said.

## Plan Kansas State Promotion Lectures

Students interested in promoting Kansas State at their high schools may do so by contacting Dr. S. E. Whitcomb, head of the physics department.

Dr. Whitcomb has given lectures to high schools and grade schools on "Physics as a Science" and would be happy to speak to any school in this area.

You'll be pleased with a Collegian want ad.

## COLLEGIAN CLASSIFIEDS

### FOR SALE

FOR SALE—1953 Ford V-8, Custom-line, radio and heater, overdrive. Mechanically perfect. 311 N. Campus Courts. Phone 69055 evenings. 103-109

FOR SALE: Trailer House—33 ft. Spartan Royal Mansion, 1950 model. Perfect condition inside and out. See at 316 North Campus Courts. 106-110

FOR SALE: Large general stamp collection, three albums, stock book, covers and miscellaneous. Would make nice addition to dealers stock. Will sell or trade for anything I can use of equal value. A. R. Helfferick, 1121 Ratone. Phone 83120. Evenings or Sunday. 106-110

Snow white home laundry. Satisfaction guaranteed. Pick up and delivery. Phone 8-3624. 106-116

### FOR RENT

TYPEWRITERS: Standard and Portable, all makes. Free delivery and pick up at your convenience. Rent may be applied toward purchase. REPAIR all makes. Ph. 85551. Crane and Co., 722 N. 4th. tr

We rent refrigerators, washers, sewing machines, cleaners, waxers. Westinghouse and Thor products. Gulbranson pianos, musical instruments and supplies. SALISBURY'S in Aggieville. tr

Manhattan Costume House rents costumes for Y-Orpheum, theatricals and fancy dress parties, with 2,000 selections. Appointments must be made in advance by phoning 82030. tr

### LOST

LOST: Horn rim glasses in Student Union. Please return, c/o CPO Box 952. 107-109

### HELP WANTED

HELP WANTED: Female, experienced in fountain work. Six days, 3 p.m.-11 p.m. Work weekends. Dairy Ann, Aggieville. 107-109

## Short Courses In Ag Attract 22 Countries

One hundred seven students representing 22 foreign countries attended Kansas State college during 1955 for special short courses in agriculture.

According to William F. Pickett, K-State liaison officer for foreign agricultural affairs, each of these persons were on the campus on an average of 27 days each.

The countries represented were Argentina, Australia, Bolivia, Brazil, China, El Salvador, Germany, Haiti, India, Iran, Israel, Japan, Korea, Lebanon, Norway, Pakistan, The Philippines, Spain, Sweden, Thailand, Turkey, and Yugoslavia.

Pickett added that 34 foreign students from 10 countries were regularly enrolled at the College either for the spring or fall semesters.

These students came from Cyprus, El Salvador, Ethiopia, Haiti, India, Iran, Pakistan, The Philippines, Thailand, and Turkey.

The Chippewas and Potawatomis each have 42 treaties with the United States.

Collegian ads pay.

## World News Briefs

# Kefauver Scores Upset In Minnesota Primary

Minneapolis, Minn., (U.P.)—Sen. Estes Kefauver scored a stunning upset victory over Adlai E. Stevenson in the Minnesota Presidential primary and jubilantly claimed today that the political tide has turned in his favor.

A flood of votes upset Stevenson in a state where analysts said he had to score a decisive victory to remain the front-runner for the Democratic Presidential nomination.

Stevenson backers, including almost all the top Democratic-farmer-labor leaders in Minnesota, said they would go over yesterday's primary returns precinct by precinct to see whether Republicans had crossed party lines to vote for Kefauver.

Gov. Orville Freeman, who had feared this might happen, said the results show "a movement en masse of the Republicans into the Democratic primary."

With 2,683 of the state's 3,806 precincts counted, Kefauver had

197,935 votes to Stevenson's 155,322.

## RUSSIA REVOLT SUBSIDING

Moscow (U.P.)—The Soviet Union's peaceful but powerful fourth revolution appeared today to be subsiding into a dogged campaign to erase Stalinism even if it takes 10 years, and it may.

Soviet leaders estimate it will take something like a decade to carry out the intensive educational plan to remove the last vestiges of Stalinism from the public consciousness. They are determined to see it through.

This is a purposeful, cautious, and skillfully-directed revolt from the top to the bottom and the leaders are content from the campaign to move slowly now.

Graduates in

Engineering  
Physics  
Mathematics

interested  
in  
Missile  
Systems  
research  
and development

*The technology of guided missiles is literally a new domain. No field*

*of engineering or science offers greater scope for creative achievement.*

**Research and development at Lockheed Missile Systems Division** cover virtually every field of engineering and science and have created new positions for graduates possessing outstanding ability in the following fields:

**Electronics**  
Research and development as applied to missile systems and associated equipment.

**Computers**  
For solution of complex problems and missile guidance.

**Systems Engineering**  
Research and development in missile systems.

**Antenna Design**  
Related to missile guidance.

**Communications**  
In the broad area of information transmission.

**Electromechanical Design**  
As applied to missile systems and related equipment.

**Instrumentation**  
Associated with aerodynamics, physics and electronics.

**Physics**  
Theoretical and experimental aero-physics, upper atmosphere research, optics, nuclear physics and spectroscopy.

**Structures**  
Structural design and analysis of missile systems.

**Thermodynamics**  
Aerodynamic heating and heat-transfer problems.

**Aerodynamics**  
Concerning performance of missile systems.

**Dynamics**  
As related to missile body flight problems.

**Operations Research**  
Applied to tactical weapons operations.

## Advanced Study Program

Graduates in Physics, Electrical, Aeronautical and Mechanical Engineering are invited to contact their Placement Officer regarding the Advanced Study Program which enables students to obtain their M.S. Degree while employed in their chosen field.

The complexity of missile systems research and development has created a number of positions for those completing their M.S. and Ph.D. degrees. The positions carry immediate responsibility commensurate with the advanced academic training and experience required.

Representatives of the Research and Engineering staff will be on campus

**Friday, March 23**

You are invited to consult your Placement Officer for an appointment.
